第五章：杀王焦点

原书第80—120页 · CH5-1—CH5-434 · v2 · 2026-10-16

英文校订稿	中文初译稿
CH5-1 · 原书80页 **5 Focal-points**	CH5-1 · 原书80页 **第五章 杀王焦点**
CH5-2 · 原书80页 The series of examples examined in the chapter on mating patterns has given us a good idea of the difficulties a defender encounters when his forces (especially the pawns in front of his castled king) are poorly placed and when the attacker's one aim is to fill the various 'holes and cracks' in the weakened enemy defences with his own pieces and thus obtain an even tighter grip. It follows from this that the squares in the immediate vicinity of the king, where the drama of the mating attack usually reaches its climax, play a special role. If the attacker threatens mate or actually mates on these squares, they are mating focal-points, but if he only harries the king from them or uses them as points from which to break into the castled position, they are called strategic or auxiliary focal-points. It may be that there is more than one mating focal-point, and in that case we speak of compound focal-points. If there are many focal-points (both mating and strategic) on squares of the same colour, we speak of a network of weak squares.	CH5-2 · 原书80页 上一章关于将杀模式的一系列例子，已经让我们充分认识到：当防守方的子力，尤其是王城前的兵，位置不佳，而进攻方一心用自己的棋子填入对方防线中的各种“孔洞与裂缝”，不断加强控制时，防守方会遇到怎样的困难。因此，紧邻王的那些格子具有特殊作用；杀王的战斗通常就在这里达到高潮。如果进攻方威胁在这些格子上将杀，或者实际在这里将杀，它们就是将杀焦点；如果进攻方只是从这里骚扰王，或以此为突破王城的据点，它们就称为战略焦点或辅助焦点。有时将杀焦点不止一个，我们便称之为复合焦点。如果同一颜色的格子上存在许多焦点，无论是将杀焦点还是战略焦点，我们便称之为弱格网络。
CH5-3 · 原书80页 Generally speaking, every focal-point is a weak square in the defender's territory and a potentially strong one for the attacker. In addition to the focal-points there are also other squares in the castling area which have a specific function, e.g. blocked squares, particularly those occupied by the defender's pawns, and also any weak squares on which the attacker can safely post his pieces.	CH5-3 · 原书80页 一般而言，每一个焦点都是防守方阵地中的弱格，对进攻方则可能成为强格。王城区域中除焦点外，还有一些格子具有特定作用，例如被堵住的格子，尤其是防守方的兵占据的格子；还有一些弱格，进攻方可以安全地把棋子安置在那里。

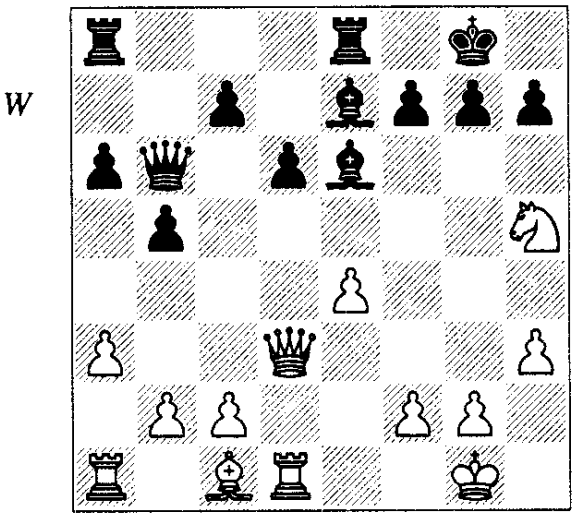

英文校订稿	中文初译稿
CH5-4 · 原书80页 As an illustration of this, take the following position (which we have already seen earlier). Here we have the following scheme:	CH5-4 · 原书80页 以下局面前面已经出现过，我们用它来说明上述概念。各格的作用如下：

AA-p080-fig01 · 原书80页

CH5-5 · 原书81页 Mating squares: g8 and f8; mating focal-points: h7 and h8; auxiliary focal-point: h7 (after Black parries mate by ...Be7); attacker's strong squares: f7, g6 and h7; blocked squares: g7 and later e7.	CH5-5 · 原书81页 将杀格：g8、f8； 将杀焦点：h7、h8； 辅助焦点：h7（黑方用...Be7应对将杀威胁之后）； 进攻方的强格：f7、g6、h7； 被堵住的格子：g7，以及稍后的e7。
CH5-6 · 原书81页 **The focal-point at g7**	CH5-6 · 原书81页 **g7焦点**
CH5-7 · 原书81页 As usual, when referring to specific squares we assume that White is the attacker. It is understood that if Black is the attacker, then the discussion applies equally to the square g2.	CH5-7 · 原书81页 和往常一样，讨论具体格子时，我们假定白方是进攻方。如果黑方发动进攻，下文的讨论同样适用于g2格。
CH5-8 · 原书81页 The most important focal-points where castling kingside is concerned are g7 and h7, since these squares are more accessible to the attacker than the others in the castling area. Of the two, h7 is the more frequent object of attack (since it comes under fire from the bishop operating from d3, a natural point of development, while the king's knight can reach g5, for example, more easily than f5 or h5). However, attacks against g7 are the more dangerous. The reasons for this are very simple: the queen can mate more easily from g7 than h7 (owing to the king's ability to flee to f8), but as well as this, a weakness on g7 usually brings with it two more on f6 and h6, while one on h7 generally only entails a single extra one at g6. Every player of any experience is well acquainted with this fact and knows that ...g6 involves a greater weakening than ...h6. On the other hand, h7 is usually harder to defend than g7, which the king's bishop can support in two ways (from f8 or f6).	CH5-8 · 原书81页 对短易位的王来说，最重要的焦点是g7和h7，因为进攻方比起王城区域中的其他格子，更容易接近这两格。其中，h7更常成为攻击目标：象从自然的出子位置d3便能攻击h7，而王翼马也更容易跳到g5，而不是f5或h5。不过，对g7的攻击更危险。原因很简单：后在g7比在h7更容易将杀，因为面对h7的后，王可能逃到f8；此外，g7的弱点通常还伴随着f6和h6两个弱点，而h7的弱点一般只会额外带来g6一个弱点。稍有经验的棋手都熟悉这一点，知道...g6对局面的削弱比...h6更大。另一方面，h7通常比g7更难防守；黑格象可以从f8或f6两个位置保护g7。

英文校订稿	中文初译稿
CH5-9 · 原书81页 The next position illustrates a typical example of an action against the square g7:	CH5-9 · 原书81页 下一局面是针对g7格展开行动的典型例子：

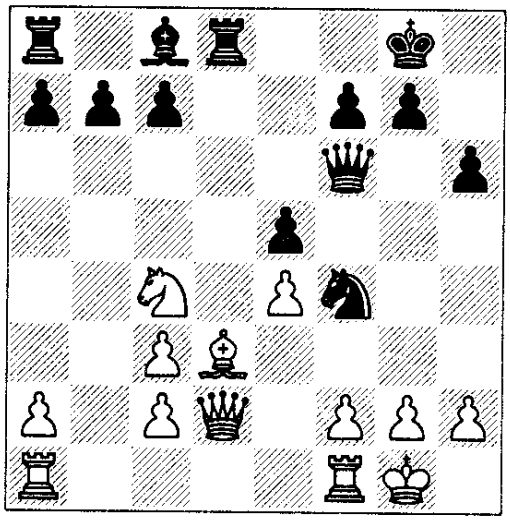

AA-p081-fig01 · 原书81页

CH5-10 · 原书82页 White, to play, has excellent prospects for an attack on g7. His knight is already observing the square, while his queen and bishop are in a position to threaten it in one move. An extremely useful point is the fact that the queen has the choice of attacking from either c3 or g3. Nevertheless, the situation is not quite as simple as that, and White must be prepared to sacrifice his bishop on h6 if he is to obtain a winning position; by simply playing 1. Qg3, White would only gain a relatively small advantage, e.g. 1... g6 2. Bg5 Qc5 3. Nf6+ Bxf6 4. Bxf6, when Black can counter with 4... h6 followed by ...Kh7. Only 1. Bh6! guarantees complete success; the main reason why it is better to move the bishop rather than the queen is that in order to attack g7 the bishop has only the one move to h6, whereas the queen has a choice between c3 and g3. Thus the bishop enters the fray first, while the queen waits to see which will be better, depending on Black's reply. Thus:	CH5-10 · 原书82页 轮到白方走，攻击g7的前景极佳。白马已经盯住这格，后和象也都只需一步就能对它构成威胁。一个非常有利的条件是：后可以选择从c3或g3发动攻击。不过，事情并没有这么简单；白方要取得胜势，必须准备在h6弃象。仅走1. Qg3，只能得到比较小的优势，例如1... g6 2. Bg5 Qc5 3. Nf6+ Bxf6 4. Bxf6，黑方可以用4... h6，接着...Kh7进行反击。只有1. Bh6!才能确保进攻完全成功。先动象而不先动后的主要原因在于：象要攻击g7，只有到h6这一种选择，而后可以选择c3或g3。因此，象先投入战斗，后则等待黑方应招之后，再判断该去哪里。具体如下：
CH5-11 · 原书82页 **1. Bh6! g6**	CH5-11 · 原书82页 **1. Bh6! g6**
CH5-12 · 原书82页 If 1... gxh6, then 2. Qc3 f6 (if 2... Bf8, then 3. Nf6+ leads to a quick conclusion) 3. Qg3+ Bg4 (otherwise the queen mates on g7) 4. Qxg4+ Kf7 5. Qg7+ Ke6 6. Nf4+ Kd7 7. Nd5 followed by 8. Nxf6+. In this variation the queen is most effective if it goes first to c3 and then to g3.	CH5-12 · 原书82页 如果1... gxh6，则2. Qc3 f6（如果2... Bf8，3. Nf6+便很快结束战斗）3. Qg3+ Bg4（否则后在g7将杀）4. Qxg4+ Kf7 5. Qg7+ Ke6 6. Nf4+ Kd7 7. Nd5，接着8. Nxf6+。在这个变化中，后先到c3，再到g3，效率最高。
CH5-13 · 原书82页 If 1... Bf8, then White plays 2. Bxg7 Bxg7 3. Qg3 Kf8 4. Qxg7+ Ke7 5. Qg5+ Kf8 6. Rd3 or 6. Nf6.	CH5-13 · 原书82页 如果1... Bf8，白方就走2. Bxg7 Bxg7 3. Qg3 Kf8 4. Qxg7+ Ke7 5. Qg5+ Kf8 6. Rd3，或6. Nf6。
CH5-14 · 原书82页 **2. Qc3 f6 3. Nxf6+** and White wins, for after 3... Bxf6 4. Qxf6 Black has no defence against mate on g7.	CH5-14 · 原书82页 **2. Qc3 f6 3. Nxf6+**，白方获胜，因为3... Bxf6 4. Qxf6之后，黑方无法防住g7的将杀。

英文校订稿	中文初译稿
CH5-15 · 原书82—83页 In order not to be unfair to Black, who tends to suffer in books such as this, here are some actual cases where White came to grief on the analogous square — g2. This position arose in the game Coria–Capablanca, Buenos Aires 1914. Black, to move, attacks g2:	CH5-15 · 原书82—83页 在这类书中，倒霉的往往是黑方。为了不偏心，下面也给出几个实战例子，看看白方怎样在对应的g2格上遭殃。图中局面出现在1914年在布宜诺斯艾利斯的科里亚对卡帕布兰卡一局。轮到黑方走，他向g2发动攻击：

英文校订稿	中文初译稿
CH5-88 · 原书88页 **The focal-point h7**	CH5-88 · 原书88页 **h7焦点**
CH5-89 · 原书88—89页 While the attacker cannot easily target g7, the square h7 is often exposed to danger even in the opening stages of a game, although attacks based on h7 as a focal-point are generally not so dangerous as those aimed at g7. This important point has already been noted, together with the reason for it, i.e. the fact that the king can escape from g8 to f8, whereas to avoid the threat of the queen on g7 the king has to travel further (to e8 or e7). Because of this, the main task involved in attacks on the focal-point g7 is the 'clearing' of that square, while the possible escape of the king is a minor worry. In attacks on h7 the 'clearing' is usually the easier task, while the attacker's main preoccupation is to stop the king escaping; this means essentially that he should have a new focal-point in view, if the attack is to be successful. In other words, the possible escape of the king turns the primary focal-point h7 into a secondary one, so that a new, real focal-point becomes necessary. It is worth keeping this important fact in mind, since in practice the majority of possible attacks on h7 founder precisely on the king's use of the simple defensive expedient of running away.	CH5-89 · 原书88—89页 进攻方不容易把矛头对准g7，但h7格往往在开局阶段就会受到威胁。尽管如此，以h7为焦点的攻击通常没有针对g7的攻击那么危险。前面已经指出这一重要区别及其原因：王可以从g8逃到f8，而要躲开g7后的威胁，就必须逃得更远，到e8或e7。因此，攻击g7焦点时，主要任务是“清除”这格上的障碍，王可能逃走则是次要顾虑。攻击h7时，“清除”往往更容易，进攻方最需要考虑的反而是阻止王逃走；也就是说，要使进攻成功，就必须预先瞄准一个新的焦点。换言之，王可能逃走，使原先的h7焦点退居次要位置，进攻方因而需要一个新的、真正起决定作用的焦点。值得牢记这一点，因为实战中许多本来可能成立的h7攻击，恰恰是由于王采用了逃跑这一简单防守手段而失败。
CH5-90 · 原书89页 These factors, which apply to most attacks on h7, are well illustrated by the following example.	CH5-90 · 原书89页 下例很好地说明了这些适用于大多数h7攻击的因素。

AA-p089-fig01 · 原书89页

CH5-91 · 原书89页 White, to move, begins with **1. Qb1!**. Black's queen has to guard the square e8, and so has only two replies:	CH5-91 · 原书89页 白方行棋，以**1. Qb1!**开始进攻。黑后必须保护e8格，因此只有两种应招：
CH5-92 · 原书89页 1) **1... Qd7 2. Re7!** (after 2. Rxe8+? Qxe8 3. Qh7+ Kf8 White's attack comes to a dead end, since the black king has e7 to escape to) **2... Qxe7** (2... Rxe7 has the same effect, while if 2... Qd8, then 3. Qh7+ followed by 4. Rxf7#) **3. Qh7+ Kf8 4. Qh8#**.	CH5-92 · 原书89页 1）**1... Qd7 2. Re7!**（2. Rxe8+? Qxe8 3. Qh7+ Kf8之后，黑王可以逃到e7，白方的进攻便走到了尽头）**2... Qxe7**（2... Rxe7的效果相同；如果2... Qd8，则3. Qh7+，接着4. Rxf7#）**3. Qh7+ Kf8 4. Qh8#**。

英文校订稿	中文初译稿
CH5-93 · 原书89页 2) **1... Qc6 2. d5 Qc8 3. Rxe8+** (this is all right now, but 3. Re7? would not do because of 3... Bxg5) **3... Qxe8 4. Qh7+ Kf8 5. d6**, and Black cannot avoid mate next move by **6. Qh8#**.	CH5-93 · 原书89页 2）**1... Qc6 2. d5 Qc8 3. Rxe8+**（现在这样走就可以了；反倒是3. Re7?不行，因为有3... Bxg5）**3... Qxe8 4. Qh7+ Kf8 5. d6**，黑方无法避免下一步**6. Qh8#**。
CH5-94 · 原书89页 White's combination, then, has two variations, and the point of each is to deprive Black's king of an escape to e7, either by blocking it or playing d6. The square h7 appears here as a secondary focal-point, while the crucial factor in the combination is the mate when the king reaches f8.	CH5-94 · 原书89页 白方的组合有两个变化，关键都是不让黑王逃到e7：或者把e7堵住，或者冲起d6控制这格。h7在这里是次要焦点，组合的决定性环节，是在黑王逃到f8后将杀。
CH5-95 · 原书90页 There is in fact such an abundance of attacks against the castled king with a real or secondary focal-point at h7, and they differ so widely, that an attempt to systematize them would take us too far afield; let us be content with a few general examples, and then deal in more detail with 'the classic bishop sacrifice on h7', which in practice is the most important kind of attack on the focal-point h7.	CH5-95 · 原书90页 以h7为主要或次要焦点的王城攻击实在太多，而且差别很大；若要把它们系统分类，就会偏离本书的讨论范围。因此，我们只看几个一般性的例子，然后再详细讨论“h7古典弃象”，这是实战中针对h7焦点最重要的攻击方式。
CH5-96 · 原书90页 This position arose in Szabo–Kotov, Groningen 1946. It is White's move, and he effects the 'clearing' of the focal-point h7 by eliminating the knight on f6:	CH5-96 · 原书90页 这一局面出现在1946年在格罗宁根的萨博对科托夫一局。白方行棋，他通过消灭f6马，完成对h7焦点的“清除”：

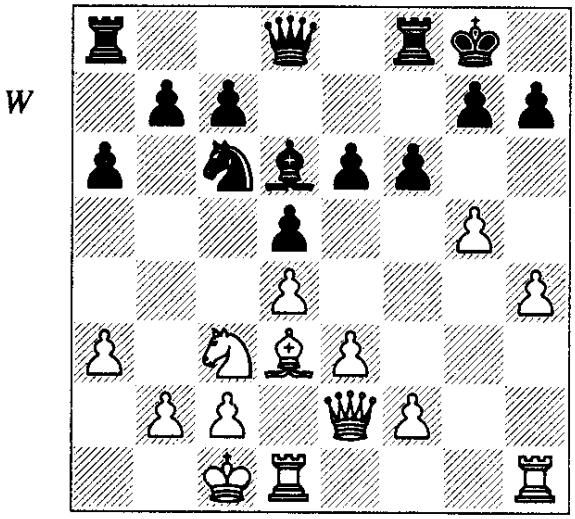

萨博（白）对科托夫（黑），白方行棋

CH5-165 · 原书95页 The reader will find further examples concerning the focal-point h7 in the next chapter, which deals with the classic bishop sacrifice. These examples provide a typical illustration of the part played by the square h7 as a mating and secondary focal-point.	CH5-165 · 原书95页 下一章讨论古典弃象，读者会在那里看到更多关于h7焦点的例子。它们典型地展示了h7格作为将杀焦点或次要焦点所起的作用。
CH5-166 · 原书95页 **The auxiliary focal-point f7**	CH5-166 · 原书95页 **辅助焦点f7**
CH5-167 · 原书95—96页 Mention has already been made of the vulnerability of the square f7 before castling, and now we shall examine the part played by an assault on that square after the king has castled. First of all, it should be remarked that the square f7 is only in exceptional cases the focal-point in the true sense, i.e. the square from which mate is effected. However, it is very often an auxiliary focal-point, which is attacked either in order to drive the king away from g8 or, by means of a sacrifice, to draw the king on to the actual square itself.	CH5-167 · 原书95—96页 前面已经讨论过易位之前f7格的脆弱性，现在来看王易位之后，攻击这格有什么作用。首先应指出，f7只有在特殊情况下才是真正的将杀焦点，也就是进攻方从这里实施将杀的格子。不过，它经常是辅助焦点：攻击f7，或者是为了把王赶离g8，或者是通过弃子把王引到f7本身。

It is possible that Lasker was riled by the touch of impudence which can be seen in Janowski's moves and of which there was even more in his behaviour as a whole.	CH5-225 · 原书100页 拉斯克在几盘对雅诺夫斯基的棋中，违背自己的原则接受弃子，结果遭遇败局。或许是雅诺夫斯基走法中那种略带挑衅的意味激怒了拉斯克；这种意味在雅诺夫斯基平日的言行中更加明显。
CH5-226 · 原书101页 **Complex focal-points**	CH5-226 · 原书101页 **复合焦点**
CH5-227 · 原书101页 Just as a successful combination derives essentially from the multiple effects of single moves, so attacks on the castled king are also more likely to succeed if they are built up with the assistance of threats against a number of different squares. We shall find that in many attacks of this kind the attacker tries to corner the king by creating a second or even a third focal-point. There have already been cases of such complex focal-points in previous examples, but we shall now examine the matter more closely.	CH5-227 · 原书101页 成功的组合，本质上往往来自一步棋的多重作用。同样，如果对王城的攻击借助了针对多个不同格子的威胁，也更容易成功。我们会发现，在许多这样的攻击中，进攻方试图通过制造第二个、甚至第三个焦点，把王逼入绝境。前面的例子中已经出现过这种复合焦点，现在进一步仔细讨论。
CH5-228 · 原书101页 We have already mentioned the part played by secondary focal-points and by the combination of this kind of focal-point with a real one. However, here we will examine only the combining of two or more real focal-points, i.e. squares from which a player either actually mates or could do so in a variation. These real complex focal-points can be divided up as follows:	CH5-228 · 原书101页 前面已经讨论过次要焦点的作用，以及它与真正将杀焦点的配合。不过，这里只讨论两个或更多真正将杀焦点的结合，也就是棋手实际在这些格子上将杀，或能在某条变化中从这里将杀。这种真正的复合焦点可以分为三类：
CH5-229 · 原书101页 1) The focal-points are adjacent squares of different colours (e.g. g7 and h7). 2) The focal-points are nearby squares of the same colour (e.g. h7 and f7). 3) The focal-points are of the same colour and make up a whole complex or network of squares (e.g. f6, g7 and h8).	CH5-229 · 原书101页 1）焦点是相邻的异色格，例如g7和h7。 2）焦点是距离较近的同色格，例如h7和f7。 3）焦点属于同一颜色，并构成一整片格子网络，例如f6、g7和h8。
CH5-230 · 原书101页 In general, one or more of the attacker's pieces control both focal-points, while the rest, in the course of the attack, transfer their influence from one focal-point to the other, preferably in the shortest time possible (i.e. one move). As far as simultaneous influence over two squares of different colours is concerned, for practical purposes only the queen comes into consideration, and in exceptional cases the rook; but if the focal-points are of the same colour, both the knight and, in particular, the bishop are effective. All the pieces are capable of transferring the attack from one focal-point to the other, though the bishop is unable to do this if the focal-points are of different colours. The bishop is, however, well suited to the case of focal-points of the same colour, while when the focal-points belong to the third group, it is indeed the classic piece by which the whole network is dominated.	CH5-230 · 原书101页 一般而言，进攻方有一个或几个棋子同时控制两个焦点，其余棋子则在进攻过程中，把作用从一个焦点转移到另一个焦点，最好只用一步完成。若要同时作用于两个异色格，实战中主要依靠后，特殊情况下也可以用车；如果焦点是同色格，马和象都能发挥作用，尤其是象。各种棋子都能把攻击从一个焦点转移到另一个，但异色焦点是象的例外。对于同色焦点，象却十分适合；在第三类局面中，象更是统治整个格子网络的典型棋子。

英文校订稿	中文初译稿
CH5-231 · 原书101—102页 When play is based on focal-points of different colours, the attack may be switched rapidly from one of the squares to the other. However, the commoner and more important cases are those in which there are two separate stages, the attack on the first focal-point being exhausted before the player transfers it decisively to the second. This transfer is often combined with a transformation of the mating pattern. An example of this is given in the following diagram (D).	CH5-231 · 原书101—102页 围绕异色焦点展开战斗时，攻击可以迅速从一个格子转向另一个。不过，更常见也更重要的情况，是攻击分为两个阶段：第一个焦点上的手段已经用尽，进攻方才决定性地转向第二个焦点。这种转移往往伴随着将杀模式的变化。下图就是一个例子。

CH5-283 · 原书106页 He is threatening to sacrifice his bishop on h6 because all the essential preconditions for such a sacrifice have been fulfilled, as will be seen from the following analysis. We shall examine those replies by Black which lead to the characteristic formation of white queen on h6 and bishop on the b1–h7 diagonal. We shall leave aside the replies 1... Qe6 and 1... f6, the first of which is bad because of 2. Bf5 and the second because of 2. Qg6.	CH5-283 · 原书106页 白方威胁在h6弃象；这种弃象所需的全部基本条件已经具备，以下分析会说明这一点。我们将讨论黑方那些会导致典型子力配置的应招：白后在h6，白象在b1—h7斜线上。暂不讨论1... Qe6和1... f6，因为前者有2. Bf5，后者有2. Qg6，都不好。

英文校订稿	中文初译稿
CH5-284 · 原书107页 First of all, the naive capture 1... Qxb4?. This is defeated by the sacrifice 2. Bxh6 gxh6 3. Qxh6, threatening mate on h7. This could be parried by 3... Re8, but Black then has to pay for the unprotected focal-point at f7 after 4. Bh7+ Kh8 5. Bg6+ Kg8 6. Qh7+ Kf8 7. Qxf7#.	CH5-284 · 原书107页 先看天真的吃兵1... Qxb4?。白方用2. Bxh6 gxh6 3. Qxh6弃象，威胁在h7将杀，就能击败这步。3... Re8可以暂时防住这个威胁，但4. Bh7+ Kh8 5. Bg6+ Kg8 6. Qh7+ Kf8 7. Qxf7#之后，黑方就要为无人保护的f7焦点付出代价。
CH5-285 · 原书107页 We have seen that the square f7 must be protected by the queen, since the rook on f8 has to move after the sacrifice, which suggests 1... Nb6 or 1... Na7. These too are answered by 2. Bxh6 gxh6 3. Qxh6, and if 3... Re8, then 4. Qh7+ and 5. Qh8#; nor is there any future in 3... f6 4. exf6 Rxf6 5. Rxe7 Rxh6 6. Rxb7.	CH5-285 · 原书107页 我们已经看到，弃象之后f8车必须移动，所以f7格必须由后保护。这提示黑方可以考虑1... Nb6或1... Na7。但白方仍应以2. Bxh6 gxh6 3. Qxh6；如果3... Re8，则4. Qh7+，接着5. Qh8#。3... f6 4. exf6 Rxf6 5. Rxe7 Rxh6 6. Rxb7也没有前途。
CH5-286 · 原书107页 Black realizes that his queen is not well placed on e7 because it blocks this escape square and thus enables White to mate with his queen on h8. Black can try to move his queen away, but in such a way that it still protects the focal-point f7: 1... Qc7 2. Bxh6 gxh6 3. Qxh6 Re8 (or 3... f6 4. exf6, with the decisive threat of 5. Re7) 4. Rac1 Qd7 5. Bh7+ Kh8 6. Bf5+ and White wins the queen.	CH5-286 · 原书107页 黑方意识到，后在e7位置不好，堵住了王的逃跑格，让白后可以在h8将杀。他可以试着移开后，同时仍保护f7焦点：1... Qc7 2. Bxh6 gxh6 3. Qxh6 Re8（或3... f6 4. exf6，威胁决定性的5. Re7）4. Rac1 Qd7 5. Bh7+ Kh8 6. Bf5+，白方得后。
CH5-287 · 原书107页 From this it can be seen that Black's queen could not even have gone to d7 on the first move.	CH5-287 · 原书107页 由此也可以看出，黑后第一步就到d7，同样不行。
CH5-288 · 原书107页 We can now cut our speculation short; there only remain 1... Re8 and 1... Rd8. That 1... Rd8 is no good can be seen after 2. Bxh6 gxh6 3. Qxh6, since then 3... Qe6 cannot be played because of 4. Qg5+.	CH5-288 · 原书107页 现在可以缩小考虑范围，只剩1... Re8和1... Rd8。2. Bxh6 gxh6 3. Qxh6就说明1... Rd8不好，因为有4. Qg5+，黑方不能再走3... Qe6。
CH5-289 · 原书107页 Thus we arrive at the main variation:	CH5-289 · 原书107页 于是我们得到主线：
CH5-290 · 原书107页 **1... Re8**	CH5-290 · 原书107页 **1... Re8**
CH5-291 · 原书107页 After this move the sacrifice of the bishop on h6 is somewhat more complicated, but it is still White's best continuation. On the other hand, 2. Bf4 is also good; less useful here (as on the first move) is 2. Qg4 because of 2... Kh8 3. Qxd4 Rd8 4. Qc3 Nb6 and Black can hold his own.	CH5-291 · 原书107页 这步之后，h6弃象稍微复杂一些，但仍是白方最佳的后续手段。2. Bf4也不错。与第一步一样，2. Qg4在这里效果较差，因为2... Kh8 3. Qxd4 Rd8 4. Qc3 Nb6，黑方能维持局面。
CH5-292 · 原书107页 **2. Bxh6 gxh6 3. Qxh6 Qe6**	CH5-292 · 原书107页 **2. Bxh6 gxh6 3. Qxh6 Qe6**
CH5-293 · 原书107—108页 This is the right reply. After 4. Bh7+ Kh8 White now gets nowhere by 5. Bg6+, while the other discovered checks fail because White's queen is attacked by Black's; furthermore, if 5. Qh5, Black has the reply 5... Kg7 6. Bf5 Qh6 with an adequate defence.	CH5-293 · 原书107—108页 正确的应招。4. Bh7+ Kh8之后，白方现在走5. Bg6+无济于事；其他闪将也不行，因为白后受到黑后的攻击。此外，如果5. Qh5，黑方有5... Kg7 6. Bf5 Qh6，可以有效防守。
CH5-294 · 原书108页 White's later play is interesting, even if it is no longer as typical of this kind of attack as the possibilities cited hitherto.	CH5-294 · 原书108页 白方接下来的走法很有趣，虽然不像前面列出的那些可能性那样，能典型地代表这种攻击。

B

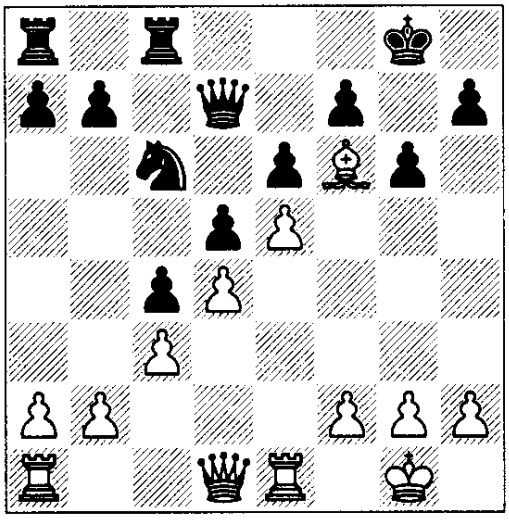

AA-p108-fig01 · 原书108页

CH5-296 · 原书108页 White's queen is now best placed where it is, on h7; further checks would only make it easier for Black to defend himself.	CH5-296 · 原书108页 白后现在留在h7最好；继续将军只会让黑方更容易防守。
CH5-297 · 原书108页 **5... Qc6**	CH5-297 · 原书108页 **5... Qc6**
CH5-298 · 原书108页 After 5... Qd5 6. Qh6+ Black cannot play 6... Kg8 due to 7. Bh7+ and 8. Be4+, while 6... Ke7 7. Be4 wins the black bishop, for 7... Qd7 is defeated by 8. e6.	CH5-298 · 原书108页 5... Qd5 6. Qh6+之后，黑方不能走6... Kg8，因为有7. Bh7+和8. Be4+；6... Ke7 7. Be4则会丢象，因为7... Qd7会被8. e6击败。
CH5-299 · 原书108页 5... Qb6 is of no use either, since 6. Rac1! leaves Black without a reasonable reply, e.g. if 6... Ne7, then 7. e6 fxe6 8. Bxe6 is quickly decisive.	CH5-299 · 原书108页 5... Qb6也没用，因为6. Rac1!之后黑方没有像样的应招。例如6... Ne7，则7. e6 fxe6 8. Bxe6，很快决定胜负。
CH5-300 · 原书108页 **6. Be4 Qb6 7. Bxb7 Qxb7 8. e6** and White wins. The threat is 9. Qh8+ Ke7 10. exf7+ and the reply 8... Nd6 fails against 9. e7+ and 10. Qh8#.	CH5-300 · 原书108页 **6. Be4 Qb6 7. Bxb7 Qxb7 8. e6**，白方获胜。威胁是9. Qh8+ Ke7 10. exf7+；8... Nd6会遭到9. e7+，接着10. Qh8#。
CH5-301 · 原书108页 This analysis shows what great power there is in the formation of queen at h6 and bishop at d3 when combined with a rook at e1 and a pawn at e5. The various operations connected with the focal-points h7 and f7 are well worth remembering, since opportunities to use them arise frequently in actual games. Since the defender must move his rook from f8 when mate is threatened at h7, it is clearly a decisive factor whether or not the focal-point f7 is protected by other pieces. An alternative defence involves ...f6 or ...f5, but the success of such a reply depends on the other features of the position, which must be carefully assessed.	CH5-301 · 原书108页 这些分析表明，h6后、d3象，配合e1车和e5兵，威力有多么强大。围绕h7和f7焦点的各种手段非常值得记住，实战中经常会出现运用它们的机会。面对h7的将杀威胁，防守方必须把车从f8移开，因此f7焦点是否有其他棋子保护，显然是决定性的因素。另一种防守是...f6或...f5，但这样的应招能否成功，取决于局面的其他特点，必须仔细评估。

英文校订稿	中文初译稿
CH5-302 · 原书108—109页 The main feature of the third group is the network of weak squares of the same colour; here the attacker's bishop is, as a rule, the piece which controls the focal-points permanently, while the others are used for manoeuvring purposes. It should be noted that control over a network of squares is also an important factor in positional play, but in attacks on the castled king it is particularly effective. The reason for this is a positional one, since control over a network is often of a fairly permanent nature. The most essential precondition is to 'clear' the network not only of the influence of the opponent's bishop (either by eliminating it or driving it away) but also of possible resistance from the opponent's pawns at important points in the network.	CH5-302 · 原书108—109页 第三类的主要特点，是同色弱格构成一个网络。通常由进攻方的象持续控制各个焦点，其他棋子则负责调动。应当指出，控制格子网络在局面棋中也是重要因素，但在攻击王城时尤其有效。其原因在于局面棋的特点：对这种网络的控制，往往能相当持久。最基本的前提，是“清除”对方象对这片网络的影响，或把它消灭，或将它赶走；同时还要消除对方兵在网络中重要格子上可能形成的抵抗。
CH5-303 · 原书109页 When the attacker has 'cleared' the network and fixed the position, the attacking operation proper follows; the squares which are candidate focal-points can easily be determined, while the other squares in the network may serve as secondary focal-points or else as strong squares for the attacker to post his pieces on.	CH5-303 · 原书109页 进攻方“清除”这片网络并固定局面之后，真正的攻击行动便随之展开。哪些格子可能成为焦点，很容易确定；网络中的其他格子，则可以充当次要焦点，或供进攻方安置棋子的强格。

B

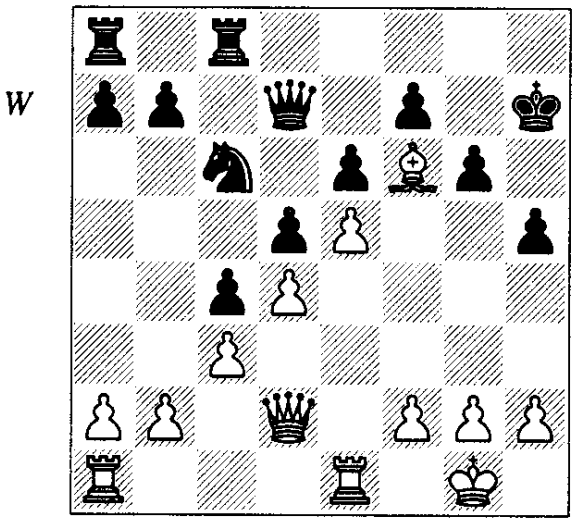

AA-p109-fig01 · 原书109页

CH5-304 · 原书109页 In the above diagram the network of dark squares is already 'cleared' and covered by White's bishop, which is firmly installed at f6. The network consists of the squares f6, g7 and h8, and also the connected squares f8 and h6. The squares g7 and h8 are candidates as focal-points, f6 is a strong square for the attacker's pieces while f8 and h6 can serve as secondary focal-points or strong squares. All this concentration of white power encircles the unfortunate black king, which has no real prospect of extricating itself from the net and escaping to the queenside, since e7 is also controlled by White. Black does not even have a dark-squared bishop to provide resistance on the network, and because of the blocked position in the centre he cannot undertake a counterattack; he is confined to defending himself. The only minor piece he has left is a knight, but this piece can in fact exercise considerable defensive influence in positions of this kind.	CH5-304 · 原书109页 上图中，黑格网络已经被“清除”，并受到牢牢驻扎在f6的白象控制。这片网络包括f6、g7、h8，以及与它们相连的f8和h6。g7和h8可能成为焦点，f6是进攻方棋子的强格，f8和h6则可作次要焦点或强格。白方集中起来的力量包围了不幸的黑王；由于e7也被白方控制，黑王实际上没有什么希望挣脱这张网、逃到后翼。黑方连一枚能在这片网络中抵抗的黑格象都没有；中心又被封闭，无法发动反击，只能防守。他唯一剩下的轻子是马，但在这种局面中，马其实能发挥相当大的防守作用。

英文校订稿	中文初译稿
CH5-305 · 原书109—110页 If White's domination is based on a dark-square network, Black still has one thing on which he can logically rely — the solid structure of his position on the light squares. In some such cases the success of an attack depends on the ability to break down resistance on the light squares by means of a sacrifice. This feature appears in the analysis of the above position, which, by virtue of its simplicity and its typical character, will well repay study.	CH5-305 · 原书109—110页 白方的控制既然建立在黑格网络之上，黑方便仍有一个可以合理依靠的条件：自己在白格上的稳固结构。在一些这样的局面中，攻击能否成功，就取决于能否通过弃子打破白格上的抵抗。上图的分析会展示这一特点；这个局面简单而典型，很值得研究。
CH5-306 · 原书110页 It is Black's move, and his first concern is to provide a defence against White's manoeuvre Qd2–h6, which threatens to bring about disaster on the focal-point g7. Various attempts at defence by Black and attacking stratagems by White, all of them typical and consequently instructive, will now be examined in a series of continuations.	CH5-306 · 原书110页 轮到黑方走，他首先要防住白方Qd2—h6的调动，否则g7焦点就会遭受灾难。下面用一系列变化讨论黑方的各种防守尝试，以及白方相应的攻击手段。这些方法都很典型，因而很有启发性。
CH5-307 · 原书110页 **A) 1... h6**	CH5-307 · 原书110页 **A) 1... h6**

CH5-338 · 原书112页 This parries the threat of 8. Bxe7, but now 8. Bg5 Nf5 9. g4 decides the game. In this variation the black king wriggled out to the edge of the network of weak dark squares, but even there he met his fate, its cause being the last square in the network, e7.	CH5-338 · 原书112页 这步防住了8. Bxe7的威胁，但现在8. Bg5 Nf5 9. g4便决定胜负。这条变化中，黑王挣扎着逃到黑格弱格网络的边缘，却仍在那里遭遇厄运；使他败亡的，是这片网络的最后一格e7。
CH5-339 · 原书112页 We shall not leave the above diagram yet, because a feature of very great practical importance should be pointed out. This is the benefit derived by White from the action of his rook on the h-file. Without an opportunity of making the manoeuvre Re3–h3, White cannot take Black's position by storm, because he lacks a threat against h7; if this does not exist, Black does not have to weaken his position, since he can easily ward off the threats against g7 alone. So even in this case, where there is a definite 'same-colour network', there is still a part to be played by alternative focal-points on squares of different colours (h7 or f7), and this applies in most practical cases. The weaknesses on the squares of the network are usually only the more sensitive ones, which does not mean that squares of the other colour will necessarily be safe — the king may succumb on them too!	CH5-339 · 原书112页 暂且还不离开前面的局面，因为有一个极具实战意义的特点必须指出：白车在h线上发挥作用，给白方带来了好处。如果没有Re3—h3的调动机会，白方就无法强攻攻破黑方阵地，因为他缺少对h7的威胁。没有这个威胁，黑方就不必削弱自己的局面，只针对g7的威胁很容易挡住。因此，即使在这样明确存在“同色格网络”的局面中，另一颜色上的备选焦点，如h7或f7，仍能发挥作用。大多数实战局面都是如此。网络中的弱格通常只是更敏感的弱点，并不意味着另一颜色的格子一定安全——王也可能在那里被将杀！

英文校订稿	中文初译稿
CH5-340 · 原书112页 We have noted the important part played by the rook on the h-file in the variations above, and we shall now go on to examine how positions of this kind can be exploited if there is no chance of employing a rook. Suppose that we move White's h-pawn from h2 to h4 in the above diagram; this gives a new situation of a type which often arises in practice, for the h-pawn is frequently advanced during the game. The pawn's being on h4 considerably blunts White's attack, and 1. h4? in the diagrammed position would be a poor move. Nevertheless, even with the pawn on h4 White has the better game, although he can only exploit his advantage slowly and Black retains chances of attacking on the queenside. Indeed, if Black's position on that side were a little further advanced, one could conclude that he would be able to preserve the balance. However, as things stand White is still the stronger, and we shall examine one continuation arising out of the new situation.	CH5-340 · 原书112页 上面的变化已经说明车在h线上的重要作用。现在来看，若暂时无法用车沿h线进攻，该怎样利用这类局面。假设把前面图中白方的h兵从h2移到h4，就得到一种实战中经常出现的新情况，因为h兵在对局中常常会冲起。兵在h4明显削弱了白方的攻势，因此原图中的1. h4?是一步坏棋。不过，即使兵在h4，白方仍然较好，只是必须慢慢发挥优势，而黑方保留着在后翼进攻的机会。如果黑方在后翼的行动再领先一些，甚至可以判断他有能力维持平衡。但在现有局面中，白方仍然更强。下面分析这种新情况下的一条变化。
CH5-341 · 原书112—113页 The modified diagram (with the pawn on h4) is given on the following page.	CH5-341 · 原书112—113页 兵移到h4后的局面见下图（原书图在下一页）。

CH5-405 · 原书117页 Some commentators have marked this move out as the decisive mistake and have suggested 14... Be6 (preventing Bc4), but this would make the win easier, e.g. 15. Bf6 Rfe8 (or 15... h5 16. Qg5 Kh7 17. d5 Bxd5 18. Bxf5) 16. Nf4! Nxd4 (precluding 17. d5; if 16... Bxf4 17. Qxf4, Black will find himself unable to defend the focal-point g7, having given up his dark-squared bishop) 17. Nh5 Nc6 18. Bc3 Be5 (18... Be7 comes to the same) 19. Nf6+ Bxf6 20. Bxf6 h5 21. Qg5 Kh7 22. Be2 and White decides the game by Bxh5.	CH5-405 · 原书117页 有些评注者把这步标为决定性的错误，并建议14... Be6，阻止Bc4。但那样白方赢得更容易，例如15. Bf6 Rfe8（或15... h5 16. Qg5 Kh7 17. d5 Bxd5 18. Bxf5）16. Nf4! Nxd4（阻止17. d5；如果16... Bxf4 17. Qxf4，黑方交出了黑格象，就会发现自己无法防守g7焦点）17. Nh5 Nc6 18. Bc3 Be5（18... Be7也一样）19. Nf6+ Bxf6 20. Bxf6 h5 21. Qg5 Kh7 22. Be2，白方用Bxh5决定胜负。

英文校订稿	中文初译稿
CH5-406 · 原书117—118页 In this analysis, as in other phases of this game, it should be noted that a method has been used which we have already seen in the variations arising from the diagram on page 109; namely, in creating threats against a dark-square network, White repeatedly makes use of sacrifices on squares of the other colour. These sacrifices fulfil the task of breaking up clusters of pawns which otherwise impede the attacker's access to the weak squares on the network itself. The linkage between the operations on the networks of different colours should be noted; on one network the intention is to keep the attacking pieces in the strongest and most permanent positions possible, while on the other they are sacrificed when the situation demands.	CH5-406 · 原书117—118页 应当注意，这段分析与本局其他阶段一样，采用了原书第109页局面的变化中已经出现过的方法：在对黑格网络制造威胁时，白方反复在另一颜色的格子上弃子。这些弃子的任务，是打散阻碍进攻方接近弱格网络的兵群。要注意，两种颜色格子上的行动彼此相连：在一种颜色上，进攻方力求让棋子占据尽可能强大、持久的位置；在另一种颜色上，则在局面需要时弃掉它们。
CH5-407 · 原书118页 It should finally be pointed out that, instead of the move played, 14... Qxb2? would have been bad because of 15. Rfb1 Qa3 16. Rb3 Qa5 17. Bf6 Re8 18. Bc4, when White's prospects for an attack are greatly improved.	CH5-407 · 原书118页 最后还应指出，如果不用实战走法，而走14... Qxb2?，也不好，因为15. Rfb1 Qa3 16. Rb3 Qa5 17. Bf6 Re8 18. Bc4，白方的进攻前景大为改善。

英文校订稿	中文初译稿
CH5-411 · 原书119页 After this move Black gains drawing chances. In such an attractive position one would expect to find a safe and clear way to victory. White here has all the necessary ingredients for success: control over a dark-square network; advantage in development; two pieces to break up the cluster on the light squares (bishop at c4 and knight at e2); and as well as all this, a pawn in the centre that prevents Black from using his e5 square as a post for his pieces!	CH5-411 · 原书119页 这步之后，黑方有了争取和棋的机会。在这样令人心动的局面中，人们会期待找到一条稳妥清楚的获胜道路。白方具备成功所需的全部条件：控制黑格网络；有出子优势；有两个棋子可以打散白格上的兵群，也就是c4象和e2马；此外，中心还有一个兵，阻止黑方把e5用作棋子的据点！
CH5-412 · 原书119页 Stronger and simpler would have been 16. Bf6!, as the following lines show:	CH5-412 · 原书119页 更强也更简单的是16. Bf6!，以下变化可以说明：
CH5-413 · 原书119页 1) 16... Be7 17. Qg5 Bxf6 18. Qxg6+.	CH5-413 · 原书119页 1) 16... Be7 17. Qg5 Bxf6 18. Qxg6+.
CH5-414 · 原书119页 2) 16... Be6 17. d5 Bxd5 18. Bxd5 Rxe2 19. Qg5 Kf8 20. Rae1!' Qb5 (or 20... Nd4 21. Qh6+ Ke8 22. Bxc6, etc.) 21. Bf3 Rxe1 22. Rxe1 Ne5 23. Qh6+ Ke8 24. Bxe5 and 25. Qh8+.	CH5-414 · 原书119页 2）16... Be6 17. d5 Bxd5 18. Bxd5 Rxe2 19. Qg5 Kf8 20. Rae1![1] Qb5（或20... Nd4 21. Qh6+ Ke8 22. Bxc6等）21. Bf3 Rxe1 22. Rxe1 Ne5 23. Qh6+ Ke8 24. Bxe5，接着25. Qh8+。
CH5-415 · 原书119页 · 纳恩编者注 [1] This move is refuted by 20... Qxf2+!! and Black forces mate himself. However, Vuković's attacking plan is basically correct, except that White has to exercise a little more care: 20. Qh6+ Ke8 21. Qg7 Nd8 22. Rae1 and now 22... Qxf2+ 23. Rxf2 Rxe1+ 24. Rf1 Bc5+ fails, because after 25. Bd4 the bishop is defended.	CH5-415 · 原书119页 · 纳恩编者注 [1] 这步会被20... Qxf2+!!反驳，反而是黑方强制将杀。不过，武科维奇的进攻计划基本正确，只是白方必须更谨慎一些：20. Qh6+ Ke8 21. Qg7 Nd8 22. Rae1。现在22... Qxf2+ 23. Rxf2 Rxe1+ 24. Rf1 Bc5+不行了，因为25. Bd4之后，白象有保护。
CH5-416 · 原书119页 3) 16... Re4 17. Qg5 Kf8 18. Nc3!, and the black rook has no good square to go to: 18... Rxd4 is inadequate because of 19. Rfe1, while 18... Rg4 is answered by 19. Qh6+ Ke8 20. Bxf7+ Kxf7 21. Qg7+ Ke8 (or 21... Ke6 22. d5#) 22. Rae1+ and mate is unavoidable.	CH5-416 · 原书119页 3）16... Re4 17. Qg5 Kf8 18. Nc3!，黑车无处可去：18... Rxd4不够，因为有19. Rfe1；18... Rg4则应以19. Qh6+ Ke8 20. Bxf7+ Kxf7 21. Qg7+ Ke8（或21... Ke6 22. d5#）22. Rae1+，将杀不可避免。
CH5-417 · 原书119页 **16... Re4 17. Nf4 Qxd4 18. Rxe4 fxe4?**	CH5-417 · 原书119页 **16... Re4 17. Nf4 Qxd4 18. Rxe4 fxe4?**
CH5-418 · 原书119页 This pawn blocks the fourth rank to White's advantage. Black should have played 18... Qxe4, when 19. Nxg6 Qxh4 20. Nxh4 leads to an ending in which White is the better placed, but Black can still salvage a draw by 20... Be6 21. Bd3 (or 21. Be2 Kg7! when 22. Bxh5 fails against 22... f6 and 23... Rh8) 21... f4 threatening both the a-pawn and 22... Kg7 followed by 23... f6.	CH5-418 · 原书119页 这个兵堵住了第四横线，对白方有利。黑方应走18... Qxe4，19. Nxg6 Qxh4 20. Nxh4之后进入白方较好的残局，但黑方仍可用20... Be6 21. Bd3（或21. Be2 Kg7!，此时22. Bxh5会遭到22... f6，接着23... Rh8）21... f4争取和棋，既威胁a兵，也威胁22... Kg7，接着23... f6。
