第九章：攻击侧翼出象与长易位的局面

原书第231—246页 · CH9-1—CH9-129 · v2 · 2026-10-16

英文校订稿	中文初译稿
CH9-1 · 原书231页 **9 The attack on the fianchettoed and queenside castling positions**	CH9-1 · 原书231页 **第九章 攻击侧翼出象王城与长易位王城**
CH9-2 · 原书231页 Up till now we have, on the whole, based our examination of the various aspects of attacking play on the ordinary kingside castling position. The fianchettoed and queenside castling positions present certain special characteristics, which affect the particular forms of attack used against these types of position.	CH9-2 · 原书231页 到目前为止，我们对进攻各个方面的考察，基本上都是以普通的短易位王城为基础。侧翼出象王城和长易位王城各有一些特殊特点，影响着针对这些局面所采用的具体攻击形式。
CH9-3 · 原书231页 **The attack on the fianchettoed king position**	CH9-3 · 原书231页 **攻击侧翼出象王城**
CH9-4 · 原书231页 The term ‘fianchetto’ (from the Italian, meaning ‘little flank’) denotes a bishop being developed on the flank (on g2, b2, g7 or b7), and if a player castles behind such a fianchetto formation, we talk of a fianchettoed king position.	CH9-4 · 原书231页 “Fianchetto”一词来自意大利语，意为“小翼侧”，指象在翼侧出子，进入g2、b2、g7或b7。如果王易位到这种阵形后方，我们便称之为侧翼出象王城。
CH9-5 · 原书231页 Castled positions of this kind have their own particular good and bad sides; these will be examined on the basis of Black's kingside fianchetto position, which occurs in the Dragon Variation of the Sicilian, and the King's Indian and Grünfeld defences.	CH9-5 · 原书231页 这种王城有其特有的优缺点。下面以黑方王翼侧出象的阵形为例加以考察；它常见于西西里防御龙式变例、古印度防御和格林菲尔德防御。
CH9-6 · 原书231页 The good aspect of the position is, above all, its considerable capacity to resist attack along the diagonal b1-h7, thanks to the pawn formation, f7, g6, and h7; nor are the squares f6 and h6 too weak, for they are covered by the bishop on g7. The bishop is also well concealed against attacks and possibilities of exchange, while in many cases the defence is assisted by its ability to cover not only the squares f6 and h6 but also the possible mating square h8. Finally, the fianchettoed position is also suited for those operations in which the g-pawn disappears, as in the following well-known manoeuvre: Black plays ...f5, and then, on White's reply exf5 he coolly continues ...gxf5, with the aim of strengthening his position in the centre. Without the bishop on g7 such play would be risky because of the opening of the g-file, but it often succeeds with the fianchettoed bishop, since the bishop defends Black's king on the g-file about as well as a pawn does.	CH9-6 · 原书231页 这种局面的优点，首先在于f7、g6、h7兵形使其很能抵抗沿b1-h7斜线的攻击；f6和h6也并不太弱，因为g7象保护着它们。象的位置隐蔽，不易遭到攻击或兑换；许多时候，它除防守f6、h6外，还能保护潜在的将杀格h8，有助于防御。最后，这种阵形也适合g兵离开原来线路的行动，例如以下熟知的调动：黑方走...f5，对白方exf5从容应以...gxf5，意在加强中央。没有g7象时，g线的打开会使这种走法很冒险；但有侧翼象时往往可行，因为象在g线上保护黑王的作用，与兵相差不多。
CH9-7 · 原书231页 The weak aspect of the fianchettoed position lies in the fact that the position of the g-pawn at g6 simplifies the attacker's task in opening up the h-file by the advance of his h-pawn; there is also a danger that the fianchettoed bishop may be exchanged either for its opposite number or some other enemy unit. Without the bishop the castled position becomes weak and vulnerable and the squares previously covered by the bishop form a typically weak network.	CH9-7 · 原书231页 侧翼出象王城的弱点在于：g兵位于g6，使进攻方更容易推进h兵打开h线；侧翼象也可能被对方同色象或其他子力换掉。没有这只象，王城就变得薄弱而易受攻击，原先由象保护的格子会形成典型的弱格网络。

英文校订稿	中文初译稿
CH9-8 · 原书232页 Naturally, an attack on the fianchettoed king position is generally directed against these weak spots, and consequently, the assault by the h-pawn and actions aimed at the exchange of the fianchettoed bishop are the principal weapons in the attack against such a position.	CH9-8 · 原书232页 对侧翼出象王城的攻击，自然通常指向这些弱点。因此，h兵的冲击以及旨在换掉侧翼象的行动，便成为攻击这种局面的主要武器。
CH9-9 · 原书232页 First, we shall give simple examples of two typical operations: namely, the elimination of the fianchettoed bishop and the breaking up of the pawn structure in front of it.	CH9-9 · 原书232页 先看两种典型行动的简单例子：消灭侧翼象，以及破坏它前面的兵形。

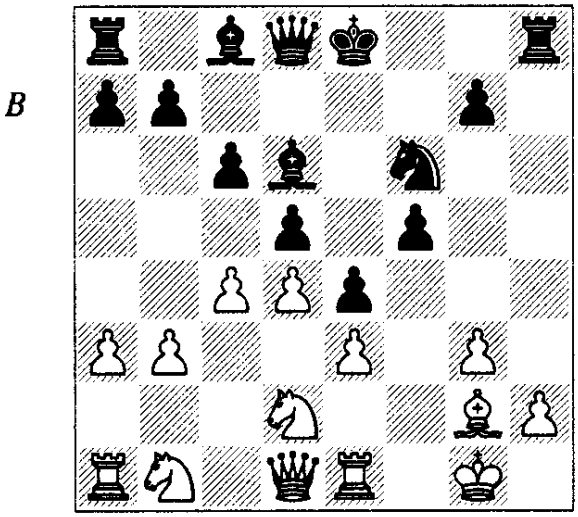

里希特—阿布拉马维丘斯，汉堡，1930年，白先。

AA-p232-fig01 · 原书232页

CH9-10 · 原书232页 The first position is from the game Richter-Abramavicius, Hamburg 1930. It is White's move, and he sacrifices both his rooks for the fianchettoed bishop in order to be able to conclude the game by an attack on the weakened dark-square network.	CH9-10 · 原书232页 第一个局面来自里希特—阿布拉马维丘斯，汉堡，1930年。白先，他用双车换取侧翼象，以便攻击削弱后的黑格网络，结束棋局。
CH9-11 · 原书232页 **1. Rh8+ Bxh8 2. Rxh8+ Kxh8 3. Qh1+ Nh7 4. Nf6 Kg7**	CH9-11 · 原书232页 **1. Rh8+ Bxh8 2. Rxh8+ Kxh8 3. Qh1+ Nh7 4. Nf6 Kg7**
CH9-12 · 原书232页 Or 4... Qxf6 5. gxf6 Bxd3 6. Qh6 Rxc2+ 7. Kd1 Rg8 8. Ng5 and mates.	CH9-12 · 原书232页 或4...Qxf6 5. gxf6 Bxd3 6. Qh6 Rxc2+ 7. Kd1 Rg8 8. Ng5，接着将杀。
CH9-13 · 原书232页 **5. Qh6+ 1-0**	CH9-13 · 原书232页 **5. Qh6+ 1-0**

英文校订稿	中文初译稿
CH9-14 · 原书232页 The following position occurred in the game Szilagyi-Szabo, Budapest 1946. Black, to move, broke up the pawn chain h2-g3 by a sacrifice and proceeded to decide the game on a network of squares of the opposite colour to that of the fianchettoed bishop.	CH9-14 · 原书232页 下图局面出现在西拉吉—萨博，布达佩斯，1946年。黑先，以弃子破坏h2-g3兵链，继而在与侧翼象异色的格子网络上决定胜负。

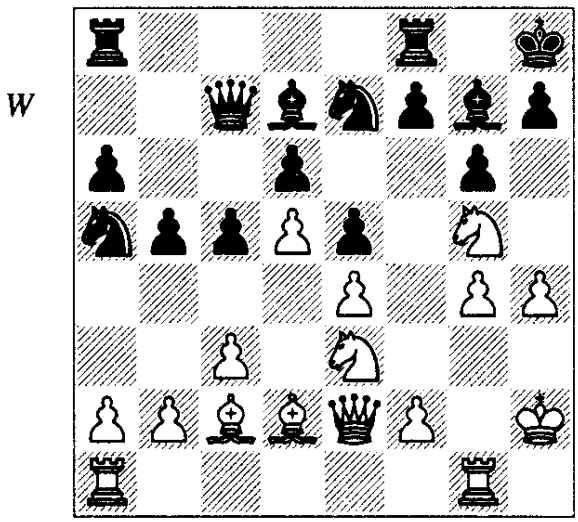

西拉吉—萨博，布达佩斯，1946年，黑先。

AA-p233-fig01 · 原书233页

CH9-15 · 原书232页 **1... Rxh2! 2. Kxh2 Ng4+ 3. Kg1 Bxg3 4. Re2**	CH9-15 · 原书232页 **1... Rxh2! 2. Kxh2 Ng4+ 3. Kg1 Bxg3 4. Re2**
CH9-16 · 原书232页 White loses, whatever the continuation, because of his weakness on the corresponding focal-points h2 and f2. Mate can be postponed only by a severe ‘letting of blood’. After 4. Nf3 exf3 5. Bxf3 Qh4 6. Re2 Bf2+ 7. Kf1 Nh2+ 8. Kg2 Qg3+ 9. Kh1 Qxf3+ Black still mates with 10... Qg3+ and 11... Qh3#.	CH9-16 · 原书232页 h2与f2这对对应焦点太弱，白方无论如何应对都要输，只有大出血才能推迟被将杀。4. Nf3 exf3 5. Bxf3 Qh4 6. Re2 Bf2+ 7. Kf1 Nh2+ 8. Kg2 Qg3+ 9. Kh1 Qxf3+之后，黑方仍将10... Qg3+再11... Qh3#。
CH9-17 · 原书233页 **4... Qh4 5. Nf1 Bf2+ 6. Rxf2 Qxf2+ 7. Kh1 Qh2 0-1**	CH9-17 · 原书233页 **4... Qh4 5. Nf1 Bf2+ 6. Rxf2 Qxf2+ 7. Kh1 Qh2 0-1**
CH9-18 · 原书233页 For White loses either his rook or his queen.	CH9-18 · 原书233页 因为白方非丢车即丢后。

英文校订稿	中文初译稿
CH9-19 · 原书233页 Where there is a fianchettoed king position there is naturally no opportunity to sacrifice the bishop on h7; moreover, many other forms of sacrifice, typical enough in the case of normal castling, are out of the question against the specific structure of the fianchetto. A form of sacrifice which can be designated as characteristic in the case of a fianchettoed king position is that of the knight on f5. An example of such a sacrifice is provided by the next diagram.	CH9-19 · 原书233页 面对侧翼出象王城，自然没有h7弃象的机会；而且，许多在普通王城中很典型的弃子，也不适用于这种特殊结构。可以说，f5弃马才是针对侧翼出象王城的一种特色弃子。下图就是一例。

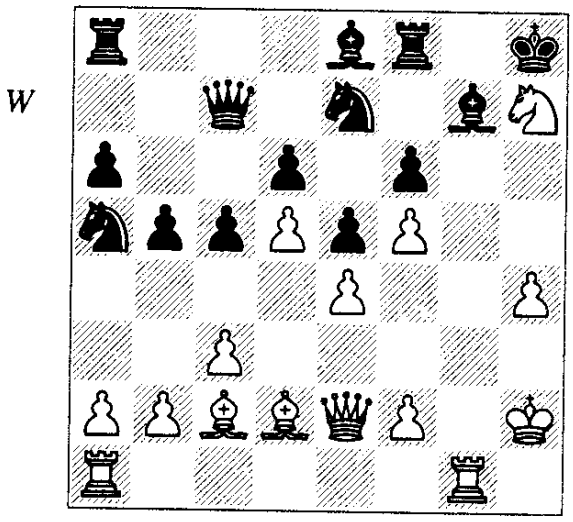

亚历山大—帕赫曼，希尔弗瑟姆，1947年，白先。

AA-p233-fig02 · 原书233页

CH9-20 · 原书233页 This position arose in the game Alexander-Pachman, Hilversum 1947. Against Black's fianchettoed king position White has a knight aggressively placed at g5, a ‘little avalanche’ of pawns on g4 and h4, a rook on g1 and his queen covering some useful squares. Nevertheless, to ‘unlock’ Black's solid position a sacrifice is necessary.	CH9-20 · 原书233页 此局面来自亚历山大—帕赫曼，希尔弗瑟姆，1947年。面对黑方侧翼出象王城，白方有进逼g5的马、g4和h4组成的“小型兵雪崩”、g1车，以及控制若干重要格子的后。尽管如此，要“解锁”黑方坚固的局面，仍须弃子。
CH9-21 · 原书234页 **1. Nf5!**	CH9-21 · 原书234页 **1. Nf5!**
CH9-22 · 原书234页 Given the favourable supporting conditions, this typical ‘anti-fianchetto’ sacrifice is absolutely correct. From f5 the knight controls the squares g7 and h6 and has the intention, above all else, of eliminating the fianchettoed bishop. If Black does not accept the sacrifice but plays, for example, 1... Rae8, White continues 2. Nxg7 and then 3. f4 with good prospects, while if 1... Bf6, then 2. Nh6. The acceptance of the sacrifice leads at once to a critical situation for Black as the reply gxf5 leads to a very dangerous attack, while the f5-square is well covered, and consequently there is no danger of Black making a counter-sacrifice on it.	CH9-22 · 原书234页 支援条件有利，这种典型的“反侧翼象”弃子完全正确。马在f5控制g7和h6，首要目的是消灭侧翼象。若黑方不接受弃子，例如1... Rae8，白方2. Nxg7再3. f4，前景很好；若1... Bf6，则2. Nh6。接受弃子会立即使黑方陷入危局，因为gxf5后的进攻十分危险，而f5格又得到充分保护，黑方无法通过在此反弃子解围。
CH9-23 · 原书234页 **1... gxf5 2. gxf5**	CH9-23 · 原书234页 **1... gxf5 2. gxf5**

英文校订稿	中文初译稿
CH9-24 · 原书234页 In positions of a similar nature one is often faced with the question whether it is better to take on f5 with the g-pawn or the e-pawn. The answer depends on the various characteristics of the position; one takes with the g-pawn, if the opening of the g-file or the diagonal d1-h5 brings with it a decisive advantage, while in playing exf5 one takes into account other possible advantages, namely, freeing the square e4 (on which a knight, for example, can take up a strong position) or opening the b1-h7 diagonal for the bishop, or perhaps to keep in reserve the continuation g5. In this particular case the g-pawn is obviously indicated, since there is an immediate threat of Qh5.	CH9-24 · 原书234页 类似局面中，经常要判断在f5用g兵还是e兵吃回更好。答案取决于局面的各种特点：如果打开g线或d1-h5斜线能带来决定性优势，就用g兵；而exf5则考虑其他潜在好处，即腾出e4格，例如让马占据强位，或为象打开b1-h7斜线，或保留g5的可能性。本例显然应使用g兵，因为立即威胁Qh5。
CH9-25 · 原书234页 **2...f6**	CH9-25 · 原书234页 **2...f6**
CH9-26 · 原书234页 If 2... h6, then 3. Qh5, threatening 4. Nxf7+ as well as 4. f6. If 2... Ng8, Black does not get as far as consolidating by ...Nf6 because of 3. Nxh7 Kxh7 4. Rxg7+ Kxg7 5. Rg1+.	CH9-26 · 原书234页 若2... h6，则3. Qh5，同时威胁4. Nxf7+和4. f6。若2... Ng8，黑方来不及用...Nf6巩固，因为3. Nxh7 Kxh7 4. Rxg7+ Kxg7 5. Rg1+。
CH9-27 · 原书234页 **3. Nxh7 Be8** (D)	CH9-27 · 原书234页 **3. Nxh7 Be8**（见图）

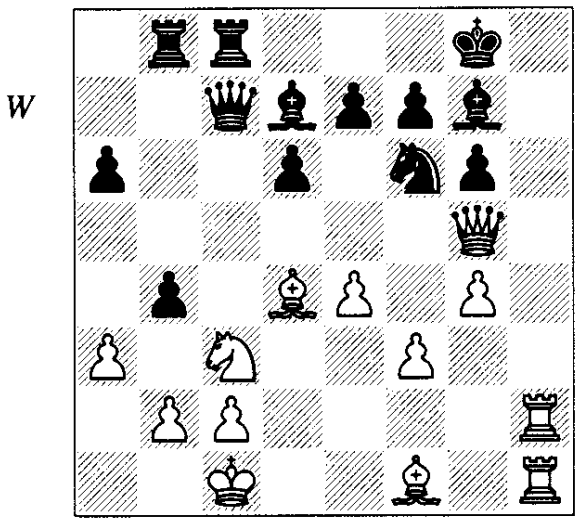

亚历山大—帕赫曼，3... Be8之后，白先。

AA-p234-fig01 · 原书234页

CH9-28 · 原书234页 The only defence as the queen must not be allowed to reach h5.	CH9-28 · 原书234页 唯一的防御，必须阻止白后进入h5。
CH9-29 · 原书234页 **4. Rxg7!**	CH9-29 · 原书234页 **4. Rxg7!**
CH9-30 · 原书235页 The fianchettoed bishop's head has to roll!	CH9-30 · 原书235页 侧翼象必须被斩除！
CH9-31 · 原书235页 **4... Kxg7 5. Nxf8 Kxf8 6. Bh6+**	CH9-31 · 原书235页 **4... Kxg7 5. Nxf8 Kxf8 6. Bh6+**

英文校订稿	中文初译稿
CH9-32 · 原书235页 When the fianchettoed bishop vanishes from the board, its opposite number usually becomes extremely powerful.	CH9-32 · 原书235页 侧翼象一旦离开棋盘，对方的同色象通常就会变得极其强大。
CH9-33 · 原书235页 **6... Kf7 7. Qh5+ Ng6**	CH9-33 · 原书235页 **6... Kf7 7. Qh5+ Ng6**
CH9-34 · 原书235页 If 7... Kg8, then 8. Rg1+ Ng6 9. Rxg6+ Bxg6 10. Qxg6+ Kh8 11. Qxf6+ Kh7 12. Qg6+ Kh8 and either 13. f6 or 13. Bg5.	CH9-34 · 原书235页 若7... Kg8，则8. Rg1+ Ng6 9. Rxg6+ Bxg6 10. Qxg6+ Kh8 11. Qxf6+ Kh7 12. Qg6+ Kh8，再13. f6或13. Bg5。
CH9-35 · 原书235页 **8. fxg6+ Kg8 9. Qf5** and White won in a few moves.	CH9-35 · 原书235页 **8. fxg6+ Kg8 9. Qf5**，白方数步后获胜。
CH9-36 · 原书235页 The importance of removing the fianchettoed bishop at the correct moment in this kind of attack is shown by the next position, one which I reached in an analysis of the Dragon Variation of the Sicilian in my book, Contemporary Opening Theory.	CH9-36 · 原书235页 下一局面说明，这类进攻中把握时机消灭侧翼象多么重要。它来自我在《当代开局理论》中对西西里防御龙式变例的分析。

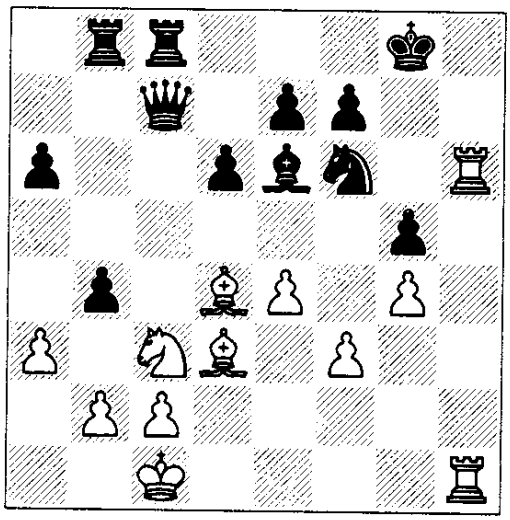

AA-p235-fig01 · 原书235页

CH9-37 · 原书235页 In my book I examined 1. Qh4, following it up by 1... bxc3 2. Qh8+ Bxh8 3. Rxh8+ Kg7 4. R1h7#.	CH9-37 · 原书235页 我在书中研究了1. Qh4，接1... bxc3 2. Qh8+ Bxh8 3. Rxh8+ Kg7 4. R1h7#。
CH9-38 · 原书235页 However, fianchettoed king positions of this kind (with the defensive bishop, the knight on f6, and a pawn on e7) offer a great deal of resistance. Consequently, in spite of the thunder on the h-file, Black can answer 1. Qh4 with 1... Nh5! 2. Bxg7 bxa3! 3. Qg5 (if 3. gxh5, then 3... Kxg7, while if 3. Bd4, then 3... axb2+ 4. Kb1 Qa5) 3... axb2+ 4. Kb1 Kxg7 [note 1], and now if 5. Rxh5, then 5... Ba2+ 6. Kxa2 b1=Q+, while if 5. gxh5, then 5... Qxc3 is in Black's favour.	CH9-38 · 原书235页 不过，具有防守象、f6马和e7兵的这种侧翼出象王城，抵抗力相当强。因此，尽管h线攻声震天，黑方仍可对1. Qh4应1... Nh5! 2. Bxg7 bxa3! 3. Qg5（若3. gxh5，则3... Kxg7；若3. Bd4，则3... axb2+ 4. Kb1 Qa5）3... axb2+ 4. Kb1 Kxg7【注1】；现在若5. Rxh5，则5... Ba2+ 6. Kxa2 b1=Q+；若5. gxh5，则5... Qxc3黑优。
CH9-39 · 原书235页 · 纳恩编者注 [Nunn's note 1] In this line 4... Qxc3! is immediately decisive, since 5. Bxc3 Ba2+ leads to mate.	CH9-39 · 原书235页 · 纳恩编者注 【纳恩注1】这一变化中，4... Qxc3!立即决定胜负，因为5. Bxc3 Ba2+导致将杀。

英文校订稿	中文初译稿
CH9-48 · 原书236页 **The attack on the queenside castled position**	CH9-48 · 原书236页 **攻击长易位王城**
CH9-49 · 原书236页 Before discussing the attack on the queenside castled position, one should first of all examine the differences between this type of castling and kingside castling. Some writers in the past have supposed that the difference is considerable and that castling long 'is much weaker than castling short'; this is a great exaggeration. The castled position after long or queenside castling differs from the short castled position only in this respect, that the positions of the king and rook are both a square nearer the centre of the board. This can be useful for the rook, but it usually presents difficulties to the king, which is safer on g1 than c1. Reckoning in terms of tempi, the following picture sums up the differences: the position on the queenside which would correspond symmetrically to the one given by short castling (king on g1 and rook on f1) is king on b1 and rook on c1, and to reach such a position after castling long would require two tempi. But let us now apply a different method of calculation: the player has castled on the kingside and then spends one tempo on the move Re1. The corresponding position to this on the queenside would be king on b1 and rook on d1, and for this only one move is needed after castling long. The conclusion to be drawn from this is simple — whenever the rook is well placed on the d-file, castling long is fundamentally as good as castling short; if the rook is in fact needed on the c-file it is weaker by two tempi, while if the rook is needed on a third square it is weaker by only one tempo.	CH9-49 · 原书236页 讨论如何攻击长易位王城之前，先应考察长、短易位的差别。过去有些作者认为差别很大，声称长易位"远弱于短易位"，这大大夸张了。长易位后的王城与短易位王城，区别仅在于王和车都更靠近中央一格。对车来说这可能有利，对王却通常带来困难，因为王在g1比在c1更安全。从步数来计算，可以这样概括两者的差别：与短易位后王在g1、车在f1对称的后翼局面，是王在b1、车在c1；长易位后要达到这个局面，需要再走两步。不过换一种算法：一方短易位后，再花一步Re1；与之对应的后翼局面应是王在b1、车在d1，而长易位后只须一步就能达到。结论很简单：只要车在d线位置理想，长易位基本上就与短易位一样好；若确实需要车在c线，则差两步；若需要车到其他格子，则只差一步。
CH9-50 · 原书237页 In practice castling queenside usually occurs when the rook is well placed on the d-file, and indeed the need for it to be placed there is often the prime reason for adopting long castling. When reckoned in these terms, the practical difference between long and short castling disappears or becomes insignificant. There is yet another difference between the two forms of castling, but it is secondary and concerns the activity of the queen. However, here too the advantages and disadvantages tend to cancel each other out. Thus one can say that castling on the queenside is almost equal in status to castling on the kingside in general terms of tempo and security. If there are still players who doubt the security of castling on the queenside, it might be suggested that their reasons for this are probably of a subjective, rather than an objective, nature. That is to say, many players remember some bad experiences which they have had with castling long and are not aware of a very common mistake, one which is repeated over and over again: they accept the tempo gained on the d-file by castling long as a gift, without wanting to pay the price for it; they neglect the consolidating move Kb1, and then, when their opponent suddenly sweeps down, it is already too late and there is no time left. The results, of course, are blamed on queenside castling.	CH9-50 · 原书237页 实战中，通常正是在车位于d线合适时才采用长易位；把车放到那里，往往就是选择长易位的首要原因。这样计算，长、短易位的实际差别便消失，或变得微不足道。两者还有一个关于后活跃性的次要差别，不过其利弊也往往相互抵消。因此，从一般的时间与安全性来看，长易位几乎与短易位地位相等。如果仍有棋手怀疑长易位的安全性，那原因很可能是主观的。他们记得自己长易位时的一些惨痛经历，却没有认识到一个一再重犯的常见错误：把长易位在d线上节省的一步当作无偿礼物，不肯付出应有代价；忽视巩固王城的Kb1，等对手突然扑来，才发现已经太迟，没有时间了。结果当然都归咎于长易位。

英文校订稿	中文初译稿
CH9-51 · 原书237页 In master chess castling on the kingside predominates, but this is not the result of some fundamental weakness of castling long; the reasons are of another, structural, kind. Castling on the queenside requires the development of three pieces, while in the case of castling short only two need be moved to clear the back rank. Another important point is that in order to castle on the queenside the queen has to be moved first, and the best moment for doing this in many openings occurs rather later, as moving the queen at an early stage of the game can turn out to be a loss of a tempo. This is an important reason for the comparative rarity of castling on the queenside, and the trend is given further impetus by the structure of modern openings, the majority of which are directed towards a struggle over the central squares. In this the c-pawn plays an important part both in covering the d-pawn and in effecting a lateral attack; this delays the queen's development on the one hand, and also slightly weakens the queenside on the other, consequently reducing the circumstances which favour castling long.	CH9-51 · 原书237页 大师对局中短易位占多数，但并不是因为长易位有什么根本缺陷，而是出于结构方面的原因。长易位须先使三枚棋子出动，短易位则只须移动两枚棋子腾出底线。另一个要点是，长易位前必须先动后，而许多开局中动后的最佳时机来得较晚，因为过早出后可能损失一步。这是长易位较少见的重要原因；现代开局的结构又进一步强化了这一趋势，因为大多数开局都围绕中央格的争夺展开。c兵在其中既保护d兵，又从侧面进攻，作用很大；这既推迟了后的出动，也略微削弱后翼，因此减少了适合长易位的情形。
CH9-52 · 原书238页 There are quite a few situations in the openings when castling on the queenside can be usefully applied, and in some cases one can say that it in fact represents the best solution to the basic problem of building up the position. We shall now list the main factors which would usually endorse the choice of long castling in a game:	CH9-52 · 原书238页 开局中有不少局面适合长易位；有时可以说，它正是解决布局基本问题的最佳办法。通常支持选择长易位的主要因素如下：
CH9-53 · 原书238页 1) The pawn position on the kingside has already been weakened, while that on the queenside is sound; this may incline the player towards castling long. (If castling on the kingside is quite impossible or is obstructed, then naturally there is no choice at all.)	CH9-53 · 原书238页 1）王翼兵形已经削弱，而后翼兵形完好，这可能使棋手倾向长易位。（如果短易位完全不可能，或受到阻碍，那自然就根本无从选择。）
CH9-54 · 原书238页 2) The opponent's forces (pieces or pawns, or both) are favourably placed for an attack on the short castled position, but unfavourably for one on the long castled position.	CH9-54 · 原书238页 2）对方的力量，无论是棋子、兵还是两者，位置适合攻击短易位王城，却不适合攻击长易位王城。
CH9-55 · 原书238页 3) The kingside is not sufficiently developed, while on the queenside the back rank is already clear. If this is the case when the situation demands castling as soon as possible, then castling takes place on the queenside.	CH9-55 · 原书238页 3）王翼出子尚不充分，而后翼底线已经腾空。如果局势要求尽快易位，此时就选择长易位。
CH9-56 · 原书238页 4) One's opponent has castled on the kingside, and the weaknesses in his castled position can only be properly exploited by means of an assault by one or more pawns. If in such a case castling on the queenside is readily available and there are no other factors militating against it, one castles long rather than short. An assault by the h-pawn with the aim of opening up the h-file for the rook is often the answer to a fianchettoed king position, and in this case too castling on the queenside is indicated.	CH9-56 · 原书238页 4）对手已经短易位，其王城弱点只有通过一个或多个兵的冲击才能充分利用。如果此时己方可以方便地长易位，又没有其他不利因素，就应选择长易位。面对侧翼出象王城，常常需要推进h兵、为车打开h线，此时也适宜长易位。
CH9-57 · 原书238页 5) A rapid deployment of the rook on the d-file gains an important tempo or some other advantage, and in such a case castling long can afford an excellent solution.	CH9-57 · 原书238页 5）迅速将车部署到d线，可以赢得重要的一步或取得其他优势；此时长易位是极好的解决办法。

英文校订稿	中文初译稿
CH9-58 · 原书238页 The factors listed here are only intended as general hints for the player, and the particular characteristics of the actual position should be surveyed each time one makes a choice between castling moves. Black, particularly, should be careful if he intends to castle on the queenside, since experience has shown that the necessary conditions for long castling more often arise for White than for Black. When Black's long castling coincides with short castling by White one gets a case of opposite-side castled positions; this leads to an intensification of the game, which naturally favours the better developed side, and this in the majority of cases is White.	CH9-58 · 原书238页 这些因素只是一般提示；每次选择易位方向，都应考察实际局面的具体特点。黑方打算长易位时尤其要谨慎，因为经验表明，长易位所需的条件在白方局面中出现得更多。黑方长易位、白方短易位，就形成异向易位，使战斗更加激烈；这自然有利于出子较好的一方，而多数情况下是白方。
CH9-59 · 原书239页 However, caution over deciding to castle on the queenside should not be overdone, since many cases arise where castling long is indicated but where the player does not do so because a prejudice about its risk deters him. Here is an example of unprejudiced castling on the queenside from the game Keres-Reshevsky, World Championship Tournament, The Hague/Moscow 1948:	CH9-59 · 原书239页 不过，决定长易位时也不应过分谨慎，因为许多局面本来适合长易位，棋手却被认为它风险很大的偏见吓退。以下是抛开偏见采用长易位的例子，来自凯列斯—列舍夫斯基，世界冠军赛，海牙／莫斯科，1948年：

凯列斯—列舍夫斯基，海牙／莫斯科，1948年，黑先。

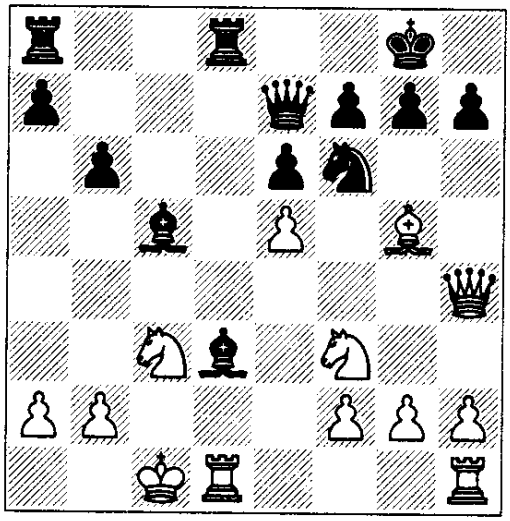

AA-p239-fig01 · 原书239页

CH9-60 · 原书239页 Black is to move; his position is apparently inferior, since he is threatened not only by Nxd5 but also Nxb5. Besides this, he has not yet castled, so that he is faced with a double task: to discover a reply to White's threats and also make the time to castle. Here is how Reshevsky solved the problem:	CH9-60 · 原书239页 黑先；局面看起来较差，因为白方既威胁Nxd5，又威胁Nxb5。此外，黑方尚未易位，因此面临双重任务：既要应付白方威胁，又要腾出时间易位。列舍夫斯基这样解决问题：
CH9-61 · 原书239页 **1... g5 2. Bg3 Qb7!**	CH9-61 · 原书239页 **1... g5 2. Bg3 Qb7!**
CH9-62 · 原书239页 Black has already shown by 1... g5 that he does not intend to castle on the kingside, and now he gives up his pawn on d5 in order to use castling long to obtain an important tempo and gain control over the central squares d4 and d5 (2... Ne7 would be weak because of 3. Nxb5).	CH9-62 · 原书239页 1... g5已经表明黑方不打算短易位；现在他舍弃d5兵，以便借长易位赢得重要的一步，并控制中央的d4和d5格（2... Ne7因3. Nxb5而较弱）。

英文校订稿	中文初译稿
CH9-63 · 原书239页 **3. Nxd5 O-O-O!**	CH9-63 · 原书239页 **3. Nxd5 O-O-O!**
CH9-64 · 原书239页 Black's castling on the queenside in the Open Variation of the Ruy Lopez (which was how this game began) qualifies as a curiosity, and many masters shook their heads when they saw what Reshevsky had done. In this case it was correct to overcome the prejudice about the unsuitability of castling long in the Ruy Lopez, for here this very move provides a happy solution to the problem: it gives Black the time he needs and consolidates his king position better than short castling would. It should also be noticed that the weaknesses at a6 and b5 are not particularly marked, since White does not possess the move a4 which would properly probe them. Another point is that castling long has lent power to Black's g-pawn; its advance to g4 is important in the struggle for the square d4.	CH9-64 · 原书239页 本局从西班牙开局开放变例开始，黑方在这种开局中长易位可谓奇闻，许多大师看到列舍夫斯基这样走，都摇头不已。但这里抛开“西班牙开局不适合长易位”的偏见是正确的，因为这步恰好圆满解决了问题：既给黑方所需的时间，又比短易位更好地巩固王的位置。还应注意，a6和b5的弱点并不突出，因为白方无法用a4充分攻击它们。此外，长易位还增强了黑方g兵的力量；其推进到g4，对争夺d4格十分重要。
CH9-65 · 原书239页 **4. Nf6**	CH9-65 · 原书239页 **4. Nf6**
CH9-66 · 原书240页 The knight here is ‘attacking empty squares,’ but 4. Nc3 would have been no better. The most important point is that White cannot play 4. c4 to support the knight on d5, since it would be answered by 4... g4 5. Nh4 (or 5. Ne1 Nd4 6. Qd3 Bf5) 5... Nd4 6. Qd3, after which either 6... c6 or 6... Bxd5 is in Black's favour.	CH9-66 · 原书240页 这匹马在这里“攻击空格”，但4. Nc3也不会更好。最关键的是，白方不能4. c4支持d5马，因为4... g4 5. Nh4（或5. Ne1 Nd4 6. Qd3 Bf5）5... Nd4 6. Qd3之后，6... c6或6... Bxd5都对黑方有利。
CH9-67 · 原书240页 **4... g4 5. Ne1 Nd4 6. Qf1**	CH9-67 · 原书240页 **4... g4 5. Ne1 Nd4 6. Qf1**
CH9-68 · 原书240页 If 6. Qe4, then 6... Qa7!, threatening 7... Bf5.	CH9-68 · 原书240页 若6. Qe4，则6... Qa7!，威胁7... Bf5。
CH9-69 · 原书240页 **6...h5**	CH9-69 · 原书240页 **6...h5**
CH9-70 · 原书240页 The rest of the game is not of interest to us here; Black's active piece play serves as sufficient compensation for the pawn, there is no question of his castled position being in danger, and it is really White who is in difficulties. In the end White did in fact lose the game after making some rather weak moves.	CH9-70 · 原书240页 本局余下过程与这里的讨论无关；黑方子力活跃，足以补偿少兵，王城完全没有危险，真正困难的是白方。最后白方又下了几步较弱的棋，果然输掉了对局。

英文校订稿	中文初译稿
CH9-71 · 原书240页 Our further consideration of the attack on the long castled position will be confined to those features which are specific to queenside castling. This means, in the main, that we need only consider positions where the king is still on c1, since if it has already retired to b1 a position has arisen which corresponds symmetrically to that after castling kingside.	CH9-71 · 原书240页 接下来对长易位王城攻击的考察，只限于长易位独有的特点。主要就是说，只须研究王仍在c1的局面；王若已经退到b1，局面就与短易位王城形成对称对应。

B

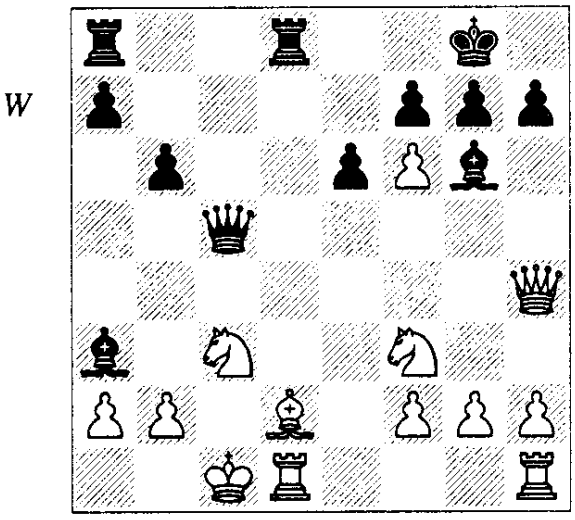

拉比诺维奇—罗曼诺夫斯基，莫斯科，1925年，黑先。

AA-p240-fig01 · 原书240页

CH9-72 · 原书240页 This position is taken from the game Rabinovich-Romanovsky, Moscow 1925. Black, to move, has no way of preventing exf6 and in desperation plays for a counterattack on the enemy king based on the pattern of Boden's Mate (see p.76).	CH9-72 · 原书240页 这个局面来自拉比诺维奇—罗曼诺夫斯基，莫斯科，1925年。黑先，无法阻止exf6，只得孤注一掷，依据博登杀王模式（见第76页）反击敌王。
CH9-73 · 原书240页 **1... Ba3! 2. exf6?**	CH9-73 · 原书240页 **1... Ba3! 2. exf6?**
CH9-74 · 原书240页 White, who has in fact the better of the game, here takes the wrong path and spends a tempo on ‘burying the corpse on f6’ instead of using it to consolidate his threatened king position, e.g. 2. Rxd3! Rxd3 3. Kb1! and if 3... Qc5, then 4. Na4 and finally 5. exf6, etc.	CH9-74 · 原书240页 白方本来占优，却在这里走错了路，花一步“埋葬f6上的尸体”，没有用它巩固受到威胁的王城。例如应2. Rxd3! Rxd3 3. Kb1!，若3... Qc5，则4. Na4，最后才5. exf6，等等。
CH9-75 · 原书240页 **2... Qc5 3. Bd2?**	CH9-75 · 原书240页 **2... Qc5 3. Bd2?**
CH9-76 · 原书241页 After this second mistake Black has a winning position. White should have played 3. Rxd3 Rxd3 4. Kb1! and if 4... Bxb2, then 5. Na4, or if 4... Rxc3, then 5. bxc3!, when Black can probably draw but cannot achieve more.	CH9-76 · 原书241页 第二次犯错之后，黑方已成胜势。白方应3. Rxd3 Rxd3 4. Kb1!；若4... Bxb2，则5. Na4；若4... Rxc3，则5. bxc3!。黑方大概可以和棋，但无法取得更多。

拉斯克—马歇尔，19... Nb6之后，白先。

AA-p244-fig02 · 原书244页

CH9-118 · 原书244页 Now that the black king has moved from c8 to b8, the distinctive character of the queenside castling position no longer exists and the situation is merely a replica of a type of attack used against the short castled position.	CH9-118 · 原书244页 黑王从c8走到b8之后，长易位王城的独有特点已经消失，局面只是某种攻击短易位王城的翻版。
CH9-119 · 原书244页 An important advantage for the attacker in this position is his ability to bring a rook into action quickly (Rd3-b3), since without this Black could defend himself by ...Nc8 and then ...Bd7.	CH9-119 · 原书244页 这里进攻方的一个重要有利条件，是能迅速以Rd3-b3将车投入战斗；否则，黑方便可...Nc8再...Bd7防守。
CH9-120 · 原书245页 **20. Rd3 Qg5+**	CH9-120 · 原书245页 20. Rd3 Qg5+

英文校订稿	中文初译稿

CH9-121 · 原书245页

This move simplifies White's task somewhat. However, Black could not have saved himself even by 20... Nc4 which contains the transparent trap 21. Rb3? Qg5+ 22. Kb1 Nd2+. At the time Lasker had reckoned on defeating 20... Nc4 in the following manner (and this has found its way into the commentaries): 21. Re1? (in order to be able to meet 21... Qg5+ with 22. Re3) 21... Rd6 22. Nxd6 Qxd6 23. Rb3+ Nb6 24. a4 Bc8 25. Re8 Qd7 26. Qb5 Qxb5 27. Rxb5 Kb7? 28. a5 Bd7 29. Rxf8 Rxf8 30. Rb4 and White goes on to capture the knight, after which he is a pawn up in the ending. Let us disregard any doubts about this ending, for Black has a stronger continuation than 27... Kb7, namely 27... Bg7 28. Rxh8 Bxh8; then White must play 29. a5 (otherwise the knight remains alive on b6) whereupon the main line runs 29... Bxd4 30. axb6 c6 31. Rb3 Bxf2 32. b7 (if White allows ...Kb7, then the position is still more favourable for Black) 32... Be6 33. Kd2 c5! 34. Ke2 c4 35. Ra3 Bd4, and it is clearly White rather than Black who has to struggle for a draw. It is interesting to see how the original characteristic of the position (the inability of the knight on h4 to move) again emerges as the decisive factor as soon as the attack on the castled position peters out. Not even the best players are immune from such misfortunes!

CH9-121 · 原书245页

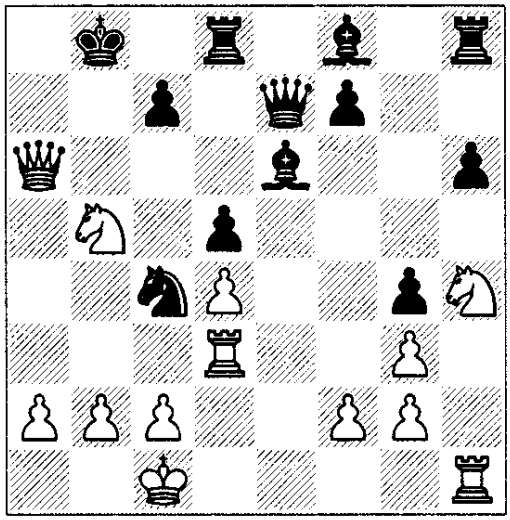

这步使白方的任务略为简单。不过黑方即使走20... Nc4，也无法自救，其中有一个明显的陷阱：21. Rb3? Qg5+ 22. Kb1 Nd2+。当时拉斯克打算用以下方式击败20... Nc4，这个变化也被收入评注：21. Re1?（准备对21... Qg5+应22. Re3）21... Rd6 22. Nxd6 Qxd6 23. Rb3+ Nb6 24. a4 Bc8 25. Re8 Qd7 26. Qb5 Qxb5 27. Rxb5 Kb7? 28. a5 Bd7 29. Rxf8 Rxf8 30. Rb4，随后白方吃马，进入多一兵的残局。姑且不谈这个残局是否可靠，黑方就有比27... Kb7更强的27... Bg7 28. Rxh8 Bxh8；白方于是必须29. a5（否则b6马不会丢），接着主要变化为29... Bxd4 30. axb6 c6 31. Rb3 Bxf2 32. b7（若允许...Kb7，局面对黑方还更有利）32... Be6 33. Kd2 c5! 34. Ke2 c4 35. Ra3 Bd4，显然是白方而非黑方必须为和棋苦战。有趣的是，一旦对王城的进攻消退，局面原有的特点——h4马无法行动——又成为决定性因素。即使最优秀的棋手，也无法免于这样的失算！

CH9-122 · 原书245页

This game, which was the decisive one in Lasker's victory at St. Petersburg, cannot be left to go on sleeping in the archives of chess history with an inaccurate commentary. Good games should not be allowed to go to their rest without good annotations as their lullabies! Therefore, we must show how in fact White does win after 20... Nc4 (D).

CH9-122 · 原书245页

这盘棋对拉斯克在圣彼得堡夺冠具有决定性意义，不能让它带着不准确的评注，继续沉睡在棋史档案中。好棋要安眠，也该有好评注作摇篮曲！因此，必须说明20...Nc4之后白方究竟怎样取胜（见图）。

拉斯克—马歇尔，分析变化20... Nc4之后，白先。

AA-p245-fig01 · 原书245页

CH9-123 · 原书245页

So that there will be no doubt about it, we shall supply two winning moves, both of them instructive as far as carrying out an attack in this kind of position is concerned.

CH9-123 · 原书245页

为消除疑问，我们给出两种取胜着法；对于如何在这类局面中展开进攻，两者都很有启发。

英文校订稿	中文初译稿
CH9-124 · 原书246页 1) 21. a4! c6 (if 21... Rd6 22. Nxd6 Qxd6 23. Rb3+ Nb6, White wins easily by 24. a5) 22. Rb3! (not 22. Qxc6? because of 22... Qb7, forcing the exchange of queens and thus bringing the attack to a halt; nor does 22. Na7 work, e.g. 22... Qxa7 23. Rb3+ Nb6! 24. Rxb6+ Ka8, when White has to exchange queens, leaving Black once again with the better game; obviously the intermediate 23... Nb6! is the key element here) 22... Qg5+ 23. Kb1 Nd2+ 24. Ka2. Now Black is unable to take the rook on b3 with check, so White wins easily, e.g. 24... Qe7 25. Qb6+ Qb7 26. Qxd8+, etc. [note 1].	CH9-124 · 原书246页 1）21. a4! c6（若21... Rd6 22. Nxd6 Qxd6 23. Rb3+ Nb6，白方24. a5轻松取胜）22. Rb3!（不能22. Qxc6?，因为22... Qb7强迫兑后，使进攻停顿；22. Na7也不行，例如22... Qxa7 23. Rb3+ Nb6! 24. Rxb6+ Ka8，白方必须兑后，黑方再次占优；中间着23... Nb6!显然是关键）22... Qg5+ 23. Kb1 Nd2+ 24. Ka2。现在黑方无法带将吃b3车，因此白方轻松取胜，例如24... Qe7 25. Qb6+ Qb7 26. Qxd8+等【注1】。
CH9-125 · 原书246页 · 纳恩编者注 [Nunn's note 1] Black's best defence is 24... Rd7, when White must find 25. f4! Qf6 (25... gxf3 26. Nxf3 deflects the knight from the attack on b3) 26. Rc3! to keep an advantage.	CH9-125 · 原书246页 · 纳恩编者注 【纳恩注1】黑方最佳防御是24... Rd7，白方必须找到25. f4! Qf6（25... gxf3 26. Nxf3使马无法攻击b3）26. Rc3!，才能保持优势。
CH9-126 · 原书246页 2) 21. Na7! [note 2] Rd6 22. Rb3+ Nb6 (forced, since 22... Rb6 is defeated by 23. Nc6#) 23. a4 Bg7 (or 23... Qd7 24. Nb5! Rc6 25. Qa7+ Kc8 26. a5) 24. Nb5! and White wins.
