第十章：抵御针对易位王的进攻

原书第247—292页 · CH10-1—CH10-414 · v2 · 2026-10-16

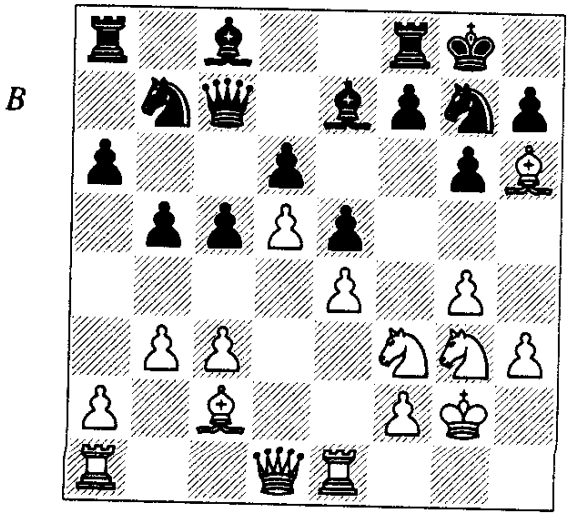

英文校订稿	中文初译稿
CH10-1 · 原书247页 **10 Defending against the attack on the castled king**	CH10-1 · 原书247页 **第十章 防御对王城的攻击**
CH10-2 · 原书247页 In presenting, up to here, the various aspects of the attack on the castled king we have looked at the operation from the attacker's point of view. However, it is also true that the defence against such an attack has its own principles and particular characteristics, and it is therefore fitting that we should also try to discuss this defence systematically.	CH10-2 · 原书247页 前面介绍攻击王城的各个方面时，我们一直从进攻方的角度考察。然而，防御这种攻击也有自己的原则和特点，因此也应当尝试作系统的讨论。
CH10-3 · 原书247页 Chess literature tends for the most part to talk of active and passive defence as being the two main types of defence. Steinitz also introduced the term 'self-defence', and H. Kmoch (in his work The Art of Defence) speaks of 'automatic defence'. Although it is now fairly well established, this division is not really the happiest one for teaching purposes; moreover, when it is a question of defence against an attack on the castled king, it is an imprecise one.	CH10-3 · 原书247页 棋书大多把积极防御和消极防御作为两大类型。斯坦尼茨还提出过“自我防御”这个术语，H. 克莫赫则在《防御的艺术》中谈到“自动防御”。这种分类虽然已经相当通行，但从教学角度看并非最恰当；用来讨论王城防御时，它也不够精确。
CH10-4 · 原书247页 I think it better to talk of direct and indirect defence of the castled position, in which case the direct defence is predominantly 'passive' and the indirect always 'active'. The difference between these kinds of defence is usually clearly marked, since the former involves the defence of the actual castling area or the removal of one's opponent's aggressive pieces, while in the latter case it is a question of actions further away from the castled position, which the defender uses to keep the attacker so busy that he fails to pursue his attack to its conclusion.	CH10-4 · 原书247页 我认为把王城防御分为直接防御和间接防御更好：直接防御主要是“消极的”，间接防御则始终是“积极的”。二者的区别通常很明确：前者是在王城区域本身进行防守，或消除对手的攻击子力；后者则在离王城较远的地方采取行动，使进攻方忙于应付，无法把攻势贯彻到底。
CH10-5 · 原书247页 In actual play direct defensive moves usually occur in conjunction with those of an indirect kind, and the main rule is that direct defence should be economical and that indirect should be executed at the right moment. Economy in direct defence consists of not making superfluous moves and not employing an unnecessarily large number of pieces in defence. The right moment for indirect defence is fairly difficult to gauge, since it is normally determined by two interacting factors; on the one hand, when direct defence has reached the limits that necessary economy allows, and on the other, when the attacker has really made a move which commits him fairly strongly, i.e. he has staked his money on the success of the attack.	CH10-5 · 原书247页 实战中，直接防御的着法通常与间接防御配合使用。主要原则是：直接防御应当节约，间接防御应当适时。所谓节约，就是不走多余的棋，不投入不必要的过多子力。间接防御的恰当时机比较难判断，因为通常取决于两个相互作用的因素：一方面，直接防御已达到必要的节约原则所允许的限度；另一方面，进攻方确实走出了使自己承担较大义务的一着，也就是把赌注押在进攻成功上。
CH10-6 · 原书247页 First, we shall set out clearly the various elements which go to make up each type of defence.	CH10-6 · 原书247页 下面先把构成两类防御的各种要素明确列出。
CH10-7 · 原书248页 **A. Direct Defence**	CH10-7 · 原书248页 **A. 直接防御**
CH10-8 · 原书248页 1) Protecting the squares of the castled position, including so-called over-protection.	CH10-8 · 原书248页 1）保护王城区域的各格，包括所谓超额保护。

英文校订稿	中文初译稿
CH10-9 · 原书248页 2) Transforming the castled position by moving the pawns in front of the king, a particular case being the setting-up of a blocked position.	CH10-9 · 原书248页 2）通过调动王前兵来改变王城结构，其中一种特殊情况是建立封闭局面。
CH10-10 · 原书248页 3) Altering the castled position by moving the king. Here it should be kept in mind that each move by the king changes the situation, changes the conditions necessary for an attack and, above all, changes the possible focal-points. King moves fall into the following graded categories:	CH10-10 · 原书248页 3）通过动王改变王城局面。应当牢记，每动一次王，局势都会改变，进攻所需条件也会改变，尤其是可能的焦点会发生变化。动王可以按程度分成以下几类：
CH10-11 · 原书248页 a) The consolidating move (e.g. Kb1 in the case of queenside castling and Kh1 in the case of kingside castling);	CH10-11 · 原书248页 a）巩固性的动王，例如长易位后的Kb1、短易位后的Kh1；
CH10-12 · 原书248页 b) A more radical alteration of the situation as a result of moving the king (e.g. to f2, thus producing a so-called 'semi-castled' position);	CH10-12 · 原书248页 b）动王使局面发生更根本的变化，例如走到f2格，形成所谓“半易位”局面；
CH10-13 · 原书248页 c) A king's flight, i.e. when it goes out in front of the castled position. Steinitz called this the king's self-defence, an older and more correct term than that of 'automatic defence' applied by Kmoch.	CH10-13 · 原书248页 c）王的出逃，即王走到王城前方。斯坦尼茨称之为王的自我防御；这个术语比克莫赫采用的“自动防御”出现得更早，也更准确。
CH10-14 · 原书248页 4) Defence by means of repulsing one's opponent's pieces, through their capture, exchange, or ejection from powerful positions.	CH10-14 · 原书248页 4）通过吃掉、交换或赶离强格等办法，击退对方棋子来防御。
CH10-15 · 原书248页 **B. Indirect Defence**	CH10-15 · 原书248页 **B. 间接防御**
CH10-16 · 原书248页 Before considering the ways of using the indirect method we must first of all examine three aspects of such a defence. The first is purely spatial, i.e. whether the defender carries out his own counterattack in the centre or on the wings; the second is concerned with the degree of the threat; and the third with the question of whether the indirect action turns at some point into the direct method of defence. In the following review we shall combine these three aspects:	CH10-16 · 原书248页 讨论间接防御的运用之前，必须先考察三个方面：第一是纯粹的空间问题，即防守方是在中心还是在侧翼反击；第二是威胁的程度；第三是间接行动是否会在某一时刻转变为直接防御。下面把这三方面结合起来考察：
CH10-17 · 原书248页 l) The defender carries out a counterattack on the opposite side, where the attacker has castled. In such a case his action is usually itself an attack on the castled king, the position being one where the players have castled on opposite sides.	CH10-17 · 原书248页 1）防守方在另一翼，即进攻方王城所在的一翼发起反攻。这种情况下，他的行动通常本身也是攻击王城，双方处于异侧易位的局面。
CH10-18 · 原书248页 2) An action on the opposite side first of all prepares the ground (files, ranks, etc.), and then turns into an outflanking manoeuvre against the attacker's castled position, i.e. while the attacker is attacking along the files, the defender gains control of the attacker's first or second rank.	CH10-18 · 原书248页 2）先在另一翼准备阵地条件，例如开放线、横线等，然后迂回攻击对方王城。也就是说，进攻方沿直线进攻时，防守方控制对方第一或第二横线。
CH10-19 · 原书248页 In this case, as in '1', the critical question is naturally either who will be the first to force mate or which of the two attacks will be brought to a halt through the diversion of pieces to provide a direct defence.	CH10-19 · 原书248页 这一情况与第1项一样，关键自然在于谁先强制将杀，或者哪一方因必须抽调子力直接防守而中断进攻。

英文校订稿	中文初译稿
CH10-20 · 原书249页 3) An action on any part of the board with the aim of gaining material. Such an action obviously only has a point when a forced mate is not part of the attacker's plan. The critical continuation then is that which costs the defender the least. For instance, if he can 'pacify the attacker's wrath' at the price of a knight, then a counterattack which brings him a rook is worthwhile.	CH10-20 · 原书249页 3）在棋盘任何区域采取以得子为目的的行动。只有进攻方不能按计划强制将杀时，这种行动才有意义。关键在于选择让防守方付出最小代价的后续。例如，若弃一匹马就能“平息进攻方的怒火”，那么能赢得一辆车的反击就是值得的。
CH10-21 · 原书249页 In practice the most important case is where the attacker sacrifices; the defender's repertoire is then greatly increased, since he is given various ways in which to return material in order to counter the attacker's plan. This method of returning material is extremely important; the extent to which it is possible affects the type of sacrifice which can be made, and the sacrifice is also a signal to the defender to counter with a sacrifice which would previously have been out of the question.	CH10-21 · 原书249页 实战中最重要的是进攻方弃子的情况。防守方的选择由此大为增加，因为他可以用各种方式归还子力，抵消对方的计划。这种归还子力的方法极其重要：有多少归还的可能，会影响进攻方可以采用哪种弃子；而对方弃子也向防守方发出信号，使他可以用先前根本不能考虑的弃子来反击。
CH10-22 · 原书249页 4) The counterattack results in material equality, but the question of position still remains open. Mate cannot be forced, both attacks are brought to a halt, and eventual simplification leads towards an ending. The resulting position, which is often extremely difficult to assess beforehand, is then decisive.	CH10-22 · 原书249页 4）反攻后子力相等，但局面优劣仍未确定。双方都无法强制将杀，两个攻势都被遏止，随后简化趋向残局。此时，所得局面的性质便具有决定意义，而这一局面事前往往极难判断。
CH10-23 · 原书249页 5) The defender's counterattack does not lead to a mating attack, nor to material or positional advantages, but instead consists of an eventual transition to the direct method.	CH10-23 · 原书249页 5）防守方的反击既不形成杀王攻势，也不取得子力或局面优势，而是最终转为直接防御。
CH10-24 · 原书249页 As a rule, this takes the form of either attacking the enemy pieces 'from the rear' or of gaining control of a file or diagonal so as to cover a certain square in one's king position (e.g. when the white queen has captured the square c7 and from there covers the focal-point h2).	CH10-24 · 原书249页 通常表现为“从背后”攻击敌子，或控制某条直线、斜线，从而保护己方王城中的某格；例如白后占据c7格，并从那里保护h2焦点。
CH10-25 · 原书249页 6) A special case of the kind of counterattack mentioned in '3' is provided by the advance of a queenside pawn majority. Its aim is to promote a pawn to a queen, and such an advantage justifies the most generous surrender of material in order to curb the attacker's forces.	CH10-25 · 原书249页 6）第3项反击的一种特殊形式，是推进后翼多兵。目标是升后；这种收益足以证明，为遏制进攻子力而大量交还子力是合理的。
CH10-26 · 原书249页 7) Retaliation in the centre can have the features of sections '3' to '5' either separately or combined. The following possibilities are particularly worth noting here:	CH10-26 · 原书249页 7）在中心反击，可以分别或同时具有第3至5项的特点。以下几种可能尤其值得注意：
CH10-27 · 原书249页 a) A central thrust demolishes or weakens the attacker's formation there and prepares the ground for further operations by the defender, or it enables him to transpose to direct defence 'via a turning manoeuvre' ;	CH10-27 · 原书249页 a）中心突击摧毁或削弱进攻方在那里的阵形，为防守方进一步行动铺路，或使他能“通过迂回调动”转入直接防御；
CH10-28 · 原书249页 b) The destruction of the pawn centre eliminates its auxiliary function with regard to an attack on the castled king. For example, the disappearance of a pawn on e5 can also mean the end of an attack on the castled king, if the pawn is vital to a certain continuation;	CH10-28 · 原书249页 b）摧毁兵中心，便消除了它对攻击王城的辅助作用。例如，若某条变化必须依靠e5兵，那么该兵消失可能就意味着攻势结束；

英文校订稿	中文初译稿
CH10-29 · 原书249页 c) Because of the danger of a central thrust, many attackers at a suitable moment deliberately create a blocked position in the centre. As a rule such a central formation cannot be rapidly activated except by the sacrifice of a piece. If the attacker has already used a sacrifice in attack, the defender is presented with an opportunity of making a return sacrifice in the centre. For example, the defender's knight on c6 is sacrificed for White's pawns on e5 and d4, thereby creating the necessary conditions for various kinds of defence without loss of material;	CH10-29 · 原书249页 c）由于中心突击的危险，许多进攻者会在适当时刻主动封闭中心。通常，若不弃子，这种中心阵形无法迅速活跃起来。如果进攻方已经弃子，防守方就有机会在中心回弃。例如，防守方把c6马换取白方e5、d4两兵，由此在不亏损子力的前提下，为各种防御创造必要条件；
CH10-30 · 原书250页 d) The destruction of the attacker's centre usually gives the defender the prospect of better conditions for positional play, as mentioned in section '4'. For it is not only that the opponent's centre pawns disappear, but the actual central squares also come under the defender's control; consequently, if the attack is held, the considerable positional advantage enjoyed by the defender persists, even when the material is equally balanced, until well into the endgame.	CH10-30 · 原书250页 d）摧毁进攻方的中心，通常会像第4项所说的那样，使防守方获得更有利的局面棋条件。不仅对方的中心兵消失，中心格本身也落入防守方控制。因此，只要挡住攻势，即使子力相等，防守方的显著局面优势仍会一直保持到残局深处。
CH10-31 · 原书250页 This outline of defensive methods brings out above all else the richness of their variety and the flexible way in which they can be combined. Because of this, defence as a whole is harder than attack, and its finesses are as a rule more concealed than those of the attacker, a point already noticed long ago by Lasker. The importance of the centre must be particularly emphasized as the critical area where the decisive step is often made. The great variety of possibilities afforded by a defence based on an action against the centre gives such an operation first place in the defender's repertoire, and so every attacker must be able to calculate accurately what is likely to happen in the centre during an attack on the castled king.	CH10-31 · 原书250页 上述防御方法的概述，首先体现了手段之丰富及其组合之灵活。因此总体而言，防御比进攻困难，防守的精妙之处通常也比进攻方更隐蔽；拉斯克早已注意到这一点。尤其必须强调中心的重要性，因为决定性的步骤往往发生在那里。针对中心采取行动，能给防守带来极其丰富的可能性，因此这种行动在防守方的手段中应居首位。每位进攻者都必须准确算清：攻击王城期间，中心可能发生什么。

英文校订稿	中文初译稿
CH10-32 · 原书250页 **Defence by over-protection**	CH10-32 · 原书250页 **以超额保护防御**
CH10-33 · 原书250页 Passing now to some examples of direct defence, let us examine the following position, which can arise in the Closed Defence to the Ruy Lopez.	CH10-33 · 原书250页 下面考察直接防御的实例。先看下面这个可能出现在西班牙开局封闭防御中的局面。

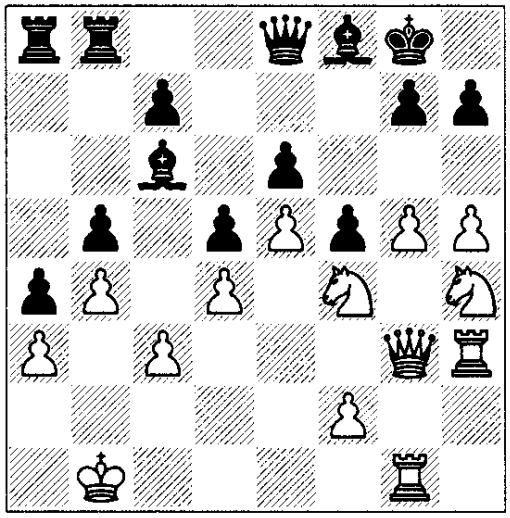

AA-p250-fig01 · 原书250页

CH10-34 · 原书251页 It is Black's move; he has to think how to supplement the direct defence of his king position, especially in view of White's threat of 1. Nh2 followed by 2. f4 and 3. f5. Black plays:	CH10-34 · 原书251页 轮黑走。他必须考虑如何加强王城的直接防御，尤其要应付白方1. Nh2，接着2. f4、3. f5的威胁。黑方走：
CH10-35 · 原书251页 **1... Nd8 2. Nh2 f6**	CH10-35 · 原书251页 **1... Nd8 2. Nh2 f6**
CH10-36 · 原书251页 Now 3. f4 can be met by 3... Nf7. Moreover, he can also answer most other moves by 3... Nf7, setting up a distinctive position with a 'double knight fianchetto'.	CH10-36 · 原书251页 现在3. f4可以用3... Nf7应对。大多数其他着法也可用3... Nf7，形成一种独特的“双马侧翼出子”阵形。
CH10-37 · 原书251页 This position offers very strong resistance against all kinds of attack, and the reason for this lies in the over-protection of the squares f5, g5, and h5, at which points White might have been able to execute a breakthrough. These squares are now covered both by Black's pawns and his knights, an example of 'prophylactic over-protection' , to use Nimzowitsch's phrase.	CH10-37 · 原书251页 这个局面对各种进攻都有很强的抵抗力，原因在于对白方可能突破的f5、g5、h5三格实行了超额保护。黑兵与黑马同时控制这些格子；借用尼姆佐维奇的术语，这就是“预防性超额保护”。
CH10-38 · 原书251页 The over-protection which Black achieves by transferring his knight to f7 is in this case neither a passive nor an uneconomical means of defence. It is not difficult to establish that Black's knight on b7 has no better position anywhere than on f7 (if ...c4, for example, White plays b4 and does not allow ...Nc5); it is better to use the knight for defence, freeing Black's other pieces for later queenside activity. In some cases over-protection can mean economical direct defence; on the other hand, depending on the position, it may be superfluous.	CH10-38 · 原书251页 在这里，黑方把马调到f7实现超额保护，既非消极，也不浪费子力。不难看出，b7马没有比f7更好的去处；例如...c4，白方就走b4，不让黑方...Nc5。因此，用马防守，让其他黑子能够随后在后翼活动，更为合理。有时超额保护就是节约的直接防御；另一方面，也可能因局面而显得多余。

英文校订稿	中文初译稿
CH10-39 · 原书251页 **Defence by blockade**	CH10-39 · 原书251页 **以封锁防御**
CH10-40 · 原书251页 A blocked pawn formation means a general reduction in the number of actions possible in any position, and as a result blockade is often the weapon employed by the weaker side. A means of defence which stands out as particularly important is the blockade of the pawns in front of the king.	CH10-40 · 原书251页 无论什么局面，封闭的兵形都会普遍减少可行的行动，所以劣势一方常把封锁作为武器。其中尤其重要的一种防御手段，是把王前的兵封闭起来。

W

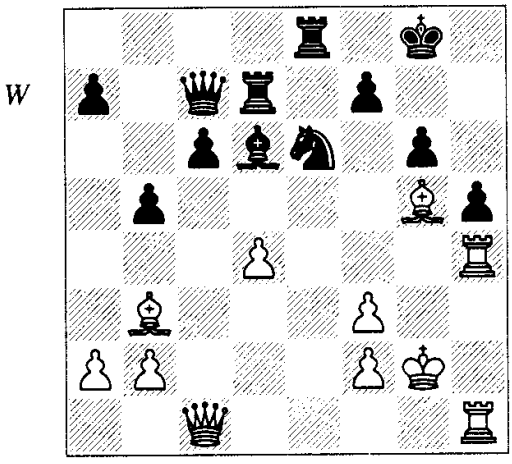

AA-p251-fig01 · 原书251页

CH10-41 · 原书252页 The continuation from the above position shows us first of all a typical case of defence by blockade, and then the way to overcome this method of defence.	CH10-41 · 原书252页 从上图继续，可以先看到一个典型的封锁防御实例，再看到克服这种防御的方法。
CH10-42 · 原书252页 Although White has the superior position with all his pieces directed against Black's kingside, he still can not achieve anything by 'normal' methods. If 1. g6, Black plays 1... h6, while if I h6, then 1... g6; in both cases blocking the pawns brings the attack to a halt. Attempts to break through by sacrificing a knight can simply be ignored by Black. Thus after I g6 h6 2. Nf3 Bd7 3. Ng5 Black does not take the knight but waits; while if I h6 g6 2. Nh5, Black again does not need to take, for by playing 2... Kh8 3. Nf6 Qf7 he can hold the draw.	CH10-42 · 原书252页 白方局面占优，全部子力都瞄准黑方王翼，但用“常规”办法仍无所获。1. g6，黑方走1... h6；1. h6则1... g6。两种情况下，封闭兵形都会使攻势停顿。试图弃马突破，黑方完全可以不予理会：1. g6 h6 2. Nf3 Bd7 3. Ng5，黑方不吃马而等待；1. h6 g6 2. Nh5，黑方也不必吃，只要2... Kh8 3. Nf6 Qf7就能守和。
CH10-43 · 原书252页 White's only chance in this position is:	CH10-43 · 原书252页 这个局面白方唯一的机会是：
CH10-44 · 原书252页 **1. Nhg6 Bd7**	CH10-44 · 原书252页 **1. Nhg6 Bd7**
CH10-45 · 原书252页 Clearly, the knight cannot be taken. 1... Kf7 is met by 2. h6 and a breakthrough, since if 2... hxg6, then 3. h7 Be7 4. Qh4 followed by 5. Nxg6.	CH10-45 · 原书252页 显然不能吃马。1... Kf7可用2. h6突破，因为2... hxg6之后3. h7 Be7 4. Qh4，接着5. Nxg6。
CH10-46 · 原书252页 **2. Rgh1!**	CH10-46 · 原书252页 **2. Rgh1!**

英文校订稿	中文初译稿
CH10-47 · 原书252页 White must play with great precision and thoroughly prepare for the breakthrough by h6 and hxg7. If he tries 2. h6 immediately, then Black replies 2... hxg6; then 3. hxg7 Bxg7 is not dangerous [Nunn note 1], while after 3. h7+ Kh8 4. Rh6 gxh6 5. gxh6 White's attack will probably not succeed.	CH10-47 · 原书252页 白方必须走得非常精确，充分准备h6、hxg7的突破。立即2. h6，黑方就2... hxg6；3. hxg7 Bxg7并不危险〔纳恩注1〕；3. h7+ Kh8 4. Rh6 gxh6 5. gxh6之后，白方进攻恐怕也不能成功。
CH10-48 · 原书252页 **2... c6 3. Qh2 Rb7 4. h6 hxg6 5. hxg7 Bxg7 6. Rh8+ and White wins.**	CH10-48 · 原书252页 **2... c6 3. Qh2 Rb7 4. h6 hxg6 5. hxg7 Bxg7 6. Rh8+，白胜。**

英文校订稿	中文初译稿
CH10-49 · 原书252页 **Defence by elimination**	CH10-49 · 原书252页 **以消除攻击子力防御**
CH10-50 · 原书252—253页 Many examples could be given of defence based on the diversion or elimination of important attacking pieces, since such operations are often undertaken; however, they are limited on the whole to one or two moves and do not normally provide a complete system of defence but only force the attacker to remodel or reorganize his attack. Thus, for example, in the quite normal case where the attacker's knight has to retreat from g5 when faced with ...h6, the problem of defence has not as a rule been fundamentally solved, but rather the attacker has been obliged to redirect his attack, either by transferring his target from h7 to h6 or g7 or else by strengthening the pressure on h7 along the diagonal b1-h7. Special examples and analysis are not necessary in the case of such straightforward diversion of opposing pieces. We are interested here in those special cases when the diversion or elimination of the attacker's pieces represents the essence of the defence and is in fact fundamental in driving back the attacking force. The simplest example of this is the exchange of queens, which is usually to the advantage of the defender and in many cases altogether eliminates the danger of attack. The queen is generally an essential piece in a mating attack and it is therefore useful to the defender if it is removed. However, other pieces too can be essential to an attack and can be the target of a defensive plan based on elimination. One of the most typical instances involves the attacker's bishop which is covering a network of weak squares. Such a visitor should, as soon as circumstances permit, be dismissed from the castling area or be eliminated by exchange. The following diagram shows a case of a bishop commanding a network of squares, and we give two possible continuations: the one actually taken, where Black misses the opportunity to defend himself by tackling the bishop; and an alternative one, which indicates the correct method of defence.	CH10-50 · 原书252—253页 引离或消除重要攻击子力的防御实例很多，因为实战中经常采取这类行动。不过，这通常只涉及一两着，不能构成完整的防御体系，只是迫使进攻方重塑或重新组织攻势。例如，进攻方g5马遇到...h6不得不后退，这种常见情况通常没有从根本上解决防守问题，只是迫使进攻方改变进攻方向：把目标从h7转到h6或g7，或沿b1—h7斜线加强对h7的压力。这类简单的驱离无需专门举例分析。这里关心的是一些特殊情形：引离或消除进攻子力本身就是防御的实质，是击退进攻力量的根本。最简单的例子就是兑后。这通常有利于防守方，而且常能彻底消除进攻危险。后一般是杀王攻势中的必需子力，因此消除它对防守方很有帮助。然而，其他棋子也可能是进攻所必需的，从而成为消除式防御计划的目标。其中最典型的是控制弱格网络的进攻方象。条件一旦允许，就应把这个来客赶出王城，或者兑掉。下图是一只象控制弱格网络的例子。我们给出两种后续：实战中黑方错过了针对这只象进行防御的机会；另一条变化则说明正确的防御方法。

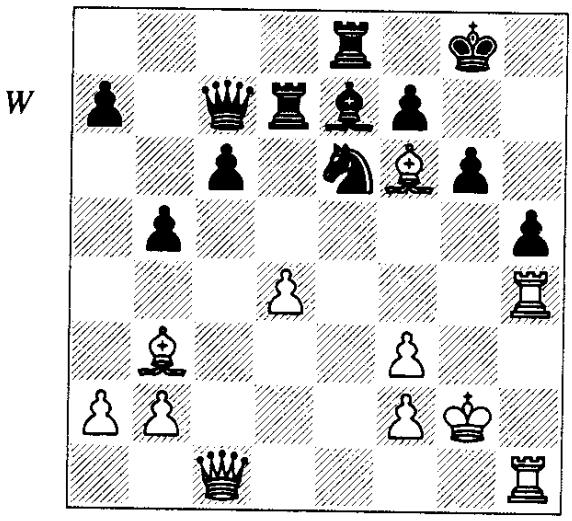

布莱克本—施瓦茨，柏林，1881年；白先。

AA-p253-fig01 · 原书253页

CH10-51 · 原书252页 · 纳恩编者注 1 Although after 4. Qh4 followed by Qh7+ White wins the g6-pawn, when the resulting position appears very unpleasant for Black. However, it is true that White risks nothing by building his position up further before playing h6.	CH10-51 · 原书252页 · 纳恩编者注 〔纳恩注1〕不过，4. Qh4之后接Qh7+，白方可以赢得g6兵，所得局面对黑方似乎很难受。但白方先进一步加强阵形，再走h6，确实没有任何风险。

英文校订稿	中文初译稿
CH10-52 · 原书253页 This position comes from the game Blackburne-Schwarz, Berlin 1881, and it is White's move. He is a pawn down and, in addition, he has the inferior pawn structure. On the other hand, he enjoys far greater activity for his pieces and has prospects of controlling the network of weak dark squares around the enemy king. It is exactly with this in mind that he plays:	CH10-52 · 原书253页 此局面出自布莱克本—施瓦茨，柏林，1881年，轮白走〔纳恩注1〕。白方少一兵，兵形也较差，但子力活跃得多，而且有希望控制黑王周围的黑格弱格网络。正是为了这一目标，白方走：
CH10-53 · 原书253页 **1. Bf6 Nf4+?**	CH10-53 · 原书253页 **1. Bf6 Nf4+?**
CH10-54 · 原书253页 Black throws away the chance of defending himself by eliminating the bishop on f6 (with 1... Be7!) and falls into a trap.	CH10-54 · 原书253页 黑方放弃了用1... Be7!消除f6象进行防御的机会，落入陷阱。
CH10-55 · 原书253页 **2. Qxf4! Bxf4 3. Rxh5 gxh5 4. Rxh5 and there is no remedy against mate on h8.**	CH10-55 · 原书253页 **2. Qxf4! Bxf4 3. Rxh5 gxh5 4. Rxh5，h8格的将杀已无法防御。**
CH10-56 · 原书253页 · 纳恩编者注 In the original edition, this diagram was incorrectly given without the black 1 pawn on b5. Qukovié's comments have been modified to take account of this correction.	CH10-56 · 原书253页 · 纳恩编者注 〔纳恩注1〕原版的这幅图漏画了b5黑兵。伏科维奇的评注已相应修改，以反映这一订正。

英文校订稿	中文初译稿
CH10-57 · 原书254页 The essential attacking piece here is the bishop on f6 and it should have been eliminated. Therefore the only correct course is 1... Be7! (D).	CH10-57 · 原书254页 这里必不可少的攻击子力是f6象，应当把它消除。因此唯一正确的走法是1... Be7!（见图）。

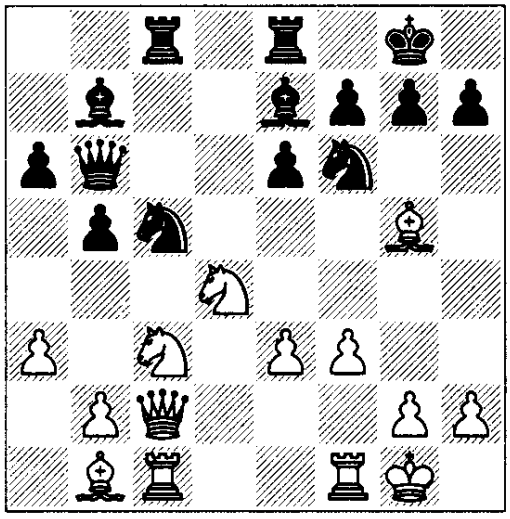

布莱克本—施瓦茨分析，1... Be7后。

AA-p254-fig01 · 原书254页

CH10-58 · 原书254页 After 2. Be5 (or 2. Bxe6 fxe6 3. Qg5 Bxf6 4. Qxf6 Qd8! and Black is the better placed) 2... Bd6 White has nothing better than 3. Bf6 and a repetition of moves; on any other move the elimination of White's dark-squared bishop affords Black a complete defence and the prospect of victory on the basis of his other advantages. Thus after 3. f4 Bxe5 4. dxe5 Ng7 White has nothing, while he is too weak for 3. Rxh5? because of 3... gxh5 4. Rxh5 Bxe5 5. dxe5 Rd4, whereupon the threat of ...Nf4+ destroys all his hopes.	CH10-58 · 原书254页 2. Be5（或2. Bxe6 fxe6 3. Qg5 Bxf6 4. Qxf6 Qd8!，黑优）2... Bd6之后，白方没有比3. Bf6重复局面更好的办法。白方走其他着法，黑方就能消除黑格象，获得完整防御，并凭其他优势争胜。因此3. f4 Bxe5 4. dxe5 Ng7，白方无所得；3. Rxh5?的力量也不足，因为3... gxh5 4. Rxh5 Bxe5 5. dxe5 Rd4，随后...Nf4+的威胁打破他的一切希望。
CH10-59 · 原书254页 Before we leave the theme of defence by elimination, the reader must be warned of the mistakes which are often made in applying this method. Many players defend themselves by endeavouring to exchange all the attacker's aggressive pieces. Such a formula can easily lead to defeat. As a rule, one should aim to exchange those pieces which are essential to the execution of the attacker's mating threats, while on the other hand one should preserve those of one's own pieces which are carrying out an important defensive function. We have already seen how important it is to preserve the fianchettoed bishop, and much the same can be said for a knight at f6 covering the important square h7.	CH10-59 · 原书254页 结束这一主题前，必须提醒读者注意运用这种方法时常犯的错误。许多棋手试图兑掉对方所有攻击子力来防御。照此行事，很容易输棋。通常应争取兑掉对方实现将杀威胁必需的子力，同时保留己方承担重要防守任务的棋子。我们已经看过保留侧翼象有多么重要；对保护h7要格的f6马，也可以作类似判断。

英文校订稿	中文初译稿
CH10-60 · 原书254页 **The king's self-defence**	CH10-60 · 原书254页 **王的自我防御**
CH10-61 · 原书254—255页 There is a graded scale which can be applied to the king's self-defence starting from the so-called consolidating move and ending with the full flight of the king to the other side of the board. Examples have already been given of the former type, so we shall begin with cases where the king is already definitely on the move, even though it may only be along the edge of the castling area. The next diagram is a typical example of self-defence by classically simple means: faced with White's pressure on h7, Black defends his pawn by advancing it and is not concerned about the square h7 itself; Black's king reduces the value of the square by moving, for it no longer comes into consideration as a focal-point.	CH10-61 · 原书254—255页 王的自我防御有一系列程度不同的形式，从所谓巩固性的动王，一直到王彻底逃往棋盘另一翼。前一种已举过例，因此这里从王已经明确开始转移的情况谈起，尽管它可能只沿王城边缘移动。下图是以经典而简单的方法自卫的典型：面对白方对h7的压力，黑方把兵挺起来保护，并不在意h7格本身；黑王一走，这个格就不再作为焦点考虑，其价值随之降低。

B

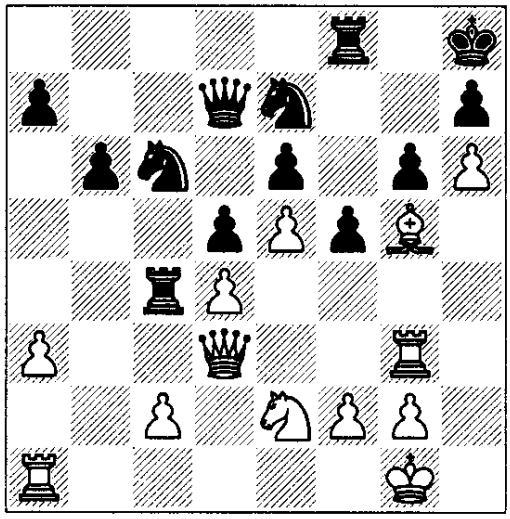

波戈留波夫—列蒂，卡尔斯巴德，1923年；黑先。

AA-p255-fig01 · 原书255页

CH10-62 · 原书255页 This position is from Bogoljubow-Réti, Carlsbad 1923. Black played:	CH10-62 · 原书255页 此局面出自波戈留波夫—列蒂，卡尔斯巴德，1923年。黑方走：
CH10-63 · 原书255页 **1... h6! 2. Bxf6 Bxf6 3. Qh7+ Kf8**	CH10-63 · 原书255页 **1... h6! 2. Bxf6 Bxf6 3. Qh7+ Kf8**
CH10-64 · 原书255页 The Black king defends itself by flight; if now 4. Qh8+ Ke7, White's position would only be made worse by his loss of a tempo. In the actual game White's initiative dissolved after 4. Rcd1 Red8 5. Kh1 Ke7 6. Nce2 Rh8 7. Qc2 a5, and, thanks to the good self-defence effected by his king, Black soon obtained rather the better game.	CH10-64 · 原书255页 黑王通过逃跑自卫。若4. Qh8+ Ke7，白方只是浪费一步，使自己局面更坏。实战4. Rcd1 Red8 5. Kh1 Ke7 6. Nce2 Rh8 7. Qc2 a5之后，白方的主动权消失了。由于黑王很好地实现了自我防御，黑方很快反而略占上风。

CH10-115 · 原书260页 Pillsbury's contemporaries were a little surprised by this exchange, which he used to make regularly in this system. In fact, the move is absolutely logical from the positional point of view. White cannot worry Black any more as regards his control of e4, and it is better that the square should be occupied by a blocked pawn than an active knight. In view of Black's complete hold on e4, White's bishop on b1 cannot be better employed than in dispatching Black's knight. This is an example of the logic, consistency, and lack of prejudice which runs through Pillsbury's style.	CH10-115 · 原书260页 与皮尔斯伯里同时代的棋手，对这次交换稍感意外；他在这一体系中经常这样走。实际上，从局面棋角度看，这着完全合乎逻辑。白方已无法再动摇黑方对e4的控制，让这里放一个被封闭的兵，总比放一匹活跃的马好。既然黑方已完全掌握e4，白方b1象最好的用途就是消除这匹黑马。这体现了贯穿皮尔斯伯里棋风的逻辑性、一贯性与不存成见。
CH10-116 · 原书260页 **18... dxe4 19. Qg3! f6**	CH10-116 · 原书260页 **18... dxe4 19. Qg3! f6**
CH10-117 · 原书260页 This move has been censured by earlier commentators because 'White's knight retreats with gain of tempo' , but closer investigation shows that the move is not a bad one, or rather that Black has nothing better. 19... f5 would be dangerous (because of White's eventual assault with g4), but otherwise it is difficult to find a natural way of parrying White's threat of 20. f5 followed by Nf4 or f6. It is important to note that 19... Qd6 20. f5 f6 fails because of 21. Ng6! Rd7 22. Ngf4, when White has realized his aim of posting a knight on f4 without having to exchange queens. On the other hand, 19... Qc7 contains some dangers on account of 20. b3. If Black had recaptured with his queen on the seventeenth move, 19... Qd6 would now work, for 20. f5 f6 would force the exchange of queens. A small and instructive detail!	CH10-117 · 原书260页 早期评注者批评这着，因为“白马获得先手后退”，但细看便知此着并不差，或者说黑方没有更好的办法。19... f5很危险，因为白方以后可用g4突击；但不用它，又难找到自然的办法应付20. f5接Nf4或f6的威胁。注意19... Qd6 20. f5 f6因21. Ng6! Rd7 22. Ngf4而失败，白方无需兑后，就实现了把马放到f4的目标。另一方面，19... Qc7因20. b3而有危险。假如黑方第17着用后回吃，此处19... Qd6就可行，因为20. f5 f6将强制兑后。一个细小而有启发性的区别!
CH10-118 · 原书260页 **20. Ng4 Kh8 21. f5! Qd7 22. Rf1 Rd8**	CH10-118 · 原书260页 **20. Ng4 Kh8 21. f5! Qd7 22. Rf1 Rd8**
CH10-119 · 原书260页 Black is planning . Qd6, but he should have noted that White will be unable to play the fundamentally important move Nf4 for some time (because of Qxf5). He could therefore have devoted the tempo to preparing ...b4, e.g. by 22... Rc8.	CH10-119 · 原书260页 黑方计划...Qd6，但本应注意：白方一时无法走出具有根本意义的Nf4，因为有...Qxf5。所以黑方可以利用这一步准备...b4，例如22... Rc8。

皮尔斯伯里—塔拉什，23. Rf4后。

AA-p260-fig01 · 原书260页

CH10-121 · 原书261页 Here we shall stop a moment to describe the course of the game so far and to point out the characteristic features of the position.	CH10-121 · 原书261页 这里稍停片刻，回顾至今的进程，指出局面的特点。
CH10-122 · 原书261页 Black released his pressure on the centre early on and thereby allowed White considerable freedom in arranging his pieces for an attack on the king. Against this attack Black built up a typical, direct defensive position which offers considerable, but not absolute, resistance. His principal weapon in the event of a further concentration of White's pieces is, however, an indirect defence in the shape of the advance of the pawn majority on the queenside. Against a whole series of attacking plans Black has successful replies in the form of retaliation on the flank; a particular point is that White cannot force the move Nf4. It was because of this that Pillsbury decided on 23. Rf4, i.e. he now abandons his preparations for Nf4 and regroups with the apparent intention of attacking e4.	CH10-122 · 原书261页 黑方过早减轻中心压力，使白方可以相当自由地布置子力杀王。黑方建立了典型的直接防御阵形，抵抗力很强，却并非绝对可靠。白方若进一步集结子力，黑方的主要武器仍是间接防御，即推进后翼多兵。对于一系列进攻计划，黑方都能以侧翼反击成功应对。尤其是白方不能强行实现Nf4。因此皮尔斯伯里选择23. Rf4，放弃准备Nf4，重新部署，表面上准备攻击e4。
CH10-123 · 原书261页 **23... Qd6 24. Qh4 Rde8 25. Nc3?**	CH10-123 · 原书261页 **23... Qd6 24. Qh4 Rde8 25. Nc3?**
CH10-124 · 原书261页 A weak move, for Black could now have played 25... b4 26. Na4 Bd5 27. Nc5 Nd7 28. Nxd7 Rxd7, after which there is nothing left of White's attack, while on the queenside Black has moved closer to his goal. 25. Nf2 was better, to prepare g4. Admittedly, if 25... Kg8!, then 26. g4 does not work (because of 26... g5 27. fxg6 Nxg6 28. Qxf6 Nxf4! 29. Qxd6 Nxe2+ and 30... Nxc1, with a whole fistful of pieces for the queen); however, White can play 26. Qh3, to be followed by Rh4, g4, and Nf4, etc.	CH10-124 · 原书261页 弱着。黑方现在可以25... b4 26. Na4 Bd5 27. Nc5 Nd7 28. Nxd7 Rxd7，白方攻势消散，黑方后翼则更接近目标。25. Nf2准备g4较好。诚然25... Kg8!之后26. g4不行，因为26... g5 27. fxg6 Nxg6 28. Qxf6 Nxf4! 29. Qxd6 Nxe2+，接着30... Nxc1，黑方用后换得一大把子力。不过白方可以26. Qh3，再Rh4、g4、Nf4等。

CH10-157 · 原书264页 This famous game has its place in chess literature as a classic example of an attack on the castled king which is stronger than the counterattack on the queenside. But in the light of my annotations, which differ fundamentally from all annotations hitherto, from Tarrasch to Réti, this game takes on a new appearance. Black's numerous opportunities to strengthen his game at various stages point rather to the equal balance between the attack and the indirect defence, and it was only the decisive mistake on the thirty-eighth move which swung the balance in White's favour. This view of the game also qualifies it as a good example of the importance of indirect defence against an attack on the castled king, and of the part played by operations with wing pawns in particular.	CH10-157 · 原书264页 这盘名局在棋书中一向被视为王城攻势胜过后翼反击的经典。但我的注解与从塔拉什到列蒂此前所有注解都有根本区别，使此局呈现新面貌。黑方在不同阶段多次可以加强行棋，这反而说明进攻与间接防御大体均衡；只是第38着的决定性错误才使天平倾向白方。这样看，这盘棋也很好地说明了面对王城攻击时间接防御的重要性，尤其是侧翼兵行动的作用。

英文校订稿	中文初译稿
CH10-158 · 原书264页 Indirect defence by means of advancing a pawn majority on the queenside was at one time held in high esteem and was more often practised than nowadays; the real reason for this is that we have acquired a better understanding of the centre and the technique of centralization, thanks to the hypermodern school. It is clear that the player who has a majority on the wing, when the material is equally balanced, will usually not have the greater influence or pressure in the centre, nor will he have the necessary conditions for a central action. A majority on the wing is created at the expense of the centre and means giving up lateral pressure on the centre, and that is the sort of strategy which the masters of today are reluctant to adopt. The struggle for the centre is a characteristic feature of all present-day openings, and the centralization of the pieces is an important theme of modern positional play; as a result, a majority on the wing appears nowadays more as a by-product of a particular strategy than its primary aim (for example, in the Exchange Variation of the Grünfeld Defence).	CH10-158 · 原书264页 推进后翼多兵的间接防御曾受到高度重视，采用得比本书写作时更多。真正原因是：超现代学派使我们对中心及子力中心化的技术有了更好理解。在子力相等时，侧翼多兵的一方通常在中心并无更大影响或压力，也缺乏中心行动所需条件。侧翼多兵以中心为代价，意味着放弃对中心的侧面压力，这是现代大师不愿采用的战略。争夺中心是现代所有开局的特征，子力中心化也是现代局面棋的重要主题。因此，侧翼多兵如今更多是某种战略的副产品，而非主要目标，例如格林菲尔德防御兑换变例。
CH10-159 · 原书264页 Thus, concern for the centre is driving majority actions out of use, and it should be added that an indirect defence against an attack on the castled king is more effective and holds better prospects of success in the form of a central action than one using wing pawns. This is shown by the following general considerations.	CH10-159 · 原书264页 重视中心，正使多兵行动逐渐失去地位。还应补充：防御王城攻击时，采用中心行动的间接防御比运用侧翼兵更有效，成功前景也更好。以下一般性理由说明这一点。
CH10-160 · 原书264页 l) Advancing pawns on the opposite wing is a slow process, since, as a rule, the whole pawn chain must move forward for a passed pawn to be created.	CH10-160 · 原书264页 1）在另一翼推进兵很慢，因为通常必须推动整条兵链，才能制造通路兵。
CH10-161 · 原书264—265页 2) The attacker knows which pawn is going to be dangerous and so can arrange to contain it economically, either by preparing to block the pawn with a piece or by planning ahead to sacrifice a piece for the passed pawn, which in fact means surrendering the piece in return for a considerable number of tempi.	CH10-161 · 原书264—265页 2）进攻方知道哪个兵会变得危险，因而可节约地限制它：或者准备以子力封锁，或者预先计划为这个通路兵弃子；后者实际上是用一子换取相当多的步数。
CH10-162 · 原书265页 3) Advancing pawns on the opposite wing is an action which is furthest in distance from the threatened castled position and which is the hardest to combine with, or transform into, direct defence.	CH10-162 · 原书265页 3）在另一翼推进兵，距离受威胁的王城最远，也最难与直接防御结合，或转变为直接防御。
CH10-163 · 原书265页 These are the general deficiencies of indirect defence using the wing pawns, and they limit its use mainly to the following cases:	CH10-163 · 原书265页 这些是利用侧翼兵间接防御的一般缺点，使它主要适用于以下情况：
CH10-164 · 原书265页 a) The attack on the castled king develops slowly, demanding a regrouping or perhaps a series of pawn moves; it does not lead to a forced mate, for a defence can be bought at the price of material;	CH10-164 · 原书265页 a）王城攻势发展缓慢，需要重新部署，或连续冲兵；攻势不能强制将杀，因为防守方能付出子力代价换得防御；
CH10-165 · 原书265页 b) Direct defence is on the whole sufficient but it may be usefully combined with something else; in other words, the defender has some tempi left over which he can devote to alternative actions, including those using the wing pawns.	CH10-165 · 原书265页 b）直接防御总体已足够，但还可有益地配合其他行动。换言之，防守方有富余步数，可以投入别的行动，包括侧翼兵行动。

英文校订稿	中文初译稿
CH10-166 · 原书265页 These, then, are the general factors which speak for, or against, indirect defence by means of the wing pawns, but in this case too the reader must overcome any inclination to think merely in terms of formulae, since the essence of a formula often consists of 'exceptions which prove the rule'.	CH10-166 · 原书265页 以上是赞成或反对用侧翼兵间接防御的一般因素。但读者在这里也必须克服仅凭公式思考的倾向，因为公式的实质，往往就在那些“证明规则的例外”之中。

CH10-172 · 原书265页 4) The dependence of timing and the form of defence on the state of the attacker's commitments.	CH10-172 · 原书265页 4）防御的时机、形式怎样取决于进攻方已经作出的承诺。

英文校订稿	中文初译稿
CH10-173 · 原书265—266页 The following position is from the game K.Treybal-H.Wolf, Teplitz-Schönau 1922. Black, to move, has the task of organizing a defence against an attack on his king position. A single glance is enough to show that he has no move to make in the way of direct defence. The only move in keeping with that would be 1... Kh7, but that would simply make White's attack easier. For example, White will in any case play Rf4-h4 and then (with the king on h7) the square g5 will be available for his queen, besides which there is a threat of Bc1 followed by Rxh6 with check. Therefore, indirect defence must be used to obstruct White's plan to gain control of h6. With that aim, only an action on the queenside can be considered, for Black cannot achieve anything in the centre.	CH10-173 · 原书265—266页 下图出自K. 特雷巴尔—H. 沃尔夫，特普利采-舍瑙，1922年。轮黑走，必须组织防御，应对王城攻势。一眼就能看出，他没有什么直接防御可走。唯一相符的是1... Kh7，但这只会便利白方进攻。例如白方无论如何都会Rf4—h4；黑王在h7时，g5便可供白后使用，此外还有Bc1再Rxh6的威胁。这次吃子还带将军。因此，必须用间接防御妨碍白方控制h6的计划。为此只能考虑后翼行动，因为黑方在中心无所作为。

CH10-179 · 原书266页 Black has succeeded in persuading White's queen to leave the attacking diagonal. 6. Rxh6 would not have worked because of 6... Rxb2 7. Qg5 Qg4 and White has nothing. An interesting possibility was 6. Nf5, which probably leads to a draw; objectively, this would not have been at all bad, for Black could have gained some advantage after White's actual move. The analysis runs 6. Nf5 gxf5 (6... Rxb2 fails against 7. Nxh6+ Bxh6 8. Qxh6) 7. Rxh6 Rxb2 8. Qg5+ Ng6 9. Rxg6+ fxg6 10. Qxg6+ Kh8 11. Rf4 (this attempt does not give more than perpetual check, which White would also obtain by 11. Qh5+) 11... Rb1+ 12. Kf2 Rb2+ 13. Ke1 Rb1+ (if 13... Qxe4+ 14. Rxe4 fxe4, White wins by 15. f7!) 14. Kd2 Rb2+ 15. Kc1 Rb1+! 16. Kxb1 Rxb3+ 17. Ka2 Rb2+ [Nunn note 1] 18. Ka3 (or 18. Kxb2 Qe5+ and 19... Qxf4) 18... Ra2+, and White's king cannot escape from perpetual check.	CH10-179 · 原书266页 黑方成功迫使白后离开攻击斜线。6. Rxh6因6... Rxb2 7. Qg5 Qg4而无效，白方毫无所得。6. Nf5很有意思，可能导致和棋；客观上这已不差，因为实战着后黑方可能略占优势。分析如下：6. Nf5 gxf5（6... Rxb2因7. Nxh6+ Bxh6 8. Qxh6而失败）7. Rxh6 Rxb2 8. Qg5+ Ng6 9. Rxg6+ fxg6 10. Qxg6+ Kh8 11. Rf4（这也只有长将；11. Qh5+同样可得长将）11... Rb1+ 12. Kf2 Rb2+ 13. Ke1 Rb1+（13... Qxe4+ 14. Rxe4 fxe4则15. f7!白胜）14. Kd2 Rb2+ 15. Kc1 Rb1+! 16. Kxb1 Rxb3+ 17. Ka2 Rb2+〔纳恩注1〕18. Ka3（或18. Kxb2 Qe5+，再19... Qxf4）18... Ra2+，白王逃不出长将。
CH10-180 · 原书266页 **6... Nxc4?**	CH10-180 · 原书266页 **6... Nxc4?**
CH10-181 · 原书266页 · 纳恩编者注 1 Black can play for a win by 17... Rh3! since after 18. gxh3 Qxc4+ he can win the rook on f4 with a series of checks.	CH10-181 · 原书266页 · 纳恩编者注 〔纳恩注1〕黑方可以17... Rh3!争胜，因为18. gxh3 Qxc4+之后，可以连续将军赢得f4车。
CH10-182 · 原书267页 The wrong turning, since White now plays Bc1 with gain of tempo, placing the bishop on the diagonal where it really belongs. The correct continuation of the defence consisted in giving, not taking, material, e.g. 6... Rxb2! 7. Qxb2 Nxc4 8. Qc3 (or 8. Qc1 Ne5 9. Rxh6 Rxb3 after which both 10. Qg5 Qg4 and 10. Rf5 Ng4 are in Black's favour) 8... Ne5 9. Rb1 c4 10. b4 Qxf6 11. Rh3 Bg7 and Black has the better prospects. Wolf, of course, was not the master to decide on 'giving' when he could 'take'. His saying was: 'Why should I sacrifice when nobody sacrifices for me!?' But the consistent implementation of a plan with a sound positional basis often demands sacrificial conceptions, as in the analysis above, which is both typical and instructive. We can see here how an element of direct defence is also involved — the elimination of White's bishop, which plays an essential part in his mating plans. White's attack then flags, whereupon Black takes some pawns, centralizes his position, and brands White's rook on h4 as misplaced; the defence welds the various elements of the position into a single whole.	CH10-182 · 原书267页 方向错了。白方现在获得先手走Bc1，把象放到真正应在的斜线上。正确的防御不是吃子，而是送还子力，例如6... Rxb2! 7. Qxb2 Nxc4 8. Qc3（或8. Qc1 Ne5 9. Rxh6 Rxb3，此后10. Qg5 Qg4和10. Rf5 Ng4均有利于黑方）8... Ne5 9. Rb1 c4 10. b4 Qxf6 11. Rh3 Bg7，黑方前景较好。沃尔夫当然不是那种能"拿"时却决定"给"的大师。他的名言是："别人都不为我弃子，我为什么要弃子？！"但要一贯执行具有可靠局面棋基础的计划，往往就需要弃子构想，正如上面典型而有启发性的分析。这里也包含直接防御因素：消除在白方将杀计划中必不可少的象。白方攻势随后衰退，黑方就吃兵、子力中心化，并使白方h4车显得错位。防御把局面的各种要素结合成一个整体。

CH10-185 · 原书267页 In sharp positions like this everything should be considered, including moves like 7... g5. The latter represents a simultaneous combination of direct and indirect defence: Black drives back the rook, blocks the diagonal of the enemy bishop, and frees the square g6 for the knight — all direct elements — while the indirect appears in certain continuations where Black's g-pawn takes part in a counterattack. Let us look at some ways in which White can go astray after 7... g5. First of all, the 'natural' move 8. Rh5? is unsatisfactory because of 8... Ne5 9. Bxg5 (after 9. Nf5 Ng4! the attack on the e-pawn gains a tempo) 9... Rxb3 10. Qc1 Rxg3 11. hxg3 Qg4.	CH10-185 · 原书267页 在这种尖锐局面，一切都应考虑，包括7... g5。此着把直接与间接防御同时结合起来：赶车、堵住敌象斜线、腾出g6给马，都是直接防御因素；间接因素则出现在某些变化中，黑方g兵参与反击。先看看7... g5后白方可能怎样走错。“自然”的8. Rh5?不行，因为8... Ne5 9. Bxg5（9. Nf5 Ng4!，攻击e兵获得先手）9... Rxb3 10. Qc1 Rxg3 11. hxg3 Qg4。
CH10-186 · 原书268页 Nor is 8. Nf5? gxh4 9. Qf3 Ne5 10. Qh5 good, e.g. 10... Rxb3 11. Nxh6+ (or 11. Bxh6 Rbb2!) 11... Bxh6 12. Qxh6 Qg4 when the clearing of the g-file enables Black to cover the focal-point at g7. The g-pawn takes an active role in the continuation 8. Rh3 g4 9. bxc4 gxh3 when the threat of ...Rxg2+ costs White a decisive tempo.	CH10-186 · 原书268页 8. Nf5? gxh4 9. Qf3 Ne5 10. Qh5也不好，例如10... Rxb3 11. Nxh6+（或11. Bxh6 Rbb2!）11... Bxh6 12. Qxh6 Qg4，g线打开，使黑方得以保护g7焦点。在8. Rh3 g4 9. bxc4 gxh3中，g兵则积极行动；...Rxg2+的威胁使白方损失决定性的一步。
CH10-187 · 原书268页 The correct response to 7... g5 is 8. Rh3! g4 (if 8... Ne5 then 9. Nf5 after which the b-pawn is protected) and now 9. Rh5! (instead of 9. bxc4 as above) 9... Ne5 10. Bxh6 Bxh6 (if 10... Rxb3 then 11. Qc1 wins) 11. Rxh6 Rxb3 12. Qc1 Ng6 13. Rh8+ Nxh8 14. Qh6 and White wins. Here White's play against the focal-point g7 is unhindered, since g4 is blocked by Black's own pawn.	CH10-187 · 原书268页 对7... g5的正确应法是8. Rh3! g4（8... Ne5则9. Nf5，b兵得到保护），然后9. Rh5!（不是上述9. bxc4）9... Ne5 10. Bxh6 Bxh6（10... Rxb3则11. Qc1白胜）11. Rxh6 Rxb3 12. Qc1 Ng6 13. Rh8+ Nxh8 14. Qh6，白胜。这里g4被黑方自己的兵堵住，白方攻击g7焦点不再受阻。

CH10-189 · 原书268页 At the very least, this is a tactical mistake; for, by 8... Rxb3 Black could have presented White with an exceptionally difficult problem and involved him in considerable risk if he persisted in playing for a win. The text move, however, gives White no difficulties and allows him to win easily.	CH10-189 · 原书268页 至少从战术上说，这是错误。8... Rxb3能给白方出一道极难的题；若白方坚持争胜，便须承担很大风险。实战着却没给白方任何困难，让他轻易获胜。
CH10-190 · 原书268页 Grünfeld and Becker, the authors of the tournament book — one of the best in the literature of the game — rightly censure Black's move, but their analysis of the continuation 8... Rxb3! is not correct. In the variation which they conclude with a drawn ending Black can eventually win, while in that which they consider won for Black the position can be resolved in White's favour. These lines together with my analysis will interest the reader as general studies of the middlegame. Here is a diagram after the alternative 8... Rxb3! (D).	CH10-190 · 原书268页 赛会棋谱集的作者格林菲尔德和贝克尔——他们的书是棋书中的佳作之一——正确地批评了黑方此着，但对8... Rxb3!的分析不正确。他们认为进入和棋残局的一条变化，黑方最终可以赢；他们认为黑方获胜的另一条变化，却可以对白方有利地解决。这些变化与我的分析一起，可作为一般性的中局研究供读者参考。下图是另选8... Rxb3!后的局面（见图）。

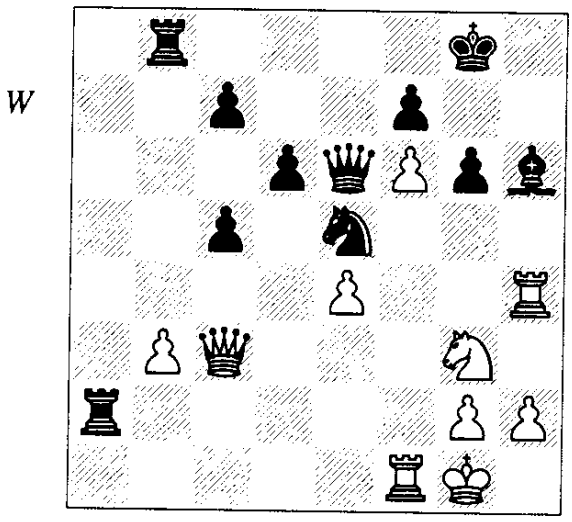

K. 特雷巴尔—H. 沃尔夫分析，8... Rxb3后。

AA-p268-fig01 · 原书268页

CH10-191 · 原书268—269页 Grünfeld and Becker reach a draw as follows: 9. Bxf8 g5! (otherwise Bg7 and mate) 10. Rh5 Rxc3 11. Bg7 Ng6 12. Nf5. In their opinion Black now has no defence against perpetual check by Nh6+. In fact, Black still has something to say and can play 12... Rxg2+! 13. Kh1 (if 13. Kxg2 then 13... Qxe4+ and Black has no trouble picking up the rook on h5) 13... Rxh2+ 14. Kxh2 (or 14. Rxh2 Qxe4+ followed by ...Nh4) 14... Qe5+ 15. Kg1 Rg3+ 16. Kh2 (16. Nxg3 Qxg3+ 17. Kh1 Qg4 followed by ...Qxe4+, ...c4, etc.) 16... Rf3+ 17. Kg1 (or 17. Kg2 Rxf5 18. exf5 Qe2+ 19. Rf2 Nf4+) 17... Rxf1+ 18. Kxf1 Qf4+ and White loses either his rook or his knight.	CH10-191 · 原书268—269页 格林菲尔德和贝克尔以下列变化论证和棋：9. Bxf8 g5!（否则Bg7将杀）10. Rh5 Rxc3 11. Bg7 Ng6 12. Nf5。他们认为黑方不能防御Nh6+长将。实际上黑方还有话说：12... Rxg2+! 13. Kh1（13. Kxg2则13... Qxe4+，黑方很容易吃掉h5车）13... Rxh2+ 14. Kxh2（或14. Rxh2 Qxe4+，再...Nh4）14... Qe5+ 15. Kg1 Rg3+ 16. Kh2（16. Nxg3 Qxg3+ 17. Kh1 Qg4，再...Qxe4+、...c4等）16... Rf3+ 17. Kg1（或17. Kg2 Rxf5 18. exf5 Qe2+ 19. Rf2 Nf4+）17... Rxf1+ 18. Kxf1 Qf4+，白方不是失车就是失马。
CH10-192 · 原书269页 The second line given by the same commentators aims to show that 8... Rxb3! cannot be answered by 9. Qc1 because of 9... Ng4 10. Bxf8 Rbb2 11. Bg7 Rxg2+ 12. Kh1 Rxh2+ 13. Rxh2 Rxh2+ 14. Kg1 Qa2 and Black wins. But if White, instead of 11. Bg7?, plays 11. Qxb2! Rxb2 12. Bg7 then Black loses. Correct after 9. Qc1 is at once 9... Rbb2 whereupon 10. Bxf8 does not work because of 10... Rxg2+ 11. Kh1 Ng4!.	CH10-192 · 原书269页 同一组评注者给出的第二条变化，试图证明8... Rxb3!之后不能9. Qc1，理由是9... Ng4 10. Bxf8 Rbb2 11. Bg7 Rxg2+ 12. Kh1 Rxh2+ 13. Rxh2 Rxh2+ 14. Kg1 Qa2，黑胜。但白方若不11. Bg7?而11. Qxb2! Rxb2 12. Bg7，黑方就输了。9. Qc1后正确的是立即9... Rbb2，10. Bxf8不行，因为10... Rxg2+ 11. Kh1 Ng4!。

英文校订稿	中文初译稿
CH10-193 · 原书269页 Now here is my analysis. First of all, let me explain why 9. Bxf8? g5! 10. Qc1, not mentioned by the commentators, does not work. Black replies 10... gxh4 and then 11. Qh6 is useless on account of 11... Qg4 while 11. Qg5+ fails against 11... Kxf8 12. Nf5 Rbb2! when White's attack is halted — he cannot get any further than Qh6+ and Ng7+ because of the threat of mate that faces him on g2 and h2. A third possibility is 11. Nf5 Rbb2! 12. Ne7+ Qxe7 13. Qg5+ (if 13. Qxb2 then 13... Qe6) 13... Kxf8 14. fxe7+ Ke8 when it can be seen that White has achieved nothing. In return for his rooks Black will win the queen and the pawns on g2 and e7, thus obtaining an advantage in the ending.	CH10-193 · 原书269页 下面给出我的分析。先解释评注者未提的9. Bxf8? g5! 10. Qc1为什么不行。黑方10... gxh4，11. Qh6因11... Qg4无用；11. Qg5+则11... Kxf8 12. Nf5 Rbb2!，白方攻势被遏止，由于自身g2、h2面临将杀，除了Qh6+、Ng7+以外无法推进。第三种可能是11. Nf5 Rbb2! 12. Ne7+ Qxe7 13. Qg5+（13. Qxb2则13... Qe6）13... Kxf8 14. fxe7+ Ke8，可以看出白方没有取得成果。黑方将用双车换得后及g2、e7两兵，取得残局优势。
CH10-194 · 原书269页 The above diagram is a hard nut to crack, and the way to attempt it is as follows: 9. Qc1! Rbb2! 10. Qxb2! Rxb2 11. Bxf8 g5 12. Rh5 Ng6 13. Bg7. Now White has the same position as in the first line above but with a tempo less and a rook more. He wins in the following variations:	CH10-194 · 原书269页 上图是颗难啃的硬核，应这样尝试：9. Qc1! Rbb2! 10. Qxb2! Rxb2 11. Bxf8 g5 12. Rh5 Ng6 13. Bg7。白方与上述第一条变化相比，少一步但多一车。以下变化白方获胜：
CH10-195 · 原书269页 1) 13... c4 14. Nf5 Rxg2+ (otherwise Ne7+ wins) 15. Kxg2 [Nunn note 1] Qxe4+ 16. Kg3 Qe5+ 17. Kh3 g4+ (if 17... Qc3+ the king escapes from the checks on g1) 18. Kg2 Qb2+ 19. CH10-213 · 原书271—272页 White decides to accept the sacrifice and to employ direct defence against the attack on his king. With good play he could certainly have come through by this method, but the right way to refute the offer is not by accepting it but by applying indirect defence in the shape of a counterattack on the queenside. After d5 there is also some point to the earlier advance a5, since an attack can now be made on Black's pawn chain at b7 and c6, as a result of which White obtains the better pawn structure and an advantage in space on the queenside and also frees the square d5 for a piece. The analysis runs 17. a6! Nxg2 (if 17... Bxg2 then 18. axb7 Qxb7 19. Ba4 when White wins the exchange and gains space, while if Black advances his b-pawn, then 18. dxc6 Qc8 represents a strengthening of White's position, after which the conditions for accepting the sacrifice are extremely good) 18. axb7 Qxb7 19. dxc6 (if 19. Ba4 as mentioned by Tartakower in The Hypermodern Game, Black would reply 19... Nxe3 20. Rxe3 Bd7) 19... Qc8 20. Nd5! (a typical example of play on the principle that the most important feature of the position, in this case White's pressure on the queenside, takes priority; it should be observed that in pursuing this policy White must also be prepared to lose the exchange) 20... Nxe1 (it might seem more consistent for Black not to make this capture but to press on with his assault; in fact, the chief attacking moves do not work, e.g. 20... h5 21. Nxf6+ and 22. Nxh5, 20... g4 21. Nxe7 Kxe7 22. Nf5+ and White stands better and finally 20... Nxd5 21. Bxd5 after which 21... Qc7, to prevent the advance of the c-pawn, is strongly answered by 22. b4) 21. Qxe1 Be6 (Black must abandon his attack on the king and defend himself in the centre and on the queenside; the decisive factor is that 21... g4 is useless because of 22. f4) 22. Qa5 Bxd5 23. Bxd5 Nxd5 24. Qxd5 Qe6 (otherwise c7!) 25. b4! and White has an overwhelming game.	CH10-213 · 原书271—272页 白方决定接受弃子，以直接防御应付杀王。若走得好，这条路当然也能过关。但正确反驳弃子的办法，是不吃，而以攻击后翼进行间接防御。d5之后，先前的a5也有了意义，因为现在能攻击b7、c6兵链，获得较好的兵形及后翼空间优势，同时腾出d5供子力中心化。分析如下：17. a6! Nxg2（若17... Bxg2，则18. axb7 Qxb7 19. Ba4，白方得半子并获得空间；若黑方推进b兵，则18. dxc6 Qc8加强白方局面，此后接受弃子的条件极佳）18. axb7 Qxb7 19. dxc6（若像塔塔科维尔在《超现代国际象棋》中所提的19. Ba4，黑方就19... Nxe3 20. Rxe3 Bd7）19... Qc8 20. Nd5!（典型地优先考虑局面最重要的特点，此处就是白方后翼压力；注意，执行这个方针也必须准备损失半子）20... Nxe1（黑方不吃而继续突击似乎更一贯；但主要攻击着都无效，如20... h5 21. Nxf6+再22. Nxh5；20... g4 21. Nxe7 Kxe7 22. Nf5+，白优；最后20... Nxd5 21. Bxd5，若21... Qc7阻止c兵推进，则22. b4有力应对）21. Qxe1 Be6（黑方必须放弃杀王，转在中心和后翼防守；关键是21... g4因22. f4无效）22. Qa5 Bxd5 23. Bxd5 Nxd5 24. Qxd5 Qe6（否则c7!）25. b4!，白方取得压倒性优势。

英文校订稿	中文初译稿
CH10-214 · 原书272页 The chief feature of this line is the complete absence of direct defence. White gives up the pawn on g2 and the exchange, which effectively blunts Black's attack, while his excellently-founded action on the queenside gains in power with every move.	CH10-214 · 原书272页 这条变化的主要特点是完全不作直接防御。白方交出g2兵和半子，便有效削弱黑方攻势，而他基础极好的后翼行动则步步增强。

We shall examine two more variations arising out of 19... gxf3 20. Qxf3 (D):

CH10-219 · 原书273页

再考察19... gxf3 20. Qxf3产生的两条变化（见图）：

耶茨—马尔科分析，19... gxf3 20. Qxf3后。

AA-p273-fig01 · 原书273页

CH10-220 · 原书273页

1) 20... N6h5 21. Bxf4! exf4 22. dxc6. Black cannot win a piece now, since 22... fxg3? permits the white queen to capture on f7, while 22... Nxg3 can be met by 23. Rg2. Black must be modest and play 22... bxc6, allowing White to consolidate by 23. Rg2. The risk involved in 22... O-O-O is illustrated by the continuation 23. Nd5! Nxg3 (23... fxg3 24. Qf5+ Qxf5 25. Nxe7+ Kb8 26. exf5 favours White) 24. Nxe7+ Kb8 25. Rg2 Ne2+ 26. Qxe2 f3 27. c7+ Kxc7 28. Nd5+ Kb8 29. Nf4!, with a characteristic switch from indirect to direct defence; after 29... Rxg2+ 30. Qxg2 White captures the pawn on f3 and remains the better placed [Nunn note 1].

CH10-220 · 原书273页

1）20... N6h5 21. Bxf4! exf4 22. dxc6。黑方现在不能得子，因为22... fxg3?允许白后吃f7，而22... Nxg3可用23. Rg2应对。黑方必须知足地22... bxc6，允许23. Rg2巩固。22... O-O-O的风险见：23. Nd5! Nxg3（23... fxg3 24. Qf5+ Qxf5 25. Nxe7+ Kb8 26. exf5白优）24. Nxe7+ Kb8 25. Rg2 Ne2+ 26. Qxe2 f3 27. c7+ Kxc7 28. Nd5+ Kb8 29. Nf4!，典型地从间接转入直接防御；29... Rxg2+ 30. Qxg2之后白方吃掉f3兵，仍占优〔纳恩注1〕。

CH10-221 · 原书273—274页

2) 20... Rg4 (covering the square f4, lessening the danger on f7, and preparing ...h5-h4) 21. a6! (logically switching to the positional motif on the queenside and thus exploiting the slower tempo of Black's attack betrayed by the move ...Rg4) 21... b6 (after 21... O-O-O? 22. axb7+ Kb8 23. dxc6 Black would be in great difficulties) 22. dxc6 h5 23. Kh1! (having made good his superiority on the queen's wing, White goes over to direct defence; he returns the extra piece in order to simplify into a favourable ending) 23... h4 (Black would recover less material by 23... Nxe2 24. Ncxe2, since then 24... h4 is met by 25. Qf1, when White clarifies the position at the further expense of his e-pawn [Nunn note, page 274]) 24. Bxf4 exf4 (the alternative 24... Rxf4 25. Qg2 is equally in White's favour) 25. Qf1 Rxg3 26. Qxh3 Rxh3 27. Kg2 f3+ 28. Kxh3 fxe2 29. Re1 with a clear advantage to White.

CH10-221 · 原书273—274页

2）20... Rg4（保护f4，减轻f7的危险，并准备...h5—h4）21. a6!（合乎逻辑地转向后翼的局面棋主题，利用...Rg4暴露的攻势减速）21... b6（21... O-O-O? 22. axb7+ Kb8 23. dxc6，黑方非常困难）22. dxc6 h5 23. Kh1!（确立后翼优势后，白方转为直接防御，归还多子，简化为有利残局）23... h4（23... Nxe2 24. Ncxe2得到的子力更少；24... h4则25. Qf1，白方再付出e兵使局面明朗〔纳恩注2，见274页〕）24. Bxf4 exf4（24... Rxf4 25. Qg2同样有利于白方）25. Qf1 Rxg3 26. Qxh3 Rxh3 27. Kg2 f3+ 28. Kxh3 fxe2 29. Re1，白方明显占优。

AA-p275-fig01 · 原书275页

CH10-236 · 原书275页 In this position Black is to move and must discover a defence against White's two threats of Nh5 and Nf5. It is fairly easy to reach the conclusion that there is not a large choice; only two moves are worth considering — 1... f5 and 1... Kh8. The first appears more natural than the second, but in fact only the second provides an adequate defence. If 1... f5?, White replies 2. Bxf5! , after which 2... Rxf5 does not work because of 3. Nxf5 gxf5 4. Qg5+ Kf7 5. Qf6+ Ke8 (or 5... Kg8 6. Rf3) 6. e6, and Black loses; nor is 2... gxf5 satisfactory, e.g. 3. Nh5 Rd7 4. e6, when the rook is lost, since if 4... Re7, then 5. Rf3 is decisive: the one course remaining, therefore, is to decline the sacrifice by 2... Ne7, but then White plays 3. Bd3, threatening f5 as well as Nh5.	CH10-236 · 原书275页 此局轮黑走，必须应付Nh5、Nf5两个威胁。不难看出选择不多，只有1... f5和1... Kh8值得考虑。前者看似更自然，实际上只有后者能充分防御。1... f5?则2. Bxf5!，2... Rxf5因3. Nxf5 gxf5 4. Qg5+ Kf7 5. Qf6+ Ke8（或5... Kg8 6. Rf3）6. e6而败；2... gxf5也不行，例如3. Nh5 Rd7 4. e6，车将丢失，因为4... Re7则5. Rf3决定胜负。只剩下2... Ne7拒绝弃子，但白方3. Bd3，同时威胁f5、Nh5。

英文校订稿	中文初译稿
CH10-237 · 原书275页 1... f5? is weak because it 'opens up the position', with the result that White's queen becomes even more effective and is always creating new threats. On the other hand, 1... Kh8, which is also primarily a form of direct defence, should enable Black, provided he can survive the immediate pressure, to make good his material advantage and territorial superiority on the queenside. Let us now examine this second move.	CH10-237 · 原书275页 1... f5?的弱点在于“打开局面”，使白后更有效，不断制造新威胁。另一方面，1... Kh8也主要是直接防御；只要顶住眼前压力，黑方就应能发挥多子和后翼空间优势。现在考察此着。
CH10-238 · 原书275页 **1... Kh8! 2. Nf5**	CH10-238 · 原书275页 **1... Kh8! 2. Nf5**
CH10-239 · 原书275页 After 2. Nh5 Rg8 3. Nf6 (otherwise 3... Bf8 3... Rg7 4. Rf3 Black can just defend himself in time by 4... Qc3 5. Rd1 Be7 and if 6. Rh3, then 6... Bxf6.	CH10-239 · 原书275页 2. Nh5 Rg8 3. Nf6（否则3... Bf8!）3... Rg7 4. Rf3之后，黑方可以4... Qc3 5. Rd1 Be7，6. Rh3则6... Bxf6，恰好及时守住。
CH10-240 · 原书275页 **2... Rg8 3. Rf3 gxf5**	CH10-240 · 原书275页 **2... Rg8 3. Rf3 gxf5**
CH10-241 · 原书275页 Forced, since even 3... Bf8 does not prevent White from sacrificing his queen on h7 and mating with the rook on the h-flle.	CH10-241 · 原书275页 强制。即使3... Bf8，也无法阻止白后在h7弃后，再由车在h线将杀。
CH10-242 · 原书275页 **4. Rh3 Rg7 5. Bxf5 (D)**	CH10-242 · 原书275页 **4. Rh3 Rg7 5. Bxf5（见图）**
CH10-243 · 原书276页 Now White threatens 6. Bxh7 and 7. Bg6+ followed by mate with the queen at h8, but Black is a knight up at this stage, so the possibility of defence by giving back material arises. As a result of this increase in his resources, Black's defence turns suddenly from direct to indirect, only in the end to return again, after the 'detour' , to direct defence.	CH10-243 · 原书276页 白方现在威胁6. Bxh7、7. Bg6+，再由后在h8将杀；但黑方此时多一马，所以可归还子力防守。防御资源增加，使黑方突然由直接转为间接防御，最终又在“绕行”后回到直接防御。

英文校订稿	中文初译稿
CH10-298 · 原书281页 Up to here Black has correctly carried through a direct defence without weakening his pawn position, at the same time keeping his trumps in reserve (the c-file and control of the central post at d5). All this has been entirely appropriate to the fairly modest commitments taken on by White. Now he mistakenly supposes that the moment for a counterattack has arrived and makes a careless move, which White could have punished. The situation required direct defence to be continued for one more move, namely, by a renewed consolidation of the king's position by 6... Kg8. The reason is that Black may eventually be forced (by Bg5) to play ...g6, after which Bh6 would threaten the rook protecting f7. This point can be covered by the king after ...Kg8; consequently, Black may then use both his rooks on the c-file, while retaining a sufficient direct defence of the castled position by ...g6, if necessary. 6... h6 would be weaker on account of7 g4, while 6... Rc7 is also incorrect, e.g. 7. Bg5 h6 8. Bf4 followed by g4.	CH10-298 · 原书281页 至此黑方正确地直接防御，没有削弱兵形，同时保留王牌，即c线及对d5中心据点的控制。这完全适合白方所承担的相对有限的义务。现在黑方误以为反击时机已到，随手一着，本可被白方惩罚。局势要求再作一着直接防御，即6... Kg8再次巩固王的位置。原因是黑方以后可能被Bg5迫使...g6，届时Bh6将攻击保护f7的车。...Kg8后，王本身可以保护f7；因此黑方可把双车用于c线，必要时仍用...g6充分直接防御王城。6... h6因7. g4较弱；6... Rc7也不对，例如7. Bg5 h6 8. Bf4，接着g4。

CH10-320 · 原书282—283页 If one leaves aside Black’s unpunished mistake on the sixth move, then the whole course of the game is a good illustration of the relationship between the scale of the attacker’s commitment and the method of defence employed. In the first phase White is not heavily committed by his rook’s excursion and Black carries out a cautious direct defence without compromising his king position. He also maintains his hold on the c-file and the centre and eliminates one enemy unit — the light-squared bishop. With f3 and g4 White has already taken on greater obligations and so the time is ripe for indirect defence by means of an action along the c-file. As soon as another unit is eliminated (the knight on e5) it is all over with White’s attack, whereas the counterattack grows from move to move, with the lack of communication between the white rooks as the main cause of White’s misfortune.	CH10-320 · 原书282—283页 若撇开黑方第6着未被惩罚的错误，对局全过程很好地说明了进攻方承担义务的程度与防御方法之间的关系。第一阶段白车出游，白方承担的义务不大；黑方谨慎地直接防御，不损害王城，同时保持c线与中心的控制，消除一枚敌子——白格象。f3、g4后白方义务增大，沿c线行动进行间接防御的时机成熟。再消除e5马以后，白方攻势完全结束，黑方反击则步步增强；白双车失联是白方不幸的主要原因。

英文校订稿	中文初译稿
CH10-321 · 原书282页 · 纳恩编者注 1 White has an even simpler win by 7. Bg5!, after which Black must surrender a piece to avoid being mated on h7.	CH10-321 · 原书282页 · 纳恩编者注 〔纳恩注1〕白方还有更简单的7. Bg5!获胜，黑方必须送掉一子，才能避免在h7被将杀。
CH10-322 · 原书283页 **Defence by a central thrust**	CH10-322 · 原书283页 **以中心突击防御**
CH10-323 · 原书283页 Attacks on the castled king in which the situation in the centre does not play a greater or lesser part are extremely rare, and as a rule it is precisely the soundness of the attacker's central formation which provides the basis for his attack. If this formation is not sound enough, the defender may use indirect defence against it in the first instance, aimed against the central formation's most vulnerable point.	CH10-323 · 原书283页 中心状况完全不起作用的王城攻击极少。通常正是进攻方中心阵形的稳固性，构成进攻基础。若阵形不够稳固，防守方首先可以针对它最脆弱的一点进行间接防御。
CH10-324 · 原书283页 Why is it that the centre is quite so important and sensitive in the particular case of an attack on the castled king? Because this kind of attack is one of the most complex and many-sided operations in chess, demanding the maximum collaboration of the pieces and a control over all possible consequences right up to the endgame. The centre is the most versatile area on the chessboard; it provides the best conditions for the full co-operation of the pieces — the basis on which positional play is founded and a prerequisite for a favourable endgame. Many-sidedness is the common property belonging to a sound attack on the castled king and to the centre, and this accounts for their mutual interdependence. Correct defence must also be many-sided — this we have seen in the last series of examples — and so each 'little crack in the centre' is more important to the defence than a variety of other weaknesses on the attacker's side.	CH10-324 · 原书283页 为什么中心在王城攻势中尤其重要而敏感？因为这类攻击是棋局中最复杂、最多面的行动之一，要求子力最大程度合作，并掌握一直到残局的所有可能后果。中心是棋盘上用途最广的区域，为子力充分协作提供最佳条件；这既是局面棋的基础，也是有利残局的前提。多面性是可靠的王城攻击与中心的共同属性，解释了两者相互依存。前面一组实例已表明，正确防御也必须具有多面性，因此“中心的每一道小裂缝”，对防守方都比进攻方其他各种弱点更重要。
CH10-325 · 原书283页 In some of the examples so far we have seen the centre acting as the basis of an attack, while in others the defender has employed indirect defence based on destroying the attacker's centre by sacrificing a piece. We have noticed particularly the case where the defender strives to centralize his pieces — giving a position which as a rule makes possible a combination of direct defence and the indirect form on the other flank. It still remains for us to look at the case of defence by means of a pawn thrust against the attacker's central formation.	CH10-325 · 原书283页 此前有些实例中，中心充当攻击基础；另一些实例中，防守方通过弃子摧毁进攻方的中心，进行间接防御。我们尤其注意过防守方力求把子力集中到中心的情况：这种局面通常允许把直接防御与另一翼的间接防御结合起来。剩下还要考察的是，以兵突击进攻方的中心阵形来防御。
CH10-326 · 原书283页 Before we pass on to examples, we must be clear that we are concerned here with a central thrust of a particular kind. For why should such a thrust be significant just at the critical phase of the attack? Why did the player not employ it earlier? The point is precisely that we are dealing here with cases where in fact the central thrust is not useful before the crisis, because the attacker has good replies to it. Only when he has increased his commitments and deployed his pieces for the attack does the moment for a thrust in the centre arise; and very often this occurs at a precise, given moment, not a move earlier or later.	CH10-326 · 原书283页 举例前必须明确，这里讨论的是特殊的中心突击。为什么它恰在进攻的关键阶段才有意义？棋手为何不早用？要点就在于：危机出现之前，中心突击其实没有用，因为进攻方有良好应对。只有在进攻方承担了更多义务、部署子力进攻之后，中心突击的时机才出现；而且往往恰在某一精确时刻，早一步或晚一步都不行。
CH10-327 · 原书283页 The following famous game provides a good example of a defensive thrust in the centre.	CH10-327 · 原书283页 下面这盘名局，是防守性中心突击的好例子。

B

阿廖欣—鲍特维尼克，10. g4后。

AA-p284-fig01 · 原书284页

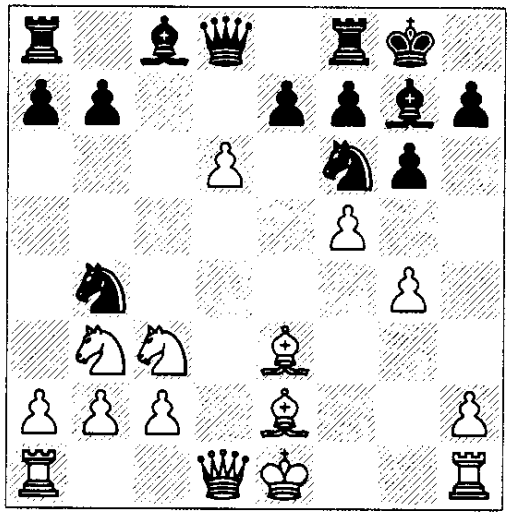

CH10-330 · 原书284页 In choosing the pawn avalanche as a means of attacking the castled king at an early stage of the game, White has undertaken a considerable obligation to carry out his attack incisively to the end. For if Black has his say, his counterattack will find a mass of weak points, files, and diagonals in White's territory; if an endgame is reached, White's advanced pawns may easily become 'cannon-fodder'.	CH10-330 · 原书284页 白方选择在对局早期发动兵雪崩攻击王城，便承担了必须把攻势锐利地贯彻到底的重大义务。因为若黑方获得发言权，其反击会在白方阵地找到大量弱点、直线和斜线；若进入残局，白方前冲的兵容易成为“炮灰”。
CH10-331 · 原书284页 The moment of undertaking an obligation is also the moment of crisis, the moment for the thrust in the centre, which in the Sicilian as a whole, and in this position particularly, is unstable. Botvinnik perceived the correct moment and struck with 10... d5!.	CH10-331 · 原书284页 承担义务的时刻，也是危机的时刻，是中心突击的时刻。整个西西里防御的中心都不稳定，此局面尤其如此。鲍特维尼克识别了正确时机，以10... d5!出击。
CH10-332 · 原书284页 **10... d5!**	CH10-332 · 原书284页 **10... d5!**
CH10-333 · 原书284页 Let us first see why ...d5 is correct at the precise moment when White plays g4. Let us suppose he has played 10. O-O and examine the difference.	CH10-333 · 原书284页 先看为什么恰在白方g4时...d5正确。假设白方10. O-O，比较二者区别。
CH10-334 · 原书284页 1) 10. O-O d5? 11. e5 Ne8 (11... d4 does not work, since White can simply take the pawn) 12. Bf3 Nc7 13. Nc5, when Black must accept the weakening of his position by Nxe6 fxe6, since 13... d4 is defeated by 14. Bxc6.	CH10-334 · 原书284页 1）10. O-O d5? 11. e5 Ne8（11... d4无效，白方直接吃兵即可）12. Bf3 Nc7 13. Nc5，黑方必须容忍Nxe6 fxe6削弱兵形，因为13... d4有14. Bxc6反驳。

英文校订稿	中文初译稿
CH10-335 · 原书284页 2) 10. g4 d5! 11. e5 d4! (now this move is good) 12. Nxd4 (or 12. exf6 Bxf6, when Black wins the piece back with the better game) 12... Nxd4 13. Bxd4 Nxg4! 14. Bxg4 Bxg4, and Black preserves the material balance while gaining the advantage with regard to space, position, and time. There is undoubtedly a great difference between the first and second instances of ...d5.	CH10-335 · 原书284页 2）10. g4 d5! 11. e5 d4!（现在此着很好）12. Nxd4（或12. exf6 Bxf6，黑方吃回一子且局面更好）12... Nxd4 13. Bxd4 Nxg4! 14. Bxg4 Bxg4，黑方保持子力均衡，同时在空间、局面与时间上占优。前后两种...d5的差别无疑很大。
CH10-336 · 原书285页 Now the question arises why ...d5! is necessary in answer to 10. g4 and what happens if Black does not employ the defensive central thrust. This can be answered by citing the continuation of the game Foltys-Eliskases, Podebrad 1936, where in the same position Black met 10. g4 with 10... Na5 aiming at the square c4. The continuation was 11. g5 Ne8 12. Bd4 (in the game Kan-Botvinnik, Moscow, 1936, 12. Qd2 was played, but Foltys' move is better) 12... Rc8 13. h4 Nc4 14. Bxc4 Rxc4 15. Qd3 Rc8 16. O-O-O Qd7 17. Rd2 Bg4 (to combat h5, but it surrenders d5 to the enemy knight) 18. Nd5 b6 19. f5! (the avalanche begins to move; Black cannot take the pawn, since the eventual Nxe7+ is decisive) 19... e6 20. Bxg7 Kxg7 21. f6+ Kh8 22. Ne7 Rd8 23. Nd4 Qa4 24. Kb1 Nc7 25. h5 gxh5 26. Rdh2 Rd7 27. e5 (threatening 28. Qxh7+ Kxh7 29. Rxh5+ mating) 27... Rxe7 28. Rxh5 Bxh5 29. Rxh5 1-0.	CH10-336 · 原书285页 现在的问题是，为什么10. g4后必须...d5!？黑方若不用这次防守性中心突击会怎样？福尔蒂斯—埃利斯卡塞斯，波杰布拉迪，1936年的后续可以回答。同一局面，黑方10... Na5瞄准c4。此后11. g5 Ne8 12. Bd4（卡恩—鲍特维尼克，莫斯科，1936年走12. Qd2，但福尔蒂斯此着更好）12... Rc8 13. h4 Nc4 14. Bxc4 Rxc4 15. Qd3 Rc8 16. O-O-O Qd7 17. Rd2 Bg4（应付h5，却把d5交给敌马）18. Nd5 b6 19. f5!（雪崩开始滚动；黑方不能吃兵，因为以后Nxe7+决定胜负）19... e6 20. Bxg7 Kxg7 21. f6+ Kh8 22. Ne7 Rd8 23. Nd4 Qa4 24. Kb1 Nc7 25. h5 gxh5 26. Rdh2 Rd7 27. e5（威胁28. Qxh7+ Kxh7 29. Rxh5+将杀）27... Rxe7 28. Rxh5 Bxh5 29. Rxh5 1-0。
CH10-337 · 原书285页 Now to return to the Nottingham game, in which Botvinnik did not allow himself to be smothered in this way.	CH10-337 · 原书285页 现在回到诺丁汉之局，鲍特维尼克没有允许自己这样窒息。
CH10-338 · 原书285页 **11. f5**	CH10-338 · 原书285页 **11. f5**
CH10-339 · 原书285页 Clearly, this is the only alternative to 11. e5 which has already been analysed. If 11. exd5 Nxd5 12. Nxd5, Black would gladly exchange queens by 12... Qxd5, thus winning the b-pawn, to say nothing of the ending.	CH10-339 · 原书285页 显然，除了已分析的11. e5，只剩这一选择。11. exd5 Nxd5 12. Nxd5，黑方乐于12... Qxd5兑后，这不仅涉及残局，还会赢得b兵。
CH10-340 · 原书285页 **11... Bc8**	CH10-340 · 原书285页 **11... Bc8**
CH10-341 · 原书285页 Though the bishop has to withdraw, it is still aggressively placed as far as White's weak pawns at f5 and g4 are concerned.	CH10-341 · 原书285页 象虽然后退，但针对白方f5、g4弱兵而言，它的位置仍有攻击性。
CH10-342 · 原书285页 **12. exd5 Nb4**	CH10-342 · 原书285页 **12. exd5 Nb4**
CH10-343 · 原书285页 There is to be no more talk of an attack on the king; the players are now concerned with a struggle for the centre pawn and the d5-square. If White holds out, he can expect success, but if Black overcomes the advancing pawn, the first player's prospects are poor.	CH10-343 · 原书285页 杀王已经谈不上了，双方现在争夺中心兵与d5格。白方若能撑住，就有望成功；黑方若征服这个前进兵，则白方前景堪忧。

英文校订稿	中文初译稿
CH10-345 · 原书285页 Whenever Alekhine made an unexpected move the world of commentators dutifully gave it one or two exclamation marks. This happened in the case of this move too, which abandons the struggle for the square d5 and, in fact, also risks losing the game.	CH10-345 · 原书285页 每当阿廖欣走出意外之着，评注界总尽职地加一两个叹号。这着也如此；但它放弃d5争夺，实际上还冒着输棋风险。
CH10-346 · 原书285页 A better line here is 13. Bf3! gxf5 14. a3 fxg4 15. Bg2. Suggested long ago by Dr Euwe, this was tried in the 2nd match game between Fischer and Reshevsky, New York 1961 when White secured an advantage after 15... Na6 16. Qd3 e6 17. O-O-O Nxd5 18. h3 g3 19. Rhg1 Qd6 20. Bxd5 exd5 21. Nxd5 Kh8 22. Bf4 Qg6. Now Fischer played 23. Qd2 but 23. Qf3! seems to me to be even stronger.	CH10-346 · 原书285页 较好的是13. Bf3! gxf5 14. a3 fxg4 15. Bg2。尤伟博士很早就提出过，后来菲舍尔—雷舍夫斯基，纽约，1961年对抗赛第2局采用。15... Na6 16. Qd3 e6 17. O-O-O Nxd5 18. h3 g3 19. Rhg1 Qd6 20. Bxd5 exd5 21. Nxd5 Kh8 22. Bf4 Qg6，白方取得优势。菲舍尔接着23. Qd2，但我看23. Qf3!更强。
CH10-347 · 原书285页 **13... Qxd6?**	CH10-347 · 原书285页 **13... Qxd6?**

英文校订稿	中文初译稿
CH10-348 · 原书285—286页 Alekhine's original assertion that 13... exd6! was impossible because of 14. a3 Nc6 15. g5 Ne8? 16. f6 etc., has remained unchallenged in chess literature. It is clear, however, that in this kind of situation it is worth looking to see whether the sacrifice of a piece will work or not. Indeed, sound logic argues that it must work, for the whole variation quoted by Alekhine so strengthens Black's position that it is worth his giving up a knight for two pawns. Above all, White's position is exposed as a result of his pawn advances: the thrust d6 leaves him without a 'backbone' in the centre; the reply ...exd6 opens up the e-file and the diagonal d8-h4, while g5 relinquishes control of the c8-h3 diagonal to Black's c8-bishop. The sacrifice can take a number of forms, but I shall give the one which seems best to me. It runs 13... exd6! 14. a3 Nc6 15. g5 Re8! with the following possibilities:	CH10-348 · 原书285—286页 阿廖欣最初断言，13... exd6!不行，因为14. a3 Nc6 15. g5 Ne8? 16. f6等。这一说法在棋书中一直未受质疑。然而，这种局面显然值得检查弃子是否可行。事实上，合乎逻辑的推理表明它一定可行：阿廖欣给出的整个变化如此加强黑方局面，值得以一马换两兵。首要的是白方冲兵使局面暴露：d6令中心失去"脊梁"；...exd6打开e线和d8—h4斜线；g5则把c8—h3斜线交给c8象。弃子可有多种形式，这里给出我认为最好的一种：13... exd6! 14. a3 Nc6 15. g5 Re8!，有以下可能：

B

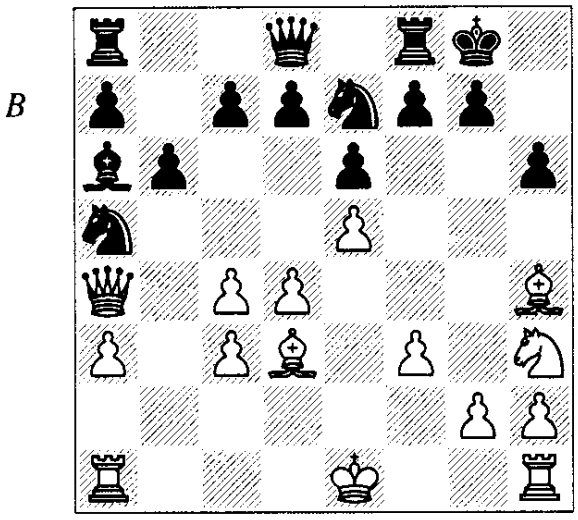

阿廖欣—鲍特维尼克，13. d6后。

CH10-379 · 原书289页

Here Burn timidly played 10... g6?; this was followed by 11. h5 Re8 12. hxg6 hxg6 13. Qc2 Bg7? (he should have played 13... Kg7 and if 14. O-O-O then 14... Rh8) 14. Bxg6 fxg6 15. Qxg6 Nd7 16. Ng5 Qf6 17. Rh8+ Kxh8 18. Qh7#.

CH10-379 · 原书289页

伯恩怯懦地10... g6?，随后11. h5 Re8 12. hxg6 hxg6 13. Qc2 Bg7?（应13... Kg7；14. O-O-O则14... Rh8）14. Bxg6 fxg6 15. Qxg6 Nd7 16. Ng5 Qf6 17. Rh8+ Kxh8 18. Qh7#。

CH10-380 · 原书289—290页

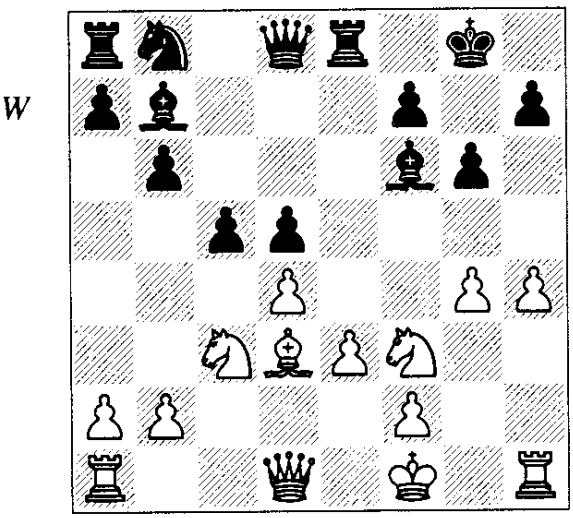

In playing 10... g6? Burn probably wished to exclude the possibility of the classic bishop sacrifice; 10... h6? would not have been correct on account of 11. g4. But is the sacrifice really threatened? And has Black no better move to prevent it than one which weakens his king position? It is an interesting fact here that there is no threat of a sacrifice at all in the original position, yet, if Black plays 10... Re8 or 10... Nd7, it is already, in practice anyway, rather dangerous, although it would still really be incorrect. Let us now play Black's most natural move, 10... c5!, and see why the sacrifice is incorrect: 11. Bxh7+ Kxh7 12. Ng5+ 12... Kh6! (not 12... Kg6 because of 13. Qd3+ nor 12... Kg8 on account of 13. Qh5) 13. Ne2 (White's most incisive move) 13... g6 14. Nf4 Bxg5! (otherwise 15. h5 is strong; 14... Kg7 fails against 15. Nge6+) 15. hxg5+ Kg7 (if 15... Kxg5 then 16. Rh5+ affords good attacking prospects) 16. Rh6 (had Black played ...Nd7 rather than ...c5 on his tenth move, White would now have a chance with 16. Qg4) 16... Rh8! [Nunn note 1] (16... Qxg5 allows White to get some material back by 17. Rxg6+) 17. Rxg6+ (or 17. Qg4 Rxh6 18. gxh6+ Kh7) 17... fxg6 18. Ne6+ Kg8 19. Nxd8 Rh1+ 20. Kd2 Rxd1+ 21. Rxd1 Bc8 22. dxc5 Kf8! 23. c6 Ke8 24. c7 Na6 with advantage to Black.

CH10-380 · 原书289—290页

伯恩10... g6?大概是想排除古典弃象；10... h6?因11. g4也不对。但弃象真有威胁吗？黑方难道没有不削弱王城的防范办法？有趣的是，初始局面中根本没有弃象威胁；但若黑方10... Re8或10... Nd7，实际对局中弃象就已相当危险，尽管客观上仍不正确。现在走黑方最自然的10... c5!，看看弃象为何不成立：11. Bxh7+ Kxh7 12. Ng5+，12... Kh6!（不是12... Kg6，因为13. Qd3+；也不是12... Kg8，因为13. Qh5）13. Ne2（白方最锐利的着法）13... g6 14. Nf4 Bxg5!（否则15. h5很强；14... Kg7有15. Nge6+反驳）15. hxg5+ Kg7（15... Kxg5则16. Rh5+，白方有良好进攻前景）16. Rh6（黑方第10着若走...Nd7而非...c5，白方现在可16.Qg4获得机会）16...Rh8!〔纳恩注1〕（16... Qxg5允许17. Rxg6+追回部分子力）17. Rxg6+（或17. Qg4 Rxh6 18. gxh6+ Kh7）17... fxg6 18. Ne6+ Kg8 19. Nxd8 Rh1+ 20. Kd2 Rxd1+ 21. Rxd1 Bc8 22. dxc5 Kf8! 23. c6 Ke8 24. c7 Na6，黑优。

英文校订稿	中文初译稿
CH10-381 · 原书290页 Accordingly, there was no threat of a sacrifice and Burn's 10... g6? simply weakened the position without any necessity; this is always a much more dangerous thing than a forced weakening, as Tartakower so finely expressed in his Hypermodern. (For compulsion creates antitheses and hence the possibility of counterplay or compensation, while in the case of a voluntary weakening there is only a naked weak spot without compensation !)	CH10-381 · 原书290页 因此，本来没有弃象威胁，伯恩10... g6?只是无必要地削弱局面。正如塔塔科维尔在《超现代国际象棋》中说得妙，这永远比被迫削弱危险得多。（被迫行动会产生对立因素，因而可能得到反击或补偿；主动削弱却只有赤裸裸的弱点，没有补偿！）
CH10-382 · 原书290页 We shall now examine an example of play from the above diagram, where Black correctly maintains the tension in the centre as a means of defence, while avoiding as much as possible any weakening of his king position.	CH10-382 · 原书290页 现在从上图考察一种示范走法：黑方正确维持中心紧张来防御，同时尽量避免削弱王城。

CH10-388 · 原书290页 The pressure in the centre has made White resort to artificial castling.	CH10-388 · 原书290页 中心压力迫使白方采取人工易位。
CH10-389 · 原书290页 **12... g6 (D)**	CH10-389 · 原书290页 **12... g6（见图）**
CH10-390 · 原书290—291页 This weakening is necessary and well-founded here, and therefore not an error. Black perceives the prospects that his light-squared bishop has on the long diagonal, and to open this up he needs to maintain the pressure against d4; to achieve this his dark-squared bishop must also remain on its long diagonal, and accordingly the square g7 must be vacated to provide against g5. Black is naturally not afraid of the ‘hanging pawns’ arising from dxc5; indeed he actually wants to induce them. In the presence of the two bishops such pawns are not usually considered a weakness in any case; here there is the additional matter of forcing open the light-squared diagonal.	CH10-390 · 原书290—291页 这里的削弱是必要而有根据的，所以并非错误。黑方看到了白格象在长斜线上的前景，而要打开它，就必须保持d4压力；为此黑格象也须留在自己的长斜线上，因此必须腾出g7以应付g5。黑方自然不怕dxc5形成的“悬兵”，实际上还想诱使它们出现。有双象时，这类兵通常本就不算弱点；这里还可借此强制打开白格斜线。
