CH12-1 · 原书334页 **12 The attack on the king as an integral part of the game**	CH12-1 · 原书334页 **第十二章 杀王进攻：对局不可分割的一部分**
CH12-2 · 原书334页 We have examined the various aspects of the attack on the castled king and have covered each topic on the basis of present-day knowledge of the art of chess. This material has been presented with all the difficulties and deficiencies of a pioneer, but with the joy of a discoverer who has seen in new knowledge a confirmation of his faith in the values of chess and his own general theory of the game.	CH12-2 · 原书334页 我们已经考察了攻击易位王的各个方面，并依据本书写作时的棋艺认识讨论了各个专题。这些材料的呈现，难免带有开拓者所面对的困难和不足；但其中也有发现者的喜悦，因为新的认识进一步印证了他对国际象棋价值的信念，以及他本人关于这一游戏的总体理论。
CH12-3 · 原书334页 The attentive reader who has battled his way with the writer from chapter to chapter will have observed the steady widening of the problem of the attack on the king; we began with the basic techniques of combination and have progressed to the kind of understanding which characterizes mastery of the game. The logical path we have taken has justified its call for a high degree of effort in return for new knowledge; its purpose is to show us the significance of the attack on the castled king in the full context of a game of chess.	CH12-3 · 原书334页 细心的读者一路随作者逐章探究，应当已经注意到，杀王进攻这个课题的范围在不断扩大：我们从组合的基本技术出发，逐步进入只有掌握高深棋艺才能达到的认识层次。沿着这条合乎逻辑的道路付出大量努力，我们获得了新的知识，因而这些努力是值得的。这条道路的目的，是让我们把攻击易位王放到整盘棋的背景中，理解它的意义。
CH12-4 · 原书334页 From our examination of the defence against a kingside attack and of the phases of such an attack, it has become clear that a correct attack is conditioned by the situation on all parts of the board and also by all that has happened in the earlier course of the game. An attack on the king is not some strange, exceptional, and daring operation like a grand slam in bridge. It is an action which is both logical and necessary; an action on which a player decides at a certain stage of the game; sometimes, indeed, he must decide on it, if his opponent is not to obtain an advantage or if the position is not to fizzle out into a draw.	CH12-4 · 原书334页 通过考察抵御王翼进攻的方法及进攻的各个阶段，我们已经明白：正确的进攻取决于棋盘各处的形势，也取决于此前整盘棋的发展。杀王进攻并不是桥牌大满贯那样奇异、特殊而大胆的行动，而是合乎逻辑、确有必要的行动，是棋手在对局某一阶段作出的决定。有时，为了不让对手取得优势，或不让局面逐渐消解为和棋，他甚至必须作出这样的决定。
CH12-5 · 原书334页 Lasker observed long ago that every action is essentially a diversion, a transition from equality to some spatial or temporal commitment. An attack on the king demands a very large diversion both in terms of the number of pieces involved and of the degree of commitment arising out of any pawn moves it entails. A considerable diversion of this kind also logically needs a considerable number of preconditions, as well as a knowledge of how these conditions are interrelated.	CH12-5 · 原书334页 拉斯克早就指出，任何行动本质上都意味着力量的转移，也意味着从均衡状态转向在空间或时间上作出某种难以收回的投入。杀王进攻所需的力量转移很大：参与的棋子很多，随之而来的冲兵又会使局面发生程度不等的不可逆变化。如此大规模的力量转移，合乎逻辑地要求相当多的先决条件，同时还要求理解这些条件之间的关系。
CH12-6 · 原书334—335页 It follows, therefore, that the attack on the castled king is an extremely difficult operation, which is based on a perfect mastery of all the forms of chess technique. Even in the early stages of the opening the first seeds of the preconditions for an attack on the king are already being sown, and the tense struggle for the central squares is tightly bound up with the successful outcome of the attack or defence. The characteristic features of a position, the weaknesses on both sides, and the elements that affect the endgame — all these accumulate and become intertwined in such a way that at a certain moment they impel the player to decide on the final objective of his play.	CH12-6 · 原书334—335页 因此，攻击易位王是一项极其困难的行动，需要全面、熟练地掌握各种棋艺技术。早在开局初期，杀王进攻先决条件的种子就已播下；对中心格的紧张争夺，与此后进攻或防守的成败密切相连。局面的特点、双方的弱点，以及影响残局的各种因素，不断积累、交织，到了某一时刻，就会促使棋手决定自己行棋的最终目标。

CH12-7 · 原书335页 This is the moment of crisis in the drama of the games of great masters, when it has to be decided whether it is best to continue promoting the preconditions for an attack on the king or to seek a favourable ending. The decision is not easy, for both courses demand not only technique but the ability to weld all the elements involved into a whole; moreover, we are still in the dark about many of the laws governing this process.	CH12-7 · 原书335页 这就是大师对局这出戏剧中的关键时刻：应当继续创造杀王条件，还是谋求有利残局？这一决定并不容易，因为两条道路都不仅要求技术，还要求把所有相关因素融合成一个整体；而支配这一过程的许多规律，我们仍然没有弄清。
CH12-8 · 原书335页 Chess skill at the present time comprises a mastery of combinative techniques and the possession of mature positional judgment, while the science of the game has cleared up the problem of the centre in the majority of openings. However, we are still a long, long way from a thorough knowledge of the laws governing the methods of integrating all the elements into a strategic whole. And where there is insufficient knowledge one proceeds 'by feel', or in other words, one takes risks. The endgame and the attack on the king are two areas about which our knowledge is incomplete, but they are also two directions in which chess can be further explored and through which the ancient game can be raised to a still higher level.	CH12-8 · 原书335页 就本书写作时而言，高超棋艺包括熟练的组合技术和成熟的局面棋判断；国际象棋理论也已阐明了大多数开局中的中心问题。然而，要彻底认识如何把各种因素整合为战略整体，我们还相去甚远。知识不足时，就只能“凭感觉”行动，换言之，就是冒险。残局和杀王进攻，是我们认识尚不充分的两个领域；同时，它们也是继续探索国际象棋的两个方向，能够把这项古老的游戏推向更高的水平。
CH12-9 · 原书335页 We have said that there still exist areas in the art of chess where our knowledge is incomplete, and many of our readers may ask whether there are not at least some signposts pointing to where new knowledge might be found. The very attentive reader may also recall that mention was made in the Introduction of Alekhine's and Capablanca's understanding of the attack on the king and that a discussion on this subject was promised at the end of the book. Indeed, this is the right place for such a discussion, since the most difficult and arcane matters should be dealt with at the end, after everything else has been elucidated.	CH12-9 · 原书335页 既然棋艺中仍有我们尚未充分认识的领域，许多读者可能会问：至少有没有一些路标，指示我们到哪里寻找新的知识？非常细心的读者也许还记得，导言曾提到阿廖欣和卡帕布兰卡对杀王进攻的理解，并答应在书末讨论这个问题。现在正是合适的时候，因为最困难、最深奥的问题，应当在其他问题都已阐明之后，留到最后讨论。
CH12-10 · 原书335页 **The discoveries of Alekhine and Capablanca**	CH12-10 · 原书335页 **阿廖欣与卡帕布兰卡的发现**
CH12-11 · 原书335—336页 It is a slightly strange thesis that one should go back to the period before the Second World War and look for the culmination of the art of the attack on the king in the play of Alekhine and Capablanca. For have not Botvinnik and Smyslov, Keres and Bronstein, Reshevsky and Gligorić in their rich creativity in the field of chess discovered all that Alekhine and Capablanca knew and also gone on to add something else? It is indeed true that they have proceeded further in many respects, and perhaps even in their knowledge about the attack on the king they are the equals of the great masters of the past; in their actual games, however, they have not so far put it into practice to the full.	CH12-11 · 原书335—336页 主张回到第二次世界大战之前，在阿廖欣和卡帕布兰卡的对局中寻找杀王艺术的顶峰，似乎有些奇怪。难道鲍特维尼克和斯梅斯洛夫、凯列斯和布龙斯坦、雷舍夫斯基和格里戈里奇，在丰富的国际象棋创作中，不仅已经掌握了两位前辈的全部知识，而且还增添了新的内容吗？确实，他们在许多方面都走得更远；也许就杀王进攻的知识而言，他们也不逊于过去的大师。然而，在实际对局中，他们迄今尚未把这种认识充分付诸实践。

英文校订稿	中文初译稿
CH12-12 · 原书335—336页 If we delve into the whole of chess literature looking for games which serve to illuminate the logical integration of the attack on the castled king and the game in its entirety, then those of Alekhine and Capablanca remain the unsurpassed models; side by side with them may be placed a few of the games of Rubinstein, Keres, and Bronstein, though we shall find scarcely any new discoveries in them: the whole period from Alekhine's death to the present day has not been particularly fruitful in the sphere of the attack on the king. So one is justified in going back to Alekhine and Capablanca as the first to discover knowledge which to this day has been neither refuted nor superseded.	CH12-12 · 原书335—336页 如果遍览国际象棋文献，寻找能够说明怎样把攻击易位王合乎逻辑地融入整盘棋的对局，阿廖欣和卡帕布兰卡的作品仍是未被超越的典范。鲁宾斯坦、凯列斯和布龙斯坦的少数对局，可以与之并列，但其中几乎没有新的发现。从阿廖欣去世到本书写作时，这整个时期在杀王进攻领域并没有取得特别丰硕的成果。因此，回到阿廖欣和卡帕布兰卡，是有道理的：他们最先发现的那些知识，直到本书写作时仍未被推翻，也未被取代。
CH12-13 · 原书336页 As far as these actual discoveries by Alekhine and Capablanca are concerned, it can be said that they did not take the form of some new principle but rather depended on a new way of thinking, which proceeded subjectively and therefore in a manner which cannot be expressed or comprehended on a theoretical basis; by these methods they discovered moves which fulfil the chief principle of the attack on the castled king, namely, obtaining the maximum preconditions for an attack with the minimum of commitment.	CH12-13 · 原书336页 至于阿廖欣和卡帕布兰卡究竟发现了什么，可以说，那并不是某条新原则，而是一种新的思维方式。这种思考带有个人特性，因而不能完全用理论表述和理解。他们凭借这种方法发现的走法，体现了攻击易位王的首要原则：以最小限度的投入，创造尽可能充分的进攻条件。
CH12-14 · 原书336页 This principle in itself is a simple one and can be easily remembered, but playing in accordance with it is extremely difficult. Here two grades of values must be clearly distinguished: the one based on the value of the individual preconditions and the other on that of the successive commitments undertaken. This must then be resolved into a precisely ordered series of moves, while one must also be ready at any moment to convert the attack into some other thematic course of action — all of which requires considerable mastery.	CH12-14 · 原书336页 这条原则本身很简单，也容易记住，但要照着它下棋，却极其困难。这里必须分清两套价值尺度：一套衡量各项先决条件的价值，另一套衡量接连作出的投入。随后，还必须把这些判断落实为次序准确的一连串走法，同时随时准备把进攻转化为其他符合局面主题的行动。这一切都需要很高的棋艺。
CH12-15 · 原书336页 From a close study of the games of Alekhine and Capablanca one can conclude that they did indeed use a perfected method of thinking in the sense mentioned above; only, in the case of Alekhine this thinking was more analytical and logical, while with Capablanca it was more artistically intuitive. However, the results of this thinking, that is, the actual moves, do not appear to differ greatly to the outside observer.	CH12-15 · 原书336页 仔细研究两人的对局，可以看出，他们确实运用了上述意义上的完善思维方法。只是阿廖欣的思考更富于分析性和逻辑性，卡帕布兰卡则更多依靠艺术家的直觉。不过，旁观者从思考的结果，也就是具体走法来看，两者似乎并没有很大差别。
CH12-16 · 原书336页 However, Alekhine's discoveries can be somewhat more precisely defined than Capablanca's: Alekhine's output was more abundant, he 'lived chess' more deeply, and he was a more passionate analyser of his own games. A particular characteristic of his commentaries is the frequent use of the idea of commitment (just as with Lasker we get the idea of compensation, with Steinitz that of the balance of the position, and with Nimzowitsch that of centralization). One could say that of all masters Alekhine had the most refined sense of the degree of commitment, even though his temperament sometimes led him to be too eager.	CH12-16 · 原书336页 不过，相较于卡帕布兰卡，阿廖欣的发现可以界定得更准确一些：他的作品更多，对国际象棋的投入更深，对分析自己的对局也更有热情。他的评注有一个显著特点，就是经常运用“投入”这一观念，正如拉斯克强调补偿、斯坦尼茨强调局面的均衡、尼姆佐维奇强调中心化一样。可以说，在所有大师中，阿廖欣对这种投入程度的感觉最为细腻，尽管他的性格有时仍会使他操之过急。

CH12-17 · 原书336—337页 When Alekhine, with apparent nonchalance, played, for instance, h4 against the French Defence, this appeared to his contemporaries to be 'the pretentiousness of genius', but a closer analysis today reveals that behind such moves there lay a great deal of mental calculation and hard logic, and that this move h4 belongs exactly when it was played; a move earlier it would have been weak and on the next it would be too late!	CH12-17 · 原书336—337页 例如，阿廖欣在法兰西防御中看似漫不经心地走出h4，同代人往往把这看成“天才的任性”。但本书写作时更细致的分析表明，这类走法背后有大量计算和严密逻辑，而且h4恰恰应当在实战那个时刻走出：早一步就弱了，晚一步又来不及！

AA-p342-fig01 · 原书342页

CH12-87 · 原书342页 Can it be that White is justified in switching to an attack on the king after preparations which were clearly directed at the c-file? How does this fit in with our thesis on the need to fulfil a series of preconditions before opening an attack on the king? In fact, there is no contradiction; the preconditions are present, but they have arisen in a different way from those in the Alekhine-Asztalos game.	CH12-87 · 原书342页 白方此前的准备明明都针对c线，现在转而杀王，难道合理吗？这与我们所说的“发动杀王进攻之前必须具备一系列先决条件”，又怎样相容呢？其实没有矛盾：所需条件已经存在，只是它们的形成方式与阿廖欣对阿斯塔洛什一局不同。
CH12-88 · 原书342页 It is true that the preconditions for the attack on the castled king in this game have come about suddenly and somewhat incidentally; at the same time, this has occurred quite legitimately. The main point is that White's play, starting with 12. a4, serves two purposes: it maintains the pressure on the c-file and simultaneously improves the preconditions for an attack on the king. As a result of 12. a4 b4 and 18. b3 the position on the queenside became blocked, and this has reduced Black's prospects of counterplay, while 17. dxc5 resolved the tension in the centre.	CH12-88 · 原书342页 本局的杀王条件，确实形成得突然，多少像是附带的结果；但它们的形成又完全合乎棋理。关键在于，从12. a4开始，白方的走法同时服务于两个目标：维持c线压力，并改善杀王条件。12. a4 b4及18. b3使后翼封闭，减少了黑方反击的机会；17. dxc5则消除了中心的紧张局面。
CH12-89 · 原书342—343页 Furthermore, 13. Bxf6, 15. Bxe4, and 16. Qxe4 represent, in effect, a far-reaching elimination of Black's defending pieces; in the same way, the struggle revolving around the pawns on the c-file has forced Black (in 17... Qa5 and 18... Bxc5) to displace two pieces which are important for the defence of his king position. This is without doubt a full set of preconditions, built up with true Capablanca virtuosity and elan. Now White's knight, a sort of 'equus ex machina', stirs up a whirlwind attack on the king, against which there is hardly an adequate defence.	CH12-89 · 原书342—343页 此外，13. Bxf6、15. Bxe4和16. Qxe4，实际上大幅削减了黑方的防守子力；围绕c线兵展开的争夺，又迫使黑方以17... Qa5和18... Bxc5，把两枚重要的王城防守棋子调离。这无疑已经是一整套进攻条件，形成过程体现了卡帕布兰卡特有的精湛技艺和洒脱气度。现在，白马如同突然登场的救星一般，掀起一阵杀王旋风，黑方几乎难以抵挡。

Still, he should now have admitted that it was pointless to continue playing for an attack and striven, by paying careful attention to the central squares, to keep the game within the well-known 'margin of a draw'; for example, 20. Be3 Bxd4 21. cxd4 Rac8 22. Bb3! when Black, after 22... Nxe3 23. Rxe3 clearly has nothing either in the centre or on the c-file; nor does 22... b5 or the like offer anything very much. CH12-160 · 原书348页 The move suggested, 20... f5, signifies that Black is satisfied with a small advantage, whereas Capablanca's idea aspires to dynamic play on the c- and f-files. However, the preconditions for this are insufficient, for counterattacks too demand preconditions and entail commitments just as attacks on the king do. The laws which determine the connection between the two types of action dictate the form, timing, and tempo of the counterattack in accordance with the state of the attack. Thus, the degree to which the attacking units have been diverted conditions the extent and force of the counterattack. In this case, therefore, direct defence by 20... f5 would have been better than 20... Bxd4.	CH12-160 · 原书348页 建议的20... f5表示黑方满足于小优，而卡帕布兰卡的构思，则着眼于在c线和f线上展开动态行动。但是，所需条件尚不充分，因为反击与杀王进攻一样，也需要先决条件，也会带来投入。两类行动之间的联系有其规律：反击的形式、时机和速度，都必须适应进攻的实际状况。进攻子力偏离原位的程度，制约着反击的范围与力量。因此，本局直接以20... f5防守，比20...
