《国际象棋中局计划》

第二章：计划的各个阶段

英文 OCR 校正稿 + 中文翻译校对稿

文档性质	初译校对稿，非最终出版版本
内容范围	原书印刷页 68–86
段落编号	CH2-1 至 CH2-15；左右栏按编号严格对应
棋谱规范	中英文棋谱均采用现代 SAN；黑方单独棋步使用省略号；结果使用 1-0 / 0-1
术语延续	出子、先手、动象 / 动后 / 动马 / 动车、子力、得子 / 失子、弃子、冲起、过渡着等沿用既定规范
版本日期	2026-09-24

重点核对三阶段与四阶段计划、弱格和开放线、三盘完整例局，以及长篇变化中的行棋次序和术语一致性。

第二章：计划的各个阶段

经校正的英文 OCR	中文译文
CH2-1 **Stages of the Plan** **Squares and lines as special-purpose objects of the plan. The preparatory stage. Concrete definition of a position. Realisation of successes achieved** Every plan can usually be subdivided into several consecutive stages, one following another. A single great plan can be broken up, as it were, into several small plans, each with its own objectives and ways of achieving them. It also happens that the course of events forces one of the opponents, and sometimes even both, to change their ideas radically. As an example, we shall now try to sketch a picture of the execution of a three-stage plan. In the first stage of the struggle, an object for the creative plan has to be created. This stage is characterised by the absence of a concrete objective and is such that—by provoking the advance of some of the opponent's pawns, for example—it bears a particular, one might say narrowly tactical, character. In this part of the plan the opponents must be guided by general considerations based on the fundamental positional principles of play. The task of both sides is to create weak squares in the opponent's camp and, when the opportunity presents itself, weak points. At the same time, it is necessary to counteract the opponent's execution of the same task. Thus, at the first stage of the plan, each side must combine active operations with prophylactic measures against the weakening of its own position. In the second stage, the planned objective comes to light. The way of achieving it becomes increasingly clear, and the concrete definition of the game attains great depth. If the objective is achieved, one side transfers the struggle to the third stage, which proceeds under the heading of realising the advantage obtained. This stage may be called technical, but only to a certain extent, since it frequently requires the ability to employ methods arising from theoretical laws and rules. The opening represents a component part of the first stage. In several openings, particularly gambits, the process of struggle may also be regarded as the second stage of the plan. A single plan may have not only three stages, but four, five or even more. On the other hand, practice also knows one-stage plans. These occur most often in games where plans remain incomplete and conditions change, so that separate parts of the game prove to have no logical connection with one another.	CH2-1 **计划的各个阶段** **格与线路作为计划的专门目标对象；准备阶段；具体判断局面；兑现已经取得的成果** 任何计划通常都可以分成几个前后相继的阶段。一个宏大的总体计划，仿佛可以拆成若干小计划，各有自己的目标以及实现目标的途径。实战进程有时还会迫使一方，甚至迫使双方，彻底改变原来的构想。 下面先以三阶段计划为例，勾勒其实施过程的大致轮廓。 斗争的第一阶段，是为创造性计划建立一个目标对象。此时尚无具体目标；例如，棋手可能设法诱使对方某些兵冲起，因此这一阶段带有特殊的、甚至可以说是狭义战术性的特点。在计划的这一部分，双方只能以局面战的基本原则为依据，按照总体考虑来行动。双方的任务，都是在对方阵地中制造弱格，并在条件允许时制造弱点；同时又必须阻止对手完成同样的任务。所以，在计划的第一阶段，积极行动必须与预防措施并行，以免削弱自己的局面。 第二阶段中，计划所针对的目标逐渐显露，实现目标的道路也愈发清晰；此时，对局面的具体判断将达到很深的程度。 一旦目标实现，一方就会把斗争推进到第三阶段，即兑现已经取得的优势。这个阶段可以称作技术阶段，但也只能在一定程度上这样说，因为棋手往往仍需运用由理论规律和规则引出的各种方法。 开局阶段是第一阶段的组成部分。在若干开局中，尤其是弃兵开局中，开局里的斗争进程也可以视为计划的第二阶段。一个计划未必只有三个阶段，也可能有四个、五个乃至更多阶段。另一方面，实战中也存在单阶段计划。它们最常见于计划未能完成、局势条件不断变化的对局；因此，对局各部分之间往往不存在逻辑联系。
经校正的英文 OCR	**中文译文**
CH2-2 We devote the present chapter to plans in which weak squares and open lines serve as the principal purposeful objects. Accordingly, a plan directed toward these objects may be subdivided into the following stages: 1. the struggle to create weak squares or open lines; 2. the struggle to seize or occupy the weak squares or lines; 3. the realisation of the advantage arising from the occupation of weak squares or open lines.	CH2-2 本章所讨论的计划，以弱格和开放线为主要目标对象。 据此，针对这些目标的计划可以分为以下阶段： 1. 为制造弱格或开放线而斗争； 2. 为夺取、占据弱格或线路而斗争； 3. 兑现占据弱格或开放线所带来的优势。 先从一盘早在1909年圣彼得堡大赛中下出的对局说起。

经校正的英文 OCR	中文译文
We begin with a game played as far back as the St Petersburg tournament of 1909.	
Spanish Game	**西班牙开局**
White: R. Teichmann Black: O. Bernstein	白方：R. 泰希曼 黑方：O. 伯恩斯坦
`1. e4 e5 2. Nf3 Nc6 3. Nc3 Nf6 4. Bb5 d6 5. d4 Bd7 6. O-O Be7 7. Re1 exd4`	`1. e4 e5 2. Nf3 Nc6 3. Nc3 Nf6 4. Bb5 d6 5. d4 Bd7 6. O-O Be7 7. Re1 exd4`
It has been well known since the game Tarrasch–Marco (Dresden, 1892) that castling for Black at the present moment entails the loss of a pawn after `8. Bxc6 Bxc6 9. dxe5 dxe5 10. Qxd8 Raxd8 11. Nxe5`, since `11... Bxe4 12. Nxe4 Nxe4` is impossible because of `13. Nd3`.	自塔拉什—马尔科一局（德累斯顿，1892年）以来，人们早已知道：黑方此时易位会在`8. Bxc6 Bxc6 9. dxe5 dxe5 10. Qxd8 Raxd8 11. Nxe5`之后丢兵，因为`11... Bxe4 12. Nxe4 Nxe4`不成立，白方有`13. Nd3`。
`8. Nxd4 O-O 9. Bxc6 bxc6`	`8. Nxd4 O-O 9. Bxc6 bxc6`
This position can rightfully be called a theoretical opening position. It has occurred hundreds of times in practice, and even important authorities differ in their evaluations. Em. Lasker frequently and very successfully employed this variation for Black. However, many believed that White's advanced central e-pawn, a certain advantage in space and, finally, the weakness of Black's queenside pawns—which may play a role in the endgame—all make White's prospects more promising.	这一局面完全可以称为理论开局局面。它在实战中出现过数百次，甚至权威棋手对其评价也意见不一。伊曼纽尔·拉斯克执黑经常采用这个变化，并且战绩出色。不过，许多人认为，白方拥有前出的中心e兵、一定的空间优势，此外黑方后翼兵形还有弱点——残局中可能会产生影响；所有这些因素都让白方前景更好。
The diagrammed position is the starting point of planning for both opponents. White sets his sights on the advance e5. There have even been attempts to play it at once, but it became clear that after `10. e5 dxe5 11. Rxe5 Bd6` the position of Black's pieces improves, while White loses part of his achievement in the centre. Therefore the move e5 requires preparation. Black's task is to prevent the advance of the e-pawn by every possible means. To achieve this, he must create strong pressure on e5. At the same time, Black may make a demonstration on the open b-file, so as not to allow White to concentrate wholly on operations in the centre.	图示局面是双方制定计划的起点。白方着眼于冲起e5。实战中有人尝试立即这样走，但`10. e5 dxe5 11. Rxe5 Bd6`之后，黑方子力的位置得到改善，白方在中心取得的成果却有所丧失。因此，e5必须先作准备。黑方的任务则是千方百计阻止e兵前进；为此，必须对e5点施加强大压力。同时，黑方还可以在开放b线上摆出行动姿态，不让白方全力集中于中心。

经校正的英文 OCR	中文译文
CH2-3 `10. b3`	CH2-3 `10. b3`
This move might be described as tactical and incidental, bearing the character of an oversight. Interestingly, the same “mistake” (perhaps too strong a word in the present case) had been made three years earlier in Forgacs–Wolf (Nuremberg, 1906).	这步棋可以说是一次偶发的战术性疏忽。有意思的是，三年前的福加奇—沃尔夫一局（纽伦堡，1906年）中也曾出现过同样的“错误”——不过在这里用“错误”一词或许太重了。
The move `10. b3` is acceptable as a link in the plan to increase White's influence over e5, but `10. Bf4` serves this objective better. After White advances the pawn to b3, Black gains the possibility of the pawn march ...a5-a4 and, on this basis, a general offensive on the queen's flank. This offensive would appear quite logical after the bishop is transferred from e7 to g7, where it will restrain the advance e5 and at the same time support Black's attack on the a- and b-files from afar.	若把`10. b3`视为加强白方对e5控制这一计划中的一个环节，它并非不能接受；但`10. Bf4`更有助于实现这个目标。白兵冲到b3后，黑方获得了……a5-a4连续冲兵的可能，并可据此在后翼展开全面攻势。若黑方把象从e7转移到g7，这一攻势就相当合乎逻辑：象在g7既能远距离遏制e5，又能支援黑方在a线和b线上的进攻。
`10... Re8`	`10... Re8`
Black is carried away by his plan and does not notice the opportunity that has arisen to seize the initiative immediately. In the game mentioned above, Wolf played `10... d5!`, and after `11. e5 Bb4! 12. Bd2 Ng4` obtained the threats ...Qh4 and ...Bc5.	黑方一心贯彻自己的计划，却没有看到眼前立即夺取主动权的机会。在上面提到的对局中，沃尔夫走了`10... d5!`，`11. e5 Bb4! 12. Bd2 Ng4`之后，黑方形成……Qh4和……Bc5的威胁。

经校正的英文 OCR	中文译文
11. Bb2 Bf8 12. Qd3 g6 13. Rad1 Bg7	11. Bb2 Bf8 12. Qd3 g6 13. Rad1 Bg7
This position poses White a number of difficult problems. Black has created such a solid defensive line that it is very difficult for White to cross the frontier with e4-e5; without this, his heavy pieces, huddled together in the rear, are doomed to inactivity. He should therefore have persistently pursued his plan: the struggle for e5 with the aim of advancing the central pawn. The more consistent 14. f4 would have kept the initiative in White's hands.	这一局面给白方提出了许多难题。黑方构筑的防线如此坚固，白方很难用e4-e5越过这道边界；而如果做不到这一点，拥挤在后方的重子便注定无所作为。因此，白方理应坚持自己的计划：争夺e5格，力求冲起中心兵。更为一贯的14. f4可以让白方继续掌握主动权。
Teichmann, however, is not one of those players inclined to take even a small risk, and cannot bring himself to do so. The move f4 appears to expose the king, permits the attacking reply ...Nh5, weakens e4 and, in the end, does not guarantee e4-e5. These considerations induce Teichmann to switch to defensive tactics, leading to further consolidation of the centre and the organisation of defence on the queen's flank.	然而，泰希曼并非那种愿意在棋局中哪怕只冒一点风险的棋手，他无法迫使自己这样下。f4看起来会暴露王位，允许黑方以……Nh5发起进攻，削弱e4点，而且最终也不能保证一定走成e4-e5。出于这些考虑，泰希曼转而采取防守策略，进一步巩固中心并组织后翼防守。
14. f3	14. f3
With this apparently modest move White neutralises the thrust ...Nh5, which, in conjunction with a future ...Be5 and ...Qh4, might begin a direct attack on the king's flank. For example, 14... Nh5 15. Bc1 (also possible is 15. Nde2 Qh4 16. Na4) 15... Be5 16. Nde2 Qh4 17. f4! Nxf4 18. Bxf4 Bxf4 19. g3, winning a piece.	这步表面朴素的棋化解了……Nh5冲击；后者与随后……Be5和……Qh4结合起来，本可成为直接进攻王翼的开端。例如：14... Nh5 15. Bc1（15. Nde2 Qh4 16. Na4也可以）15... Be5 16. Nde2 Qh4 17. f4! Nxf4 18. Bxf4 Bxf4 19. g3，白方得子。
Black therefore begins a plan of attack on the queen's flank.	于是，黑方开始实施后翼进攻计划。

经校正的英文 OCR	中文译文
CH2-4 14... Qb8 15. Bc1	CH2-4 14... Qb8 15. Bc1
Retreat! Teichmann realises that his operation with 10. b3 has failed. In the general “orchestra” of the white pieces, the role of the bishop on b2 has proved worthless, and Teichmann transfers it to e3 so that it can take part in the coming events.	退象！泰希曼认识到，自己以10. b3展开的行动已经失败。在白方各子组成的总体“乐队”中，b2象没有发挥任何作用，于是他把象转移到e3，以便参与即将发生的战斗。
15... Qb6 16. Na4	15... Qb6 16. Na4
On the immediate 16. Be3 there would have followed 16... c5 17. Nde2 a5.	若立即16. Be3，则有16... c5 17. Nde2 a5。
16... Qb7 17. Nb2 c5 18. Ne2 Bb5	16... Qb7 17. Nb2 c5 18. Ne2 Bb5
This may be called an “intermediate move”. Before placing the bishop on the square assigned to it in the plan, c6, Black considers it useful to provoke c4. Why is this necessary? Black intends to organise an attack on the b3-pawn by ...a5-a4, and for this it is very important to deprive that pawn of the protection of the c2-pawn.	这可以称为一步“过渡着”。黑方计划让象最终占据c6，但在此之前，他认为先诱使白方走c4很有用。为什么？黑方准备以……a5-a4组织对b3兵的攻击；为此，剥夺c2兵对白方b3兵的保护至关重要。
19. c4 Bc6 20. Nc3	19. c4 Bc6 20. Nc3
White blockades a4 as far as possible and anticipates the advance of the a-pawn. A battle begins around this point, with Black as the attacking side after seizing the initiative on move 14.	白方尽量封锁a4点，并预先考虑到a兵的冲起。围绕这个格子的战斗也随之展开；自第14步夺取主动权以后，黑方便一直是进攻方。
20... Nd7 21. Be3 Nb6 22. Rb1 a5 23. Bf2!	20... Nd7 21. Be3 Nb6 22. Rb1 a5 23. Bf2!
A deeply planned move whose aim is not discovered by the opponent. As will be seen later, it in fact prevents the immediate advance of the black a-pawn. The black queen finds itself in an unpleasant opposition with the white rook; if Black intends to continue the attack on the queen's flank, it	这步棋谋划深远，对手没有看出它的目的。后面可以看到，它实际上阻止了黑方a兵立即前进。黑后与白车处在令人不快的对位关系中；如果黑方还想继续进攻后翼，就应当把后从b线转移到c8或a6。

经校正的英文 OCR	中文译文
would be useful to remove the queen from the b-file to c8 or a6. `23... a4?` This move is a mistake. Admittedly, the pawn is recovered by force, which Bernstein had of course foreseen; but he fails to take into account that it is won back at the cost of the game. The conclusion is clear: an excessively direct execution of a plan can, despite a correct idea, lead to a deplorable result.	 `23... a4?` 这是一步错误。诚然，黑方能够强行收回一兵，伯恩斯坦当然也预见到了这一点；但他没有意识到，收回这兵要以整盘棋为代价。结论很清楚：即使计划的构想正确，执行得过于直截了当，也可能招致惨痛后果。

CH2-5
`24. Nbxa4 Nxa4`
 	
This too is unconsidered. Better was `24... Bxa4 25. bxa4 Qc6`; even then, however, the initiative passes to White after `26. Bh4 Nxa4 27. Nd5`.
 	
`25. bxa4 Qa6 26. Re2`
 	
Again an outwardly modest move, but in essence it prepares a powerful plan of attack on the king's flank. It is useful from several points of view: it prepares to double the rooks on the open b-file, frees e1 for the bishop and, in addition, defends the a2-pawn. The main, planned objective, however, comes to light only three moves later.
 	
`26... Bxa4`
 	
From move 23 onward Black goes downhill. He grabs the “poor” pawn without foreseeing the immediate punishment. A less pleasant but still lesser evil was `26... Bxc3`. The best defence, however, should be regarded as `26... Qc8`, followed by ...Qd7 or ...Qe6, placing the queen in the centre while retaining hopes of play on the a-file. In no circumstances can the white knight be allowed to reach d5 with tempo—that is, while creating a threat.
 	
It is useful to note here that in chess, as in life, once one has gone astray it is not easy to retain self-control and, without losing one's presence of mind, begin searching for new paths under unfavourable conditions. We often see a player who, after making a mistake and losing the thread of his thought, becomes agitated, excited and irritated, begins to play badly and aggravates his difficulties. Black's play in this game after the mistaken advance ...a4 gives precisely such an impression of annoyance and irritation.
 	
`27. Nd5!`
 	
The beginning of a plan of attack which is brilliantly carried through to the end over the course of twenty moves and completed with a mating construction.
 	
White now has the direct threat Nxc7, but the aim of the attack is not merely this. Its object is the weakened f6-square, for control of which the struggle now begins.
 	
White's plan can be divided into three stages: first, the exchange of the bishop which is the principal defender of f6; second, the attack on f6 and the invasion of that square; third, the realisation of the invasion. All the elements of the general methods of planning—concrete ideas, dynamic play and harmony of forces—are vividly reflected in the course of executing the plan.
	CH2-5
	`24. Nbxa4 Nxa4`
	
	这同样未经深思。较好的是`24... Bxa4 25. bxa4 Qc6`；不过即使如此，`26. Bh4 Nxa4 27. Nd5`之后，主动权仍将转到白方手中。
	
	`25. bxa4 Qa6 26. Re2`
	
	又是一步外表朴素的棋，实质上却在准备强大的王翼进攻计划。它有多方面用处：准备在开放b线上叠车；为象腾出e1格；此外还保护a2兵。不过，计划的主要目标要到三步以后才会显露。
	
	`26... Bxa4`
	
	黑方从第23步起便一路下滑。他抓走这个“可怜的”兵，却没有预见惩罚会立即到来。`26... Bxc3`虽然令人不快，但仍是较轻的灾难。最佳防守则应是`26... Qc8`，随后走……Qd7或……Qe6，把后放在中心，同时保留在a线上行动的希望。无论如何，都不能让白马带先手进入d5——也就是让它在制造威胁的同时占据该格。
	
	这里值得指出：下棋如同生活，一旦误入歧途，要保持自制、镇定地在不利条件下寻找新路并不容易。我们常常看到棋手犯错、思路断裂后变得焦躁、激动、恼怒，继而越下越差，使自己的困难更加严重。本局中，黑方错误地冲起……a4后，其行棋给人的正是这种烦躁和恼怒之感。
	
	`27. Nd5!`
	
	一项进攻计划由此开始。白方在此后二十步中出色地把它贯彻到底，最终以杀王阵势收尾。
	
	眼下白方有Nxc7的直接威胁，但进攻的目标不止于此。真正的目标是已经削弱的f6格，双方围绕这一格子的争夺现在开始。
	
	白方的计划可以分成三个阶段：第一，交换防守f6的主要棋子——黑方的象；第二，攻击f6格并侵入该格；第三，兑现侵入所获得的成果。计划方法的一切基本要素——具体构想、动态行棋、子力协调——都在执行过程中得到了鲜明体现。

经校正的英文 OCR	中文译文
CH2-6 27... Ra7 28. Bh4 This is why White played Bf2 on move 23. One move later, the planned basis of 26. Re2 is also revealed. Black cannot ignore the threat Nf6+ or Bf6 and begins defending the vulnerable f6-point in his castled position. The continuation 28... Re6 clearly fails to 29. Rb8+—Black opened the b-file, but White creates the threats on it. After 28... c6 29. Nf6+ Bxf6 30. Bxf6 Rd7 31. Qe3, the threat Qh6 brings about Black's immediate downfall. Only one possibility remains. 28... Bd4+ 29. Kh1 Kg7 30. Bf2! This forces the exchange of bishops, since 30... Be5 is met by 31. f4, while after 30... Bf6 31. Nxf6 Kxf6 32. Bh4+ Black has a miserable position. The role of the white rook on e2 is now clear: it guarantees White the exchange of bishops. 30... Bxf2 31. Rxf2 Threatening a check from c3. The second stage of the plan begins: the struggle to invade with the knight on the weak f6-square. Realising that surrendering this square is “just like death”, Black makes heroic efforts to defend it, but after the exchange of bishops he has insufficient forces. 31... Qa5 32. Qe2! Once again threatening a diagonal check, this time from b2. 32... f6 33. Qb2 Rf8 Black needs only one tempo to save himself. If it were now his turn, he would play ...c6, repulsing the attack on f6. But, alas, he does not have this tempo and the game is decided. White's threats, following one after another, do not give Black a moment's respite. 34. g4! Threatening 35. Nxf6. Black can postpone the fall of f6 for only three moves. 34... h6 35. h4 g5 36. f4! gxh4 37. Nxf6 And so the invasion takes place, after which the second stage of the plan may be considered complete. The third and concluding stage consists of realising the advantage achieved by the knight's invasion of f6. The position of the black king is utterly ruined, and his main forces are on the other flank, unable to arrive in time for the defence. Meanwhile, White's threats are already impending. He now threatens 38. Nh5+ Kf7 39. Qf6+ and Rb8+.	CH2-6 27... Ra7 28. Bh4 这正是白方第23步走Bf2的原因。再过一步，26. Re2所准备的基础也将显现。黑方无法无视Nf6+或Bf6的威胁，只得开始防守易位王城中的薄弱f6点。 28... Re6显然不行，因为有29. Rb8+——开放b线的是黑方，利用这条线制造威胁的却是白方。28... c6 29. Nf6+ Bxf6 30. Bxf6 Rd7 31. Qe3之后，Qh6的威胁会让黑方立即崩溃。黑方只剩一种可能。 28... Bd4+ 29. Kh1 Kg7 30. Bf2! 这迫使黑方交换象，因为30... Be5后有31. f4；而30... Bf6 31. Nxf6 Kxf6 32. Bh4+后，黑方局面悲惨。白车位于e2的作用现在已经清楚：正是它保证白方能够交换双象。 30... Bxf2 31. Rxf2 白方威胁从c3将军。计划的第二阶段开始：争取让马侵入薄弱的f6格。黑方明白，让出这个格子“无异于死亡”，因而拼命防守；但双象交换后，其防守力量已经不足。 31... Qa5 32. Qe2! 白方再次威胁沿斜线将军，这一次将从b2发起。 32... f6 33. Qb2 Rf8 黑方只差一个先手就能自救。如果此时轮到他走，……c6便可击退白方对f6点的进攻。可惜黑方没有这个先手，败局已经注定。白方的威胁接连不断，不给黑方片刻喘息。 34. g4! 威胁35. Nxf6。黑方最多只能再拖三步，f6点终将失守。 34... h6 35. h4 g5 36. f4! gxh4 37. Nxf6 侵入终于完成，计划的第二阶段可以宣告结束。第三个也是最后一个阶段，是兑现白马侵入f6所取得的优势。黑王的位置已经完全被摧毁，主力却远在另一翼，无法及时赶回防守。 与此同时，白方的威胁已迫在眉睫：现在有38. Nh5+ Kf7 39. Qf6+以及Rb8+。

CH2-7 37... Rf7 38. g5	CH2-7 37... Rf7 38. g5

经校正的英文 OCR	中文译文
Now the g-file is opened and the rook enters the attack.	现在g线被打开，白车投入进攻。
`38... Bc6 39. Rg1 Qa3 40. gxh6+ Kxh6 41. Rh2! Bxe4`	`38... Bc6 39. Rg1 Qa3 40. gxh6+ Kxh6 41. Rh2! Bxe4`
The sacrifice of a piece is the only defence against mate (if `41... Qf3+`, then `42. Qg2`). White's positional advantage grows into material gain. The agony does not last long.	弃子是避免立即被将杀的唯一办法（若`41... Qf3+`，则`42. Qg2`）。白方的局面优势转化为子力收益；黑方的痛苦不会持续太久。
`42. Nxe4 Qf3+ 43. Qg2 Qxg2+ 44. Rhxg2 Rxf4 45. Rg6+ Kh7 46. Nf6+ 1-0`	`42. Nxe4 Qf3+ 43. Qg2 Qxg2+ 44. Rhxg2 Rxf4 45. Rg6+ Kh7 46. Nf6+ 1-0`
Spanish Game	**西班牙开局**
White: Y. Vilner Black: P. Romanovsky (3rd USSR Championship, 1924)	白方：Y. 维尔纳 黑方：P. 罗曼诺夫斯基 （第三届苏联锦标赛，1924年）
`1. e4 e5 2. Nf3 Nc6 3. Bb5 d6 4. d4 Bd7 5. Nc3 Nge7`	`1. e4 e5 2. Nf3 Nc6 3. Bb5 d6 4. d4 Bd7 5. Nc3 Nge7`
Steinitz played this sometimes, although with this move Black delays the development of the king's flank by one tempo. Besides, the knight does not have as wide a range of activity from e7—particularly in the struggle for the centre—as it does from f6.	斯坦尼茨有时会这样下，不过黑方因此耽误了一个先手才开始王翼出子。此外，马在e7的活动范围——尤其在中心争夺中——也不如位于f6时广阔。
What, then, attracted Steinitz to this move? Its idea is to try to consolidate e5 after ...Ng6. After `5... Nf6 6. O-O Be7 7. Re1`, the e5-pawn is deprived of pawn support and Black has to exchange with ...exd4. For quite a long time, theoretical authorities, including Steinitz, regarded this exchange as a surrender of the centre. The move `5... Nge7` was one of Steinitz's numerous experiments.	那么，斯坦尼茨究竟看中了这步棋的什么？其构想是走……Ng6来巩固e5点。`5... Nf6 6. O-O Be7 7. Re1`后，e5兵失去兵的支援，黑方不得不以……exd4交换。相当长一段时间里，包括斯坦尼茨在内的理论权威，都把这种交换看作放弃中心。`5... Nge7`是斯坦尼茨众多试验之一。
`6. Bg5`	`6. Bg5`
Chigorin played this against Steinitz in the eleventh game of their 1892 world championship return match. In several match games with Steinitz, Lasker continued `6. Bc4`, threatening Ng5. Vilner's opponent in the present game—the author of this book—intended to test Chigorin's recommendation and answer `6. Bc4` with `6... Na5`.	1892年世界冠军回敬赛第11局中，齐果林曾以此应对斯坦尼茨。拉斯克在与斯坦尼茨的几盘对抗赛中则续走`6. Bc4`，威胁Ng5。本局中维尔纳的对手——也就是本书作者——准备检验齐果林的建议，并以`6... Na5`回应`6. Bc4`。
`6... h6`	`6... h6`
Steinitz played `6... f6 7. Be3 Ng6` here. In the present game, without analysing concrete variations, Black feared that after `6... f6` the opponent would obtain the open a2-g8 diagonal, on which the bishop might be consolidated after `7. Be3 Ng6 8. a3!?`. However, exchanging the light-squared bishops with ...Nxd4 would create a weak square for Black on e6. Yet, after choosing an experimental system, Black had to think more boldly and concretely. The proverb “the sheep is safe when the wolf has had its fill” cannot be made the basis of a chess plan.	斯坦尼茨在这里曾走`6... f6 7. Be3 Ng6`。本局中，黑方没有具体分析变化，便担心`6... f6`会让对手获得开放的a2—g8斜线；白象可在`7. Be3 Ng6 8. a3!?`后稳固地占据这条斜线。然而，黑方若以……Nxd4交换白格象，e6就会成为自己的弱格。既然选择了试验性体系，黑方本应想得更大胆、更具体。“既要狼吃饱，又要羊不死”不能成为 国际象棋计划的基础。
`7. Be3`	`7. Be3`
The apparently more logical `7. Bh4` surprisingly leads to difficulties in defending the d4-pawn after `7... g5 8. Bg3` (not `8. Nxg5 Ng6!`) `8... g4`. White would have to choose `9. Bxc6 Nxc6 10. d5 gxf3 11. dxc6 Bxc6 12. Qxf3`, when `12... Qg5` or ...h5 would give Black a good game.	看似更合逻辑的`7. Bh4`，却会在`7... g5 8. Bg3`（不能`8. Nxg5 Ng6!`）`8... g4`后意外陷入难以保护d4兵的困境。白方将不得不走`9. Bxc6 Nxc6 10. d5 gxf3 11. dxc6 Bxc6 12. Qxf3`，但`12... Qg5`或……h5之后，黑方局面良好。
It is interesting that Vilner feared not `7... g5`, but `7... Nxd4 8. Nxd4 exd4 9. Qxd4 Bxb5 10. Nxb5 Nc6! 11. Bxd8 Nxd4 12. Nxd4 Rxd8`. This too undoubtedly eases Black's position.	

经校正的英文 OCR	中文译文
When planning a game, one often has to consider quite a few concrete continuations which justify or refute one idea or another. 7... g6 An incorrect scheme, inconsistent with the idea of developing the knight on e7. Black should strengthen e5 by ...Ng6 and complete development quickly with ...Be7 and ...O-O. The invasion of the white knight on d5 promises nothing concrete, and it could hardly hold its ground there. 8. dxe5! The beginning of a plan that is very dangerous for Black. White has an advantage in development and intends to exploit it by opening the d-file. If Black replies ...dxe5, the king's bishop on g7 will be condemned to inactivity; after ...Nxe5, however, White is prepared to be satisfied with 9. Nxe5 dxe5 (9... Bxb5? 10. Ng4) 10. Bxd7+ (10. Qe2 is also not bad) 10... Qxd7 11. Qxd7+ Kxd7 12. O-O-O+ Kc6 13. Rd3 Bg7 14. Rhd1, with an indisputable advantage.	有趣的是，维尔纳所担心的并非7... g5，而是7... Nxd4 8. Nxd4 exd4 9. Qxd4 Bxb5 10. Nxb5 Nc6! 11. Bxd8 Nxd4 12. Nxd4 Rxd8。毫无疑问，这一变化同样能缓解黑方局面。 制定对局计划时，棋手经常必须考察许多具体后续手段，以证明或驳倒某个构想。 7... g6 这是一个错误的阵形，与把马出到e7的构想并不协调。黑方本应走……Ng6加强e5点，并以……Be7、……O-O迅速完成出子。白马侵入d5并不能带来实质成果，而且很难在该格立足。 8. dxe5! 一项对黑方十分危险的计划由此开始。白方拥有出子优势，准备通过打开d线加以利用。若黑方以……dxe5回应，g7象将被迫无所作为；若走……Nxe5，白方则乐于接受下列后续手段：9. Nxe5 dxe5（9... Bxb5? 10. Ng4）10. Bxd7+（10. Qe2也不错）10... Qxd7 11. Qxd7+ Kxd7 12. O-O-O+ Kc6 13. Rd3 Bg7 14. Rhd1，白方优势无可争议。
经校正的英文 OCR	**中文译文**
CH2-8 8... dxe5 Black chooses the lesser of two evils and strives to create a complicated position in the difficult struggle ahead. 9. Qd2 White's plan is to control the d-file after castling queenside. At the same time, he wants to make it difficult for the opponent to castle. Nevertheless, the queen move does not take the immediate course of events into account with sufficient concreteness, and only one move later White has to transfer it to e2. It was better to do this at once, postponing the operation of the heavy pieces on the d-file until he had castled queenside. 9... Bg7 10. O-O-O Bg4 11. Qe2 After 11. Nd5, Black has the adequate defence 11... a6. White prefers to carry out his intended line, reconciling himself to the loss of a tempo. 11... Qc8 12. Bc5 a6 Black must defend against 13. Bxe7, which can now be answered by 13... axb5. 13. Ba4 White would also retain the better position after Bxc6+, but this would somewhat relax the tension. Black would probably have replied ...bxc6. 13... b5 14. Bb3 O-O 15. Nd5! This move gives White the advantage and the chance to start an attack on	CH2-8 8... dxe5 黑方两害相权取其轻，希望在接下来的艰苦斗争中制造复杂局面。 9. Qd2 白方计划后翼易位后控制d线，同时让对手难以易位。然而这步动后没有足够具体地考虑眼前进程，以致仅仅一步以后，后又不得不转移到e2。白方最好立即把后走到e2，等完成后翼易位后，再让重子在d线上展开行动。 9... Bg7 10. O-O-O Bg4 11. Qe2 若11. Nd5，黑方有充分的防守11... a6。白方宁愿坚持原定路线，接受损失一个先手。 11... Qc8 12. Bc5 a6 黑方必须防守13. Bxe7；现在可以用13... axb5回应。 13. Ba4 Bxc6+也能让白方保有较好局面，但会在一定程度上缓和紧张形势；黑方大概会以……bxc6回应。 13... b5 14. Bb3 O-O 15. Nd5!

经校正的英文 OCR	中文译文
the king's flank.	这步棋使白方获得优势，并有机会开始进攻王翼。
`15... Re8 16. h3 Be6 17. Qd2`	`15... Re8 16. h3 Be6 17. Qd2`
Played to prevent tactical possibilities connected with the opposition of the queen and black rook on e8. Such possibilities do arise after `17... Bxd5 18. exd5 Na5` or `18. Bxd5 Nxd5 19. exd5 Na5` (or ...Nd4).	这样走是为了防止白后与e8黑车对位所引出的战术可能。这些战术确实会在`17... Bxd5 18. exd5 Na5`，或者`18. Bxd5 Nxd5 19. exd5 Na5`（或……Nd4）后出现。
There was, however, a more consistent way for White to occupy the d-file: `17. Nxe7+ Nxe7 18. Rd3`, followed by a build-up of the heavy pieces on the d-file.	不过，白方还有一个更为一贯的办法占据d线：`17. Nxe7+ Nxe7 18. Rd3`，随后在d线上集结重子。
`17... Rb8`	`17... Rb8`
The aim of this move is to prepare an attack on b2. Black further intends ...a5, provoking a4, opening the b-file by exchanging on a4 and then trying to bring the bishop on g7 into play. All this is a rather hazy expectation, but it does cause White some concern.	这步棋意在准备攻击b2点。黑方还打算走……a5诱使白方走a4，再通过于a4交换打开b线，继而尝试让g7象投入战斗。这些设想相当朦胧，却仍然让白方产生了一些顾虑。
`18. g4`	`18. g4`
White is not afraid of ghosts. His attacking moves convey courage and belief in the correctness of his plan. He now threatens decisive progress by g5 followed by Nf6+.	白方不怕虚张声势的威胁。这些进攻棋步中有一种勇气，也体现了他对自己计划正确性的信念。白方现在威胁以g5，随后Nf6+取得决定性进展。
`18... a5!`	`18... a5!`
Black sacrifices a pawn in the hope of enlivening his pieces somewhat and, principally, with the aim of distracting the opponent from executing his plan.	黑方弃兵，希望稍微激活自己的子力；更主要的目的，是分散对手的注意力，使其无法贯彻原计划。
`19. g5`	`19. g5`
Strangely, this attack is not so threatening. White should not refuse the gift with `19. Nxe7+ Nxe7 20. Qxa5`, although after `20... Bxb3 21. cxb3` (dangerous is `21. axb3 Nc6 22. Qc3 Ra8`, with initiative for the pawn) `21... Nc6` (worse is `21... Ra8 22. Qxb5 Rxa2 23. Ba3`) `22. Qc3 Qe6`, it would be very difficult to realise the extra pawn.	说来奇怪，这次进攻并没有那么可怕。白方本不该拒绝礼物：`19. Nxe7+ Nxe7 20. Qxa5`。不过，`20... Bxb3 21. cxb3`（`21. axb3 Nc6 22. Qc3 Ra8`很危险，黑方用一兵换得主动）`21... Nc6`（`21... Ra8 22. Qxb5 Rxa2 23. Ba3`较差）`22. Qc3 Qe6`之后，多兵仍很难兑现。
`19... Bxd5`	`19... Bxd5`
Of course, the check on f6 cannot be allowed.	黑方当然不能允许白方在f6将军。
`20. Bxd5`	`20. Bxd5`
It is hard to decide whether `20. exd5 a4 21. dxc6` was better. An interesting variation is `21. gxh6 axb3 22. hxg7 bxa2 23. Qh6 a1=Q+ 24. Kd2 Qxd1+ 25. Rxd1 f6`: White has no attack and is a rook down. After `21. dxc6 axb3 22. axb3 Nf5!`, Black gets promising play for the pawn.	很难判断`20. exd5 a4 21. dxc6`是否更好。一个有趣的变化是`21. gxh6 axb3 22. hxg7 bxa2 23. Qh6 a1=Q+ 24. Kd2 Qxd1+ 25. Rxd1 f6`：白方没有进攻，还少一车。`21. dxc6 axb3 22. axb3 Nf5!`后，黑方用一兵换得很有希望的局面。
`20... h5`	`20... h5`
After this move, which locks the king's flank, White's attack comes to an end.	这步棋封锁王翼后，白方的进攻也随之结束。

经校正的英文 OCR	中文译文
CH2-9 The conditions of the struggle have changed radically. White has failed to carry out his plan; Black has rid himself of the troubles caused by his badly played opening. The opponents must look afresh at the position, consider new plans and spend time calculating possible variations. The first question: can White, as a few moves ago, win a pawn by 21. Bxe7 Nxe7 22. Qxa5? No. There follows 22... Nxd5 23. Rxd5 (even worse is 23. exd5 Qf5!) 23... Ra8; 24. Qxb5 is impossible because of 24... c6, while after 24. Qe3, Black simply takes the a2-pawn. The second question: what should White do, and does the opponent threaten anything? Black has no direct threats, but in general his forces are more actively placed than White's. The advance of Black's queenside pawn group may provide a motive for a plan aimed at the exposed position of the white king. Also possible is ...a4 and ...Nd8, threatening to win the bishop with ...c6. Finally, Black could improve the position of his pieces by ...Qa6 and ...Rbd8. White must also watch out for ...Nxd5: after exd5 the bishop on g7 comes back to life with ...e4, while after Qxd5 and ...Qb7 the advanced position of the white queen proves awkward. All these considerations are clearly relative, since they do not bring out the full dynamics of the coming struggle, but they must nevertheless be taken into account. In view of this, White might contemplate only a very rough plan, whose guiding light must be the old but correct objective of occupying the d-file with the rooks. 21. Qe3? In all probability, Vilner also regarded this move as a link in the plan to seize the d-file with the rooks. White intends Nh4 followed by Qf3. Sooner or later Black will have to take the bishop with ...Nxd5, after which Rxd5 and Rhd1 will achieve the objective. Incidentally, with the current arrangement of forces, the queen also defends h3. Yet White heads toward his objective along a bad road. The queen finds itself in dangerous opposition to the enemy rook, and Black immediately exploits this fact. It follows that even an insufficiently well-conceived plan still has to be carried out skilfully: only one link of the chain need be “rusty” for the whole chain to fall apart. White should have chosen 21. c3, followed by Qc2 and doubling the rooks. With 21. c3 he would also have solved several subsidiary problems: eliminating Black's ideas connected with the knight thrust to d4; answering ...b4 with c4; and restricting the activity of the opponent's king's bishop by placing the pawn on c3. 21... Nd4 This sudden and unpleasant thrust has become possible because the white queen stands on the e-file. 22. Bxe7 White exchanges his best-placed piece for the knight, which has made only a single opening move—and not a particularly successful one at that. The decision was clearly dictated by the desire to preserve the light-squared bishop at any price. Yet this natural desire was again not confirmed by calculating variations, which would have shown White that the bishop could not be kept on the a2-g8 diagonal. In that case, is it worth preserving?	CH2-9 斗争条件已经彻底改变。白方未能贯彻计划；黑方则摆脱了因开局下得不好而承受的麻烦。双方必须重新审视当前局面，考虑新的计划，并花时间计算可能的变化。 第一个问题：白方能否像几步以前那样，以21. Bxe7 Nxe7 22. Qxa5得兵？不能。黑方有22... Nxd5 23. Rxd5（23. exd5 Qf5!更差）23... Ra8；此时24. Qxb5因24... c6而不成立，若24. Qe3，黑方则简单吃掉a2兵。 第二个问题：白方该做什么？对手是否构成了威胁？ 黑方没有直接威胁，但总体而言，其子力配置比白方积极。后翼兵群的前进，可以成为制定计划的动机，目标是白王暴露的位置。黑方也可能走……a4和……Nd8，以……c6威胁得象。最后，黑方还能用……Qa6和……Rbd8改善子力位置。此外，白方必须提防……Nxd5：若exd5，g7象会因……e4重新活跃起来；若Qxd5，再遭……Qb7，白后过于前出的处境就会显得尴尬。 这些考虑显然只具有相对价值，因为它们没有揭示未来斗争的全部动态；但仍必须把它们纳入考虑。因此，白方至多只能构想一个非常粗略的计划，其中的指路明灯仍应是那个古老却正确的目标：用双车占据d线。 21. Qe3? 维尔纳很可能也把这步棋视为双车夺取d线计划中的一个环节。白方准备走Nh4，继而Qf3。黑方迟早要以……Nxd5吃象，随后白方便以Rxd5、Rhd1实现目标。顺带一提，当前的子力配置下，白后还保护着h3兵。 然而，白方正沿着一条错误道路走向目标。白后与敌车形成危险对位，黑方立即利用了这一点。由此可见，即使计划本身考虑得不够正确，也仍须以高超技巧来执行；整条链条只要有一个环节“生锈”，就会完全断裂。 白方应该选择21. c3，随后Qc2并叠车。21. c3还能同时解决若干附带问题：消除黑马跳入d4的构想；以c4回应……b4；最后，c3兵还能限制对方王翼象的活动。 21... Nd4 白后位于e线，使黑方获得了这一突然而令人不快的跃马机会。 22. Bxe7 白方用位置最好的一枚棋子，交换了那匹只在开局走过一步——而且那一步也并不很成功——的马。这样交换显然是因为他无论如何都想保住白格象。然而，这个自然愿望又一次没有得到变化计算的验证；只要计算一下，白方便会发现自己不可能让象留在a2—g8斜线上。既然如此，保留它还有什么价值？

经校正的英文 OCR	中文译文
The correct continuation was 22. Nxd4 exd4 23. Qf4 Nxd5 24. exd5 Re5 25. Bxd4 Rf5! 26. Qg3 Bxd4 27. Rxd4 Qd8 28. Rg1 Rb6, winning back one of the pawns and leading to an approximately equal position.	正确的后续手段是22. Nxd4 exd4 23. Qf4 Nxd5 24. exd5 Re5 25. Bxd4 Rf5! 26. Qg3 Bxd4 27. Rxd4 Qd8 28. Rg1 Rb6，黑方收回一兵，局面大致均衡。
It should be noted that 22. Nxe5 was impossible because of 22... Nxd5, when Black wins a piece (23. exd5 Nf5 or 23. Qxd4 Nf4!).	需要指出，22. Nxe5不行，因为22... Nxd5后黑方得子（23. exd5 Nf5或23. Qxd4 Nf4!）。
22... Rxe7 23. c3	22... Rxe7 23. c3
Even worse is 23. a3 c6 24. Ba2 b4, when Black obtains an attack.	23. a3 c6 24. Ba2 b4更差，黑方将发动进攻。
23... Nxf3 24. Qxf3 c6 25. Bb3 a4 26. Bc2 a3	23... Nxf3 24. Qxf3 c6 25. Bb3 a4 26. Bc2 a3
Black strives to create a weak square on d4 by eliminating the c3-pawn, and to exploit it as a base for the rooks and, if all goes well, also for the bishop.	黑方试图消灭c3兵，在d4制造弱格，再把它用作车的据点；如果进展顺利，象也会利用这个格子。
27. b3	27. b3
Tempting but weak was 27. Bb3, which would be met by 27... c5 28. Bd5 axb2+ 29. Kxb2 c4!; Black's attack on the a-file, supported by the bishop from f8, is rather dangerous. The white bishop may appear well placed on the weak central d5-square, but its role there is insignificant because it acts in isolation, without proper connection with the rest of White's forces.	诱人但软弱的是27. Bb3，黑方可走27... c5 28. Bd5 axb2+ 29. Kxb2 c4!；黑方在a线上的进攻相当危险，还有f8象的支援。白象表面上稳居中心弱格d5，但它孤军作战，与白方其余子力缺乏适当联系，因此实际上作用很小。
27... b4 28. c4	27... b4 28. c4
White assumes that opposite-coloured bishops and the locked position will lead to a draw, and again contents himself with a general consideration. Yet concrete calculation would have convinced him of the weakness of the pawn advance.	白方认为异色格象加上封闭局面会导向和棋，又一次满足于总体判断。然而，只要具体计算变化，他就会看出这次冲兵的软弱。
In the course of the game, we have observed several times how White made not so much direct mistakes as mediocre moves, precisely because his choice was based on general principles. This applies to his 9th, 17th, 19th, 21st, 23rd and finally 28th move. Of course, there are positions where one must be guided by only very rough information about the value of one move or another, but in most cases matters are different. Assessing a position by calculating variations—that is, by analysis—will always be more accurate and will make it easier to find the right way to achieve the planned objective.	本局进程中，我们几次看到白方所走的与其说是直接错误，不如说是平庸棋步；根源恰恰在于他仅仅依据一般原则来选择棋步。第9、17、19、21、23步乃至最后的第28步都是如此。当然，有些局面只能根据非常粗略的信息判断某步棋的价值；但在大多数情况下，事情并非如此。通过计算变化，也就是通过分析来判断局面，总会更为准确，也更容易找到实现计划目标的正确道路。
White's last move may be regarded as a fatal mistake. The best response to Black's energetic attack on the dark squares in his camp was 28. Bd3, and if 28... bxc3, then 29. Bc4. Black would still retain the better position, but his activity would to some extent be tied to the necessary defence of f7. It should be added that the white bishop is now condemned to lifelong imprisonment behind its own pawns.	白方最后一步可以视为致命错误。面对黑方针对己方黑格展开的猛烈进攻，最佳应对是28. Bd3；若28... bxc3，则29. Bc4。黑方仍有较好局面，但其行动在一定程度上会受制于必须防守f7点。还应补充的是，白象如今注定终身囚禁在自己的兵链后面。

CH2-10 28... Re6	CH2-10 28... Re6
The beginning of the execution of a plan consisting of four stages: occupation of d4 with the bishop and its consolidation there; preparation for opening the f-file; control of that file by the heavy pieces; invasion of	一个四阶段计划由此开始实施：用象占据d4格并在该处巩固；准备打开f线；用重子控制该线；侵入敌方阵地，组织对王的决定性进攻。从

经校正的英文 OCR	中文译文
the opponent's camp and organisation of a decisive attack on the king. Judging by White's reply, he apparently still does not discover this murderous intention.	白方的回应判断，他显然仍未看出这个足以致命的意图。
`29. Rd3`	`29. Rd3`
Is this really intended to double the rooks on the d-file? Alas, White does not suspect that three moves later his rooks will be in the same situation as his bishop.	这真的是要在d线上叠车吗？可惜白方没有意识到，仅仅三步以后，双车就会陷入与白象相同的处境。
`29... Bf8 30. Rhd1`	`29... Bf8 30. Rhd1`
`30. Qe3` does not help, in view of `30... Be7`, followed by ...Qf8.	`30. Qe3`也无济于事，因为有`30... Be7`，随后……Qf8。
`30... Bc5 31. Qe2 Bd4`	`30... Bc5 31. Qe2 Bd4`
Not fearing `32. f4`, because of `32... Bb2+` and ...exf4.	黑方不怕`32. f4`，因为有`32... Bb2+`，随后……exf4。
`32. Kb1`	`32. Kb1`
White intends to withstand the siege. But this decision is incorrect, since Black has a real breakthrough plan at his disposal. It was better to sacrifice the exchange by `32. Rxd4 exd4 33. Rxd4`, although even then Black's task would not be very complicated: `33... Qc7! 34. Qd2 Ree8`, with the decisive threat ...Rbd8; if `35. Rd7`, then `35... Qe5`.	白方打算坚守围城。然而这个决定并不正确，因为黑方手中有一项切实可行的突破计划。白方最好用`32. Rxd4 exd4 33. Rxd4`弃半子；不过即便如此，黑方的任务也不会太复杂：`33... Qc7! 34. Qd2 Ree8`，形成……Rbd8的决定性威胁；若`35. Rd7`，则`35... Qe5`。
`32... c5`	`32... c5`
And so the bishop is consolidated on the eternal d4-square. But it can be exploited as a real force only when harmony is established with the other black forces. For this it is necessary to organise an invasion by the rooks into the opponent's camp. This is obviously impossible along the open d-file. Another file must be opened—in the present case, the f-file.	至此，黑象牢牢占据“永恒”的d4格。不过，只有当它与黑方其他子力形成协调时，才会成为真正的力量。为此，黑方必须组织双车侵入敌阵。沿开放d线显然无法做到这一点，所以还要打开另一条线——在本局中便是f线。
However, the move ...f6 requires preparation. It opens not only the f-file but also the g-file, along which the white rooks could develop a dangerous counterattack against the g6-pawn and then, with the queen's support, against the black king. Black's attack on the f-file and White's counterattack on the g-file would take the form of a mighty battle between six heavy pieces, with the bishops inactive. For the present Black must, first, consolidate the position of his king in advance, particularly g6, and second, place his heavy pieces so that after the exchange of pawns he can strive for a breakthrough with all his might—that is, “build up” on the f-file. It is desirable to prepare this arrangement with the queen behind the rooks. Opening the f-file is plainly no simple operation, and the slightest carelessness might ruin the whole plan.	但是……f6需要准备。它不只会打开f线，也会打开g线；白车可能沿g线对g6兵展开危险反击，并在白后支援下继续攻击黑王。黑方在f线进攻，白方在g线反击，局面将演变为六枚重子的激烈会战，双方的象却无所作为。因此，黑方现在首先要预先巩固王位，尤其是g6点；其次要把重子安排妥当，使换兵之后能够集中全力突破，也就是在f线上“层层集结”。最好把后放在双车后面来构建这一阵势。可见，打开f线并不是 一项简单行动，稍有疏忽便可能毁掉整个计划。
`33. Rf3`	`33. Rf3`
White discovers his opponent's intention. However, both the rook move to f3 and all the subsequent manoeuvres of White's heavy pieces show that he is unable to construct a defensive plan. After the f-file is opened and occupied, Black threatens to win the f2-pawn, which is attacked four times but can be defended by only three white pieces. In the attack on f2, all the invasion squares—f1, f2 and f3—are open to the black rooks.	白方发现了对手的意图。然而，无论动车到f3，还是此后对白方重子所作的全部调动，都表明他无法构建防守计划。f线一旦打开并被占据，黑方就会威胁吃掉f2兵：黑方四次攻击该兵，而白方只能用三枚棋子防守。围绕f2兵展开进攻时，f1、f2、f3三个侵入格全部向黑车敞开。
Therefore the relatively best defensive plan was to advance the pawn to f3, transfer the queen to g2 and free d1 for the bishop, from where it could cover the pawn one more time. This did not promise salvation, but it would at least have complicated Black's process of realisation.	因此，相对最佳的防守计划应是冲起f3，把后转移到g2，并为象腾出d1格，使其能再保护f2一次。这仍不能带来拯救，却至少会让黑方兑现优势的过程复杂一些。
`33... Qd8 34. h4 Qe7 35. Rg1 Rf8 36. Bd3 Kh7 37. Rfg3 Rd6 38. R1g2 f6`	`33... Qd8 34. h4 Qe7 35. Rg1 Rf8 36. Bd3 Kh7 37. Rfg3 Rd6 38. R1g2 f6`

The objective of the second stage is fulfilled: the f-file is opened and immediately occupied by Black's heavy pieces.
 	
`39. gxf6`
 	
If White continues to wait, for example with `39. Kc2`, there follows `39... Qf7`; `40. f3` is impossible because of `40... Rfd8`, with an unavoidable invasion of the black rooks, this time along the d-file.
 	
`39... Rfxf6 40. Rg5 Qf7 41. Bc2 Rf4 42. Rh2 Rdf6`
 	
This ends the third stage, and the struggle passes to its concluding phase: invasion and the swift “taking prisoner” of the king.
	第二阶段的目标实现了：f线被打开，并立即由黑方重子占据。
	
	`39. gxf6`
	
	若白方继续等待，例如`39. Kc2`，则`39... Qf7`；这时`40. f3`不行，因为有`40... Rfd8`，黑车将不可避免地侵入——这一回是沿d线。
	
	`39... Rfxf6 40. Rg5 Qf7 41. Bc2 Rf4 42. Rh2 Rdf6`
	
	第三阶段至此结束，斗争进入最后阶段：侵入敌阵，迅速把白王“俘虏”。

CH2-11
`43. Rgg2 Bxf2`
 	
At last the bishop enters into full contact with the rooks. This harmony signifies a quick end.
 	
`44. Bd1 Bd4 45. Kc1 Rf1 46. Kc2 R6f3 47. Qd2 Rc3+ 48. Kb1 Qf3`
 	
Black is carried away by the process of invasion. `48... Be3` would have provoked immediate capitulation. Even now, however, White is soon mated. The apotheosis of achieving the planned objective is illustrated by the diagram.
 	
`49. Re2 Rxb3+ 50. axb3 Qxb3+ 51. Kc1 Bb2+ 0-1`
 	
Mate follows on the next move.
 	
In concluding this instructive game, we wish once again to recount the basic reasons for White's defeat. We have in mind not individual weak moves or direct oversights, but the very essence of the errors in chess thinking. From this point of view, the basic reason must be seen in a non-concrete approach to many positions arising in the course of the struggle. There were too few variations in White's thinking when evaluating positions, and this prevented him from foreseeing even approximately the immediate course of events on the board.
 	
Thus White's 28th move, c4, testifies that he did not foresee the manoeuvre ...Bg7-f8-c5-d4 at all. When the bishop invaded d4, he was unable to weigh the associated dangers correctly and, instead of immediately sacrificing the exchange, allowed the opponent to play ...c5. Had White imagined the consequences of the ...f6 break, he would of course not have permitted the construction of a real stronghold on d4. The non-concrete approach to the position was essentially a breach of the principles of dynamic play. White's thinking was undynamic: he assessed the position statically, not in the light of the continuous development of the struggle.
 	
Besides these main reasons, White's mistake must also be regarded as the loss, to some extent, of steadfastness in improving his position. If one yields to a feeling of inevitable defeat, one's thinking begins almost to run idle. A weakened will to resist shows itself in indifference to the creative side of the game. In the present game, White's play after `21... Nd4` gives the impression of demoralisation, and after `29... Bf8`, even of total doom.
	CH2-11
	`43. Rgg2 Bxf2`
	
	黑象终于与双车形成充分配合。这种协调意味着对局很快就会结束。
	
	`44. Bd1 Bd4 45. Kc1 Rf1 46. Kc2 R6f3 47. Qd2 Rc3+ 48. Kb1 Qf3`
	
	黑方陶醉于侵入的过程。`48... Be3`本可迫使白方立即认输；不过即使如此，白方也很快遭到将杀。图示局面展现了计划目标得以实现的高潮。
	
	`49. Re2 Rxb3+ 50. axb3 Qxb3+ 51. Kc1 Bb2+ 0-1`
	
	下一步即将杀。
	
	在结束这盘富有教育意义的对局时，我们想再次归纳白方失败的根本原因。这里所指的不是个别软着或直接漏着，而是其国际象棋思维错误的实质。从这个角度看，根本原因在于：白方面对实战中出现的许多局面，都缺乏具体分析。判断局面时，他头脑中计算的变化太少，因此甚至无法大致预见棋盘上紧接着会发生什么。
	
	例如，白方第28步c4说明，他完全没有预见……Bg7-f8-c5-d4的调动。黑象侵入d4以后，他又没有正确衡量其中的危险；他没有立即弃半子，反而允许对手走成……c5。如果白方想象过……f6冲兵突破会造成什么后果，他当然不会容许黑方在d4建成真正的堡垒。这种不具体的局面处理方式，本质上违背了动态行棋的原则。白方的思维缺乏动态性；他静止地判断局面，没有把局面置于斗争持续发展的过程中来考察。
	
	除这些主要原因外，白方的错误还在于：在某种程度上，他失去了坚持改善局面的意志。一旦屈服于“必败”的感觉，思维就几乎开始空转。抵抗意志减弱，表现为对对局创造性一面的漠不关心。本局中，白方在`21... Nd4`以后便显得意志消沉；`29... Bf8`以后，更给人彻底绝望之感。

经校正的英文 OCR	中文译文

CH2-12
Philidor Defence
 	
White: A. Evenson
Black: A. Alekhine
(Kiev, 1916)
 	
`1. e4 e5 2. Nf3 d6 3. d4 Nf6 4. Nc3 Nbd7`
 	
One of the principal variations of the Philidor Defence has been played. However, the knight on d7 hampers Black and makes development of his queen's flank difficult. Therefore another plan of development is now put forward: `4... exd4 5. Nxd4 Be7 6. Be2 O-O 7. O-O a6 8. a4 c5 9. Nf3 Nc6`. Unfortunately there is still too little practical experience to permit conclusions, but in any case it has no less right to exist than the stereotyped theoretical variation chosen by Black in the present game. In the latter, Black usually has to overcome certain difficulties before emerging safely into the broad scope of the middlegame.
 	
`5. Bc4 Be7 6. O-O O-O 7. dxe5`
 	
White has no reason to fear the exchange ...exd4, which would only strengthen his position in the centre. Yet Evenson's decision to open the d-file is easy to understand, since `7. Qe2`, recommended in practice and approved in opening handbooks, justifies itself only after the book reply `7... c6`.
 	
However, precisely after `7. Qe2`, Black has an interesting possibility with an exchange on d4: for example, `7... exd4 8. Nxd4 Ne5 9. Bb3 c5 10. Nf5 Bxf5 11. exf5 Nc6`, or ...Qd7, with excellent prospects.
 	
The move `7. h3` creates the greatest difficulties for Black. In the variation just mentioned, after `8... Ne5`, it allows `9. Be2`, threatening to begin an offensive with f4. After `9... d5`, the simple `10. exd5 Nxd5 11. Nxd5 Qxd5 12. Nf5!` is possible, and White's position is preferable. Besides, `7. h3` prevents the knight thrust to g4 and thereby secures e3 for the bishop.
 	
After Be3, White could move the knight from f3 and attack e5 once again with f4. A rough course of events might be `7. h3 c6 8. a4 Qc7 (8... Nxe4 9. Nxe4 d5 10. Bxd5 cxd5 11. Nc3` would create a lasting weakness for Black on d5) `9. Be3`, when Black is cramped, while White threatens Nh2 or Nd2 followed by f4.
 	
After Evenson's exchange in the centre, the rooks will be drawn to the only open d-file, and if neither opponent succeeds in outstripping the other in this operation, one must expect a mass exchange—the herald of a drawing tendency.
	CH2-12
	菲利多尔防御
	
	白方：A. 埃文松
	黑方：A. 阿廖欣
	（基辅，1916年）
	
	`1. e4 e5 2. Nf3 d6 3. d4 Nf6 4. Nc3 Nbd7`
	
	双方进入了菲利多尔防御的一个主要变化。然而，d7马妨碍黑方，令其后翼出子困难。因此，如今有人主张采用另一套出子计划：`4... exd4 5. Nxd4 Be7 6. Be2 O-O 7. O-O a6 8. a4 c5 9. Nf3 Nc6`。遗憾的是，这一体系的实战经验仍太少，尚不足以下结论；但无论如何，它和本局黑方选择的刻板理论变化一样，都有充分的存在理由。采用后者时，黑方通常必须先克服一些困难，才能安然进入中局的广阔天地。
	
	`5. Bc4 Be7 6. O-O O-O 7. dxe5`
	
	白方没有理由害怕……exd4交换，因为那只会加强自己在中心的位置。不过，埃文松决定打开d线也很容易理解：实战中常见、开局手册也认可的`7. Qe2`，其实只有在资料所给的应手`7... c6`之后才能证明其合理。
	
	恰恰在`7. Qe2`之后，黑方于d4交换有一个很有意思的可能。例如：`7... exd4 8. Nxd4 Ne5 9. Bb3 c5 10. Nf5 Bxf5 11. exf5 Nc6`，或者……Qd7，黑方前景极佳。
	
	`7. h3`给黑方制造的困难最大。在上面提到的变化中，`8... Ne5`之后，白象可以走`9. Be2`，威胁以f4开始攻势。若`9... d5`，白方可以简单地走`10. exd5 Nxd5 11. Nxd5 Qxd5 12. Nf5!`，局面较好。此外，`7. h3`还能阻止黑马跳到g4，从而把e3格留给白象。
	
	Be3以后，白方可以把马从f3移开，再用f4攻击e5兵。对局大致可能这样发展：`7. h3 c6 8. a4 Qc7`（`8... Nxe4 9. Nxe4 d5 10. Bxd5 cxd5 11. Nc3`会在d5给黑方留下长期弱点）`9. Be3`。黑方局面受限，白方则威胁Nh2或Nd2，随后f4。
	
	埃文松在中心交换以后，双车将被吸引到棋盘上唯一的开放d线；如果任何一方都无法在这一行动中抢先，便可预期大规模交换——这通常预示着对局将趋向和棋。

经校正的英文 OCR	中文译文
CH2-13 `7... dxe5` White's plan is now obvious: clear the way for the rooks to the d-file and try to double them there. The route to this objective is also clear. It consists of Qe2, Be3 or Bg5, Rfd1, a4 if necessary to prevent ...b5, and possibly h3 so as not to allow ...Ng4 after Be3 and to prevent the pin ...Bg4. It is necessary, however, to decide in what order these moves should be made.	CH2-13 `7... dxe5` 白方的计划现在很明显：为双车清出通向d线的道路，并尝试在那里叠车。实现目标的路线也很清楚：Qe2，Be3或Bg5，Rfd1；必要时走a4阻止……b5；也可能先走h3，既避免Be3后出现……Ng4，又防止……Bg4牵制。不过，这些棋步应当按什么顺序走，还需要作出决定。

经校正的英文 OCR	中文译文
To answer this question, one must probably state concretely what plan Black should choose to bring the rooks to d8 and neutralise the opponent's play on the d-file. In order to develop his queen's flank, Black has to free the queen's knight from the defence of e5.	要回答这个问题，大概要先具体说明：黑方应选择什么计划，才能把双车调到d8，并化解对手在d线上的行动。为了让后翼出子，黑方必须解除后翼马保护e5兵的任务。
The most convenient method is to defend e5 once more with the queen from c7; incidentally, ...Qc7 also frees d8 for the rooks. Thus: `8. Qe2 c6 9. a4 Qc7 10. h3 Nc5 11. Rfd1 a5 12. Bg5 Be6 13. Rd2 Rad8`. It is not hard to convince oneself that White does not succeed in controlling the d-file. Consequently, the exchange `7. dxe5` does not achieve its objective and is a link in a mistaken plan.	最方便的办法，是让后从c7再保护e5兵一次；顺带地，……Qc7也为双车腾出d8格。因此：`8. Qe2 c6 9. a4 Qc7 10. h3 Nc5 11. Rfd1 a5 12. Bg5 Be6 13. Rd2 Rad8`。不难看出，白方无法控制d线。因此，`7. dxe5`这次交换没有实现目标，是错误计划中的一个环节。
`8. Bg5 c6 9. a4 Qc7 10. Qe2 Nc5 11. Ne1`	`8. Bg5 c6 9. a4 Qc7 10. Qe2 Nc5 11. Ne1`
Having become convinced that the rooks' entrance onto the d-file leads only to exchanges, White apparently does not wish to take the road to a prospective draw—though he himself created it with move seven—and changes his plan. He is prepared to concede the d-file, counting on preventing the invasion of the black rooks with a knight covering d3, and intends to prepare his own attack on the centre with f4 and the subsequent opening of the f-file.	白方认识到，双车进入d线只会导致交换，于是显然不愿走向可预见的和棋——尽管这条道路正是他第7步亲手开辟的——遂改变计划。他准备让出d线，指望用马守住d3，阻止黑车侵入；同时计划以f4进攻中心，随后打开f线。
`11... Ne6 12. Be3 Nd4 13. Qd1`	`11... Ne6 12. Be3 Nd4 13. Qd1`
`13. Bxd4 exd4` is less attractive, and the second knight would have to retreat to the first rank.	`13. Bxd4 exd4`吸引力较小，而且另一匹马还得退回底线。
`13... Rd8`	`13... Rd8`
Black accepts the gift of the open d-file. His plan will consist of three stages: doubling the rooks on this file and removing the knight from d3; invasion of the opponent's territory; realisation of the advantage achieved.	黑方收下了这份开放d线的礼物。其计划分为三个阶段：在d线上叠车，并赶走d3马；侵入对方阵地；兑现已经取得的优势。
He will need more than thirty moves to fulfil the plan: the first part takes ten moves, the second six and the third twenty. Thus, the process of realisation can be very protracted and complicated. In the previous game it took only a few moves, since the opponent was routed during the invasion itself; here, however, as we shall see, White retains considerable resources for resistance even after the rooks invade.	为完成这项计划，黑方需要三十多步：第一部分用十步，第二部分用六步，第三部分用二十步。可见，兑现优势的过程可能非常漫长而复杂。上一盘棋只用了几步，因为对手在被侵入的过程中便已溃败；本局则不同，我们将看到，即使双车侵入以后，白方仍保有相当多的抵抗资源。
`14. Nd3 Be6 15. Bxe6 Nxe6 16. Qe1 Rd7 17. f3`	`14. Nd3 Be6 15. Bxe6 Nxe6 16. Qe1 Rd7 17. f3`
This advance testifies that White has finally decided to switch to defence; now Black realises his plan without hindrance. Clearly it was necessary to continue consistently with `17. f4`, to which Alekhine intended `17... Ng4`, and if `18. f5`, then `18... Rxd3 19. cxd3 Nxe3`; `20. Qxe3` is impossible because of `20... Bc5`. But instead of `20. Qxe3`, White could take the other knight with `20. fxe6`, followed by `20... Nxf1 21. exf7+ Kxf7 22. Qxf1+ Kg8`. Admittedly, the resulting position is still more favourable for Black. The threats ...Bc5+ or ...Qb6+ followed by ...Rf8 are rather unpleasant. All the same, White could defend with `23. Qe2`.	这次冲兵说明白方终于决定转入防守；此后黑方将不受阻碍地实现计划。显然，白方理应一以贯之地走`17. f4`。阿廖欣准备以`17... Ng4`回应；若`18. f5`，则`18... Rxd3 19. cxd3 Nxe3`，这时`20. Qxe3`因`20... Bc5`而不成立。不过，白方不必走`20. Qxe3`，可以用`20. fxe6`吃掉另一匹马，随后`20... Nxf1 21. exf7+ Kxf7 22. Qxf1+ Kg8`。诚然，形成的局面仍对黑方更有利；……Bc5+或……Qb6+随后……Rf8的威胁相当棘手，但白方仍可用`23. Qe2`防守。
After `17. f3`, however, Black slowly but surely takes control of the whole board.	然而`17. f3`以后，黑方缓慢却稳步地控制了整个棋盘。

CH2-14 `17... Rad8 18. Bf2 Nh5`	CH2-14 `17... Rad8 18. Bf2 Nh5`
The beginning of the “hunt” for the knight on d3.	

经校正的英文 OCR	中文译文

`19. Ne2 c5 20. b3 Nhf4 21. Nexf4 Nxf4 22. Nxf4 exf4`
 	
This completes the first stage of the plan and begins the second: the invasion along the open file. The invasion square—a weak square on an open line—is d2. True, it can be covered by `23. Qc1 Rd2 24. Be1`, but Black's main threat is not the direct ...Rd2; it is the preliminary ...c4-c3.
 	
`23. c3`
 	
This forestalls the threat just mentioned and, after `23... c4 24. b4`, covers c5, where the black bishop might otherwise take up a very powerful position. In return, however, White creates another weak square on the d-file: d3.
 	
`23... Qe5`
 	
Black is guaranteed an invasion on d3; for the present he improves the position of his queen and bishop.
 	
`24. Ra2 Rd3 25. Rc2 b6`
 	
Threatening to win a pawn by ...Bf6.
 	
`26. Qc1 Qe6 27. Qb1 Bf6 28. b4 c4 29. Qc1 g5`
 	
Black begins to execute the concluding part of the plan. All his pieces occupy ideal positions. Admittedly, the invading rook itself cannot deliver the decisive blow, but by paralysing White's forces it assists in a series of operations leading to a further deterioration of his position. The pawn advance on the king's flank undertaken by Alekhine is probably the most energetic way for Black to realise his advantage, personified by the menacing and unassailable position of the rook on the weak d3-square.
	黑方开始“围猎”d3马。
	
	`19. Ne2 c5 20. b3 Nhf4 21. Nexf4 Nxf4 22. Nxf4 exf4`
	
	计划的第一阶段至此完成，第二阶段——沿开放线侵入——随之开始。侵入格，也就是开放线上的弱格，是d2。诚然，白方可以走`23. Qc1 Rd2 24. Be1`加以保护；但黑方的主要威胁并不是立即……Rd2，而是先走……c4-c3。
	
	`23. c3`
	
	这阻止了上述威胁；`23... c4 24. b4`后，白方还控制了c5格，否则黑象本可在那里占据极其强大的位置。作为代价，白方却在d线上制造了另一个弱格：d3。
	
	`23... Qe5`
	
	黑方已经确保能够侵入d3；眼下先改善后与象的位置。
	
	`24. Ra2 Rd3 25. Rc2 b6`
	
	黑方威胁以……Bf6得兵。
	
	`26. Qc1 Qe6 27. Qb1 Bf6 28. b4 c4 29. Qc1 g5`
	
	黑方开始执行计划的最后部分。所有棋子都占据了理想位置。诚然，侵入敌阵的车本身无法完成决定性打击；但它瘫痪了白方子力，并由此帮助黑方展开一系列行动，使白方局面进一步恶化。阿廖欣在王翼发动兵的攻击，大概是黑方兑现优势最有力的方式；而这种优势，正具体体现在黑车牢牢占据薄弱d3格所形成的巨大威胁上。

Chapter Two

Stages of the Plan

Squares and lines as special purpose objects of the plan. The preparatory stage. Concrete definition of a position. Realisation of successes achieved

Every plan can usually be subdivided into several consecutive stages, ensuing one after the other. A single great plan can be broken up, as it were, into several small plans with their own objectives and ways of achieving them. It also happens that a course of events forces one of the opponents, and sometimes even both, to radically change their ideas.

As an example, we try to draw, at present in outline, a picture of the carrying out of a three stage plan.

In the first stage of the struggle, one has to create an object for a creative plan. This stage is characterised by the lack of a concrete objective and is such (for example, by provoking the advance of some of the opponent's pawns) that it bears a particular, one could say narrow-tactical character. In this part of the plan the opponents have to be guided by general considerations, based on fundamental positional principles of play. The task of both sides is to create weak squares in the opponent's camp and, if the opportunity presents itself, weak points. At the same time, it is necessary to counteract the opponent's carrying out of the same task. Thus, at the first stage of the opponent's plan, side by side with active operations, he must also take prophylactic measures against the weakening of his own position.

In the second stage, the planned objective comes to light. The way to achieving the objective becomes all the more clear. The concrete definition of the game reaches great depth.

If an objective is achieved, one of the sides transfers the struggle to the third stage, which proceeds under the heading of realisation of the advantage achieved. This stage might be called technical, but only to a certain extent, since in it is frequently required the ability to employ methods ensuing from theoretical laws and rules.

The opening stage represents a component part of the first stage. In several openings, particularly in gambits, the process of the struggle could be taken as also being the second stage of the plan. In a single plan, there might be not only three, but also four, five and

even more stages. On the other hand, practice knows also one-stage plans. These are most often met in games where incomplete plans occur, where conditions change, and that is why separate parts of the game turn out to have no logical connection with each other.

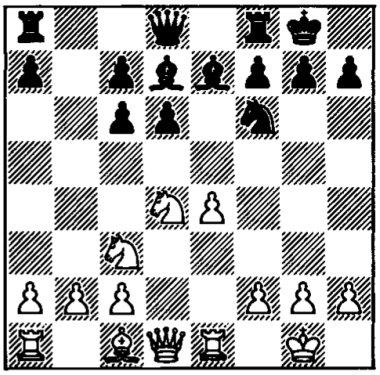

We devote the present chapter to plans in which weak squares and open lines serve as the main purposeful objective.

In accordance with this statement, the plan, with these objectives in view, can be sub-divided into the following stages:
1: the struggle for the creation of weak squares (or open lines)
2: the struggle for the capture (occupation) of weak squares or lines
3: the realisation of the advantage ensuing from the occupation of weak squares or open lines.

We begin with a game played as far back as the Petersburg tournament of 1909.

Spanish Game
White: **R.Teichman**
Black: **O.Bernstein**
1 e4 e5 2 Nf3 Nc6 3 Nc3 Nf6 4 Bb5 d6 5 d4 Bd7 6 0-0 Be7 7 Re1 exd4

It has been well known since the time of the game Tarrasch-Marco (Dresden 1892) that castling for Black, at the present moment, entails the loss of a pawn after 8 Bxc6 Bxc6 9 dxe5 dxe5 10 Qxd8 Raxd8 11 Nxe5, since 11 ... Bxe4 12 Nxe4 Nxe4 is not possible because of 13 Nd3.
8 Nxd4 0-0 9 Bxc6 bxc6

This position can rightfully be called a theoretical opening. It has been met in practice hundreds of times and even important authorities diverge in their opinions when evaluating it. Em. Lasker frequently and with great success employed this variation for Black. However, many people reckoned that the presence of the central advanced e-pawn for White, some advantage in space, and finally a certain weakness of the Black pawns on the queen's flank which might play a role in the endgame - all this makes White's chances more promising.

The diagrammed position is the intitial point of planning for both opponents. White sets his sights on the advance e5. There were even attempts to make this at once, but it became clear that, after 10 e5 dxe5 11 Rxe5 Bd6, the position of Black's pieces is improved, while White loses part of

his achievement in the centre. Therefore the move e5 requires preparation. Black's task consists of preventing, in every possible way, the advance of the e-pawn. To achieve this, it is necessary for him to create strong pressure on the e5 point. At the same time, Black could make some demonstration on the open b-file, so as not to allow White to wholly concentrate on operations in the centre.

10 b3

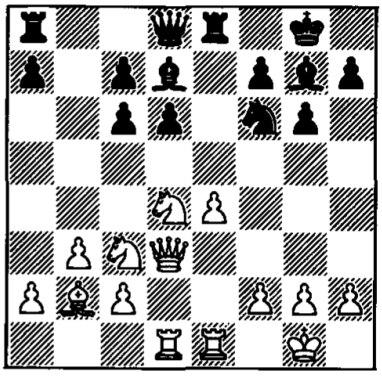

One could qualify this move as tactical, bearing the incidental character of an oversight. It is interesting that this "mistake" (possibly too strong a term for the present case) was made three years before the present game in the encounter Forgacs-Wolf (Nürnberg 1906).

The move 10 b3 is acceptable as a link in the plan to increase White's influence over the e5 square, but this objective is better served by 10 Bf4. The fact of the matter is that, after the advance of the White pawn to b3, the possibility appears for Black of the pawn march ...a5-a4 and, on this basis, an overall offensive develops on the queen's flank. This offensive would look quite logical after the transfer of the bishop from e7 to g7, where it will hold up the advance e5 and, together with this, support Black's attack on the a- and b-files from a distance.

10 ... Re8

Black is carried away with his plan and does not notice the possibility which has turned up to immediately seize the initiative. In the above-mentioned game, Wolf played 10 ... d5! and on 11 e5 Bb4! 12 Bd2 Ng4 with the threats of ... Qh4 and ... Bc5.

11 Bb2 Bf8 12 Qd3 g6 13 Rad1 Bg7

This position poses White a number of difficult problems.

Black has created such a solid defensive line that it is very difficult for White to march through the frontier e4-e5, and without this his heavy pieces, huddled together at the rear, are doomed to inactivity. Therefore he ought to have persistently strived to carry out his plan, that is the struggle for the e5 square with the aim of achieving the advance of his central pawn. The more consistent 14 f4 kept the initiative in White's hands. Teichmann, however, does not belong to those chessplayers who are inclined to take if only small risks in the game, and will not be forced into this. The move f4, as it seems, exposes the king's

position, allows the attacking reply … Nh5, weakens the e4 point, and in the end does not guarantee the move e4-e5. These considerations induce Teichmann to switch to defensive tactics, which lead to a further consolidation of the centre and organisation of a defence on the queen's flank.

14 f3

With this apparently modest move, White renders harmless the thrust … Nh5, which, in conjunction with a future … Be5 and … Qh4, might be the beginning of a direct attack on the king's flank. For example, 14 … Nh5 15 Bc1 (also possible is 15 Nde2 Qh4 16 Na4) 15 … Be5 16 Nde2 Qh4 17 f4! Nxf4 18 Bxf4 Bxf4 19 g3 with the win of a piece.

Therefore Black commences a plan of attack on the queen's flank.

14 ... Qb8 15 Bc1

Retreat! Teichmann realises his operation with 10 b3 is a failure. In the general "orchestra" of White pieces, the role of the bishop on b2 turns out to be worthless - and Teichmann transfers it to e3, so that it can take part in the forthcoming events.

15 ... Qb6 16 Na4

On an immediate 16 Be3 would have followed 16 … c5 17 Nde2 a5.

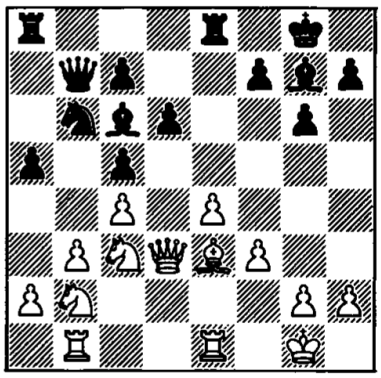

16 ... Qb7 17 Nb2 c5 18 Ne2 Bb5

This can be called an "intermediate" move. Before placing the bishop on the position destined for it in the plan (c6), Black considers it is useful to provoke the move c4. Why is this necessary? Black intends to organise an attack on the b3 pawn by … a5-a4, and for this it is very important to deprive it of the defence of the c2 pawn.

19 c4 Bc6 20 Nc3

As far as it is possible, White blockades the a4 point, and envisages the advance of the a-pawn. A battle also begins to develop around this point, in which the attacking side is Black, who seized the initiative after the 14th move.

20 ... Nd7 21 Be3 Nb6 21 Rb1 a5

23 Bf2!

A deeply planned move, the aim of which is not discovered by the opponent. As will be seen later, it in fact prevents the immediate advance of the Black a-pawn. The Black queen finds itself in unpleasant opposition to the White rook, and if he intends to continue the attack on the queen's flank then it would be useful for him to take the

queen away from the b-file to c8 or a6.

23 ... a4?

This move is mistaken. Admittedly, the pawn is recovered by force, which, of course, was foreseen by Bernstein; but he does not take into account that it is won back at the cost ... of the game. The conclusion is clear - a too direct carrying out of the plan can, despite a correct idea, lead to a deplorable result.

24 Nbxa4 Nxa4

This is also an unconsidered move. Better was 24 ... Bxa4 25 bxa4 Qc6; though even in this case the initiative passes to White after 26 Bh4 Nxa4 27 Nd5.

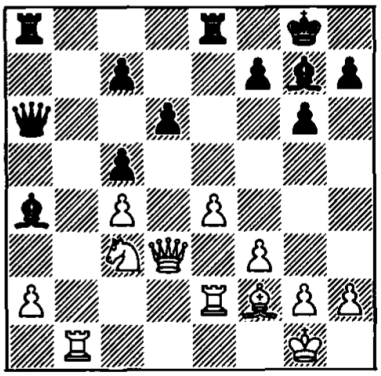

25 bxa4 Qa6 26 Re2

Again an outwardly modest move, but essentially it serves as preparation for a powerful plan of attack on the king's flank. The move is useful from various points of view: for the doubling of rooks on the open b-file, freeing a square on e1 for the bishop, and, in addition, the defence of the a2 pawn. The main (planned!) objective, however, only comes to light three moves later.

26 ... Bxa4

From the 23rd move Black goes downhill. He grabs the "poor" pawn, not foreseeing the immediate punishment. A not very pleasant, but all the same lesser evil, was 26 ... Bxc3. However, the best defence should be regarded as 26 ... Qc8 and then ... Qd7 or ... Qe6, placing the queen in the centre and, together with this, retaining hopes of play on the a-file. In any case, no way can the White knight be allowed to d5, and that with tempo (i.e. with the creation of threats).

It is useful to note here that in the chess struggle, as also in life, after going astray it is not easy to retain self-control and, without losing one's presence of mind, begin a search for new paths in unfavourable conditions. Often we see how a chessplayer, after making a mistake and losing his train of thought, excited, perturbed, vexed, begins to play badly and exacerbates his difficulties. The impression of Black's moves in this game, after the mistaken advance ... a4, is one of annoyance and irritation.

27 Nd5!

The beginning of a plan of attack, brilliantly carried through to the end over the course of 20 moves and completed with a mating set-up.

Now White has a direct threat

of Nxc7 but the aim of the attack is not just this. The object of the attack is the weakened f6 square, for the control of which the struggle now begins.

White's plan can be broken up into three stages. The first - exchange of the bishop which is the main defender of the f6 point; the second - attack of the f6 square and invasion on it; the third - realisation of the invasion. All the elements of the general methods of planning - concrete ideas, dynamic play, harmony of forces - are boldly reflected in the course of the fulfilment of the plan.

27 ... Ra7 28 Bh4

This is why White played Bf2 on the 23rd move. A move later, the planned basis of 26 Re2 is also revealed. Black cannot ignore the threat of Nf6+ or Bf6 and sets about the defence of the vulnerable point in his castled position - the f6 point.

The continuation 28 ... Re6 will clearly not do in view of 29 Rb8+ (Black opened the b-file, but White creates the threats on it). After 28 ... c6 29 Nf6+ Bxf6 30 Bxf6 Rd7 31 Qe3, the threat Qh6 leads to Black's immediate downfall. There remains only one possibility.

28 ... Bd4+ 29 Kh1 Kg7 30 Bf2!

This forces the exchange of the bishop, since on 30 ... Be5 follows 31 f4, while after 30 ... Bf6 31 Nxf6 Kxf6 32 Bh4+ Black has a miserable position. The role of the White rook on e2 is now clear. Namely, it guarantees White the exchange of bishops.

30 ... Bxf2 31 Rxf2

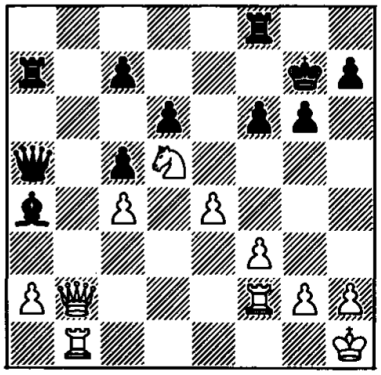

Threatening a check on c3. The second stage of the plan begins - the struggle to invade with the knight on the weak f6 square. Realising that the surrender of this square is "just like death", Black makes heroic efforts to defend it, but after the exchange of bishops, he has insufficient forces for this.

31 ... Qa5 32 Qe2!

Once again, threatening a diagonal check, this time from b2.

32 ... f6 33 Qb2 Rf8

Black needs only one tempo to save himself. If it were now his turn to move, he would have played 33 ... c6, repulsing the attack on the f6 point. But alas he does not have this tempo and the game is decided. White's threats, following one after the other, do not give Black a respite for a moment.

34 g4!

Threatening 35 Nxf6. Black can

postpone the fall of the f6 point only by three moves.

34 ... h6 35 h4 g5 36 f4! gxh4 37 Nxf6

And so the invasion takes place, after which the second stage of the plan can be considered completed.

The third, concluding stage, will consist of the realisation of the advantage which has been achieved by the invasion of the knight on f6. The position of the Black king is utterly ruined and his main forces find themselves on the other flank and unable to get over in time to the defence.

In the meanwhile, White's threats are already impending. Now 38 Nh5+ Kf7 39 Qf6+ and Rb8+ is threatened.

37 ... Rf7 38 g5

Now the g-file is opened and the rook is introduced into the attack.

38 ... Bc6 39 Rg1 Qa3 40 gxh6+ Kxh6 41 Rh2! Bxe4

The sacrifice of a piece is the only defence against mate (if 41 ... Qf3+, then 42 Qg2). White's positional advantage increases to material gain. The agony does not last long.

42 Nxe4 Qf3+ 43 Qg2 Qxg2+ 44 Rhxg2 Rxf4 45 Rg6+ Kh7 46 Nf6+ 1:0

Spanish Game
White: **Y.Vilner**
Black: **P.Romanovsky**
(3rd USSR Championship 1924)

1 e4 e5 2 Nf3 Nc6 3 Bb5 d6 4 d4 Bd7 5 Nc3 Nge7

Steinitz played this sometimes, though Black, with this move, delays the development of the king's flank by one tempo. Besides this, the knight does not have such a range of activity from e7 (particularly in the struggle for the centre), as from f6.

For all that, what attracted Steinitz to this move? The idea of it consists of the attempt to consolidate the e5 point after ... Ng6, which, on 5 ... Nf6 6 0-0 Be7 7 Re1 is deprived of pawn support and Black has to exchange ... exd4. For quite a long time, theoretical authorities, including also Steinitz, treated this exchange as a surrender of the centre. The move 5 ... Nge7 was one of Steinitz's numerous experiments.

6 Bg5

Chigorin played this against Steinitz in the 11th game of the return match in 1892. Lasker, in several match encounters with Steinitz, continued 6 Bc4 with the threat Ng5. Vilner's opponent in the present game (he is the author of this book) intended, on 6 Bc4, to put Chigorin's recommendation to the test and reply 6 ... Na5.

6 ... h6

Steinitz played here 6 ... f6 7 Be3 Ng6. In the present game, Black, without going into analysis of concrete variations, feared, after 6 ... f6, letting the opponent have the open a2-g8 diagonal, on which the bishop might be consolidated after 7 Be3 Ng6 8 a3!? However, in

the event of an exchange of the white-squared bishops by 8 ... Nxd4, a weak square is created for Black on e6. And yet, upon the experimental system chosen by Black, it was necessary to think more boldly and concretely. The proverb "the sheep is safe when the wolf has had its fill" cannot be assumed as a basis for the chess plan.

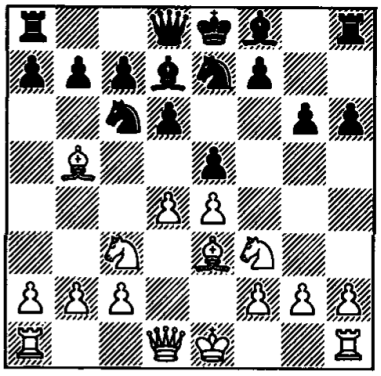

7 Be3

The apparently more logical 7 Bh4 surprisingly leads to difficulties with the defence of the d4 pawn after 7 ... g5 8 Bg3 (not 8 Nxg5 Ng6!) 8 ... g4. White would have to go in for 9 Bxc6 Nxc6 10 d5 gxf3 11 dxc6 Bxc6 12 Qxf3, which would have given Black a good game after 12 ... Qg5 or h5. It is interesting that Vilner feared not 7 ... g5, but the variation 7 ... Nxd4 8 Nxd4 exd4 9 Qxd4 Bxb5 10 Nxb5 Nc6! 11 Bxd8 Nxd4 12 Nxd4 Rxd8. Undoubtedly, this also eases Black's position.

In planning a game, one often has to consider quite a few concrete continuations, justifying or refuting this or that idea.

7 ... g6

An incorrect scheme, which is not in accordance with the idea of the development of the knight on e7. He should strengthen the e5 point, by playing ... Ng6, and quickly complete his development (Be7, 0-0). The invasion of the White knight on d5 does not promise him anything real, and he

could hardly hold his ground on this square.

8 dxe5!

The beginning of a plan which is very dangerous for Black. White has an advantage in development and he intends to exploit it by opening the d-file. If he replies 8 ... dxe5, the king's bishop on g7 will be doomed to inactivity; however, in the event of 8 ... Nxe5, White is prepared to content himself with the continuation 9 Nxe5 dxe5 (9 ... Bxb5? 10 Ng4) 10 Bxd7+ (10 Qe2 is also not bad) 10 ... Qxd7 11 Qxd7+ Kxd7 12 0-0-0+ Kc6 13 Rd3 Bg7 14 Rhd1 with an indisputable advantage.

8 ... dxe5

Black chooses the lesser of two evils and strives to create a complicated situation in the forthcoming difficult struggle.

9 Qd2

White's plan consists of controlling the d-file after 0-0-0. At the same time he wants to make it difficult for the opponent to castle. Nevertheless the queen move does not take into account, sufficiently concretely, the immediate course

of events, and already a move later he has to transfer it to e2. It was better to do this at once, postponing the operation of the heavy pieces on the d-file until he has castled queen's side.

9 ... Bg7 10 0-0-0 Bg4 11 Qe2

On 11 Nd5 Black has the adequate defence 11 ... a6. White prefers to carry out his planned line, reconciling himself to a loss of tempo.

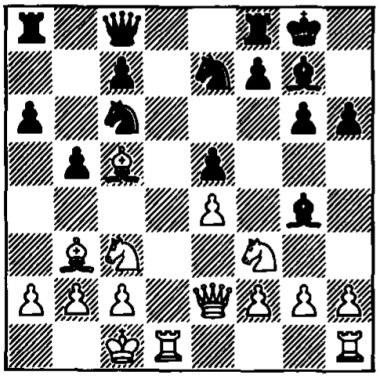

11 ... Qc8 12 Bc5 a6

He must defend himself against 13 Bxe7, on which now follows 13 ... axb5.

13 Ba4

White would also retain the better position after Bxc6+ but this would somewhat relax the tension. Black would probably have replied 13 ... bxc6.

13 ... b5 14 Bb3 0-0

15 Nd5!

This move gives the advantage to White, who gets the chance to start an attack on the king's flank.

15 ... Re8 16 h3 Be6 17 Qd2

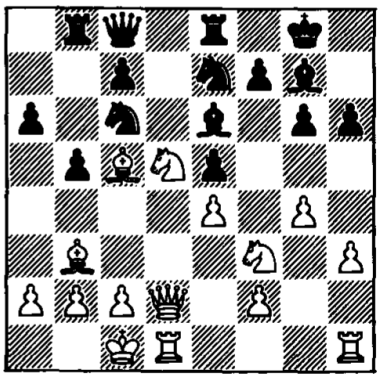

Played with the aim of preventing tactical possibilities connected with the opposition of the queen and Black rook on e8. These possibilities actually arise after 17 ... Bxd5 18 exd5 Na5 or 18 Bxd5 Nxd5 19 exd5 Na5 (Nd4).

There was, however, a more consistent way for White to occupy the d-file - 17 Nxe7+ Nxe7 18 Rd3, with a subsequent build-up of heavy pieces on the d-file.

17 ... Rb8

The aim of this move consists of the preparation of an attack on the b2 point. Black intends to furthermore play ... a5, provoking the move a4, opening the b-file by an exchange on a4 and then attempting to include the bishop on g7 in the game. All this - is a rather hazy expectation, but it does cause White some concern.

18 g4

White is not afraid of ghosts. There is a sense of courage and belief in the correctness of his plan from his attacking moves. He now threatens to make decisive progress after g5 followed by Nf6+.

18 ... a5!

Black sacrifices a pawn in the hope of enlivening his pieces somewhat, and principally with the aim of distracting the opponent from carrying out his plan.

19 g5

How strange it should be that this attack is not so threatening. White should not refuse the gift (19 Nxe7+ Nxe7 20 Qxa5), though, after 20 ... Bxb3 21 cxb3 (dangerous is 21 axb3 Nc6 22 Qc3 Ra8 with an initiative for the pawn) 21 ... Nc6 (worse is 21 ... Ra8 22 Qxb5 Rxa2 23 Ba3) 22 Qc3 Qe6, it would be very difficult to realise the extra pawn.

19 ... Bxd5

Of course, the check on f6 cannot be allowed.

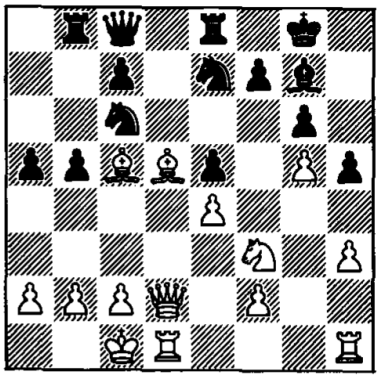

20 Bxd5

It is hard to decide whether it was better to play 20 exd5 a4 21 dxc6 (an interesting variation is 21 gxh6 axb3 22 hxg7 bxa2 23 Qh6 a1Q+ 24 Kd2 Qxd1+ 25 Rxd1 f6 - White has no attack and is a rook down) 21 ... axb3 22 axb3 Nf5!; Black gets a promising game for the pawn.

20 ... h5

After this move, locking the king's flank, White's attack comes to an end.

The conditions of the struggle have changed radically. White has not managed to carry out his plan; Black has rid himself of the troubles which have burdened him as a result of a badly played opening. The partners must look afresh at the position created and consider new plans, spend time calculating possible variations.

The first question: can White, just like a few moves ago, win a pawn by continuing 21 Bxe7 Nxe7 22 Qxa5? No, he cannot. There follows 22 ... Nxd5 23 Rxd5 (even worse is 23 exd5 Qf5!) 23 ... Ra8 and 24 Qxb5 is not possible in view of 24 ... c6, while, on 24 Qe3, Black simply takes the a2 pawn.

The second question: what should White do and is he threatened with anything from the opponent's side?

There are no direct threats from Black, but on the whole his forces are more actively posted than White's. The advance of Black's pawn group on the queen's flank might serve as a motive for the creation of a plan, aimed at the exposed position of the enemy king. Also possible is the idea of playing ... a4 and ... Nd8, threatening to win the bishop after ... c6. Finally, Black could improve

the position of his pieces by playing ... Qa6 and ... Rbd8. Besides this, White must watch out for the capture ... Nxd5, since in the event of exd5 the bishop g7 is re-animated (... e4), while after Qxd5 and the reply ... Qb7 the White queen's forward position does not turn out to be particularly good.

All these considerations have clearly relative value, since they bring out all the dynamics of the forthcoming struggle, but nevertheless they must be taken into account. In view of this, White might contemplate if only a very rough plan in which the guiding light must be the old, but correct objective to occupy the d-file with the rooks.

21 Qe3?

In all probability, this move was also considered by Vilner to be a link in the plan of seizing the d-file with the rooks. White intends to continue 22 Nh4 and then Qf3. Sooner or later Black will have to take the bishop ... Nxd5, then Rxd5 and Rhd1 and the objective is achieved. Incidentally, with the present arrangement of forces, the queen defends the h3 pawn.

And yet White heads towards the objective on a bad road. The queen turns out to be in dangerous opposition to the enemy rook and Black immediately exploits this fact. From this it follows that an insufficiently correctly thought out plan needs to be still skilfully carried out. Only one of the links in the plan has to be "rusty" for the whole chain to fall to pieces.

White should stop at 21 c3, with Qc2 and the doubling of rooks to follow. With the move 21 c3 he would have also solved a series of accessory problems: the elimination of Black's ideas connected with the knight thrust to d4, on ... b4 he would reply c4, and finally, the placement of the pawn on c3 would restrict the activity of the opponent's king's bishop.

21 ... Nd4

The possibility of this sudden and unpleasant thrust has been created by the White queen being on the e-file.

22 Bxe7

White has exchanged his most favourably placed piece for the knight, which made only the one opening move - and not a particularly successful one at that. The decision to exchange on e7 was obviously dictated by the desire to retain the white-squared bishop at any price. However, this natural desire once again was not confirmed by an examination of the variations, which would have convinced White of the impossibility of retaining the bishop on the a2-g8 diagonal; but in this case is it worth preserving it?

The correct continuation was 22 Nxd4 exd4 23 Qf4 Nxd5 24 exd5 Re5 25 Bxd4 Rf5! 26 Qg3 Bxd4 27 Rxd4 Qd8 28 Rg1 Rb6, winning back one of the pawns, which leads

to an approximately equal position.

It should be noted that not possible was 22 Nxe5 Nxd5, and Black wins a piece (23 exd5 Nf5 or 23 Qxd4 Nf4!).

22 ... Rxe7 23 c3

Even worse is 23 a3 c6 24 Ba2 b4 and Black obtains an attack.

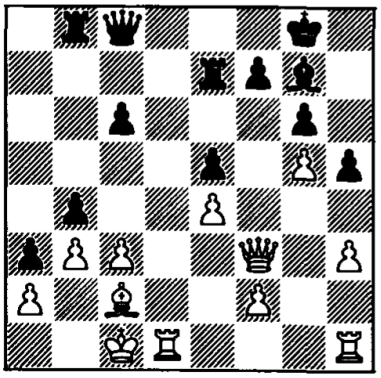

23 ... Nxf3 24 Qxf3 c6 25 Bb3 a4 26 Bc2 a3

White strives to create a weak square on d4, by eliminating the c3 pawn, and to exploit it as a base for the rooks, while if things turn out well then also for the bishop.

27 b3

Tempting but weak was 27 Bb3, on which would follow 27 ... c5 28 Bd5 axb2+ 29 Kxb2 c4! and Black's attack on the a-file, supported by the bishop from the f8 square, is rather dangerous. The White bishop is apparently well placed on the weak central d5 square, but its role there is insignificant because it acts in isolation without a proper connection with the rest of White's forces.

27 ... b4

28 c4

White assumes that "opposite-coloured" bishops and the locked position will lead to a draw, and again contents himself with a consideration of a general character. Meanwhile a concrete examination of the variations would have convinced him of the weakness of the advance of the c-pawn.

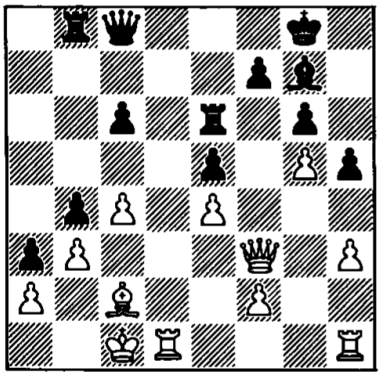

Thus, in the course of the game, we have observed several times how White has made not so much direct mistakes as mediocre moves, precisely because his choice of moves was made on the basis of general principles. This applies to his 9th, 17th, 19th, 21st, 23rd and finally the last, 28th move. Of course there are positions where one has to be guided by very rough data about the value of this or that move, but in the majority of cases the matter is somewhat different. The assessment of a position on the basis of an examination of variations, i.e. analysis, will always be more correct and make easier the finding of a right way to achieve the planned objective.

White's last move can be considered a fatal mistake. The best retort to the energetic attack on the black-squared territory in his camp was 28 Bd3, and if 28 ... bxc3, then 29 Bc4. Also in this case Black retains the better position, but his activity to a certain extent would be connected to the necessary defence of the f7 point. It should be added that the White

bishop is now doomed to life imprisonment behind its own pawns.

28 ... Re6

The beginning of the execution of a plan, consisting of four stages: occupation of the d4 square with the bishop and consolidating it there; preparation for the opening of the f-file; control of the file with the heavy pieces; invasion of the opponent's camp and organisation of a decisive attack on the king. Judging by White's reply, he apparently still does not discover this intention, which is murderous for him.

29 Rd3

Is this really to double rooks on the d-file? Alas White does not suspect that three moves later his rooks prove to be in the same situation as his bishop.

29 ... Bf8 30 Rhd1

30 Qe3 does not help, in view of 30 ... Be7 followed by ... Qf8.

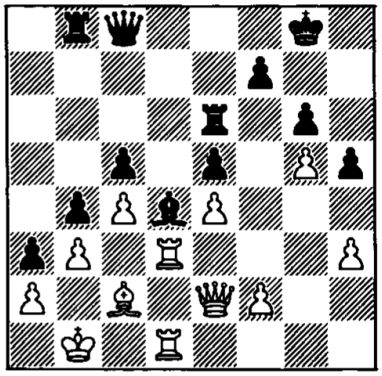

30 ... Bc5 31 Qe2 Bd4

Not fearing 32 f4, in view of 32 ... Bb2+ and ... exf4.

32 Kb1

With the intention of withstanding the seige. But this decision is incorrect, since Black has available a real plan to break through. It was better to sacrifice the exchange by 32 Rxd4 exd4 33 Rxd4, though even in this case it would not be a very complicated task. There would follow 33 ... Qc7! 34 Qd2 Ree8 with the decisive threat of ... Rbd8; if 35 Rd7, then 35 ... Qe5.

32 ... c5

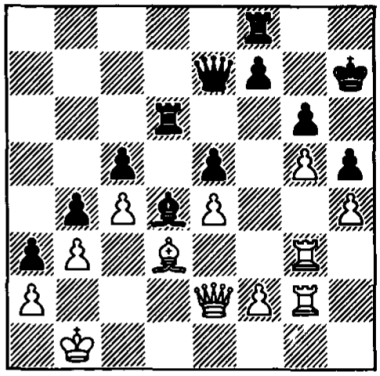

And so the bishop is consolidated on the eternal square d4. But it can be exploited as a real force only when harmony is established with the other Black forces. But for this it is necessary to organise an invasion of the rooks into the opponent's camp. It is obviously impossible to do this along the open d-file. It is necessary to open another file - in the present case, the f-file. However, the move ... f6 needs preparation. You see, in this way, not only the f-file but also the g-file is opened, along which the White rooks can develop a dangerous counter-attack on

the g6 pawn, and then also on the Black king with support from the queen. Black's attack on the f-file and White's counter-attack on the g-file will take the form of a mighty battle of six heavy pieces with inactive bishops. For the present, it is necessary for Black, firstly, to consolidate beforehand the position of his own king and in particular the g6 point, and secondly, to place his heavy pieces in such a way that now, after the exchange of pawns, he can strive for a breakthrough with all his might, i.e. to "build up" on the f-file. It is desirable to prepare this set-up in such a way that the queen is behind the rooks. It seems that the opening of the f-file is not a simple operation and the slightest carelessness might lead to the ruin of the whole plan.

33 Rf3

White discovers his opponent's intention. However, both the move of the rook to f3 and all the subsequent manoeuvres of White's heavy pieces indicate that he is not able to construct a plan of defence. After the opening and occupation of the f-file, Black threatens to win the f2 pawn, which turns out to be attacked four times, whereas it can be defended with only three White pieces. In the attack on the f2 pawn, all squares of invasion (f1, f2, f3) are open for the Black rooks. Therefore the relatively best plan of defence was the advance of the pawn to f3, the transfer of the queen to g2 and the freeing of the d1 square for the bishop, from where it can cover the pawn an extra time. This does not promise salvation, but it would have to some extent complicated the process of realisation for Black.

33 ... Qd8 34 h4 Qe7 35 Rg1 Rf8 36 Bd3 Kh7 37 Rfg3 Rd6 38 R1g2

38 ... f6

The aim of the second stage is carried out - the opening of the f-file, which is immediately occupied by Black's heavy pieces.

39 gxf6

If White continues to wait, for example by 39 Kc2, then follows 39 ... Qf7, and 40 f3 is not possible in view of 40 ... Rfd8 with an unavoidable invasion of the Black rooks, but this time along the d-file.

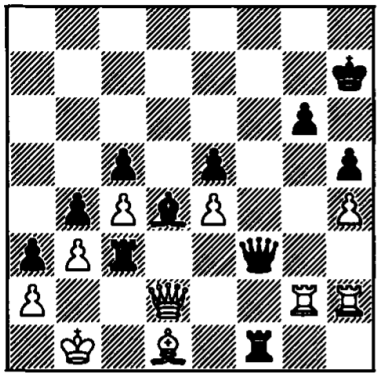

39 ... Rfxf6 40 Rg5 Qf7 41 Bc2 Rf4 42 Rh2 Rdf6

With this ends the third stage, and the struggle passes on to the concluding phase - the invasion and swift "taking prisoner" of the king.

43 Rgg2 Bxf2

Finally the bishop enters into full contact with the rooks. This harmony signifies a quick end.

44 Bd1 Bd4 45 Kc1 Rf1 46 Kc2 R6f3 47 Qd2 Rc3+ 48 Kb1 Qf3

Black is carried away by the process of invasion. 48 ... Be3 would have provoked an immediate capitulation. However, even now White soon gets mated. The apotheosis of achieving the planned objective is illustrated by the diagram.

49 Re2 Rxb3+ 50 axb3 Qxb3+ 51 Kc1 Bb2+ 0:1

It is mate on the following move.

In conclusion of this instructive game we wish to once again recount the basic reasons for White's defeat. With this we have in mind not individual weak moves or direct oversights, but the very essence of the errors of chess thinking. If we look at the matter from this point of view, then this basic reason should be seen as a non-concrete approach to many positions, arising in the course of the struggle. There were too few variations in White's thinking, when evaluating positions, and this prevented him foreseeing, if only roughly, the immediate course of events on the board. Thus White's 28th move, c4, bears witness to the fact that he did not foresee at all the manoeuvre ... Bg7-f8-c5-d4. When the bishop had invaded on d4, he was not able to correctly weigh up the dangers associated with this and, instead of an immediate sacrifice of the exchange, allowed the opponent to play ... c5. If White had imagined the consequences of the break ... f6, he, of course, would not have permitted the construction of a real stronghold on the d4 square. The non-concrete approach to the position was essentially a breach of the principles of dynamic play. White's thinking was undynamic, he assessed the position staticly and not in the light of a continous development of the struggle.

Besides these main reasons, White's mistake must further be regarded as a loss of steadfastness in improving his position to some extent. If one yields to the feeling of inevitable defeat, then thinking begins almost to run free. A weakened will to resist is shown by an indifference to the creative side of the game. In the present game, White's play, after 21 ... Nd4, gives the impression of demoralisation, while after 29 ... Bf8 even total doom.

Philidor Defence
White: **A.Evenson**
Black: **A.Alekhine**
(Kiev 1916)

1 e4 e5 2 Nf3 d6 3 d4 Nf6 4 Nc3 Nbd7

One of the principal variations of the Philidor Defence has been played. However, the position of the knight on d7 hampers Black and makes difficult the development of his queen's flank. Therefore, nowadays, another plan of development is advanced: 4 ... exd4 5 Nxd4 Be7 6 Be2 0-0 7 0-0 a6 8 a4 c5 9 Nf3 Nc6. Unfortunately there is still little practical experience of it, which does not allow any conclusions to be made, but in any case it has no less right to exist than the stereotyped theoretical variation chosen by Black in the present game. Black usually has to overcome some difficulties in order to come out of it all right into the broad scope of the middlegame.

5 Bc4 Be7 6 0-0 0-0 7 dxe5

White has no reason to fear the exchange ... exd4, which would only strengthen his position in the centre. And yet Evenson's decision to open the d-file is easy to understand since 7 Qe2, advanced in practice and approved in opening handbooks, justifies itself only after the reply given in the reference books, 7 ... c6. Meanwhile, namely after 7 Qe2, an interesting possibility is opened for Black with an exchange on d4, for example 7 ... exd4 8 Nxd4 Ne5 9 Bb3 c5 10 Nf5 Bxf5 11 exf5 Nc6 or Qd7 with excellent prospects.

The move 7 h3 creates the most difficulties for Black, which, on 8 ... Ne5 in the above-mentioned variation, allows the retreat 9 Be2 with the threat to begin an offensive by f4. On 9 ... d5, possible is the simple 10 exd5 Nxd5 11 Nxd5 Qxd5 12 Nf5! and White's position is preferable. Besides this, the move 7 h3 averts the thrust of the knight to g4 and thereby secures the e3 square for the bishop.

After Be3, White could move the knight away from f3 and attack the e5 pawn once again by f4. A rough course of events might be: 7 h3 c6 8 a4 Qc7 (8 ... Nxe4 9 Nxe4 d5 10 Bxd5 cxd5 11 Nc3 would create a lasting weakness for Black on d5) 9 Be3, and Black is cramped; White, however, threatens Nh2 or Nd2 with f4 to follow.

After the exchange in the centre, made by Evenson, the rooks will be attracted to the only open d-file, and if neither opponent succeeds in outstrippipng the other in this operation, then one must expect a mass exchange - heralding the drawing style.

7 ... dxe5

White's plan now is obvious - to free the way for the rooks to the d-file and attempt to double them on this line. The way leading to this objective is also clear. It consists of the moves Qe2, Be3 or

Bg5, Rfd1, a4 (if necessary to prevent ... b5) and possibly further, h3, so as not to allow the move ... Ng4 after Be3 and to prevent the pin ... Bg4. However it is necessary to decide in which order those moves should be made.

To reply to this question one must probably state concretely what plan Black must choose to bring the rooks to the d8 square and neutralise the opponent's play on the d-file. In order to develop his queen's flank, Black has to free his queen's knight from defence of the e5 pawn.

The most convenient way is to defend the e5 pawn again with the queen from c7; incidentally, with the move ... Qc7, Black frees the d8 square for the rooks. Thus 8 Qe2 c6 9 a4 Qc7 10 h3 Nc5 11 Rfd1 a5 12 Bg5 Be6 13 Rd2 Rad8. It is not hard to convince oneself that White does not succeed in controlling the d-file. Consequently, the exchange 7 dxe5 does not achieve its objective and is a link in a mistaken plan.

8 Bg5 c6 9 a4 Qc7 10 Qe2 Nc5 11 Ne1

Convinced that the entrance of the rooks on the d-file leads to only exchanges, White, apparently, does not want to take the road to a prospective draw (which, however, he himself created with his 7th move) and changes plan. He is prepared to concede the d-file, reckoning on preventing the invasion of the Black rooks with the covering knight on d3, and intends to prepare an attack himself on the centre by f4 and a subsequent opening of the f-file.

11 ... Ne6 12 Be3 Nd4 13 Qd1

13 Bxd4 exd4 is less attractive, and the second knight has to retreat to the first rank.

13 ... Rd8

Black accepts the gift of the open d-file. His plan will consist of three stages: doubling rooks on this file and removing the knight d3; invasion of the opponent's territory; realisation of the advantage achieved.

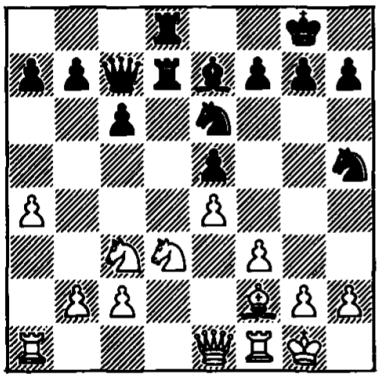

He will need over 30 moves to fulfil this plan, since the first part takes 10 moves, the second - 6, and the third - 20. It turns out that the process of realisation can be very protracted and complicated. In the previous game it only took a few moves, since the opponent was subjected to a rout even during the process of invasion; here, however, as we will see, White retains considerable resources for resistance even after the invasion of the rooks.

14 Nd3 Be6 15 Bxe6 Nxe6 16 Qe1 Rd7 17 f3

This advance bears witness to the fact that White has finally decided to switch to defence; now Black realises his plan without hindrance. Clearly it was necessary to continue with the consistent 17 f4, on which Alekhine was intending to reply 17 ... Ng4 and if 18 f5

then 18 ... Rxd3 19 cxd3 Nxe3 and 20 Qxe3 is not possible on account of 20 ... Bc5. But in place of 20 Qxe3 White could take the other knight - 20 fxe6 with the continuation 20 ... Nxf1 21 exf7+ Kxf7 22 Qxf1+ Kg8. Admittedly, the position created is also more favourable for Black. The threats ... Bc5+ or ... Qb6+ followed by ... Rf8 are rather unpleasant. All the same, by playing 23 Qe2, White could defend himself. However, after 17 f3, Black slowly but surely takes control of the whole board.

17 ... Rad8 18 Bf2 Nh5

Beginning a "hunt" for the knight d3.

19 Ne2 c5 20 b3 Nhf4 21 Nexf4 Nxf4 22 Nxf4 exf4

This completes the first stage of the plan and begins the second - the invasion on the open line. The square of invasion (weak square on an open line) is the d2 point. True, it can be covered by 23 Qc1 Rd2 24 Be1, but Black's main threat is not the direct ... Rd2, but the preliminary .... c4-c3.

23 c3

Forestalls the above-mentioned threat and, in the event of 23 ... c4 24 b4, covering the c5 square, which the Black bishop might occupy with great strength, but in return creating yet another weak square d3 on the d-file.

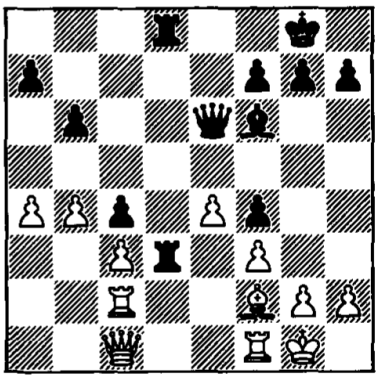

23 ... Qe5

Black is guaranteed an invasion on d3, and for the present he improves the position of his queen and bishop.

24 Ra2 Rd3 25 Rc2 b6

With the threat to win a pawn after ... Bf6.

26 Qc1 Qe6 27 Qb1 Bf6 28 b4 c4 29 Qc1

29 ... g5

Black begins to carry out the concluding part of the plan. All his pieces occupy ideal positions. Admittedly, the invading rook itself cannot deliver the decisive blow, but, by paralysing White's forces, it assists in the carrying out of a series of operations which lead to a further deterioration of his position. The pawn advance on the king's flank, which Alekhine un-

dertakes, is probably the most energetic way for Black to realise his advantage, personified by the menacing and unassailable position of the rook on the weak d3 square.

30 h3 Be5 31 Qa1 h5 32 a5

White opens the a-file, but the opponent's attack develops at such a pace, that he already will not manage to exploit this airway. If he had wanted to, Black could have deprived White of even this possibility, by playing ... a6.

32 ... g4 33 axb6 axb6 34 Bh4 f6 35 Be1 g3

Finally suffocating the opponent. The final aspiration will consist of the invasion of the queen, along the g1-a7 diagonal, to e3.

36 Qa6 Qc6

With the threat ... Ra8.

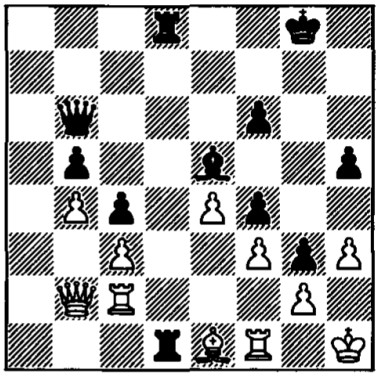

37 Qa3

The continuation 37 Ra2 Bxc3 was also hopeless, as indeed was everything else. White reaps the fruits of his two mistaken plans - with the moves 11 Ne1 and 17 f3. The consequences of bad moves will not always be ruinous, but following an incorrect plan is in fact "like death".

37 ... b5 38 Qb2 Qb6+ 39 Kh1 Rd1

Not at once 39 ... Qe3, in view of 40 Re2, but now Black threatens 40 ... Qe3 41 Re2 Qxc3.

No help is 40 Rg1 Qxg1+ or 40 Re2 R8d3 with the threat ... Bxc3.

There followed:

40 Rc1 Qe3 41 Ra1 Bc7 42 Qa2 Rxa1 43 Qxa1 Qe2 44 Rg1 Bb6

and four moves later

0:1
