CH7-1 · 原书194页 **Manoeuvring. About the Initiative**	CH7-1 · 原书194页 **调动与主动权**
CH7-2 · 原书194页 In chess works and commentaries we quite often come across the term 'manoeuvering". Following the example of the late grandmaster Tartakover, it is sometimes substituted for the concept of "tacking", though in the semantic sense both terms are not the same.	CH7-2 · 原书194页 在国际象棋著作与评注中，我们经常遇到“调动”一词。按照已故特级大师塔塔科维的用法，有时人们会用它替代“迂回”这一概念，尽管从语义上说，两者并不相同。
CH7-3 · 原书194页 Manoeuvering is a term coming from the German word manöver, which means manoeuvre.	CH7-3 · 原书194页 “调动”一词源自德语manöver，意为“运子”。
CH7-4 · 原书194页 However, one should not mix up the concepts of 'manoeuvre' and 'manoeuvering'. A manoeuvre is several moves of one piece, usually made with some concrete aim. Manoeuvering is a series of manoeuvres with different pieces, bearing a more or less prolonged character and rarely having a clearly outlined aim.	CH7-4 · 原书194页 不过，不应混淆“运子”和“调动”两个概念。运子，是同一枚棋子连续走数步，通常带有某种具体目标；调动，则是不同棋子一系列运子的组合，持续时间较长，而且很少具有清晰明确的目标。
CH7-5 · 原书194页 Manoeuvering is a concept that arose in connection with a definite phenomenon on the horizons of chess art which appeared at the end of the last century and was provoked mainly by the advocating of dogmatism by a number of representatives of the English and German chess schools.	CH7-5 · 原书194页 “调动”这一概念，与上世纪末棋坛出现的一种现象有关。当时，英国和德国学派的一些代表人物提倡教条化的下法，促成了这种现象。
CH7-6 · 原书194页 In a number of events, with these masters came to be recommended a form of waiting tactics. One of the partners, following this recommendation, waited until his opponent finally created a real weakness in his camp or made some other sort of mistake. It would also happen that both partners, having learned to be patient, began to manoeuvre by themselves in the rear of communications, following a policy of extreme caution and trying not to give each other even if only the slightest chance of attack.	CH7-6 · 原书194页 这些大师在不少情况下倡导等待战术：一方耐心等待，直到对手在阵地中留下真正的弱点，或犯下其他错误。有时双方都十分耐心，各自在后方调动子力，采取极端谨慎的方针，力求不给对手哪怕最微小的进攻机会。
CH7-7 · 原书194页 This, of course, did not mean that all manoeuvering merited censure.	CH7-7 · 原书194页 当然，这并不意味着所有调动都值得批评。
CH7-8 · 原书194页 In manoeuvering one can perceive several gradations. Besides waiting, aimless manoeuvring, there is also forcing, planning manoeuvring. This takes place in those cases where the achievement of the intended aim requires prolonged piece and pawn manoeuvres. This aspect of manoeuvering is seen particularly often in positions of a closed t type, that is with mutually locked pawn chains.	CH7-8 · 原书194页 调动也有不同类型。除消极等待、缺乏目的的调动外，还有局面所迫、按计划进行的调动：要实现既定目标，必须经过长时间的子力和兵的调动。这种情况尤其常见于双方兵链相互锁住的封闭局面。
CH7-9 · 原书194页 We also begin our review with positions of this sort - and playing them is difficult and requires a profound and penetrating assessment of positions from the chessplayer.	CH7-9 · 原书194页 我们先从这类局面谈起。处理它们并不容易，棋手必须对局面作出深入而透彻的判断。
CH7-10 · 原书194页 The next position arose in the game Lasker-Burn, played in the Petersburg tournament 1909:	CH7-10 · 原书194页 下图局面出自拉斯克对伯恩一局，1909年彼得堡锦标赛。
CH7-11 · 原书195页 Fearing his opponent's tactical chances, associated with the move d5, and intending, without hindrance, to unhurriedly prepare an attack on the king's flank, Lasker locked the position here with the move	CH7-11 · 原书195页 拉斯克顾虑对手以...d5制造战术机会，同时又想从容准备王翼进攻，于是用下面这步封闭了局面：

CH7-13 · 原书195页 A more interesting and sharper struggle might have ensued with the tension-centre, but also in a closed position a plan will quite possibly present itself, with the only difference that the achievement of a concrete (objective is then postponed until a more distant moment in the game. From now on the play forcibly assumes the form of protracted manoeuvering.	**CH7-13 · 原书195页** 保持中心的紧张状态，可能带来更有趣、更尖锐的斗争。不过，封闭局面同样可以制定计划，只是具体目标要在更遥远的将来才能实现。从此，双方不得不展开漫长的调动。

CH7-20 · 原书195页 The manoeuvering has already lasted 20 moves and both opponents have vigilantly held back their forces close to critical points of the board. White's offensive on the king's flank has been slowed down and only on the queen's flank does a possibility slightly appear, by playing Bc2 to then try and seize the white squares by c4.	**CH7-20 · 原书195页** 调动已经持续了20步，双方始终谨慎地把子力留在关键区域附近。白方王翼攻势受阻，只有后翼还隐约存在机会：先走Bc2，再以c4争夺白格。

CH7-26 · 原书196页 Now the game livens up and soon loses its manoeuvering character. The Black pawns on the queen's flank prove to be weak and this in the end decides the outcome of the game.	**CH7-26 · 原书196页** 对局顿时活跃起来，很快结束了调动阶段。黑方后翼兵的弱点暴露出来，并最终决定了胜负。
CH7-27 · 原书196页 In the following example the author of the numerous piece manoeuvres is likewise Lasker.	**CH7-27 · 原书196页** 下一个例子中，反复调动子力的仍然是拉斯克。

CH7-29 · 原书196页 The pawn chain here, as distinct from the previous example after the move d5, is not locked. There are also open lines and weak points present - in short, quite a lot of objects for planning. White has made territorial gains on the king's flank. Nevertheless in the course of the next 20 moves the opponents conduct the struggle on manoeuvering lines.	**CH7-29 · 原书196页** 与上一例d5之后的局面不同，这里的兵链并未锁住。棋盘上既有开放线，也有弱点，可供制定计划的目标不少。白方在王翼取得了空间优势，但接下来20步，双方依然主要进行调动。

CH7-37 · 原书196页 White has a weak e4 pawn, and the need to defend this makes his manoeuvering efforts to pressurise the Black king's position not very effective. If now, for example, 28. Lasker's next move is surprising and above all deserves attention in respect of the assessment of it by the author himself.	**CH7-37 · 原书196页** 白方的e4兵是个弱点，必须分出力量保护它，这使他通过调动向黑王施压的效果大打折扣。例如现在28. CH7-39 · 原书196-197页 Lasker gave his reasons for the retreat of the queen: "Black's position is cramped, but there are no combinations leading to a win to be seen. Therefore it is necessary to first try to disorganise Black's pieces by means of new attacks and then later return to the intended plan of attack."	**CH7-39 · 原书196-197页** 拉斯克解释这次退后的理由：“黑方局面拥挤，但看不出能够取胜的战术组合。因此必须先制造新的威胁，打乱黑方子力的配置，再回到原定的进攻计划。”

CH7-40 · 原书197页 What are the "new attacks" that Lasker intends? Black has a weak d6 pawn, defended only by the knight; possibly he intends to direct his gaze precisely here, but the attack on d6 is fully counterbalanced by Black's attack on the e4 pawn.	**CH7-40 · 原书197页** 拉斯克准备制造什么“新的威胁”？黑方的d6兵较弱，只由马保护，他或许正瞄准这个目标。不过，白方对d6兵的攻击，可以被黑方对e4兵的反攻完全抵消。
CH7-41 · 原书197页 A new stage of manoeuvering begins, on the part of Lasker, who sets his distant aim on distracting some ofBlack's pieces from defence of the king's flank. He leaves the rook and both knights "on duty" in expectation of forthcoming events in this sector of the board, but the queen and other rook begin to manoeuvre in the central area.	**CH7-41 · 原书197页** 拉斯克开始新一轮调动，长远目标是牵走部分防守王翼的黑子。他把一车、双马留在王翼待命，另一车与后则转而在中心活动。

CH7-180 · 原书204页 Despite White's extra pawn in the game Blackburne-Albin from Hastings 1895, he cannot achieve anything - the construction of the position excludes the possibility of a breakthrough. The potential weakness of the Black b6 pawn cannot be realised. There are no open files on the board, and the heavy pieces of both partners are doomed to inactivity. However, having an extra pawn, Blackburne did not want to content himself with a draw. As a result, there arises the process of many moves of manoeuvring, in which White only waits to see if Black will by chance relax his attention to the b6 pawn. Black likewise cannot do anything and is obliged to manoeuvre. The defence of the b6 pawn does not present any particular difficulty. Let us see how events developed.	**CH7-180 · 原书204页** 1895年哈斯廷斯锦标赛，布莱克本对阿尔宾一局，白方虽然多一兵，却无法取得进展。兵形封闭，没有突破的可能，b6兵潜在的弱点也无法利用。棋盘上没有开放线，双方重子都难以发挥作用。但布莱克本不愿带着多一兵的优势接受和棋，于是开始漫长的调动，等待黑方偶然疏忽b6兵的防守。黑方也无事可做，只能跟着调动；保护b6兵并不困难。下面看看实战的发展。

CH7-216 · 原书206页 A continuation which gives the game a locked character. The struggle now enters a manoeuvring phase which lasts not more, not less than 30 moves. Throughout this long period, the sides 'succeed" in producing just one pawn exchange. Such a process of manoeuvring requires great patience from the partners. In the end it exhausts White, that is the side whose fault it was that the struggle went into manoeuvring channels. "Those who live by the sword, must die by the sword"'.	CH7-216 · 原书206页 这一后续手段使局面封闭，双方进入持续整整30步的调动阶段。在如此漫长的过程中，他们竟只“完成”了一次兑兵。这需要极大的耐心，最终首先耗尽耐心的却是白方，也正是白方主动把对局引向了调动。可谓作茧自缚。

But the main thing is this, that White reckons on carrying out, in the near future, the advance d3-d4 or f2-f4, opening the centre, but does not take into account that the opponent will prevent the execution of this plan, after which he has to manoeuvre until the end of the game. It shows that the process of manoeuvring is far from always created by chance or comes about by coincidence, without depending on the will of the players. Manoeuvring arises at times also as a result of a conscious striving for it by one or both opponents. From the creative point of view, what is not brought about by such striving cannot justify itself. CH7-262 · 原书208页 We have already used the term "initiative" time and again in the pages of this book. The Latin word "initium"1 means the principle of initiative. Initiative in life - this is a display of activity in any area of man's work. The initiative is born, becomes apparent and is developed out of a resolute striving for individual or collective thoughts. In the chess struggle the initiative likewise presents itself as a resolute activity, directed towards the creation of immediate threats to the opponent, to the constraint of his position, to the restriction of the mobility of his forces s and his possibilities in general.	**CH7-262 · 原书208页** 本书已经多次使用“主动权”这个词。它的词源可追溯到拉丁语initium，意为“开始”。生活中的主动精神，体现在各个领域积极采取行动，并在坚定落实个人或集体构想的过程中产生、表现和发展。在国际象棋中，争取主动权同样意味着果断行动：向对手制造直接威胁，压缩其阵地，限制其子力活动和可用的选择。

CH7-263 · 原书208页 More often than not in the chess game, one of the opponents holds the initiative, but there will be occasions when the initiative runs across a counter-initiative, particularly when attacks are conducted on opposite flanks. The initiative will quite often bear a temporary character: it either runs dry or is intercepted by the opposing side.	CH7-263 · 原书208页 一盘棋中，通常由一方掌握主动权；但也可能双方各有主动行动，尤其是在两翼分别进攻时。主动权往往是暂时的：它可能逐渐消失，也可能被对手夺走。
CH7-264 · 原书208-209页 From the point of view of scale, manifestation of the initiative can be divided into several categories. The initiative can be small, firm, durable, dangerous, s strong etc. Sometimes it is said that the initiative develops into an attack. This is an inaccuracy. An attack represents an offensive. The initiative likewise often attends threats and offensives. But if an attack is always an initiative, then an initiative cannot in all cases be identified with an attack. For example, in the game Alekhine- Yates, White held the initiative for 40 moves - the whole process of manoeuvring - but he only obtained an attack at the end of the game, after the move g5, when he began an assault on the f6 and h7 pawns and created mating threats. Therefore to say that the initiative turns into an attack is roughly the same as talking about the change of boldness into bravery, cowardice into timidity, a laugh into a roar, etc.	CH7-264 · 原书208-209页 主动权可以有不同的程度和性质：轻微、稳固、持久、危险或强大，等等。人们有时说“主动权转化为进攻”，我们认为这并不准确。进攻是一种主动行动，主动权也常表现为威胁和攻势。但有进攻就有主动权，并不意味着所有主动权都等同于进攻。例如阿廖欣对耶茨一局，白方在整个40步的调动过程中都掌握主动权，直到最后冲起g5，开始攻击f6、h7兵并制造将杀威胁时，才真正发动进攻。所以，把两者说成彼此转化的关系，就如同说大胆变成勇敢、怯懦变成胆怯、笑声变成大笑一样，并不严密。
CH7-265 · 原书209页 In the opening of the game, White holds a small initiative thanks to the right of the first move (let us say, after 1. d4, Black is deprived of the reply 1... e5). If Black succeeds in neutralising even such a slight initiative in the opening, then it is customary to consider that he has equalised the game, though, in the present case, the term "equalisation" bears a particularly conditional character.	CH7-265 · 原书209页 开局时，白方凭借先行之利，拥有轻微的主动权。例如1. d4之后，黑方便不能随意应以1... e5。若黑方能够消除这点主动权，通常就称为“取得均势”，不过这里的“均势”只是一种相对的说法。
CH7-266 · 原书209页 It happens that an opening develops symmetrically. ■ This is observed sometimes in the Four Knights Opening, in the exchange variation of the French Defence, in the Italian Game and even in the Queen's Gambit. More often than not, White succeeds in obtaining a small initiative in symmetrical systems, once again thanks to having the first move.	CH7-266 · 原书209页 有些开局会形成对称局面，例如四马开局、法兰西防御兑换变例、意大利开局，甚至后翼弃兵。在对称体系中，白方也往往能凭借先行之利争取到轻微的主动权。
CH7-267 · 原书209页 Seizing the initiative is a definite creative achievement. The extent of this advantage depends on the character and strength of the initiative.	CH7-267 · 原书209页 夺取主动权是棋艺创造的一项成果。这种优势有多大，取决于主动权的性质和强度。
CH7-268 · 原书209页 Without mentioning the purely chess advantages of holding the initiative, one can boldly maintain that it evokes creative enthusiasm, stimulates an increase in work-rate of thought and imagination, promotes confidence in one's own strength. On the other hand, the need to parry the opponent's initiative quite often has a disastrous psychological influence, having a negative effect on the quality of play, on thes steadfastness of defence, and at times leads to demoralisation. It is no coincidence that a sizeable proportion of mistakes and oversights fall to the lot of chessplayers who come under the influence of the opponent's initiative in a game.	CH7-268 · 原书209页 掌握主动权的好处并不限于棋盘本身。它还能激发构思的热情，促使思考和想象更加活跃，增强自信。反过来，不断应付对手威胁，往往会造成沉重的心理压力，损害行棋质量和防守的韧性，甚至令人丧失斗志。实战中，相当多的错误和漏算发生在受对手压制的一方身上，这并非偶然。
