CH6-1 · 原书175页 **The Struggle with Heavy Pieces**	CH6-1 · 原书175页 **重子斗争**
CH6-2 · 原书175页 In the introduction we have already pointed out the presence of a highly significant difference e between the middlegame and endgame stages. The transition into the endgame to a considerable extent changes both the whole thematic struggle, which means also the planning of it, and methods of operation. It is very important to mention that in t the endgame the evaluation of weak and strong points is changed and also the significance of open lines, the role of theory and technique increases, and particular requirements for handling pawns arise.	CH6-2 · 原书175页 导言中已经指出，中局与残局有着十分重要的区别。转入残局后，斗争的主题、计划和行动方法都会发生很大变化。尤其需要注意的是，强点、弱点以及开放线的意义都会随之改变，理论知识和技术的重要性上升，运用兵也有了特殊要求。
CH6-3 · 原书175页 In this connection the question inevitably arises: to what extent in the central stage of the game is it necessary to be guided by considerations coming out of the possibility of transferring the struggle to the endgame? You see the game of chess presents itself as a single whole and, despite the significant difference in the positional requirements of the middlegame and endgame, never should it be forgotten that in many cases even the most sharp and tense struggle in the middlegame receives its completion deep in the endgame.	CH6-3 · 原书175页 由此自然产生一个问题：在中局阶段，应当在多大程度上考虑将来转入残局的可能性？一盘棋毕竟是一个整体。尽管中局和残局对局面的要求差别很大，我们仍须记住，许多激烈而紧张的中局斗争，要到残局深处才能分出胜负。
CH6-4 · 原书175页 It is possible to reply to this question in a general way, that, taking into account the possibility of the future endgame, one should not exaggerate its role and so much the more attach decisive importance to the solving of the creative problems of the middlegame and even some openings.	CH6-4 · 原书175页 一般说来，应当考虑未来可能出现的残局，但不能夸大这一因素的作用，更不能让它决定中局、甚至某些开局阶段的构思。
CH6-5 · 原书175页 Let us say there is no need to worsen one's pawn formation in vain, since this might have an unfavourable effect in the endgame. But if a concrete plan of action, intended in the middlegame, requires the creation of backward, doubled, isolated and even a formation of pawns, then it is necessary to go in for this by discarding abstract considerations, relevent only to the endgame.	CH6-5 · 原书175页 例如，不应无端破坏自己的兵形，因为这可能在残局中带来不利影响。但若中局的具体行动计划要求承担落后兵、叠兵、孤兵等兵形弱点，就应当接受，抛开那些仅适用于残局的抽象顾虑。
CH6-6 · 原书175-176页 It is well-known, for example, that Lasker,by■ choosing the exchange variation of the Spanish Game as White (1. e4 e5 2. Nf3 Nc6 3. Bb5 a6 4. Bxc6), was planning, after 4... dxc6, to exploit the extra pawn on the king's flank in the endgame. He carried out this plan with success in match games against Janowski i and Tarrasch. This did not prevent Lasker, in the international tourmnament at Nirnberg 1896, finishing off Tarrasch in the same variation even before the transfer of the game into an ending. A still more striking example was the game Lasker-Capablanca (Petersburg 1914). Capablanca, familiar with Lasker's planned line to the endgame, in the exchange variation, blockaded the e-pawn and planned an attack on it with the rooks on the open e-file together with support from the bishop on b7. The struggle developed in the middlegame, in which Lasker did not stop at the advance f5, as a result of which the e4 pawn became backward and weak. At the decisive moment of the struggle he sacrificed this pawn, to invade with the knight on the sixth rank and the rooks on the seventh, and literally smashed his dangerous opponent. In conceiving the idea of attack, Lasker assessed his prospects finely and deeply and disregarded considerations about a possible endgame.	CH6-6 · 原书175-176页 例如，众所周知，拉斯克执白采用西班牙开局兑换变例（1. e4 e5 2. Nf3 Nc6 3. Bb5 a6 4. Bxc6），计划在4... dxc6之后利用残局中王翼多兵的优势。他在对雅诺夫斯基和塔拉什的对抗赛中成功执行了这一计划。不过，在1896年纽伦堡国际大赛上，他用同一变例甚至在进入残局之前就击败了塔拉什。更鲜明的例子是1914年彼得堡的拉斯克对卡帕布兰卡一局。卡帕布兰卡熟悉拉斯克转入残局的计划，于是在兑换变例中封锁e兵，准备用e线双车并由b7象支援来攻击它。战斗仍在中局展开，拉斯克毫不犹豫地冲起f5，使e4兵成为落后弱兵。在斗争的决定性时刻，他又弃掉这个兵，让马侵入第六横线、双车叠入第七横线，彻底击溃了这位强劲的对手。拉斯克在构思进攻时，对自己的前景作出了细致而深入的判断，完全没有受可能转入残局这一因素的束缚。
CH6-7 · 原书176页 In short, if it is possible to combine the positional requirements of the middlegame and endgame - so much the better. But if they clash, then preference must be given to the requirements of the middlegame.	CH6-7 · 原书176页 如果能兼顾中局和残局的要求，自然最好；若两者发生冲突，则应优先满足中局的需要。

CH6-8 · 原书176页 These questions arise in a particularly sharp fashion in positions where only queens and rooks on each side take part in the struggle (obviously, besides the pawns). The feature of this sort of middlegame position consists of the fact that the exchange of one of the pieces leads to an endgame - a queen or a rook. Here, calculation of the endgame situation becomes one of the most important factors for assessment.	**CH6-8 · 原书176页** 当双方除兵以外，只剩后和车参加斗争时，这个问题尤其突出。这类中局的特点是，只需兑掉一对棋子，就会转入后残局或车残局。因此，对可能出现的残局作出判断，便成为评价当前局面的重要依据之一。
CH6-9 · 原书176页 In chess literature the opinion is expressed that it is necessary to treat positions with heavy piece material as an endgame. This is a profound error.	**CH6-9 · 原书176页** 有些国际象棋著作主张，应把只剩重子的局面当作残局处理。这是根本性的错误。
CH6-10 · 原书176页 A characteristic feature of the concluding stage of the game is the full right of the king to take part in the struggle. The king in the endgame is an active piece, which frequently decides the outcome of the battle. Meanwhile, in the presence of the queen and rook, the king is obliged to seek shelter behind pawn cover, and forgetting this truth prompted by the mistaken notion that the struggle has proceeded to the endgame, might end and actually does end in a very sad way.	**CH6-10 · 原书176页** 残局的一个典型特点，是王能够充分参加战斗，成为活跃的棋子，并常常决定胜负。但当双方仍有后和车时，王必须躲在兵的掩护之下。如果误以为已经进入残局，忘记了这一点，就很可能付出惨重的代价；实战中这样的例子并不少见。
CH6-11 · 原书176-177页 At the same time the king must be ready to rush immediately into battle the moment the queens are exchanged and a rook ending ensues. On the other hand, in positions where an exchange of one of the heavy pieces leads to the endgame phase, great attention has to be paid to the pawn formation, to see that it is as comfortable as possible for the end-stage. The presence of passed pawns is of particular significance. Often this advantage acquires a decisive character. You see it is necessary to bring to a halt the advance of a passed pawn, in the present case the role of a blockading piece is not appropriate for the king, while to waste the energy of a queen or rook on the blockade of a pawn means conceding an advantage in force to the opponent for the rest of the struggle.	**CH6-11 · 原书176-177页** 与此同时，王又必须随时准备在兑后转入车残局后立即参战。另一方面，既然兑掉一对重子就可能进入残局，便应特别注意兵形，尽量使它适合残局。通路兵在这里尤为重要，往往能成为决定性的优势。对手必须阻止它前进，但在当前局面中，王不宜承担封锁任务；若用后或车封锁兵，又会牵制这枚重子的力量，让对手在其他战场形成兵力优势。
CH6-12 · 原书177页 The features of the struggle, inherent in this individual phase of the middlegame, also make up the contents of the present chapter.	**CH6-12 · 原书177页** 本章讨论的，就是这一特殊中局阶段的斗争特点。
CH6-13 · 原书177页 Here we have a position from the 5th match game Schlechter- Lasker (1910).	**CH6-13 · 原书177页** 图中局面出自1910年施莱希特对拉斯克对抗赛的第五局。
CH6-14 · 原书177页 Can it be contended that either one of the sides has the advantage? Of course not. More than this, many chessplayers would shake hands and go away peacefully.	**CH6-14 · 原书177页** 能说哪一方占优吗？当然不能。甚至可以说，许多棋手在这里就会握手言和。
CH6-15 · 原书177页 On the board we are on the verge of an endgame, but this verge will last for many moves and will not be crossed.	**CH6-15 · 原书177页** 局面已接近残局，但接下来的许多步，双方都会停留在这一边界上，并不真正进入残局。

CH6-19 · 原书177页 He is not afraid of weakening the d4 point, which could prove dangerous if minor pieces were taking part in the S struggle. However, for an endgame position, the pawn is better left on c2. The weakness of the Black pawn on d6 is imaginary.	**CH6-19 · 原书177页** 白方不怕削弱d4格；只有在轻子仍参加战斗时，这个弱点才可能带来危险。不过，若从残局的角度考虑，c兵最好留在c2。黑方的d6兵也只是表面上显得薄弱。

CH6-22 · 原书177页 Lasker carefully, via the rear of communications, brings his king nearer to the c centre and the queen's flank. For the endgame, the king of course is best situated alongside his main group of pawns, which is the only place where it can assume an offensive. Black thereby begins to carry out a plan of enlivening the play on the queen's flank. At the same time a particular problem is also solved transfer of the function of defence of the d6 pawn to the king, which frees the queen from this role. The king is clearly more securely placed	**CH6-22 · 原书177页** 拉斯克谨慎地让王沿己方后排向中心和后翼靠拢。从残局的角度看，王最好靠近自己的主要兵群，因为只有在那里才有进攻的可能。黑方开始执行活跃后翼局面的计划，同时解决了一个具体问题：让王接替保护d6兵的任务，把后解放出来。

CH6-28 · 原书177-178页 Possibly a little risky, but a move which is full of initiative that poses White a serious problem. Black strives for a position in which an exchange of queens will be favourable for him. This allows him to achieve great freedom of activity in so far as White has to avoid the endgame. The negative side to the move is the rather weakened pawn cover of his king. Meanwhile it is still a long way to the endgame, indeed will he even succeed in achieving it.	**CH6-28 · 原书177-178页** 这步或许有些冒险，却积极争取主动，给白方出了难题。黑方力求形成兑后对自己有利的局面，使白方必须回避残局，从而为自己争取更大的活动自由。不过，这步也明显削弱了黑王的兵屏障。眼下离残局还远，究竟能否顺利转入残局，还是个问题。

CH6-114 · 原书182页 This move bears witness to the fact that Pillsbury did not try to understand sufficiently deeply the situation which has arisen.I By removing g the rook from the back rank, he dooms the queen to the role of watchman for the passed pawn.N Meanwhile, in the forthcoming struggle, the energy of the queen is needed for the fulfilment of another task. It is therefore no surprise that soon Black not only proves to be powerless to realise his advantage but also a real threat of defeat hangs over him. The rook move also has another shady side it worsens the position of the Black king, with which the rook now loses contact. In making his aggressive t thrust, Pillsbury obviously counted on enlivening the passed e-pawn and, by threatening to advance it, to avert or to some extent weaken the offensive power of the enemypassed pawn. However, very soon it becomes clear that this plan is mistaken and that the passed a-pawn in the present situation is more advanced and dangerous than the e-pawn. Pillsbury's idea proves to be insufficiently concrete, he cannot foresee, with necessary distinctness, a way of leading to the achievement of the planned objective.	**CH6-114 · 原书182页** 这步说明皮尔斯伯里没有深入理解局面。他把车调离底线，迫使后留下来看守通路兵；但接下来的斗争恰恰需要后去完成另一项任务。因此，黑方很快不仅无法兑现优势，反而面临输棋的危险。这步动车还削弱了黑王的安全，因为车已无法照应王。皮尔斯伯里积极出击，显然是想活跃自己的e通路兵，用冲兵威胁牵制对方的通路兵。然而，实战很快证明这个计划有误：当前局面中，a通路兵走得更远，也比e通路兵更危险。皮尔斯伯里的构想不够具体，没有清楚看出实现目标的途径。

However, with queen and rook on the board, a number of other factors influence the assessment of the position. In the present case, for example, it is necessary to pay attention to the strong position of the Black rook on the second rank, where it is far actively placed than the more White rook. A comparison of the positions of the kings likewise proves to be in Black's favour in view of the presence of the "vent" h6. He has a strong mobile pawn in the centre. White has a weak point on f2. In such a situation White's passed pawn on a4 might be converted from a strength into a weakness, and this is confirmed by the immediate course of events.	**CH6-137 · 原书183-184页** 白方有一个从后方得到保护的通路兵。在车残局或后残局中，这能保证他拥有明确的局面优势。但双方同时还有后和车时，评价局面必须考虑其他因素。这里黑车在第二横线上十分活跃，远胜白车；比较双方王的位置，黑方因h6提供了逃生格，同样占优。此外，黑方有一个强大而灵活的中心兵，白方的f2则是弱点。在这种情况下，a4通路兵可能由优势变成负担，接下来的实战便证实了这一点。

CH6-152 · 原书184-185页 Despite the equality of forces and relative simplicity of the position, White has a basis for considering his position preferable. His pawns are more compactly placed, the Black c5 pawn is isolated and is an object for pressure. Nevertheless, White's chances of victory must be regarded as being minimal. There is no way for White to increase t the a attack on the c5 pawn, t the number of operating forces on the board is very limited, the d3 pawn cannot go to the help of its pieces since the d4 square, where it might come into contact with the c5 pawn, is firmly blockaded. It is to White's advantage to force a rook ending in order to activate his king, but it is quite difficult to achieve this. However, generally speaking, his king is worse placed than the enemy king, which is reliably covered with pawns. And yet the initiative is undoubtedly White's hands. Black is chained to passive defence and must watch closely in case the enemy attempts to display activity somewhere.	**CH6-152 · 原书184-185页** 虽然双方子力相等，局面也相对简单，白方仍有理由认为自己稍好：他的兵形更紧凑，黑方的c5孤兵则是施压目标。不过，白方的胜机很小。棋盘上的子力有限，无法再加强对c5兵的攻击；d3兵也帮不上忙，因为能与c5兵接触的d4格已被牢牢封锁。白方若能转入车残局、活跃自己的王，自然有利，但这很难做到。就当前局面而言，白王的位置反倒不及受到兵可靠掩护的黑王。不过，主动权仍掌握在白方手中。黑方只能被动防守，时刻提防白方在其他区域采取行动。

CH6-153 · 原书185页 What should White's plan consist of? At the first stage his main task must be to drive away the enemy queen from the central d5 position and occupy the c4 square with his queen, where it will be far more actively placed. Upon this, White must be ready to exchange queens and thus to transfer the struggle into a rook endgame. In this connection he must create as favourable conditions as possible for such an endgame.	**CH6-153 · 原书185页** 白方应制定怎样的计划？第一阶段的主要任务，是把黑后赶离中心的d5据点，再让自己的后占据c4，获得更大的活性。同时，白方要准备兑后转入车残局，并为此尽可能创造有利条件。
CH6-154 · 原书185页 We look at White's future operations in more detail. Above all he must move his king up as close as possible to the centre, let us say to the f2 square, while in the rook endgame he will prepare the advance e3 followed by d4 with the rooks s placed on the c-file. This leads to the win of the c5 pawn, providing of course, that the opponent himself does not succeed in bringing his king to the centre.	**CH6-154 · 原书185页** 具体来说，首先应让王尽量靠近中心，例如走到f2。进入车残局后，可让车占据c线，再准备冲起e3和d4。如果黑王来不及赶到中心，就能吃掉c5兵。
CH6-155 · 原书185页 From this it is clear that White's task is far from easy, while, upon good defence by Black, possibly unrealisable. In any case, there is a sharp, tense struggle in prospect, sated with various interesting ideas.	**CH6-155 · 原书185页** 可见，白方的任务绝不轻松；若黑方防守准确，甚至可能无法实现。无论如何，接下来将是一场尖锐、紧张而富于构思的斗争。

CH6-157 · 原书185页 The advance of the king to the centre points to the fact that White is striving to transfer to the endgame. If, at this moment, the Black king cannot in good time support the engagement in the centre, then after the exchange of queens White would l create an attack on the c5 pawn by one of two means: f4 and d4, or e3 and likewise d4.	**CH6-157 · 原书185页** 王向中心靠拢，表明白方力求转入残局。如果届时黑王不能及时支援中心，白方兑后后便可用f4、d4，或e3、d4两种方案之一攻击c5兵。
CH6-158 · 原书185页 To a certain extent, these threats are also hanging with queens present, but the carrying out of them in the middlegame involves danger (as we have already had the opportunity of convincing ourselves in the model game Schlechter-Lasker) in view of the exposed position of his own king.	**CH6-158 · 原书185页** 双方仍有后时，这些威胁也在一定程度上存在。但在中局执行这样的计划，会暴露自己的王，因而有危险；前面的施莱希特对拉斯克一局已经说明了这一点。
CH6-159 · 原书185-186页 Consequently, Black must place his king in such a way that, in the event of an endgame, it is able to quickly go over to the defence of the c5 pawn, while if it is attacked by the heavy pieces it can easily find shelter on the flank. From this point of view, the most convenient square was f7 and it was in fact necessary to direct the king here by playing now 38. Kg8. Black thought otherwise and, judging by the future development of events, less well.	**CH6-159 · 原书185-186页** 所以，黑王应选择这样的位置：一旦进入残局，能迅速赶去保护c5兵；若遭重子攻击，又能方便地退往侧翼避险。f7最适合这一要求，因此黑方此时应走38... CH6-165 · 原书186页 This storming thrust gains in strength with the position of the king on g6. In making this, White pursues three aims: to create another weakness for the opponent in the centre - an isolated pawn on e5; to create a handy piece base on the e4 square, which the king can also exploit in the event of an endgame ensuing; finally to generally open the position in the centre and bare the cover of the enemy king. Nevertheless the energetic advance of the White e-pawn sharpens the struggle for both sides - you see the position of his own king is exposed, the d3 pawn, located on an open file, becomes backward.	**CH6-165 · 原书186页** 黑王在g6，使这步冲兵更有力量。白方有三个目的：在中心给黑方制造一个新的弱点——e5孤兵；在e4建立便利的据点，进入残局后连王也能利用它；最后，打开中心，剥去黑王的掩护。不过，这步积极的冲兵也使双方都面临更尖锐的斗争：白王同样暴露，而开放线上的d3兵又成为落后兵。

This move is made so that the h-pawn will not find itself under attack in the event of the exchange of queens and a check of the Black rook on the second rank. On the other hand, White wants to ascertain the position of the Black king: the move to f6 is unfavourable because of the reply f4, while the retreat to f8 means taking it away from the important central squares. In this way the advance of the h-pawn is, as it were, a useful waiting move.	**CH6-169 · 原书186页** 白方逐步为残局作准备。这步冲兵使h兵在兑后、黑车从第二横线将军时不至于遭到攻击。同时，白方也在等待黑王表明去向：走f6会遭到f4，退f8又会远离重要的中心格。因此，这步冲兵是一种有用的等待手段。

CH6-296 · 原书193页 It remains for us to sum up a little. This amounts to the following: the struggle of heavy pieces of the type we have looked at is a process of the middlegame, and an attempt to include the king as an active piece in this struggle is just as risky as when it occurs in any middlegame; in addition to this, in the struggle of heavy pieces, several endgame factors (the role of the passed pawn etc.) increase in significance, while such operations as a pawn storm, various pawn formations in the centre and so on, on the other hand lose their effectiveness to a large extent; the struggle of heavy pieces is usually distinguished by great sharpness, in so far as it contains as much range of activity as is possible, and can quickly shift to any part of the board.	**CH6-296 · 原书193页** 最后归纳一下：本章所讨论的重子斗争属于中局，贸然让王积极参战，与其他中局一样危险。不过，在这类局面中，一些残局因素，如通路兵的作用，会更加重要；而兵潮、中心各种兵阵等手段的效果，反而会大幅降低。重子的活动范围很广，能够迅速把战斗转移到棋盘的任何区域，因此这类斗争通常十分尖锐。
