CH3-1 · 原书87页 **Play on the a-file**	CH3-1 · 原书87页 **a线上的战斗**
CH3-2 · 原书87页 We have chosen as the basic theme the question of planning play along the a-file, when it occurs with castling king's side by both opponents. Namely these cases of play along the a-file assume a specific character, requiring an independent examination.	CH3-2 · 原书87页 我们选取双方均已短易位时围绕a线展开的计划性行棋作为基本主题。这类a线行动具有鲜明特点，值得单独研究。
CH3-3 · 原书87页 What features characterise play along the a-file, with king's side castling by both sides? Firstly, the a-file is as distant as can be from the king's flank, as a result of which the principal events, for the time being, do not affect the castled positions. Even more important is the fact that the side holding the initiative in play on the a-file must concentrate large-scale forces, and in any case the rooks, on that file or near it. It means that such play is attended by the diversion of important pieces from the king's flank. But this could prompt the opponent to direct his forces to an attack there, in the event of which it is very important to take care of the defence of the king's flank with a solid pawn chain and a minor piece covering detachment.	CH3-3 · 原书87页 双方均在王翼易位时，a线行动具有哪些特点？首先，a线与王翼相距甚远，所以主要战事暂时不会直接影响易位后的王城。更重要的是，掌握a线主动权的一方必须在该线及其附近集中大量兵力，尤其是双车。这意味着重要棋子会被调离王翼，从而可能促使对手转而进攻王翼。因此，必须以稳固兵链和少量轻子妥善守护王翼。 译注：从残局的观点来看，由于a线距离王城非常远，而轻子对于通路兵，尤其是边线通路兵的防守能力较弱，如果在此处的战斗发生大量重子兑换，后翼一旦出现通路兵将是决定性的。在围绕a线斗争的过程中执行兑换或者兵的突破时，必须时刻考虑到这一点。
CH3-4 · 原书87页 The technique of opening the a-file consists of the exchange of the a-pawn for the b-pawn. Such an exchange is difficult to achieve if the b-pawn stands on its original square. Therefore it is useful, as a pre-requisite to opening the a-file, to provoke the advance of the knight's pawn one or two squares. There is no need to mention that the plan of opening the a-file and the future invasion on it must be carefully thought out, taking into account all the concrete positional conditions, to weigh up whether it is possible for the opponent to advantageously prevent the opening of the a-file or launch a successful counter-attack on the king's flank.	CH3-4 · 原书87页 打开a线的基本方法，是以a兵交换对方的b兵。如果b兵仍在初始格，这种交换便难以实现。因此，打开a线之前，往往要先诱使对方的b兵冲起一格或两格。不言而喻，打开a线并随后沿线侵入的计划必须经过周密考虑：既要结合局面的具体条件，也要权衡对手能否有利地阻止开线，或在王翼发动有效反击。
CH3-5 · 原书87页 In planning play on the a-file, it is of course necessary to secure the occupation of the opened line with his rooks. It means that an appropriate regrouping of forces must take place even before the opening of the line.	CH3-5 · 原书87页 规划a线行动时，当然必须确保开线后能够以双车占据该线。这意味着适当的子力重组必须在a线打开之前便已完成。
CH3-6 · 原书87页 As an excellent example of the technique of invasion on the a-file might serve the ending of the game Marco-Muller, played as long ago as the end of the last century (1898) in the accessory tournament of the international congress in London.	CH3-6 · 原书87页 早在十九世纪末的伦敦国际象棋大会附属赛（1898年）中，马尔科对穆勒一局的收尾，便出色展示了沿a线侵入的技术。
CH3-7 · 原书87页 White has prepared the opening and occupation of the a-file.	CH3-7 · 原书87页 白方已经为打开并占据a线做好准备。
CH3-8 · 原书88页 Now an immediate capture on b6 was also not bad. After 33. axb6 axb6 34. Qa1! Rxa4 35. Rxa4 the a-file would be in White's hands, which, in connection with the weakness of the b6 and e6 pawns, must in the end decide the game in his favour. And yet the reply 35... Rd7 would have allowed Black to defend himself quite tenaciously.	CH3-8 · 原书88页 此时立即在b6吃兵也不坏。白方若走33. axb6 axb6 34. Qa1! Rxa4 35. Rxa4，便可掌握a线；结合b6兵和e6兵的弱点，这最终应当为白方带来胜利。不过，黑方以35... Rd7回应后仍可顽强防守。

CH3-10 · 原书88页 **33. Qa1!** only now threatening axb6. In order not to lose a pawn, Black is forced to take the rook away from the a8 square, after which White captures the a-file, retaining all the heavy pieces. There followed: **33... Rab8 34. axb6 axb6 35. Ra7+ Kh8 36. Rc7 Ra8 37. Raa7 Rxa7 38. Qxa7**	CH3-10 · 原书88页 **33. Qa1!** 这时才真正威胁axb6。为了不丢兵，黑方被迫将a8车移开，随后白方便能在保留全部重子的情况下占据a线。实战接着走： **33... Rab8 34. axb6 axb6 35. Ra7+ Kh8 36. Rc7 Ra8 37. Raa7 Rxa7 38. Qxa7**
CH3-11 · 原书88页 White has doubled on the seventh rank and this predetermines a quick end.	CH3-11 · 原书88页 白方在第七横线叠起重子，胜负很快便见分晓。
CH3-12 · 原书88页 38... Rb8 39. Rh7+ Kg8 40. Rh6 Qe8 41. Qh7+ Kf8 42. Rxg6 1-0	CH3-12 · 原书88页 38... Rb8 39. Rh7+ Kg8 40. Rh6 Qe8 41. Qh7+ Kf8 42. Rxg6 1-0
CH3-13 · 原书88页 In this example there were quiet conditions on the king's flank. The locked pawn chain guarded the White king from any sort of trouble and he was able to transfer all his forces to the a-file.	CH3-13 · 原书88页 在这个例子中，王翼局面很平稳。封闭的兵链使白王免受任何威胁，白方便能把全部子力调往a线。
CH3-14–15 · 原书88页 In the game Lasker-Showalter (Nürnberg 1896) the overall situation was rather different. Black has succeeded in opening the a-file with the pawn march-route ...a5-a4xb3, captured it and invaded on the first and second ranks with his heavy pieces. Lasker endeavours to exploit as far as possible the time spent by Showalter on the whole of this operation, to create counter threats against the enemy king, which remains on h8 under cover of the pawn chain h7-g6-f5 and the knight e6. After White's 60th move this strategically interesting game arrived at the following position, which is not easy to evaluate.	CH3-14–15 · 原书88页 在拉斯克对肖瓦尔特一局（纽伦堡，1896年）中，整体形势则大不相同。黑方通过...a5-a4xb3的冲兵路线成功打开并占据a线，随后以重子侵入第一、第二横线。拉斯克则力求利用肖瓦尔特为整套行动耗费的时间，对黑王制造反击威胁。黑王仍在h8，由h7-g6-f5兵链和e6马掩护。白方走完第60步后，这盘战略上颇有意思的对局形成了图示局面，其优劣并不容易判断。
CH3-16 · 原书88页 Clouds hang over the White king but also White has his own chances. The splendidly placed knight on d5, transferring to f6, opens the h1-a8 diagonal for the queen. By penetrating on it to b7 or c6, he is able to create direct threats to the enemy king.	CH3-16 · 原书88页 白王头顶乌云密布，但白方也有自己的机会。位置极佳的d5马转到f6后，便能为后打开h1-a8斜线。白后沿这条斜线侵入b7或c6，就能对黑王制造直接威胁。
CH3-17 · 原书89页 There was a sharp and interesting development of events:	CH3-17 · 原书89页 接下来，局势的发展既尖锐又有趣：

CH3-19–20 · 原书89页 With the threat ...Qf1. However Black does not foresee the opponent's dangerous counterattack. He could make a draw, but not more, by playing 61... Rg1+ 62. Bxg1 Qxg1+ 63. Kh3 Nxf4+ 64. Qxf4 Qh1+ 65. Kg3 Qg1+ 66. Kh3 Qh1+ etc. (67. Qh2 Qf1+). True, on 61... Rg1+ possible is 62. Kh2, but then 62... Rf1 63. Rd2 Qe1 leads to a complicated position in which Black can apparently defend himself. Now, however, there comes an immediate denouement. **62. Qb7 Ng7 63. Kh2；不过，62... Rf1 63. Rd2 Qe1会形成复杂局面，黑方看来能够守住。实战中，胜负却立即揭晓： **62. Qb7 Ng7 63. Qf7 1-0**

CH3-21–23 · 原书89页 Could Black, instead of 60... Rb1, have played stronger? 60... Qc1 offered chances of a win. If 61. Nf6 then 61... Qc2 and there is only one more for White - the return of the knight to d5, since on 62. Bg1 follows 62... Qg2+. Black's further plan is this: to exchange queens by playing 62... Qe2, return the rook to b2 (in the event of 63. Qxe2), transfer the king to f7 and dispatch the knight to a5 to win the b3 pawn. Several instructive examples of play on the a-file can be found in the creative work of Capablanca.	**CH3-21–23 · 原书89页** 黑方能否用更强的走法替代60... Rb1？60... Qc1可以争取胜机。若61. Nf6，则61... Qc2，白方只有把马退回d5，因为62. Bg1会遭到62... Qg2+。黑方接下来的计划是走62... Qe2兑后；若63. Qxe2，就把车撤回b2，再把王调到f7，马调到a5，以吃掉b3兵。在卡帕布兰卡的对局中，我们还可以找到几个富有启发性的a线作战范例。
CH3-24 · 原书89页 In a game with Treybal (Carlsbad 1929), Capablanca, playing White, after a protracted siege of the enemy position, succeeded, by locking the centre and the king's flank, in opening the a-file and invading on it with the heavy pieces.	**CH3-24 · 原书89页** 在对特雷巴尔的一局中（卡尔斯巴德，1929年），执白的卡帕布兰卡经过长时间围攻，封闭了中心和王翼，成功打开a线，并以重子沿线侵入。
CH3-25 · 原书89页 White easily controls the a-file. Black, locked up by White's powerful black-squared seven-pawn chain, is obliged to stick to waiting tactics. The only question is whether White can exploit the inevitable invasion of his rook on a7.	**CH3-25 · 原书89页** 白方轻而易举地控制着a线。他的七个兵组成强大的黑格兵链，把黑方牢牢封锁住，迫使黑方只能等待。唯一的问题在于：白车侵入a7已不可阻止，但白方能否利用这一点取得成果？

CH3-38 · 原书90页 It is apparent from the ending that the rook on a7 gave defensive help to the minor pieces. The question arises whether White would have been able to exploit his enormous advantage in space on the a-file if there were only heavy pieces on the board? Alas, no. He would have nothing with which to attack the b7 pawn.	**CH3-38 · 原书90页** 从这段收尾可以看出，a7车为轻子提供了防守上的支持。这便引出一个问题：如果棋盘上只有重子，白方还能利用自己在a线上的巨大空间优势吗？恐怕不能，因为他将没有合适的棋子去攻击b7兵。

CH3-51 · 原书90页 Alekhine expressed the opinion that, instead of 26. b5, White should play at once 26. Ra1, in order to avoid the exchange of bishops. In this case he would have more chances of exploiting his advantage on the queen's flank, but retaining the bishops would also have increased the defensive resources of Black, who, moreover, because of the open character of the position, could organise counterplay in the centre and on the king's flank.	CH3-51 · 原书90页 阿廖欣认为，白方应立即走26. Ra1，而不是26. b5，以避免兑象。这样，白方利用后翼优势的机会会更多；不过，保留双方的象也会增加黑方的防守资源。况且局面比较开放，黑方还可以在中心和王翼组织反击。
CH3-52 · 原书90–91页 There is a sharper, but in return very keen, course of events when play on the a-file is countered with an initiative displayed by the opponent on the king's flank. At times play on the a-file will develop into a real counterattack, which, when combined with measures to defend one's own king, can bring decisive success, particularly when the opponent is too carried away by an attack on the king's flank.	CH3-52 · 原书90–91页 当一方沿a线展开行动，而对手以王翼的主动行动相抗衡时，斗争就会变得更加尖锐激烈。有时，a线行动会发展为真正的反击；只要同时做好对己方王的防守，就可能取得决定性成果，尤其是在对手过分专注于王翼进攻的时候。

CH3-59–60 · 原书91页 In this opening White's plan consists of the following: by firmly controlling the e5 square, to obtain a dominating position on the king's flank and then, by establishing a harmony of action between the bishop b2, queen and king's rook (O-O, Rf1-f3-g3 or h3), to launch a direct attack on the enemy king. From the point of view of countering this plan Black plays the opening, if not weakly, then inoffensively. One of the best possibilities for Black is the development of the bishop on g7. Therefore in place of 3... Nf6, worth considering is 3... g6. Likewise Black does not need to hurry with the development of the queen's knight, so as not to allow the pin with the bishop on b5 or first of all to prevent this pin by... a6. **6. Be2**	CH3-59–60 · 原书91页 在这个开局中，白方的计划是牢牢控制e5格，从而在王翼取得主导地位，再让b2象、后及王翼车协调配合，对黑王发动直接进攻。王翼车的调动路线是短易位后经f1-f3转到g3或h3。从对抗这一计划的角度看，黑方的开局下法即使谈不上软弱，也至少缺乏针对性。黑方较好的选择之一是把象出到g7，因此第3步值得考虑3... g6，而不是3... CH3-69 · 原书92页 Side by side with the 21st move, Black's most serious positional mistake in the present game. True, there is no denying that he has a certain planning for his game. He intends a broad pawn advance on the queen's flank, projecting it on the theme of play on the a-file. However, upon this, Black makes a very superficial calculation of White's attacking possibilities on the king's flank and, by eliminating the pawn tension in the centre himself with his last move, leaves White free to act in that sector of the board. This mistake must have fatal consequences.	**CH3-69 · 原书92页** 与第21步一样，这是黑方本局最严重的局面错误之一。不可否认，黑方的行棋确有一定计划：他准备在后翼大举冲兵，围绕a线展开行动。然而，他对白方王翼进攻可能性的估计过于肤浅。这步棋主动消除了中心兵之间的紧张，使白方能够放手在王翼行动。这个错误本应带来致命后果。
CH3-70–75 · 原书92页 Meanwhile, Black had at his disposal an interesting possibility - 13... Bxe5, and White has to think carefully before deciding how to recapture the bishop. If, for example, 14. Instead of this he prefers to drag on a miserable existence.	**CH3-145 · 原书96页** 白方局面已明显较差，更严重的是，黑马深入其子力配置的腹地，使他几乎无计可施。因此，勇敢的选择应是弃半子：18. Rxd3 exd3 19. Qd1。这样可以拔掉这根刺，争取顽强抵抗的机会。实战中，白方却宁愿继续困守苦境。

CH3-149–150 · 原书97页 But it is difficult to leave this move without a question mark. White again ignores the opponent's intention and plays without a plan. 21. Na4 was necessary, with the threat Nb2. In the event of 21... Ba3 follows 22. Nc5! Nxc5 23. dxc5 Bxc5 24. cxd5 cxd5 25. Kh1 with the dangerous threat Qb2. If, however, on 21. Bxc3**	**CH3-149–150 · 原书97页** 这步棋实在不能不打问号。白方再次无视对手的意图，毫无计划地行棋。应走21. Na4，威胁Nb2。若21... Ba3，则22. Nc5! Nxc5 23. dxc5 Bxc5 24. cxd5 cxd5 25. Kh1，白方制造出Qb2的危险威胁。若黑方以21... b6回应21. Na4，白方仍可22. CH3-164 · 原书97–98页 Another advantage for Black should be noted: the seventh and eighth ranks, present themselves as splendid routes for transfer of the rooks from one edge of the board to the other, allow him to very forcefully exploit the powerful activity of these mobile pieces. This freedom and speed of manoeuvre in his own rear along the open ranks can sometimes prove to be a decisive factor. White, in this respect, finds himself in a far worse situation. On the first rank there is a dense crowd of his own pieces, the second is also jammed since, on each of these lines, the knight, established on d3, takes away two squares. Below we will see how well Black exploits the advantage of his control of White's “rear".	**CH3-164 · 原书97–98页** 黑方还有一个优势值得注意：第七、第八横线为双车在棋盘两翼之间调动提供了绝佳通道，使黑方能够充分发挥车强大的机动性。利用己方后方畅通的横线自由而迅速地调车，有时可以成为决定性因素。白方在这方面的处境差得多：第一横线上子力拥挤，第二横线也交通不畅，因为占据d3的黑马在这两条横线上各控制着两个格。接下来可以看到，黑方如何充分利用对方后方受制的弱点。

CH3-180 · 原书98页 Though we have given special attention to the breakthrough of heavy pieces on the a-file, it is clear that its planning, technique and results are not very much different from the breakthrough into the position of the enemy army on other files. Of course, there is some difference, particularly in the process of the realisation of the invasion, between the course of the struggle with a breakthrough along the edge-file and the central e or d lines. In the latter case, the rooks which break through have to operate in the direction of both flanks, and at times this can even weaken the strength of the breakthrough.	**CH3-180 · 原书98页** 本章着重讨论重子沿a线突破，但显然，这种突破在计划、实施方法和结果上，与沿其他线侵入敌方阵地并无太大差别。当然，沿边线突破与沿中央的e线或d线突破，仍存在一些区别，尤其是在将侵入转化为成果的过程中。沿中央线突破时，侵入的车需要兼顾两翼，有时反而会分散突破的力量。
CH3-181 · 原书98页 However, upon an invasion along the edge-file, the attack of the rooks is launched in the direction of one flank and therefore becomes, as it were, more concrete and strong.	**CH3-181 · 原书98页** 沿边线侵入时，车的进攻则集中朝向一翼，因此目标更明确，力量也更集中。
