《国际象棋中局计划》

B：格子 - 3：第六（第三）横线上的弱格

英文 OCR 校正稿 + 中文翻译校对稿

文档性质	初译校对稿，非最终出版版本
内容范围	原书印刷页 43-51
棋谱规范	中文译文采用现代 SAN；黑方单独着法使用省略号；结果使用 1-0 / 0-1
术语延续	tempo 译为“先手”；动象 / 动后 / 动马 / 动车；material 按棋理语境译为“子力”
版本日期	2026-09-24

重点核对第六（第三）横线的表述、六个主要实例、开局名称、棋手译名和棋谱。

B：格子 - 3：第六（第三）横线上的弱格

经校正的英文 OCR	中文译文
WS-1 One of the most tempting objectives of a plan is to create real weak squares on the sixth (third) rank. Establishing a knight or bishop on these squares usually represents a positional achievement just as decisive as obtaining an "eternal" knight. Sometimes the two ideas are combined. We begin with just such an example. The game Pillsbury-Chigorin (Vienna, 1898) reached the diagrammed position. White's knight has established itself on the weak b6-square. Under its cover White intends to attack the a5-pawn, after whose fall the passed a-pawn should have a decisive say. Pillsbury, however, pursued this objective too directly: 29. Ra3 Chigorin immediately sacrificed the exchange in order to eliminate the "eternal" knight: 29... Rxb6! 30. cxb6 Qxb6 White has a material advantage, but Black has obtained definite counter-chances in connection with the weakness of the d4-pawn - a weak point. The game continued: 31. Rf1 Rxd4 As White's reply shows, this does not win a pawn at all. 32. Rxa5 c5 33. Ra8 Kf8 34. Qh3 Ke7 35. Qh4+ f6 36. Qh8 Rd8 37. Qxg7+ Bf7 38. Rxd8 c4+ 39. Kh1 Qxd8 40. Rb1? A presumptuous move which even leads to defeat. The correct 40. Qh6 Qd3 41. Rg1 Qd2 would have achieved only a draw. 40... c3! Pillsbury must now give up a rook for this pawn, and he resigned a few moves later. Returning to the diagrammed position, we must once again emphasise the powerful role of the knight on b6, which was probably quite sufficient for victory. Instead of 29. Ra3 it was necessary to play 29. Qe5, and after 29... Qa7, 30. Rb3, consolidating the knight's base.	WS-1 计划中最诱人的目标之一，是在第六横线（从对方一侧看即第三横线）上制造真正的弱格。把马或象安置在这些格子上，通常是与造出“永恒之马”同样具有决定性的局面成就。有时，这两种构想还会结合起来。 先看一个这样的例子。 皮尔斯伯里对齐戈林一局（维也纳，1898年）形成了图示局面。白马已经在b6弱格站稳脚跟。以这匹马为掩护，白方准备攻击a5兵；一旦该兵失守，白方的a线通路兵就应当发挥决定性作用。 然而，皮尔斯伯里过于直接地追求这一目标： 29. Ra3 齐戈林立即弃半子，以便消灭“永恒之马”： 29... Rxb6! 30. cxb6 Qxb6 白方拥有子力优势，但黑方利用d4兵这一弱点，获得了明确的反击机会。 实战继续： 31. Rf1 Rxd4 正如白方的应着所示，这根本得不到一兵。 32. Rxa5 c5 33. Ra8 Kf8 34. Qh3 Ke7 35. Qh4+ f6 36. Qh8 Rd8 37. Qxg7+ Bf7 38. Rxd8 c4+ 39. Kh1 Qxd8 40. Rb1? 这步棋过于自信，甚至导致败局。正确的40. Qh6 Qd3 41. Rg1 Qd2只能取得和棋。 40... c3! 皮尔斯伯里现在不得不用一车换掉这个兵，又走了几步便认输。 回到图示局面，我们必须再次强调b6马的强大作用；这匹马本身很可能已经足以制胜。白方不应走29. Ra3，而应走29. Qe5；若29... Qa7，则30. Rb3，巩固白马的据点。

WS-2 In the following instructive example, both knights carry out a	WS-2 在下面这个很有启发性的例子中，白方双马在第六横线上发动了毁

经校正的英文 OCR	中文译文

devastating raid on the sixth rank.
 	
The position comes from Romanovsky-Smorodsky (3rd USSR Championship, 1924). White is conducting an offensive. His pawn group has already advanced to the fifth rank and severely cramps Black. White's c-pawn can advance to c5, but is it worth vacating c5 with the knight? The square is very weak, it lies in the enemy camp, and the knight together with the pawns exerts serious pressure on the centre and queenside. Thus the black rook on d6 has no move. ...Nd7 is also impossible because of Ne6 and c5. The black bishop is tied to the b7-pawn, since ...b6 is met by Nxa6.
 	
White undoubtedly has several ways to realise his advantage. He chooses a plan of invading the sixth rank with the knights via d6 and b6. The knight on c5 therefore abandons its excellent post in order to penetrate even more deeply into the enemy position.
 	
31. Nb3 Kf7 32. c5 R6d7
 	
Some players might now be tempted by 33. d6, but that would only help Black free himself a little. There follows ...Ke8, then ...Rf7, while e6 becomes an excellent springboard for Black's bishop and knight. Moreover, by "blocking" d6 with a pawn, White deprives one of his knights of an excellent base.
 	
33. Na5
 	
The knight heads for d6 via c4.
 	
33... Rc7 34. Rd1 h5
 	
Black is helpless.
 	
35. Rfd2 Rcd7 36. Na4
 	
The beginning of a victorious nine-move knight attack.
 	
36... Ke8 37. Nb6 Rc7 38. Nac4 Bd7 39. Nd6+ Ke7
 	
The objective is achieved. The white cavalry holds the entire enemy army in a vice - a good example of how the strength of a knight increases when it enters the enemy camp on weak squares.
 	
40. Nb5!
 	
In view of the threat Nd6+, White wins at least the exchange and retains the initiative. Further resistance is useless, and Black soon resigned.
	灭性的突袭。
	
	图示局面取自罗曼诺夫斯基对斯莫罗德斯基一局（1924年第3届苏联锦标赛）。白方正在进攻，其兵群已经推进到第五横线，严重限制了黑方。白方可以把c兵冲到c5，但值得让马离开c5吗？这个弱格位于敌方阵地内，白马与兵群一道向中心和后翼施加强大压力：黑方d6车没有一步可走；……Nd7也因Ne6和c5而不成立；黑象被拴在b7兵的防守上，因为……b6会遭到Nxa6。
	
	白方无疑有多种兑现优势的方法。他选择让双马经d6和b6侵入第六横线。因此，c5马离开自己的优良位置，以便更加深入地闯入敌阵。
	
	`31. Nb3 Kf7 32. c5 R6d7`
	
	有些棋手此时会被`33. d6`吸引，但这只会帮助黑方稍稍解围。黑方可以走……Ke8，随后……Rf7；e6格也将成为黑象和黑马的良好跳板。此外，白方用兵“堵住”d6格，也会使自己的一匹马失去优良据点。
	
	`33. Na5`
	
	白马准备经c4前往d6。
	
	`33... Rc7 34. Rd1 h5`
	
	黑方束手无策。
	
	`35. Rfd2 Rcd7 36. Na4`
	
	一场九回合制胜马攻由此开始。
	
	`36... Ke8 37. Nb6 Rc7 38. Nac4 Bd7 39. Nd6+ Ke7`
	
	目标实现了。白方的骑兵把黑方全军牢牢钳住；这很好地说明，一匹马沿弱格深入敌阵后，其力量会如何增长。
	
	`40. Nb5!`
	
	由于Nd6+的威胁，白方至少可以得半子，同时仍保持主动权。黑方继续抵抗已无意义，不久便认输。

WS-3 **Queen's Indian Defence** White: A. Alekhine Black: J. R. Capablanca New York, 1927 1. d4 Nf6 2. c4 e6 3. Nf3 b6 4. g3 Bb7 5. Bg2 c5 6. d5	WS-3 **后翼印度防御** 白方：A. 阿廖欣 黑方：J. R. 卡帕布兰卡 纽约，1927年

经校正的英文 OCR	中文译文
This aggressive continuation was recommended in its day by Rubinstein. Great defensive accuracy is required against it. Black must take the pawn to avoid difficulties in developing his queenside forces, but this leads to an unpleasant pin of the d5-pawn. Exploiting this pin, White aims eventually to create a base for his pieces on d5. The whole variation leads to a sharp, tense struggle, in which the first exchange of pieces occurs only after 17 moves.	1. d4 Nf6 2. c4 e6 3. Nf3 b6 4. g3 Bb7 5. Bg2 c5 6. d5 这一步积极的续着当年由鲁宾斯坦推荐。黑方必须极其精确地防守。他不得不吃兵，以免后翼子力出动遇到困难，但这样d5兵会受到令人不快的牵制。白方利用这一牵制，试图在以后为己方子力在d5建立据点。整个变例会导致尖锐而紧张的斗争，直到第17回合才出现第一次子力交换。
6... exd5 7. Nh4 g6 8. Nc3 Bg7 9. O-O O-O 10. Bf4 An interesting plan introduced by Alekhine, aiming to exploit the rather weak d6-point. For example, after 10... d6 11. cxd5, Black cannot immediately develop the knight on d7, while after ...Nh5 his influence in the centre is weakened and the knight is not particularly well placed. More often employed here is 10. cxd5, followed by an advance of the central pawns, e4 and f4.	6... exd5 7. Nh4 g6 8. Nc3 Bg7 9. O-O O-O 10. Bf4 这是阿廖欣引入的一项有趣计划，目的在于利用相当薄弱的d6点。例如10... d6 11. cxd5以后，黑方不能立即把马出到d7；走……Nh5又会削弱黑方对中心的影响，而且这匹马的位置也不理想。 这里更常见的是10. cxd5，随后推进中心兵e4和f4。
10... d6 11. cxd5 Nh5 12. Bd2 In retreating to d2 White is apparently guided by the desire to retain the possibility of advancing the central pawns, especially e4. Yet only three moves later he finds it necessary to transfer the bishop to e3 even though his pawn is still on e2. The reply 12. Be3 is more purposeful for other reasons as well. Black cannot display activity on the queenside without ...c4; with the bishop on e3, however, this would allow White to centralise it by Bd4.	10... d6 11. cxd5 Nh5 12. Bd2 白象退到d2，显然是为了保留推进中心兵、尤其是e4的可能。然而，仅仅三步之后，白方就发现必须把象转移到e3，尽管e兵仍在e2。12. Be3还有其他理由使其更有目的性。黑方若不走……c4就无法在 后翼积极行动；白象在e3时，……c4却会允许白方以Bd4把象中心化。
12... Nd7 13. f4? This move should be blamed not so much in itself - with consistent play it would not have led to particularly serious consequences - as for being the beginning of a false idea. It is incomprehensible why White refrains from 13. e4, threatening Nf5, and after 13... Nhf6, f4.	12... Nd7 13. f4? 这步棋的问题主要不在其本身——若白方以后连贯行棋，它并不会造成特别严重的后果——而在于它是一个错误构想的起点。白方为什么不走13. e4威胁Nf5，若13... Nhf6再走f4，令人难以理解。
13... a6 Black's plan becomes clear: supported by the excellently placed bishop on g7, he intends to conduct a full-scale pawn offensive on the queenside. This plan is highly active.	13... a6 黑方的计划已经清楚：以位置极佳的g7象为支援，在后翼发动全面的兵的攻击。这是一个高度积极的计划。
14. Bf3 White prompts the knight to return to a better position. More consistent was 14. a4 followed by e4, or even 14. e4 at once, threatening Nf5. In that case Black would probably play ...Nhf6 himself.	14. Bf3 白方促使黑马回到更好的位置。较为连贯的是14. a4，随后走e4；甚至可以立即走14. e4威胁Nf5。这样黑方大概会主动走……Nhf6。
14... Nhf6 15. a4? Preventing ...b5, but appreciably weakening the queenside, which Black later manages to exploit. Even now, with 15. e4, White could still have fought successfully for the initiative. For example, 15. e4 b5 16. Qc2, and if 16... b4, then 17. Nd1!, threatening Nd1-e3-c4. If 16... c4, then 17. Rae1 Re8 18. Nd1, and White's purposeful concentration in the centre with the advance e4-e5 in view must cause Black anxiety.	14... Nhf6 15. a4? 这步棋制止了……b5，却明显削弱了白方后翼，而黑方后来成功利用了这一点。即使此时走15. e4，白方仍可成功争夺主动权。例如15. e4 b5 16. Qc2，若16... b4，则17. Nd1!，威胁Nd1-e3-c4；若16... c4，则17. Rae1 Re8 18. Nd1。白方围绕e4-e5冲兵这一明确目标在中心集结子力，必定会让黑方感到不
15... c4 This move fixes the weak b3-square and, after the e-pawn advances,	

经校正的英文 OCR	中文译文

also d3, since the black knight has a direct route to this point via c5.
 	
16. Be3 Qc7
 	
Intending, after 17... Nc5 18. Bxc5, to recapture on c5 with the queen. Black's pieces operate very harmoniously; his rooks will take up a dominating position on the e-file, while White's d5-pawn is weak. Convinced that his position is bad, White launches a reckless attack on the kingside.
	安。
	
	`15... c4`
	
	这步棋固定了b3弱格；e兵推进后，d3也会成为弱格，因为黑马可以经c5直达该处。
	
	`16. Be3 Qc7`
	
	黑方准备在`17... Nc5 18. Bxc5`之后用后在c5吃回。黑方子力配合得非常协调：双车将在e线上占据统治地位，而白方d5兵又很薄弱。白方认定自己的局面不佳，于是在王翼发起了鲁莽的进攻。

经校正的英文 OCR	中文译文

WS-4
17. g4
 	
White could have defended tenaciously with 17. Qc2 Nc5 18. Rad1 Rfe8 19. Bf2 Nb3 20. e4.
 	
17... Nc5 18. g5 Nfd7 19. f5?
 	
This gives Black another base, the e5-square, while accomplishing nothing for White.
 	
It is known that on the day of this encounter with Capablanca, then world champion, Alekhine was extremely nervous, which perhaps explains his play. A chess player's condition and even his character are closely connected with the style and quality of his play.
 	
White continues to play as if everything were already lost. With 19. Qe1, followed by Rd1 and Qf2, he could have defended successfully, reserving f5 for a suitable moment.
 	
19... Rfe8 20. Bf4 Be5 21. Bg4 Nb3 22. fxg6 hxg6 23. Rb1 Bxc3 24. bxc3 Qc5+ 25. e3
 	
Of course not 25. Kg2 or 25. Kh1, when Black captures the d5-pawn with check. But now d3 is weakened, and Black immediately exploits it.
 	
25... Ne5 26. Bf3 Nd3!
 	
Black need not hurry to take the pawn. Supported by the c4-pawn, the knights are picturesquely perched on d3 and b3. This elegant picture repeats the arrangement seen in the previous example, but here the background - the positional circumstances - is more complicated and structurally colourful.
 	
White must relieve his position at all costs, but the exposed king does not allow him to avert serious loss in the approaching crisis.
 	
27. Kh1 Bxd5 28. Rxb3 Nxf4 29. Rb1 Rxe3 30. Ng2 Rxf3! 31. Rxf3 Nxg2 32. Kxg2 Re8 33. Kf1 Bxf3 34. Qxf3 Qxg5 35. Re1
 	
35. Rxb6 is impossible because of 35... Qc1+ and 36... Qd2+.
	WS-4
	`17. g4`
	
	白方本可走`17. Qc2 Nc5 18. Rad1 Rfe8 19. Bf2 Nb3 20. e4`顽强防守。
	
	`17... Nc5 18. g5 Nfd7 19. f5?`
	
	这使黑方又获得一个据点——e5格，而白方自己却一无所获。
	
	据说，在与当时的世界冠军卡帕布兰卡进行这盘棋的当天，阿廖欣极为紧张；这或许可以解释他的行棋。棋手的状态乃至性格，都与其行棋的风格和质量密切相关。
	
	白方继续下得仿佛“一切都已完了”。其实走`19. Qe1`，随后Rd1和Qf2，他完全能够成功防守，并把f5冲兵留到合适时机。
	
	`19... Rfe8 20. Bf4 Be5 21. Bg4 Nb3 22. fxg6 hxg6 23. Rb1 Bxc3 24. bxc3 Qc5+ 25. e3`
	
	当然不能走`25. Kg2`或`25. Kh1`，否则黑方可以将军吃掉d5兵。但现在d3格被削弱，黑方立即加以利用。
	
	`25... Ne5 26. Bf3 Nd3!`
	
	黑方不必急于吃兵。在c4兵的支援下，双马如画般盘踞在d3和b3。这幅优美的图景重复了上一例中的配置，不过这里的背景——即具体局面条件——更为复杂，结构也更加丰富。
	
	白方必须不惜一切代价缓解局面，但暴露的王位使他无法避免即将到来的危机造成严重损失。
	
	`27. Kh1 Bxd5 28. Rxb3 Nxf4 29. Rb1 Rxe3 30. Ng2 Rxf3! 31. Rxf3 Nxg2 32. Kxg2 Re8 33. Kf1 Bxf3 34. Qxf3 Qxg5 35. Re1`

经校正的英文 OCR	中文译文
35... Rxe1+ Even in the queen ending, resistance three pawns down is useless. White resigned on the 42nd move.	不能走35. Rxb6，因为有35... Qc1+和36... Qd2+。 35... Rxe1+ 即使进入后残局，少三兵的白方也没有抵抗意义。白方在第42回合认输。

经校正的英文 OCR	中文译文
WS-5 A bishop's invasion and consolidation on the sixth (third) rank, particularly on e6, d6 (e3, d3), is likewise a considerable and at times decisive positional achievement. The ending of the second game of the 1908 world championship match between Emanuel Lasker and Tarrasch is a classic example of this plan. Lasker, with Black, played the opening poorly, lost a pawn, and seemed doomed to defeat. Thereafter, however, thanks to indifferent play by his opponent, he succeeded in beginning a counter-struggle in the centre around White's isolated e4-pawn. Black has just played 24... d5 and threatens not only 25... dxe4 26. Nxe4 f5 but also simply 25... Qg6. White's correct continuation was 25. Nf5, so that after 25... dxe4 he could reply 26. Nxh6. If the bishop retreats, 26. exd5 is possible, provoking an exchange of rooks. The knight occupies an excellent position on f5, and after 25... Bf8 - for example, 26. exd5 Bc5+ 27. Kf1 Qg6 28. Rxe5 Rxe5 29. g4 - it is difficult for Black to continue the attack. Tarrasch, however, immediately takes on d5 and exposes e3, which Lasker energetically exploits. 25. exd5? Be3+ 26. Kf1 cxd5 27. Rd3 White underestimates the role of the bishop on e3. Even now he should continue 27. Nf5 d4 28. Nxe3 dxe3 29. Re2, accepting a cramped but far from hopeless position. 27... Qe6 28. Re2 f5 29. Nh1 f4 30. Rd1 d4 The power of the bishop is now revealed in all its brilliance. Under its cover and with its assistance, Black's attack proceeds swiftly and unhindered towards its goal. 31. Nf2 Qa6 32. Nd3 Rg5 33. Ra1 Qh6 34. Ke1 After 34. h3, 34... Rg3 35. Qd5 f3 is decisive. 34... Qxh2 35. Kd1 Qg1+ 36. Ne1 Or 36. Re1 Qxg2. 36... Rge5 37. Qc6 R5e6 38. Qxc7 R8e7 39. Qd8+ Kg7 40. a4 f3 41. gxf3 Bg5 0-1 After 42. Rxe6 Rxe6 43. Qa5 Bh4, White suffers serious material loss.	WS-5 象侵入并盘踞第六（第三）横线，特别是e6、d6（或e3、d3）格，同样是一项重大的、有时甚至具有决定意义的局面成就。 拉斯克与塔拉什1908年世界冠军赛第二局的收尾，是这一计划的经典范例。拉斯克执黑在开局阶段下得很差，丢了一兵，败局似乎不可避免。不过，此后由于对手行棋平淡，他得以围绕白方e4孤兵在中心展开反击。 黑方刚走了24... d5，不仅威胁25... dxe4 26. Nxe4 f5，还简单地威胁25... Qg6。白方正确的续着是25. Nf5，以便在25... dxe4后走26. Nxh6。黑象若退，白方可以走26. exd5，促成双车交换；白马在f5位置极佳。若25... Bf8，例如26. exd5 Bc5+ 27. Kf1 Qg6 28. Rxe5 Rxe5 29. g4，黑方将很难继续进攻。 然而，塔拉什立即在d5交换，暴露了e3格；拉斯克没有错过机会，积极加以利用。 25. exd5? Be3+ 26. Kf1 cxd5 27. Rd3 白方低估了e3象的作用。即使此时，也应走27. Nf5 d4 28. Nxe3 dxe3 29. Re2，接受一个局促但远非无望的局面。 27... Qe6 28. Re2 f5 29. Nh1 f4 30. Rd1 d4 黑象的威力此刻展现得淋漓尽致。在它的掩护和协助下，黑方的进攻迅速而毫无阻碍地直奔目标。 31. Nf2 Qa6 32. Nd3 Rg5 33. Ra1 Qh6 34. Ke1 若34. h3，则34... Rg3 35. Qd5 f3具有决定性。 34... Qxh2 35. Kd1 Qg1+ 36. Ne1 或36. Re1 Qxg2。 36... Rge5 37. Qc6 R5e6 38. Qxc7 R8e7 39. Qd8+ Kg7 40. a4 f3 41. gxf3 Bg5 0-1

经校正的英文 OCR	中文译文
WS-6 The following position arose in Alekhine-Mikenas at the 5th Olympiad (1933). Black has a weak d6-square, towards which the enemy bishop is clearly heading. Mikenas, however, ignored the threat and continued: 12... a6 Apparently intending to attack the centre with ...c5 and meanwhile preventing the knight's invasion on b5. Alekhine's comment on 12... a6 is interesting: "Black does not take into account that he must defend d6 at any price. From now on the dominating position of White's dark-squared bishop proves in itself a sufficient advantage to decide the outcome of the struggle." In Alekhine's opinion, ...Nf6 followed by ...Ne8 was necessary. Further events developed as follows: 13. Bd6 f5 This move, which assists the consolidation of the bishop on d6, also demonstrates Black's incorrect assessment of the position. It was still useful to carry out the manoeuvre Nd7-f6-e8, for example 13... Nf6 14. e5 Ne8 15. Ba3 Rg8 16. h4 Nf5, although even then Black's position remains difficult because of the inactive queenside. 14. e5 Rg8 15. h4 b6 So that after 16... Nf8 17. Qg5, Black has the reply 17... Ra7. 16. Ne2 Nf8 17. a5 b5 18. g3 Rh8 19. Kg2 Kg8 20. Rh1 Kf7 21. Nf4 Rg8 22. b3 Nh7 23. c4 Bd7 24. Rac1 Bf8 25. Be2 Nc8 26. cxd5 cxd5 27. Bxf8 After the exchange of bishops, several weak dark squares arise in Black's camp - b6, f6 and especially c5. The last serves until the end of the game as an excellent base for White's pieces. In addition, White's rooks and queen soon occupy the c-file, which becomes a road of invasion into the enemy camp. All these achievements are to a considerable extent consequences of the powerful positional pressure exerted by the bishop on d6 over 13 moves. It not only cramped Black and played an important role in the development of the initiative, but also forced him into a series of moves that weakened his position. Since we will soon examine the role of open lines in a plan, we give the end of the game as a brief introduction to this important strategic theme. 27... Nxf8 28. Rc5 Thus not only the knight and bishop, to which we have paid particular	WS-6 图示局面产生于阿廖欣对米凯纳斯一局，比赛为1933年第5届奥林匹克团体赛。 黑方存在d6弱格，而白象显然正朝那里进发。米凯纳斯却忽视了威胁，继续走： 12... a6 他显然准备以……c5攻击中心，同时阻止白马侵入b5。 阿廖欣对12... a6的评论很有意思：“黑方没有意识到，他必须不惜一切代价防守d6格。从现在起，白方黑格象的统治地位本身就构成足以决定斗争结果的优势。”阿廖欣认为，黑方必须走……Nf6，随后……Ne8。 此后棋局如下发展： 13. Bd6 f5 这步棋帮助白象巩固d6据点，也再次说明黑方对局面的判断有误。此时仍应执行Nd7-f6-e8的调马，例如13... Nf6 14. e5 Ne8 15. Ba3 Rg8 16. h4 Nf5；不过即使如此，黑方后翼缺乏活动，局面仍然困难。 14. e5 Rg8 15. h4 b6 这样在16... Nf8 17. Qg5之后，黑方可以应以17... Ra7。 16. Ne2 Nf8 17. a5 b5 18. g3 Rh8 19. Kg2 Kg8 20. Rh1 Kf7 21. Nf4 Rg8 22. b3 Nh7 23. c4 Bd7 24. Rac1 Bf8 25. Be2 Nc8 26. cxd5 cxd5 27. Bxf8 兑象以后，黑方阵地中出现了几个黑格弱点：b6、f6，尤其是c5。直到对局结束，c5一直是白方子力的优良据点。此外，白方的双车和后很快占领c线，把它变成侵入敌阵的通道。 这些成就在很大程度上都是d6象连续13回合施加强大局面压力的结果。它不仅限制黑方，是白方主动权不断发展的重要因素，还迫使黑方走出一系列削弱自身局面的招法。 我们马上就要考察开放线在计划中的作用，因此这里给出本局结尾，作为对这一重要战略主题的小小引介。 27... Nxf8 28. Rc5

WS-7
We examine one more example of a bishop invading the sixth rank in the enemy camp: Holmov-Livshin, 21st USSR Championship, 1954.
 	
Two important positional features can be seen in White's arrangement: the bishop is established on the weak e6-square, while on the c-file the white rooks attack the backward pawn, whose defence ties down Black's main forces. Were it not for this latter circumstance, Black might himself have exploited the open a-file to invade White's camp and to some extent compensate for the powerfully posted bishop on e6.
 	
41. b5
 	
Preventing the advance of the c-pawn once and for all.
 	
41... Qe8
 	
After 41... Nd8 42. e5 Nxe6 43. exd6 cxd6 44. dxe6, White would have had considerably better chances thanks to his control of the c-file and the passed pawn on e6. For example, 44... Rac7 is impossible: after both pairs of rooks are exchanged, White wins with e7.
 	
42. Qb2 Qf8 43. Re3 Qa8 44. Re2
 	
Black can no longer defend against the e5 break, whose strength is determined by the position of the bishop on e6.
 	
44... Qf8 45. e5 Nd8
 	
The main variation of the breakthrough is 45... dxe5 46. fxe5 Nxe5 47. Rxe5 fxe5 48. Rf1 Qd8 49. Qxe5+ Kh6 50. Qf4+ Kg7 51. Qf6+ Kh6 52. Rf4, and the mating threat is irresistible.
 	
46. exd6 cxd6 47. Qd4 Rab7 48. g4 Re8 49. g5 Rbe7 50. f5
 	
Opening lines on the kingside makes Black's resistance useless.
 	
50... Rb7 51. Rf1 Kh8 52. gxf6 Nf7 53. fxg6 hxg6 54. Rg2 Qh6 55. Rg3 Kg8 56. Qd3 1-0
 	
In the final position, the bishop on e6 plays the leading role, just as it did throughout the attack.
	WS-7
	再看一个象侵入敌方第六横线的例子：霍尔莫夫对利夫申一局（1954年第21届苏联锦标赛）。
	
	白方的子力配置中有两个重要的局面特征：白象盘踞在e6弱格；双车则在c线上攻击黑方落后兵，黑方主力全被牵制在对该兵的防守上。若非后一因素，黑方本可利用开放的a线侵入白方阵地，从而在一定程度上补偿e6白象的强大位置。
	
	`41. b5`
	
	一劳永逸地制止c兵前进。
	
	`41... Qe8`
	
	若`41... Nd8 42. e5 Nxe6 43. exd6 cxd6 44. dxe6`，白方凭借对c线的控制和e6通路兵，将获得明显更好的机会。例如不能走`44... Rac7`；双方两对车全部交换后，白方以e7取胜。
	
	`42. Qb2 Qf8 43. Re3 Qa8 44. Re2`
	
	黑方已经无法防住e5冲兵突破；这一突破的力量正是由e6象的位置决定的。
	
	`44... Qf8 45. e5 Nd8`
	
	突破的主要变化是`45... dxe5 46. fxe5 Nxe5 47. Rxe5 fxe5 48. Rf1 Qd8 49. Qxe5+ Kh6 50. Qf4+ Kg7 51. Qf6+ Kh6 52. Rf4`，白方的将杀威胁无法抵挡。
	
	`46. exd6 cxd6 47. Qd4 Rab7 48. g4 Re8 49. g5 Rbe7 50. f5`
	
	王翼线路一经打开，黑方的抵抗便失去意义。

suffers defeat.

Meanwhile it was not an entirely bad position for White. He has available a number of active possibilities. Worth considering, for example, is the pushing of the h-pawn. After 32 h4 it is dangerous to take the c4 pawn with the queen, in view of 33 Rc1. White, however, intends to continue h5, Bh3 and Rf1 with pressure on the king's flank.

32 ... Nc7 33 Ra4 Na6 34 Qh6

Yet another unnecessary thrust, which helps Black to carry out his plan even sooner. The rook is badly placed on a4, as incidentally soon becomes clear, and it should have simply retraced its steps.

34 ... Qf8 35 Qg5

The exchange of queens simplifies the struggle to Black's advantage. The f6 pawn is very weak, it is not easy to realise the plan of invasion on d4. It is natural that White endeavours to complicate the situation as much as possible on the king's flank.

35 ... Nc5!

The bad position of the White rook on a4 tells. It has to go back where it came from, since 36 Raxb4 Rxb4 37 Rxb4 loses the exchange after 37 ... Nxe4.

36 Ra1 h6 37 Qe3

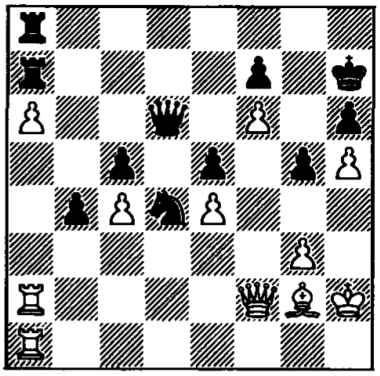

Of course, 37 Qxe5 is not possible, in view of 37 ... Nd3.

37 ... Kh7 38 Rd2 Ne6 39 a6 Rba7 40 Rda2 c5 41 h4 Qd6

On top of everything, White has trouble with the a6 pawn.

42 h5 g5 43 Qf2 Nd4

The knight which every chessplayer "dreams" about.

44 Rd2 Kg8

Black wants, after 45 ... Rxa6 46 Rxa6, to take on a6 with the rook, which at the present moment would not have been possible in view of Rxd4 followed by Qf5+-c8+ with a draw.

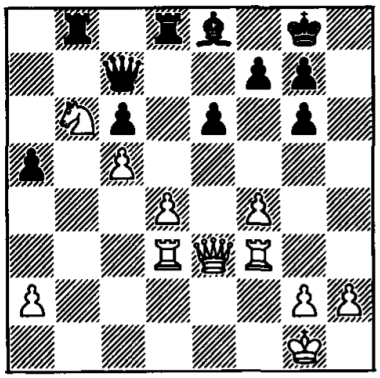

45 Rda2

White sealed this move, but then **resigned** without playing on. A correct decision, since after ... Rxa6 the b-pawn, with support from the "eternal" knight reaches the first rank without any trouble.

3: Weak Squares on the sixth (third) rank

One of the most tempting objectives of a plan is to create real weaknesses of squares on the 6th (3rd) ranks. The establishment of a knight or bishop on these squares usually represents just as decisive a positional achievement as obtaining the "eternal" knight. Sometimes these ideas are combined.

We also begin with just such an example.

The clash **Pillsbury- Chigorin** (Vienna 1898) arrived at this position. White's knight has settled down on the weak b6 square. Under its cover, he intends a plan of attack on the a5 pawn, upon the fall of which the passed a-pawn must have a decisive say.

However, Pillsbury strived too directly for this objective:

29 Ra3

on which Chigorin immediately sacrificed the exchange, if only to eliminate the "eternal" knight. Of course, after

29 ... Rxb6! 30 cxb6 Qxb6

White has a material advantage, but Black obtained definite counter-chances in connection with the weakness of the d4 pawn (weak point!).

The game continued:

31 Rf1 Rxd4

This, as the reply shows, does not win a pawn at all.

32 Rxa5 c5 33 Ra8 Kf8 34 Qh3 Ke7 35 Qh4+ f6 36 Qh8 Rd8 37 Qxg7+ Bf7 38 Rxd8 c4+ 39 Kh1 Qxd8 40 Rb1?

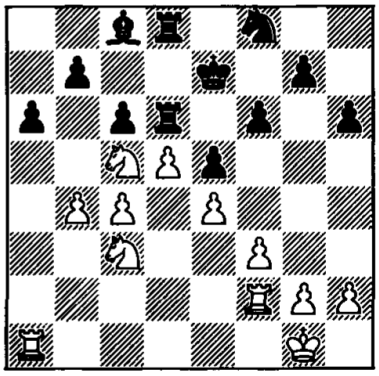

A presumptuous move, even leading to defeat. However, the correct 40 Qh6 Qd3 41 Rg1 Qd2 would have only achieved a draw.

40 ... c3!

Now Pillsbury has to give up the rook for this pawn and after a few more moves **he resigned**.

Returning to the position in the diagram we must once again emphasise the powerful role of the knight on b6, which is probably quite sufficient for victory. Only instead of 29 Ra3 it was necessary to play 29 Qe5 and if 29 ... Qa7, then 30 Rb3, consolidating the piece base of the knight.

In the following instructive example, both knights carry out a devastating raid on the 6th rank.

Before us is a position from the game **Romanovsky-Smorodsky** (3rd USSR Championship 1924). White is carrying out an offensive. His pawn group has already broken through to the 5th rank and is severely cramping Black. White's

c-pawn can advance to c5, but is it worth abandoning the c5 square with the knight? You see, this square is very weak, it is located in the enemy camp, and indeed the knight, together with the pawns, exerts serious pressure on the centre and the queen's flank. Thus the Black rook d6 does not have a single move. Also impossible is ... Nd7 in view of Ne6 and c5. The Black bishop is riveted to the b7 pawn, on ... b6 follows Nxa6.

Undoubtedly, White has various ways of realising his advantage. He stops at a plan to invade with the knight on the 6th rank - the d6 and b6 squares. Therefore the knight c5 abandons its excellent position, in order to penetrate even more deeply into the enemy position.

31 Nb3 Kf7 32 c5 R6d7

Some players would be tempted now by the advance d6, but this would only help Black to free himself a little. There follows 33 ... Ke8, then ... Rf7, and the e6 square acts as a fine spring-board for the Black bishop and knight. Besides this, by "jamming" the d6 square with the pawn, White deprives one of his knights of an excellent piece base.

33 Na5

The knight heads for d6, via c4.

33 ... Rc7 34 Rd1 h5

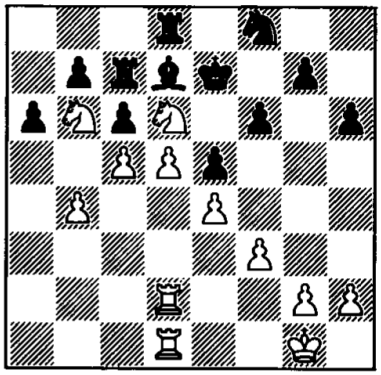

Black is helpless.

35 Rfd2 Rcd7 36 Na4

The beginning of a victorious nine move knight attack.

36 ... Ke8 37 Nb6 Rc7 38 Nac4 Bd7 39 Nd6+ Ke7

The objective is achieved. The White cavalry keeps the whole enemy army in a vice - a good example of how the strength is increased of a knight entering into the enemy camp on weak squares.

40 Nb5!

In this way White wins at least the exchange, in view of the threat d6+, and maintains the initiative. Further resistance by **Black** is useless and soon after he **resigned**.

We look further at the following game.

Queen's Indian Defence
White: **A.Alekhine**
Black: **J.R.Capablanca**
(New York 1927)

1 d4 Nf6 2 c4 e6 3 Nf3 b6 4 g3 Bb7 5 Bg2 c5 6 d5

This aggressive continuation was recommended, in his day, by Rubinstein. Against it, great accuracy in defence is required from Black. He is obliged to take the pawn, in order to avoid difficulties

with the development of his queen's-side forces, but this leads to an unpleasant pin of the d5 pawn. Exploiting this pin, White strives to create in the future a base for his pieces on the d5 square. The whole of this opening variation leads to a tense, sharp struggle, in which the first piece exchange comes only after 17 moves.

6 ... exd5 7 Nh4 g6 8 Nc3 Bg7 9 0-0 0-0 10 Bf4

An interesting plan, introduced by Alekhine, with the aim of exploiting the rather weak point d6. For example, in the event of 10 ... d6 11 cxd5, Black cannot develop the knight at once on d7, while after ... Nh5 Black's influence in the centre is weakened and the knight is not particularly well placed.

More often employed here is 10 cxd5, followed by an advance of pawns in the centre (e4 and f4).

10 ... d6 11 cxd5 Nh5 12 Bd2

In retreating to d2, White is apparently guided by the desire to retain the possibility of advancing the centre pawns, in particular the advance e4. The fact of the matter is that already after three moves he finds it necessary to transfer the bishop to e3, even though his pawn is still on e2. The reply 12 Be3 is more purposeful, and for other reasons. Black cannot display activity on the queen's flank without the move ... c4. Meanwhile, with the position of the bishop on e3, it gives White the possibility of centralising the bishop by Bd4.

12 ... Nd7 13 f4?

This move should be blamed not so much in itself, since with consistent play by White in the future it would not have led to particularly serious consequences, as for being the beginning of a false idea. It is incomprehensible why White refrains from 13 e4 with the threat Nf5, and if 13 ... Nhf6 then f4.

13 ... a6

Black's plan becomes clear: with support from the excellently placed bishop on g7 he intends to carry out a full-scale pawn offensive on the queen's flank. This plan is highly active.

14 Bf3

White prompts the knight to return to a better position. More consistent was 14 a4 and then e4, or even at once 14 e4, threatening Nf5. In this case, Black would probably play ... Nhf6 himself.

14 ... Nhf6 15 a4?

Preventing ... b5, but leading to an appreciable weakening of the queen's flank, which the opponent manages to exploit in the future.

Also by continuing 15 e4 now, White could still successfully contend for the initiative. For example, 15 e4 b5 16 Qc2 and if 16 ... b4, then 17 Nd1!, threatening the manoeuvre Nd1-e3-c4. If, however, 16 ... c4, then 17 Rae1 Re8 18 Nd1, and the concentration of White's pieces in the centre

with real purpose in view - the advance e4-e5, must cause Black anxiety.

15 ... c4

This move fixes the weak square b3, while in the event of the advance of the e-pawn - also the d3 square, since the Black knight has a direct road to this point via c5.

16 Be3 Qc7

With the aim, in the event of 17 ... Nc5 18 Bxc5, to capture on c5 with the queen. Black's pieces operate very harmoniously, his rooks will take up a dominating position on the e-file, White's d5 pawn is weak. Convinced that he has a bad position, he launches a reckless attack on the king's flank.

17 g4

White could staunchly defend himself by continuing 17 Qc2 Nc5 18 Rad1 Rfe8 19 Bf2 Nb3 20 e4.

17 ... Nc5 18 g5 Nfd7 19 f5?

This lets Black have yet another piece base - the e5 square, without at the same time achieving anything for White.

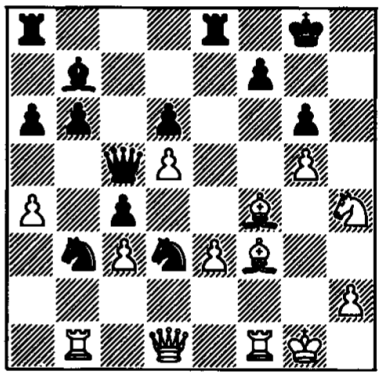

It is known that, on the day of this encounter with Capablanca, at this time the world champion, Alekhine was extremely nervous and this can perhaps explain his play. You see, the condition of a chessplayer and even his character have a close connection with the style and quality of his play.

White continues to play as if "all is lost". Meanwhile by continuing 19 Qe1, and then Rd1 and Qf2, he could successfully defend himself, reserving the advance f5 for a convenient moment.

19 ... Rfe8 20 Bf4 Be5 21 Bg4 Nb3 22 fxg6 hxg6 23 Rb1 Bxc3 24 bxc3 Qc5+ 25 e3

Of course, not Kg2 or Kh1, on which follows the capture of the d5 pawn with check, but now the d3 square is weakened and Black immediately exploits this.

25 ... Ne5 26 Bf3 Nd3!

He need not hurry with the capture of the pawn. The knights, supported by the c4 pawn, are picturesquely perched on d3 and b3. This elegant picture repeats the set-up which we saw in the previous example, but here its background, that is the positional circumstances, are more complicated and structurally colourful.

White must at all costs relieve his situation, but the exposed position of his king does not allow him to avert serious loss in the approaching crisis.

27 Kh1 Bxd5 28 Rxb3 Nxf4 29

Rb1 Rxe3 30 Ng2 Rxf3! 31 Rxf3 Nxg2 32 Kxg2 Re8 33 Kf1 Bxf3 34 Qxf3 Qxg5 35 Re1

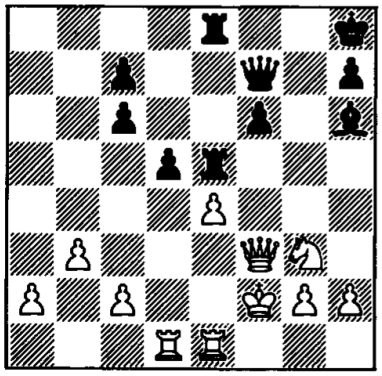

35 Rxb6 is not possible in view of 35 ... Qc1+ and 36 ... Qd2+.

35 ... Rxe1+

Even in the queen ending, resistance three pawns down is useless. **White resigned** on the 42nd move.

Also a bishop invasion and consolidation on the 6th (3rd) rank, particularly on the e6, d6 (e3, d3) squares is a considerable and at times decisive positional achievement.

The ending of the second game of the match for the world championship between **Em.Lasker** and **Tarrasch** (1908) serves as a classic example of this plan. Lasker, with the Black pieces, played the opening poorly, lost a pawn and his defeat seemed inevitable. From then on, however, thanks to indifferent play by the opponent, he succeeded in starting up a counter-struggle in the centre around the isolated White pawn on e4.

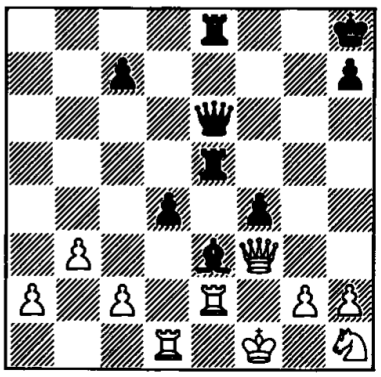

Black has just played 24 ... d5 and threatens not only 25 ... dxe4 26 Nxe4 f5, but also simply 25 ... Qg6. The correct continuation for White was now 25 Nf5, so as, on 25 ... dxe4, to reply 26 Nxh6. In the event, however, of the retreat of the bishop, possible is 26 exd5, provoking an exchange of rooks; the knight occupies an excellent position on f5 and after 25 ... Bf8 (for example 26 exd5 Bc5+ 27 Kf1 Qg6 28 Rxe5 Rxe5 29 g4) it is difficult for Black to continue the attack.

However, Tarrasch takes at once on d5 and exposes the e3 square, which Lasker does not fail to energetically exploit.

25 exd5? Be3+ 26 Kf1 cxd5 27 Rd3

White under-estimates the role of the bishop on e3. Also now he should continue 27 Nf5 d4 28 Nxe3 dxe3 29 Re2, submitting to a cramped, but far from hopeless position.

27 ... Qe6 28 Re2 f5 29 Nh1 f4 30 Rd1 d4

The power of the bishop is now

revealed in all its brilliance. Under its cover and its assistance, Black's attack swiftly and without any hindrance leads to the objective.

31 Nf2 Qa6 32 Nd3 Rg5 33 Ra1 Qh6 34 Ke1

On 34 h3, decisive is 34 ... Rg3 35 Qd5 f3.

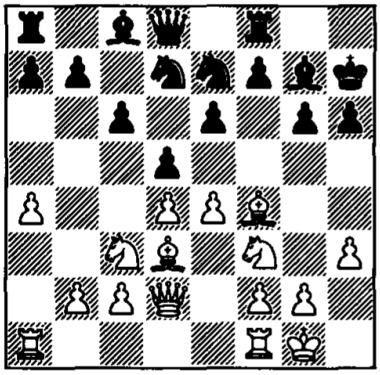

34 ... Qxh2 35 Kd1 Qg1+ 36 Ne1

Or 36 Re1 Qxg2.

36 ... Rge5 37 Qc6 R5e6 38 Qxc7 R8e7 39 Qd8+ Kg7 40 a4 f3 41 gxf3 Bg5 0:1

After 42 Rxe6 Rxe6 43 Qa5 Bh4 White suffers serious material loss.

The following position arose in the game **Alekhine-Mikenas** from the 5th Olympiad (1933):

Black has a weak d6 square, to which the enemy bishop is clearly heading. Mikenas, however, ignoring the threat, continued

12 ... a6

apparently having in mind an attack on the centre by ... c5 and, in this case, preventing the invasion of the knight on b5.

Interesting is Alekhine's comment apropos the move 12 ... a6: "Black does not take into account that he must at any price defend the d6 square. From now on the dominating position of White's black-squared bishop proves to be in itself sufficient advantage to decide the outcome of the struggle." In Alekhine's opinion, it was necessary to play ... Nf6 and then ... Ne8.

Further events developed thus:

13 Bd6 f5

Also this move, assisting the consolidation of the bishop on d6, bears witness to Black's incorrect assessment of the position. It was still useful to carry out the manoeuvre ... Nd7-f6-e8, for example 13 ... Nf6 14 e5 Ne8 15 Ba3 Rg8 16 h4 Nf5, though even in this case his position remains difficult due to the inactive queen's flank.

14 e5 Rg8 15 h4 b6

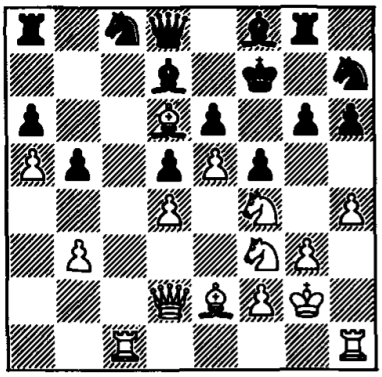

So as, after 16 ... Nf8 17 Qg5, to have the reply 17 ... Ra7.

16 Ne2 Nf8 17 a5 b5 18 g3 Rh8 19 Kg2 Kg8 20 Rh1 Kf7 21 Nf4 Rg8 22 b3 Nh7 23 c4 Bd7 24 Rac1 Bf8 25 Be2 Nc8 26 cxd5 cxd5

(see next diagram)

27 Bxf8

After the exchange of bishops, several weak black squares are created in the opponent's camp - b6, f6 and particularly c5; the last serves to the end of the game as an excellent base for the White pieces. Besides this, the White rooks

and queen soon occupy the c-file, which serves as a road of invasion into the enemy camp. All these achievements are to a considerable extent a consequence of the powerful positional pressure which the bishop on d6 has exerted over the course of 13 moves. It not only cramps Black and is an important factor in the development of all initiative, but has also forced him into a series of moves, leading to a weakening of his position.

Since we will shortly go over to a look at the role of open lines in the plan, we give the end of the game as a little introduction to this important strategical theme.

27 ... Nxf8 28 Rc5

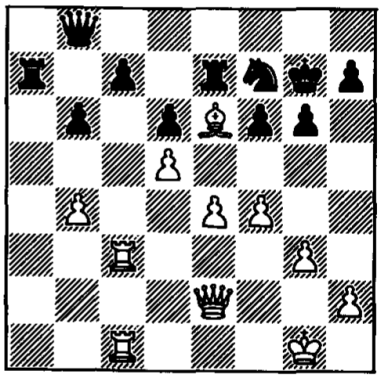

And so, not only the knight and bishop, to which we gave particular consideration when looking at the question of weak squares, but also the other pieces - the rooks, the queen, and in the endgame even the king, placed on weak points, prove to be a decisive influence on the course of the struggle.

28 ... Na7 29 Nd3 Kg7 30 Rhc1 Rc8 31 Rxc8 Bxc8 32 Qc3 Kh7 33 Qc5

The invasion begins. Black could still repel one or other direct threat, but he is not in a position to oppose White's offensive on the c-file with a planned defence.

33 ... Rg7 34 Qb6! Qe7 35 Nc5 g5 36 hxg5 hxg5 37 Ne1 and **Black** soon **resigned**.

We look at another example of an invasion of the bishop on the sixth rank in the enemy camp (the game **Holmov-Livshin**, 21st USSR Championship 1954).

In White's arrangement of pieces, one can see two important positional features: the bishop is established on the weak e6 square, while on the c-file the White rooks attack the backward pawn, the defence of which pins down Black's main forces. If it were not for this last circumstance, he might have himself exploited the open a-file for invasion into the enemy camp and to some extent compensated for the powerfully posted bishop e6.

41 b5

Preventing once and for all the advance of the c-pawn.

41 ... Qe8

The continuation 41 ... Nd8 42 e5 Nxe6 43 exd6 cxd6 44 dxe6 would have given White considerably better chances thanks to his control of the c-file and the passed pawn on e6. For example, 44 ... Rac7 is not possible. After the exchange of both rooks White wins with the move e7.

42 Qb2 Qf8 43 Re3 Qa8 44 Re2

Now Black cannot defend himself against the break e5, the strength of which is determined by the position of the bishop on e6.

44 ... Qf8 45 e5 Nd8

The main variation of the breakthrough consists of 45 ... dxe5 46 fxe5 Nxe5 47 Rxe5 fxe5 48 Rf1 Qd8 49 Qxe5+ Kh6 50 Qf4+ Kg7 51 Qf6+ Kh6 52 Rf4 and the mating threat is irresistible.

46 exd6 cxd6 47 Qd4 Rab7 48 g4 Re8 49 g5 Rbe7 50 f5

The opening of lines on the king's flank makes Black's resistance useless.

50 ... Rb7 51 Rf1 Kh8 52 gxf6 Nf7 53 fxg6 hxg6 54 Rg2 Qh6 55 Rg3 Kg8 56 Qd3 1:0

In the final position, the bishop e6 plays the main violin, as it did through the full extent of the attack.

4: Some Conclusions

In summing up everything that has been said about weak squares, we might first of all conclude that they present themselves as positional elements, capable of considerably increasing the strength of pieces (in the first place - the bishop or knight), sometimes to an extent which is sufficient to decide the outcome of the game.

This conclusion leads in earnest to the question about the relative strength of the pieces, which should be assessed according to the role fulfilled by them in a given concrete position.

Another conclusion is the establishment of the cause of weakened squares, which can be divided into two categories: (i) structural and (ii) positional.

The structural cause is determined by the position of the pawns. A square which cannot be attacked by pawns can be considered a structural weakness. However, it must be emphasised once again that the weakness of such a square is only potential. It only becomes a real weakness when there arises the positional possibility of the opponent exploiting this square as a base for his pieces. The absence of a bishop, operating on squares of the colour of the weakened square, or a knight which powerfully defends this square, likewise must relate to structural causes, since both one and the other circumstance in itself does not determine the actual
