CH6-1 · 原书121页 **6 The classic bishop sacrifice**	CH6-1 · 原书121页 **第六章 古典弃象**
CH6-2 · 原书121页 This sacrifice deserves a chapter to itself, because it is the oldest and most explored of all the sacrifices involved in the attack on the castled king and also because it provides particularly good illustrations of the role of h7 and f7 as mating and secondary focal-points.	CH6-2 · 原书121页 这种弃子值得单独用一章讨论：在攻击已易位王的各种弃子中，它的历史最悠久，研究也最充分；而且，它能特别清楚地说明h7和f7作为将杀焦点及次要焦点的作用。
CH6-3 · 原书121页 The earliest instance of the sacrifice of the bishop on h7 followed by Ng5+ occurs in Gioacchino Greco's handbook of 1619, but the first systematic review of it was made by E. Voellmy in his article 'On attacking the castled king' in the Schweizerischen Schachzeitung in 1911. Some writers give it the name of Greco's sacrifice, for which there are some grounds, while others call it Colle's sacrifice, for which there is in fact no justification, as Colle never played a good game which contained the sacrifice in spite of the fact that he often used it. I think the term 'classic bishop sacrifice' more appropriate, since this indicates both its early origins and also the basic simplicity of the idea underlying it.	CH6-3 · 原书121页 h7弃象后接Ng5+的最早实例，见于焦阿基诺·格雷科1619年的手册；首次系统论述则是E.沃尔米于1911年在《瑞士国际象棋杂志》发表的《论攻击已易位王》。有些作者称之为"格雷科弃子"，尚有一定依据；另一些人称之为"科勒弃子"，其实没有道理，因为科勒虽然经常采用这种弃子，却从未以此下出过一盘好棋。我认为"古典弃象"更合适，既体现其悠久渊源，也说明其基本构思的简洁。
CH6-4 · 原书121页 Greco reaches the position below in his handbook after making six not particularly intelligent moves.	CH6-4 · 原书121页 格雷科在手册中走了六回合不甚高明的棋，便得到下图局面。

CH6-6 · 原书121页 · 纳恩编者注 [Nunn's note 1] More commonly called the Greek Gift sacrifice, although the reason for applying this term specifically to the sacrifice on h7 is unclear.	CH6-6 · 原书121页 · 纳恩编者注 【纳恩注1】更常用的名称是“希腊礼物弃子”，不过，为什么专门用这个名称指h7弃子，并不清楚。
CH6-7 · 原书122页 Let us now consider the next, rather more natural, position, where the classic sacrifice is again successful.	CH6-7 · 原书122页 再来看下面这个自然得多的局面，古典弃象在这里同样成立。

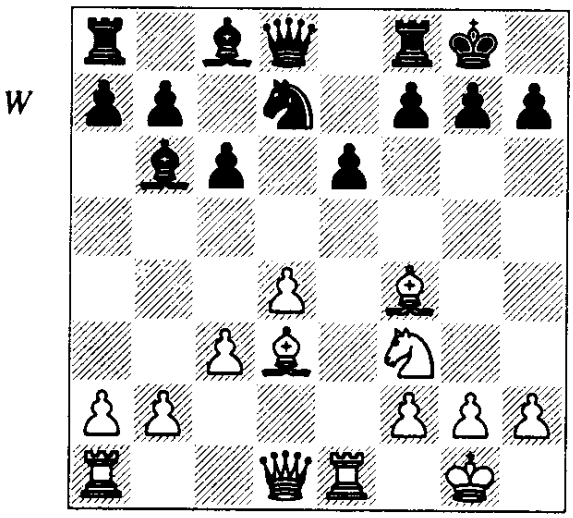

AA-p122-fig01 · 原书122页

CH6-8 · 原书122页 **1. Bxh7+ Kxh7 2. Ng5+**	CH6-8 · 原书122页 **1. Bxh7+ Kxh7 2. Ng5+**
CH6-9 · 原书122页 Here, as in other examples of the classic bishop sacrifice, there are three main variations arising from the sacrifice, i.e. those beginning with ...Kg8, ...Kh6, and ...Kg6. These three variations must be carefully examined on every occasion, for if any one of them contains a loophole, the whole combination falls to the ground.	CH6-9 · 原书122页 这里和其他古典弃象的例子一样，弃子后有三个主要变化，分别从...Kg8、...Kh6和...Kg6开始。每次都必须认真检查这三个变化；其中任何一个有漏洞，整个组合就不能成立。
CH6-10 · 原书122页 1) variation with ...Kg8 **2... Kg8 3. Qh5 Re8 4. Qxf7+ Kh8 5. Qh5+ Kg8 6. Qh7+ Kf8 7. Qh8+ Ke7 8. Qxg7#**. This variation contains, as its main feature, a typical example of an attack using h7 and f7 as secondary focal-points with the queen finally mating on g7, a common enough pattern after this sacrifice.	CH6-10 · 原书122页 1）...Kg8变化 **2... Kg8 3. Qh5 Re8 4. Qxf7+ Kh8 5. Qh5+ Kg8 6. Qh7+ Kf8 7. Qh8+ Ke7 8. Qxg7#**。 这个变化的主要特征，是利用h7和f7作为次要焦点，最后由后在g7将杀。这是此类弃子之后相当常见的攻击模式。
CH6-11 · 原书122页 2) variation with ...Kh6 **2... Kh6 3. Nxe6+** and **4. Nxd8**, etc. This naturally succeeds because Black's queen is on d8, but even with the queen on a5 the move 2... Kh6 would have no prospects. In that case White would win by, e.g. 3. Qg4 Rh8 (otherwise Qh4+ and Qh7#) 4. Nxe6+ and 5. Qxg7#.	CH6-11 · 原书122页 2）...Kh6变化 **2... Kh6 3. Nxe6+**，再**4. Nxd8**，等等。 黑后在d8，这样当然能成功；即使后在a5，2... Kh6也没有前途。那时白方例如可用3. Qg4 Rh8（否则Qh4+再Qh7#）4. Nxe6+，接5. Qxg7#取胜。

英文校订稿	中文语言校订稿
CH6-12 · 原书122页 3) variation with ...Kg6 **2... Kg6 3. h4** This is the strongest move here; in other cases ...Kg6 may be best met by Qg4. Black's reply is forced. **3... Rh8 4. h5+! Rxh5 5. Qd3+ f5 6. exf6+ Kxf6 7. Qf3+ Ke7 8. Qf7+ Kd6 9. Qxh5** and White wins.	CH6-12 · 原书122页 3）...Kg6变化 **2... Kg6 3. h4** 这是本局面中的最强着；其他局面中，对付...Kg6的最佳办法可能是Qg4。黑方应着被迫。 **3... Rh8 4. h5+! Rxh5 5. Qd3+ f5 6. exf6+ Kxf6 7. Qf3+ Ke7 8. Qf7+ Kd6 9. Qxh5**，白胜。
CH6-13 · 原书123页 One could now produce a series of examples, pursuing different variations according to the various elements in each position, but it is more to the point at once to pose the question as to how to judge the correctness of the sacrifice, first with reference to White's position and then to Black's.	CH6-13 · 原书123页 我们当然可以继续列举一系列例子，根据各局面的不同因素考察各种变化；不过，现在直接提出如何判断弃子正确与否的问题，更切中要点。先看白方的条件，再看黑方的条件。
CH6-14 · 原书123页 **Necessary conditions for the classic bishop sacrifice**	CH6-14 · 原书123页 **古典弃象的必要条件**
CH6-15 · 原书123页 White must firstly have a queen, a bishop and a knight. The light-squared bishop must be able to reach h7 in order to force the tempo of the attack, though it is not essential that it should put Black in check or take a pawn in so doing. The knight should be within easy and safe reach of the square g5, and the queen within reach of h5, though in some cases it is enough for it to be able to get to some other square on the h-file.	CH6-15 · 原书123页 白方首先必须有后、象、马。白格象必须能够到达h7，以强制手段加快进攻节奏，但不一定必须将军或吃兵。马应当能方便而安全地进入g5，后应能到达h5；不过，有时只要能进入h线上的其他格子就够了。
CH6-16 · 原书123页 As far as Black's position is concerned, there should be two pawns standing intact at f7 and g7 (g7 may on rare occasions be occupied by a bishop instead of a pawn); the h-pawn should be on h7 (on h5 in exceptional cases), but it may be that there is no h-pawn at all. The position of Black's queen on d8 and a rook on f8 points to, but does not absolutely guarantee, the correctness of the sacrifice. What is more important is that Black's knight should not be able to reach f6 and that neither his queen nor bishop should be able to occupy the h7-b1 diagonal unharmed.	CH6-16 · 原书123页 至于黑方，应有两个尚未移动的兵位于f7和g7（极少数情况下，g7也可能是象而不是兵）；h兵应在h7（特殊情况下在h5），也可能根本没有h兵。黑后在d8、车在f8，是弃子可能成立的迹象，却不是绝对保证。更重要的是，黑马不能到达f6，黑后或黑象也不能安然占据h7-b1斜线。
CH6-17 · 原书123页 These are the basic conditions which need to be taken into account. In the examples which follow we shall examine to what extent each of these conditions is fulfilled; the positions are chosen in such a way as to show which is the critical continuation in each example, i.e. the one that is in doubt because a certain condition is apparently unfulfilled.	CH6-17 · 原书123页 以上是必须考虑的基本条件。下面的例子将考察每项条件得到满足的程度；所选局面旨在说明各例中的关键变化，也就是由于某个条件表面上没有满足而令人存疑的变化。

CH6-41 · 原书125页 These three examples represent only a small section of a large number of possible cases in which the crucial continuation is ...Kg8. How large the variety of these positions is and how sensitive they are to minute changes can be illustrated by the following observation: if, in any of the previous three diagrams, White's h-pawn is moved to h4, the bishop sacrifice is no longer correct. In the first two diagrams (on page 124) this is because the queen is prevented from getting to h4, while in the diagram above it is because White's rook can no longer create threats along the h-file. Having the pawn on h4 rather than h2 is an obstacle in the variation with ...Kg8; on the other hand, we shall see how it assists White in the variation with ...Kg6.	CH6-41 · 原书125页 以...Kg8为关键变化的可能局面很多，这三个例子只是其中一小部分。以下观察足以说明其种类之多，以及对细微差别何等敏感：在前面三幅图中，只要把白方h兵移到h4，弃象就不再成立。前两图（第124页）是因为后不能再到h4；上图则是因为白车不能再沿h线制造威胁。兵在h4而不在h2，在...Kg8变化中成为障碍；但我们稍后会看到，它在...Kg6变化中又能帮助白方。

CH6-92 · 原书130页 We shall now attempt to establish a practical rule for positions of the type given on pages 122-129, a means by which players can orientate themselves quickly and fairly accurately. Positions similar to that on page 121, i.e. with a rook on h1 and pawn on h4, will be left aside for the time being and will be dealt with in chapter 7. It should also be remarked that in the positions on pages 122-129 the basic condition that the defender should not be able to reject the sacrifice unscathed was fulfilled. It should further be added that the arrangement of Black's pieces in those positions did not depart greatly from the normal, while White, in addition to the essential light-squared bishop, the queen, and the knight on f3, had at his disposal a number of other supporting pieces to sustain his attack. Listed in categories, these were:	CH6-92 · 原书130页 现在试着为第122—129页这类局面建立一条实用规则，让棋手能迅速而较准确地把握方向。类似第121页、车在h1而兵在h4的局面暂且搁置，到第七章再讨论。还应指出，第122—129页各局面都满足一项基本条件：防守方无法毫发无损地拒绝弃子。此外，那些局面中黑方子力的配置与通常情形相差不大，而白方除必要的白格象、后和f3马之外，还有若干支援子力维持进攻。分类列举如下：

CH6-94 · 原书131页 As can be seen, the principal supporting pieces are the pawn at e5 and the bishop on the diagonal c1-f4, followed by the knight on d2 or c3 and the rook on the open e-file. There may be a few other such supporting pieces (e.g. a rook on f1, if the f-file is open) which have not been provided with examples, but the reader will already have seen the basic idea — as a rule at least two active supporting pieces are necessary, if the classic bishop sacrifice is to bring the attacker success. CH6-95 · 原书131页 This is a simple practical criterion and should help the player to get his approximate bearings. CH6-105 · 原书132页 Here is an example of the classic bishop sacrifice on h7 in a position which differs from those examined hitherto. First of all, a bishop, and not a pawn, is on g7, while Black's queen is on b6 and not on d8. Let us now look at the conditions for success in each of the variations. Clearly, ...Kh8 does not come into consideration at all, nor does moving the king to h6, but the variation with ...Kg8 gives rise to a few doubts, since the bishop's presence on g7 prevents the well-known harrying of the king by Qh8+. We shall see later on how really critical this variation is and that White's success hangs on a thread. The ...Kg6 variation presents an even harder prospect, for White has only one of the supporting pieces mentioned above (bishop at c1) at his disposal and still needs an extra tempo to make up the necessary pair with Re1. Furthermore, Black's queen is not imperilled on b6 by the battery of queen on g4 and knight on g5, as is the case when it is on d8; moreover, Black's considerable strength in the centre and on the queenside opens up the possibility of defending by returning the material and exploiting the positional compensation obtained for it. According to our scheme, then, the continuation ...Kg6 represents a danger to White, and we should have to doubt the success of the attack if it were not for one more factor which helps White: the fact that a bishop, and not a pawn, stands at g7 means that an attack on that square entails the loss of a piece and not of a pawn. While the bishop on g7 helps Black in the ...Kg8 variation, with ...Kg6 it acts as a drawback which compensates for the deficiencies in White's position already referred to. These points will be best illuminated by further analysis.	CH6-105 · 原书132页 这里是在一个与前例不同的局面中进行h7古典弃象。首先，g7上是象而不是兵，黑后也在b6而不是d8。我们考察各变化中成功所需的条件。显然，...Kh8根本不能考虑，王走h6也一样；但...Kg8变化略有疑问，因为g7象使白方无法用熟知的Qh8+追击黑王。后面会看到，这个变化确实十分关键，白方能否成功仅系于一线。...Kg6变化更难处理：白方只有前述支援子力中的一枚，即c1象，还须多花一步Re1才能凑齐必要的两枚。此外，黑后在b6，不像在d8时那样受g4后与g5马的配合威胁；而且，黑方在中央与后翼的雄厚力量，使其可能通过归还子力、利用由此得到的局面棋补偿进行防守。因此，按我们的判断框架，...Kg6对白方有危险。如果没有另一个有利因素，就不得不怀疑白方进攻能否成功：g7上是象而不是兵，意味着攻击该格会使黑方失子，而非仅失兵。g7象虽在...Kg8变化中帮助黑方，在...Kg6变化中却成为负担，抵消了上述白方局面的不足。进一步分析能最好地说明这些要点。

CH6-166 · 原书138页 Another interesting point is that Capablanca often undertook attacks against the castled king in his earlier years, but extremely rarely as he became older. This was to a certain extent the result of the progressively greater ability of his opponents and a general rise in standards, but it was perhaps even more because of a gradual waning of enthusiasm under the weight of increasing self-criticism. Unlike Capablanca, Alekhine played in his own style from his youth right till the end, accepting the risk of difficult attacks against the castled king even against strong opponents.	CH6-166 · 原书138页 另一个有趣之处是，卡帕布兰卡年轻时经常攻击已易位王，年纪渐长后却极少这样做。部分原因是对手实力不断增强、整体水平提高，但或许更主要的原因，是越来越强的自我批判压抑了他的进攻热情。阿廖欣则不同，从青年时代直到最后，他始终坚持自己的风格，即使面对强敌，也愿意冒险向已易位王发动复杂进攻。

科勒—奥汉隆，12. Bxh7+之后，黑先。

CH6-171 · 原书139页 A great lover of the classic sacrifice, Colle here too is unable to control his temperamental penchant for sacrifice, though even at a quick glance it is apparent that the presence of Black's knight on d7 is a danger in both the main variations, while a valuable tempo is saved in the ...Kg8 variation by the rook's being on e8. Correct would have been either 12. Nxd4 or 12. cxd4 [note 1].	CH6-171 · 原书139页 科勒非常喜爱古典弃象，这次又未能克制自己嗜好弃子的冲动。其实匆匆一看就能发现，黑马在d7，在两个主要变化中都构成危险；而...Kg8变化中，黑车在e8又节省了一步宝贵时间。正确着法应是12. Nxd4或12. cxd4【注1】。

CH6-174 · 原书139页 So far all is well, since in the event of 13... Kg8 the sacrifice is half correct, that is, White can obtain a draw. After 13... Kg8 14. Qh5 Ne5 15. Rxe5 Bxe5 16. Qxf7+ White can get perpetual check, but no more than that. Black is no better off if he tries a different line in this variation, e.g. 14... Qf6 (instead of 14... Ne5) 15. Qh7+ Kf8 16. Ne4 Qe5 17. cxd4, whereupon 17... Qxh2+ is forced, for 17... Qd5 is not feasible because of 18. Qh8+ Ke7 19. Bg5+ f6 20. Qxg7+, with a massacre of Black's pawns [note 1].	CH6-174 · 原书139页 到这里还没有问题，因为若13... Kg8，弃象算是成立一半，也就是白方可以和棋。13... Kg8 14. Qh5 Ne5 15. Rxe5 Bxe5 16. Qxf7+之后，白方能长将，但仅此而已。黑方换走其他分支也不会更好，例如不用14... Ne5而走14... Qf6 15. Qh7+ Kf8 16. Ne4 Qe5 17. cxd4，此时17... Qxh2+被迫，因为17... Qd5不行：18. Qh8+ Ke7 19. Bg5+ f6 20. Qxg7+，黑兵将遭到大肆扫荡【注1】。
CH6-175 · 原书140页 14... Nf6? is very weak indeed on account of 15. Qxf7+ Kh8 16. Re4.	CH6-175 · 原书140页 14... Nf6?则非常软弱，因为15. Qxf7+ Kh8 16. Re4。
CH6-176 · 原书140页 · 纳恩编者注 [Nunn's note 1] First of all, Vuković's line 13... Kg8 14. Qh5 Ne5 15. Rxe5 Bxe5 16. Qxf7+ is not a draw, but a forced win for White after 16... Kh8 17. Qh5+ Kg8 18. b3, and the arrival of the bishop on a3 completes the mating net. His other suggestion, 14... Qf6 15. Qh7+ Kf8 16. Ne4 Qe5 is in fact Black's best defence, but even here White need not take the draw, but can very well play for a win by 17. f4! Qd5 18. c4 Qc6 19. f5!. After 19... Nf6 20. Nxf6 gxf6 21. Bg5!, for example, White has an extremely dangerous attack. Thus Colle's sacrifice gives White a very promising attack even against perfect defence, so Vuković's acerbic comments regarding Colle's play (see page 121) seem rather unjustified.	CH6-176 · 原书140页 · 纳恩编者注 【纳恩注1】首先，武科维奇给出的13... Kg8 14. Qh5 Ne5 15. Rxe5 Bxe5 16. Qxf7+并非和棋；16... Kh8 17. Qh5+ Kg8 18. b3之后，象进入a3就补齐杀网，白方强制取胜。他提出的另一着14... Qf6 15. Qh7+ Kf8 16. Ne4 Qe5，实际上是黑方最佳防御；但即便如此，白方也不必接受和棋，完全可以17. f4! Qd5 18. c4 Qc6 19. f5!争胜。例如19... Nf6 20. Nxf6 gxf6 21. Bg5!，白方攻势极其危险。因此，即使对方防守完美，科勒的弃象仍能带来前景很好的进攻；武科维奇对科勒的尖刻评论（见第121页）显得相当缺乏根据。
